INTRODUCTION

This handbook is designed to provide students with general information and guidance about studying on research programmes in the School of Philosophy, Psychology & Language Sciences (PPLS) and should be referred to in conjunction with the University’s Code of Practice for Supervisors and Research Students (CoP) http://www.ed.ac.uk/schools-departments/academic-services/policies-regulations/codes.

This handbook does not supersede University Regulations available online under Degree Regulations and Programme of Study (DRPS): http://www.drps.ed.ac.uk/15-16/.

We consider it each student’s responsibility to make themselves familiar with the contents of this handbook and also the Code of Practice for Supervisors and Research Students. We believe that the information provided in this handbook may help you avoid unnecessary problems. Please do not hesitate to contact the Postgraduate Office if you have any questions.

CONTACTS - SUPPORT

Administrative Support: The Postgraduate Office
The School Postgraduate Office is situated in the Dugald Stewart Building (1st Floor)

| PPLS PG Administrator | Miss Katie Keltie | PPLS PG Administration Co-ordinator

The PPLS Postgraduate Office (PGO) provides administrative support for all postgraduate programmes, courses, staff and students in the School.

Each member of the PGO Team is available to help and provide advice on all aspects of postgraduate administration in the School however they do specialize in particular areas as detailed above.

The Postgraduate Office operates an open door policy; if you have any questions about studying in the school, please do not hesitate to come to the office during the office hours described above. Occasionally the office will be closed for training or meetings if your enquiry is urgent please call the number above and leave a message. We will get back to you as soon as possible.

**Academic Support: Postgraduate Advisor & Pastoral Support**

The Subject Area Postgraduate Advisors (PG Advisor) look after the academic administration of the research programmes in each subject area in the School. They are responsible for the smooth running of admissions, co-ordinating examinations, progress reviews, programme evaluation and curriculum development. In addition to your Supervisor, the PG Advisor is available to all research students as source of pastoral support and advice for any scholarly or personal issues, which may arise whilst students are on the Programme. These may include advice with course or topic choices at critical stages in the Programme, but may equally relate to less routine matters.

It is your responsibility to inform your Supervisor or PG Advisor immediately of any problems which are interfering with your coursework or progress through the programme, including any religious or medical requirements that might affect your participation in any aspects of the programme.

If you cannot, or do not want to discuss an issue with your Supervisor or Postgraduate Advisor, you can contact the PPLS Postgraduate Office. The Postgraduate Office staff will be able to direct you to the most appropriate person to advise you.

Other sources of specialist academic and pastoral support are listed in the *Code of Practice for Supervisors and Research Students*.

**Academic Support: Student Representatives**

Each Subject Area has a student representative appointed to represent the views of their fellow research students. Further information regarding student representatives is available at the end of this handbook.
The Postgraduate Group

The School Postgraduate Group (sometimes referred to as the Postgraduate Studies Committee) deals with all policy issues for postgraduate students in the school.

The Programme Directors and Postgraduate Advisors in each subject area act as a liaison between subject area staff and the Postgraduate School. The PG Group also approves all new programmes and courses.

The School Postgraduate Director is the convenor of the Postgraduate Group and liaises with the School and the College on behalf of all students and staff in the Postgraduate School. The PG Advisors and Programme Directors are responsible for communicating between subject area and PG Group level.

1 Not MSc Psychological Research as they provided the representative in 2013/14
RESEARCH DEGREE PROGRAMMES

There are two types of higher research degree offered within the school which differ in scope and required length of study:

- PhD students are registered for 3 years full time or 6 years part time
- MPhil students are registered for 2 years full-time or 4 years part-time

PhD and MPhil programmes allow for one further year of study in addition to the registration period this is sometimes referred to as the “writing up” period. The maximum period of registration for the PhD is thus four years for full-time students and seven years for part-time students and for the MPhil is three years for full-time students and five years for part-time students.

If students decide to take advantage of this additional period of study they will not be charged tuition fees but will need to pay a matriculation fee in order to refresh their registration.

Students should note that their access to School facilities may be reduced in the writing up period.

PhD degrees
With respect to the PhD, the University of Edinburgh Postgraduate Regulations state that by the end of the degree, the student will have demonstrated that they “are capable of pursuing original research in a field of study ... in a critical and scholarly way”, and that the PhD thesis must be an original work making a “significant contribution to knowledge in or understanding of the field of study”.

Milestones for Full-Time PhD Students
- By the end of the first year, students are required to have a fully developed research proposal;
- By the end of the second year, students are expected to have completed most of their collection of empirical data, or of primary theoretical sources, and begun their analysis;
- By the end of the third year, students are expected to have completed all analysis and produced a draft of their thesis;
- All students are expected to complete and submit their thesis within a maximum of four years.

Milestones for Part-Time PhD students
For part-time students the timetable is more flexible, but the overall requirements remain the same. Detailed timelines are agreed by the student and supervisor.

MPhil degrees
With respect to the MPhil, the University of Edinburgh Postgraduate Regulations state that by the end of the degree, MPhil thesis must contain “a significant amount of material worthy of publication or public presentation”.

Milestones for Full-Time MPhil Students
- By the end of the first year, students are required to have a fully developed research proposal, and to have commenced data collection;
- After eighteen months, students are normally expected to have completed their collection of data, or of primary theoretical sources, and to be engaged in their analysis;
- By the end of the second year, students are expected to have completed all analysis and produced a full draft of their thesis; most students should also be able to submit their thesis at this point;
- All students are expected to submit their thesis in a maximum of three years

Milestones for Part-Time MPhil Students
As with part-time PhD students, the timetable is more flexible, but the overall requirements remain the same. Detailed timelines are agreed by the student and supervisor.
SUPERVISION (CoP² Section 2)

Supervisors
Research students have two or more supervisors, with whom they work closely throughout their research, at least one of whom will be from their subject area. All new research students are allocated a principal (or lead) supervisor when they are accepted for admission who is responsible for directing the student's work and ensuring that administrative procedures are carried out satisfactorily. Most are allocated an assistant (or co-) supervisor at the same time, although sometimes a decision on the assistant supervisor is delayed until an appropriate point in the student's first year at the University. It is quite possible, and often beneficial for the student, to arrange joint supervision with someone from another subject area whose expertise is especially relevant to the student's research topic. Such decisions are always made in consultation with the student. The difference between the roles of principal, co- and assistant supervisor is usually one of degree of involvement in the student's research:

- A principal supervisor is fully engaged with the student’s work and provides the main support. The principal supervisor (or lead co-supervisor) is also the lead contact for any administration relating to changes to the student record;
- A co-supervisor is also fully engaged in the student’s work, but is not responsible for administrative matters;
- An assistant supervisor’s role may vary from occasional meetings with the student and reading of the work produced to active participation in some aspects of the student’s research. Students may have more than one assistant supervisor if appropriate for their area of research.

Work with supervisors is central to the research student's career. The supervisors’ role is to provide guidance on the structure and content of the thesis. This will usually include:

- agreeing with the student a suitable field of study and training, as appropriate;
- reading and offering comments and suggestions on written work, from early reviews of the background literature to the full draft of the final thesis;
- ensuring that the end of first year review and subsequent annual reviews of progress are held and reported properly;
- supporting the student to plan and manage their research effectively;
- being the first point of contact if there are any problems - whether intellectual, practical or emotional - which the student wants to discuss;
- applying for any concessions that may be deemed necessary;
- giving guidance on academic publishing and careers, and providing references for job applications after completion of the thesis.

The student and supervisors are both responsible for staying in touch throughout the period of study. They should arrange to meet regularly, and exchange frequent correspondence if the student is away on fieldwork. It is important that supervisors know how to reach the student at all times. It is also important that the supervisors keep the supervisee informed of any periods when they will be away from the University.

---

2 Code of Practice for Supervisors and Research Students: http://www.ed.ac.uk/academic-services/policies-regulations/research-students
Supervision Styles

Individual supervisors differ greatly in their styles of supervision. Some prefer very frequent meetings and more structured tasks for the student; others prefer more informal ways of working. Some are more directive, while others see their role more as encouraging and enabling. Second supervisors may assume very different roles. Sometimes they become more important than the first supervisor; sometimes both supervisors choose to meet the student together for supervisions; and sometimes the role is providing a more limited input to the student’s work.

Whatever the pattern of supervision that develops, it is vital that it be suited to the specific needs of the particular student at the time, and that both parties discuss and negotiate how best to work. What works well for one student may not be appropriate for another. Moreover, what students need from their supervisors may well vary over different stages of the degree. The supervisory relationship is an evolving one. It is therefore crucial to a successful relationship that students learn to say what they need from their supervisors, and that supervisors be flexible and open enough to respond appropriately.

Supervision Support

Occasional disagreements, stresses and strains are part of most healthy supervisions, but it is important for all parties to be able to contain and manage any tension which might develop in the relationship between supervisor and researcher. The second supervisor is always there to provide an alternative point of view and different kinds of support. Your fellow students (and other members of the teaching staff) can also provide a great deal of informal support and guidance. However, if you feel you are having a serious problem with your supervisor or supervisors, you should in the first instance approach the subject area as quickly as possible. There are a number of different ways you can do this: through the postgraduate advisor in your subject area, or your student representatives. You can also go to the School Postgraduate Office for further guidance.

All research students and supervisors should make themselves familiar with University Code of Practice for Supervisors and Research Students.
PROGRESS MONITORING  (CoP SECTION 3.2)

The progress of postgraduate research students must be reviewed for each year of the programme. This monitoring process allows students to reflect on their progress so far and plan for the following year. The process also allows students and supervisors the opportunity to raise and address any concerns that may arise so that the students receive the support they need in order to succeed on the programme.

Students and supervisors should plan to complete the review process in either early summer or late autumn each year. The appropriate “season” for review will be determined by when the student started their programme. Students who start in September should be reviewed between May and July while for students who start in January a later review in held between October and November is more appropriate.

Annual Review
All full time PhD and MPhil students undergo a formal review within 12 months of their enrolment. For part-time students this review takes place after 18 to 24 months, with an interim review of progress after 9 to 12 months.

The Annual Review is carried out in order to assess:
- whether the candidate is capable of doing a PhD or MPhil, and;
- in the first year: whether their work is sufficiently developed, and of the required standard, to justify continuation of PhD or MPhil registration.
- in subsequent years: to review the previous year’s progress against the previous plan. If progress differed from that expected, the meeting reflects on how and why work did not proceed as anticipated;
- to agree a sensible programme of work for the coming year including, where appropriate, a target thesis submission date;
- to review the supervisory relationship (e.g., was the support appropriate and adequate in the last year? Could anything improve the relationship? Will the student’s supervisory needs evolve in the coming year?).

The review facilitates support, and timely completion, of the research by ensuring that students proceed only when they have acquired the necessary expertise. The annual review is intended as a genuine hurdle, but the preparation provided by research training, coupled with guidance from supervisors and advisor, provides the support needed to pass.

The Review Panel
The review is carried out by a panel, which usually has three or four academic members including supervisors and one external panel member (an academic member of staff not directly involved in the project).

It is the responsibility of the student to arrange a date and time for the review with their supervisory team. Once the date is confirmed by all panel members the student is required to complete a standard self-assessment form in preparation for the review. Further documentation and information may be requested by the review panel prior to the meeting.

Students must submit their form and additional documentation through the online submission system at least two weeks prior to their meeting date.

The form should include the research question, locate it in the appropriate academic literature and elaborates the research design, methodology and anticipated contribution to knowledge. It should discuss ethical and practical issues involved in the proposed research and include a programme of work and, where possible, a timetable.
The paperwork is submitted in advance of a meeting of the Review panel, which is usually opened with an oral presentation by the student. The assessors discuss the work presented with the student—asking questions, giving constructive feedback and making suggestions. It may last up to 2 hours, to allow enough time for a full assessment of the work and of the student.

Following the review, supervisors make one of the following recommendations to the College Postgraduate Studies Committee:

a) Confirmation of registration for the degree for which the student is enrolled (for example PhD, MPhil)

b) A repeat progression review to be held within three months

c) For part-time students only, deferment of the confirmation decision to the following annual review

d) Registration for a different degree such as MPhil or Masters by Research

e) Registration for a postgraduate taught degree (MSc) or diploma, which may include credit for courses already taken

f) Discontinuation of registration

At the end of the review meeting, the principal supervisor will draft a written report of the meeting, including its recommendation to the College Postgraduate Studies Committee and feedback to the student. This report is entered into the second part of the online form which is then automatically sent to the other supervisors and student for confirmation of agreement. Once all parties have agreed on the report it is then submitted to the College Postgraduate Studies Committee.

Where a serious problem is identified or discontinuation is considered, the Review panel will specify where the proposal is deficient and explaining what work needs to be done to bring the proposal up to the required standard in the report. A second review will be arranged at which the student has the chance to present a revised proposal. If the Review panel still finds that the student has not met the required standard, then discontinuation will be recommended.

**CHANGES TO THE PERIOD OF STUDY (CONCESSIONS) (CoP Section 3.3)**

There is rarely any good reason for students to exceed the maximum period of registration. If there have been exceptional circumstances which have prevented the student to submit by the end of their fourth year and application for extension can be made and may be approved by the College of Humanities and Social Sciences. When extensions are approved students are required to pay additional fees.

If a student is unable to work on their research for reasons of health, domestic or other legitimate circumstances, an interruption of studies may be sought through the supervisor. It is the student’s responsibility to inform supervisors of any such situation as quickly as possible. It is not possible to apply for an interruption retrospectively. (More information on extensions and suspensions can be found in the University Code of Practice for Supervisors and Research Students).

Where possible it is important that any changes to registration are requested in advance. Students should make a point to discuss any issues with their supervisors as soon as they arise to allow for action to be taken in a timely manner. If it is agreed that a concession is appropriate the supervisor will then contact the PG Office who will help them to process the request.

Research Council funded students should be aware that any application for extension or interruption must also be approved by the relevant funding body so their applications may take a little longer to process.
ATTENDANCE (CoP Section 3.3)

It is important that you attend the University regularly and are fully engaging with your research programme. Please make sure that you attend all meetings scheduled with your supervisor as these meetings act as a check point for attendance and engagement. If you are unable to make a meeting you have scheduled, please contact your supervisor as soon as possible to arrange an alternative meeting time. There may also be additional points during the year when students will be asked to check in with the Postgraduate Office.

If you are intending to be off campus for more than two weeks at a time, please complete the relevant permission to be off campus form available on the PPLS Postgraduate website: http://www.ppls.ed.ac.uk/students/postgraduate/current.php.

In addition, students holding Tier 4 visas are required to attend central University census events throughout the year. Information on this will be emailed to you by Student Administration.

STUDENTS ON A TIER 4 VISA

As a Tier 4 student, the University of Edinburgh is the sponsor of your UK visa. The University has a number of legal duties to manage our sponsorship of your visa. These include:

- monitoring your attendance on your programme and
- reporting to the Home Office where you suspend or withdraw from your studies, complete them early, fail to register or are repeatedly absent to the point of being excluded from studies.

As a student with a Tier 4 visa sponsored by the University of Edinburgh, the terms of your visa require you to, (amongst others):

- Ensure you have a correct and valid visa for studying at the University of Edinburgh, which, if a Tier 4 visa, requires that it is a visa sponsored by the University of Edinburgh;
- Attend all of your University classes, lectures, tutorials, etc where required. This includes participating in the requirements of your course including submitting assignments, attending meetings with tutors and attending examinations. If you cannot attend due to illness, for example, you must inform your School. This includes attending Tier 4 Census sessions when required throughout the academic session.

Please note that any email relating to your Tier 4 sponsorship, including census dates and times will be sent to your University email address - you should therefore check this regularly.

Further details on the terms and conditions of your Tier 4 visa can be found in the “Downloads” section at www.ed.ac.uk/immigration

Information or advice about your Tier 4 immigration status can be obtained by contacting the International Student Advisory Service, located at the International Office, 33 Buccleuch Place, Edinburgh EH8 9JS
Email: immigration@ed.ac.uk
SUBMISSION AND EXAMINATION OF THE THESIS (CoP Section 3.4-3.7)

Approximately two months before the planned submission deadline students must review the thesis submission information on the School website. This site includes guidance on the process and links to all necessary forms.

http://www.ppls.ed.ac.uk/students/postgraduate/phd_students.php#Thesis

Students are asked to complete intention to submit forms to the School Postgraduate Office, these forms trigger the administrative processes for submission preparation so should be completed in good time.

Further advice on this can be sought from the PG Office.

SKILLS TRAINING

The School places great importance on training for research students. All students are required to attend research methodology courses and courses pertinent to their research project as directed by their supervisory team. Additionally students are strongly encouraged to attend skills training courses put on by the College through the University’s Institute for Academic Development and through the Computing and Library services. Courses include workshops on Thesis Writing, Effective Presentation, Time Management, Literature Searching, Career Development, etc. All courses are free of charge and full details and further links may be found at:

http://www.ed.ac.uk/schools-departments/institute-academic-development/postgraduate

RESEARCH AND TRAINING SUPPORT

Information on financial support for research and training activities is available online:

http://www.ppls.ed.ac.uk/students/postgraduate/current.php

PART-TIME TUTORING

All PhD students will be emailed towards the end of semester 2 with details of Tutoring opportunities and how to apply/express an interest in tutoring.

You must ensure you have suitable academic knowledge of the course content you wish to tutor, and that the tutoring workload will not be detrimental to your programme of study. If you would like to be considered for a tutoring assignment in an area other than your expertise, you are advised to attend the relevant classes/lectures, in order to acquire the skills and knowledge to be considered as a tutor for the following year.

General training is available from the Institute of Academic Development for tutors in either on-line and/or classroom style courses:

- http://www.ed.ac.uk/schools-departments/institute-academic-development/learning-teaching/tutors-demonstrators/courses
- http://www.ed.ac.uk/schools-departments/institute-academic-development/learning-teaching/staff/courses-events/online-tutoring

All courses are bookable through the events booking system on MyEd.
ETHICS

Attention to the ethical and legal implications of research for researchers, research subjects, sponsors and collaborators is an intrinsic part of good research practice. The School of Philosophy, Psychology & Language Sciences (PPLS) attaches great importance to addressing the ethical implications of all research activities carried out by members of the School. We emphasise a collaborative approach to improving ethical awareness as part of professional research roles and training.

Further information is available at the College of Humanities & Social Sciences research website - http://www.hss.ed.ac.uk/Research/

RESEARCH APPROVALS FOR EXTERNAL BODIES

If research or data gathering activities will be taking place in external institutions (e.g. Schools, Hospitals or Clinics) additional ethics approval may be required. Criminal record or health checks may also be required prior to approval being given for research to commence.

If you are going to be conducting research outside the University it is important that you ask for guidance about this from the PG Office. You should do this as early as possible in the process of agreeing your approach to research as the clearance check process can be lengthy.

PLAGIARISM

Plagiarism is the unacknowledged copying of other people’s work, that is, presenting others work as if it were your own. You are responsible for ensuring that you do not plagiarise.

The University's degrees and other academic awards are given in recognition of the student's personal achievement. Plagiarism (that is, the action of including or copying, without adequate acknowledgement, the work of another author in one's own work as if it were one's own) is academically fraudulent and an offence against University discipline.

Plagiarism, at whatever stage of a student's course, whether discovered before or after graduation, will be investigated and dealt with appropriately by the University.

Plagiarism is a serious offence that can result in expulsion from the University. Please make absolutely sure you do not inadvertently lay yourself open to charges of plagiarism. If you quote or paraphrase work you have read, whoever it is by, acknowledge this clearly with a reference to your source.

Out of respect for your hard work we will always ask for maximum penalties for those few individuals who see fit to plagiarise or cheat. No details of ‘home’ academic discipline, national or cultural origin, or poor command of English are any excuse. If you do not understand any aspect of the relevant regulations, ASK and make sure you do.

For current University regulations on plagiarism, see the Assessment Regulations section 8: http://www.ed.ac.uk/schools-departments/academic-services/policies-regulations/regulations
STUDENT REPRESENTATION

The School of Philosophy, Psychology & Language Sciences has a well-established system for postgraduate representation, enabling students to raise general issues of concern about their programme. Student feedback and evaluation is a valued input to curriculum development and programme review at the University of Edinburgh.

Representatives are usually selected at the beginning of each academic year, and their role is to communicate the views of the students on programme to the academics responsible within the School. Informal feedback, to the Postgraduate Director, the Postgraduate Advisor, individual Course Conveners or the PPLS Postgraduate Office, is welcome at any time. Postgraduate representatives are also welcome to participate in the Edinburgh University Students’ Association.

Programme / Subject Area Representatives
Each taught programme within each subject area will select its own student representative and each subject area will select one or two students to represent the research students. Two School student representatives sit on the School Postgraduate Group (PG Group) and are available to raise issues at PG Group on the behalf of subject area representatives. If you are unsure whether or not the issue should be raised, please do not hesitate to contact the Postgraduate Office (PGO).

Any issues raised at the PG Group meeting that are relevant to your subject area will be ‘fed’ down for information from School reps and it is your responsibility to relay these to your fellow students.

Responsibilities
- Make yourself available to fellow students and the School Student Representatives to raise issues and receive feedback
- Make yourself available, where applicable, to visiting students to the School to provide a students perspective of life in the University of Edinburgh and in particular, the School of Philosophy, Psychology & Language Sciences
- Programme and Subject Area Representatives will be nominated by the first week of semester one, further information will be available from your Programme Director or PG Advisor

Why be a Student Representative?
- So that you can make a positive difference to the way your programme / subject area is run
Psychology

- To develop your interpersonal, communication and negotiation skills and have something new and valuable to add to your CV
- To ensure that student representation continues to be taken seriously

Subject Area Specific Roles

**Philosophy**

- *Programme / Subject Area Representative(s)* will be invited to attend subject area meetings to represent views of all Philosophy PG students
- *Programme / Subject Area Representative(s)* will be invited to attend Staff-Student PG Committee to represent views of all Philosophy PG students
- Both *Programme / Subject Area* and *PhD representative(s)* to report to the School PG representatives to ensure issues are raised at the School PG Group

**Psychology**

- *Representative(s)* will be invited to attend the Staff-Student Liaison Committees to represent views of all Psychology PG students
- *Programme / Subject Area representative(s)* to report to the PhD representative(s) to ensure issues are raised at the Psychology Teaching Committee
- *PhD representative(s)* will be invited to attend the Psychology Teaching Committees to represent the views of all Psychology postgraduates
- Both *Programme / Subject Area* and *PhD representative(s)* to report to the School PG representatives to ensure issues are raised at the School PG Group

**Linguistics & English Language**

- *Representative(s)* will be invited to attend the Staff-Student Liaison Committees to represent views of all Psychology PG students
- *PhD representative(s)* will be invited to attend the subject area meetings to represent views of all LEL PG students
- Both *Programme / Subject Area* and *PhD representative(s)* to report to the School PG representatives to ensure issues are raised at the School PG Group

**School Student Representatives**

The School Postgraduate Group deals with all policy issues for postgraduate students in the School. The Programme Directors and Postgraduate Advisors in each subject area act as a liaison between subject area staff and the Postgraduate School. The Group also approves all new programmes and courses.

One taught and one research student representative is selected on a rotation basis within the School. For the academic year of 2016/17 a Programme Representative from a Psychology taught master’s programme (not MSc/Dip Psychological Research\(^3\)) and a research student from Philosophy will be chosen. The role of the School Representative is to communicate the views of the students on programme to the academics responsible within the School. This might include general feedback on the programme if they are a representative with a representative on a rotation basis; MSc/Dip Psychological Research is not due to provide a rep this year.

---

\(^3\) Each programme must provide a representative on a rotation basis; MSc/Dip Psychological Research is not due to provide a rep this year.
taught student, and also more specific concerns, for example difficulties in accessing resources, comments on the teaching methods / supervision.

Students are selected to sit on the PG Group, made up of the School PG Director, Programme Directors and PG Advisors. The PG Group is the place to raise concerns and deal with issues that go beyond a specific subject area.

As a school representative you have a positive role to play, by enabling communication and constructive change.

Your role as a School Student Representative on the PG Group is to ensure that your fellow MSc Programme Representatives and Research Representatives are aware of who you are and how you can be contacted. The School PGO will provide you with contact details of all programme and research representatives when they have been selected (early Semester 1).

Each taught programme within each subject area will select its own student representative and each subject area will select one or two students to represent the research students. These students will be asked to let you know of any issues raised at subject area level that is relevant to the Postgraduate Group. If you are unsure whether or not the issue should be raised, please do not hesitate to contact the PGO.

If any issues are raised at the Postgraduate Group meeting that you feel the students should be aware of; you should inform the programme / research reps to ‘feed’ the information down.

Responsibilities
- Make yourself available to programme / research representatives to receive feedback
- Raise issues with the School Postgraduate Studies Committee
- Provide feedback to the programme / research representatives on what you are doing and how the School has responded
- Make yourself available, where applicable, to visiting students to the School to provide a students perspective of life in the University of Edinburgh and in particular, the School of Philosophy, Psychology & Language Sciences
- Make yourself available to the College of Humanities & Social Sciences representative to receive feedback and raise issues with the College Postgraduate Studies Committee (CPGSC)

Why be a Student Representative?
- So that you can make a positive difference to the way the Postgraduate School is run
- To develop your interpersonal, communication and negotiation skills and have something new and valuable to add to your CV
- To ensure that student representation continues to be taken seriously

College Student Representative
Representatives for the College Postgraduate Studies Committee (CPGSC) are selected on a rotation basis.

The role of the college representative is to communicate the views of the students to the academics responsible within the College. This might include general feedback on the programmes and also more specific concerns, for example difficulties in accessing resources, comments on the teaching methods / supervision.

The remit of the College Postgraduate Studies Committee is:
- To be responsible for the governance of postgraduate activities in the College
- To advise on management objectives as they relate to postgraduate activity
- To take a proactive approach to the development and implementation of postgraduate strategy and activity, including the harmonisation of operations at School level
• To determine curricula for postgraduate degrees, diplomas and certificates
• To approve postgraduate curriculum changes
• To monitor the effectiveness of postgraduate teaching and supervision
• To identify and promote good practice in learning and teaching in the College
• To consider and respond to any appropriate documentation or issues requested by University committees such as Academic Policy Committee or Senatus Postgraduate Committee
• To approve nominations of external examiners for postgraduate examinations
• To receive reports from the College International Committee
• To report to the Senatus Postgraduate Studies Committee

The College representative has a positive role to play, by enabling communication and constructive change.

The College Representative on the College Postgraduate Studies Committee should ensure that their fellow Postgraduate Representatives across the College are aware of who they are and how they can be contacted. The College Postgraduate Office can provide you with contact details of all programme and research representatives when they have been selected (early Semester 1).

Responsibilities
• Be available to programme / research representatives to receive feedback
• Raise issues with the College Postgraduate Studies Committee
• Provide feedback to the programme / research representatives on issues that have been raised
• Be available, where applicable, to visiting students to the School to provide a students perspective of life in the University of Edinburgh and in particular, the School of Philosophy, Psychology & Language Sciences

Why be a College Representative?
• To make a positive difference to the way taught postgraduate programmes are run in the College of Humanities & Social Sciences
• To develop interpersonal, communication and negotiation skills and have something new and valuable to add to your CV
• To ensure that student representation continues to be taken seriously
FACILITIES, COMMUNICATION AND ADMINISTRATION

Computing Courses
A list of computing courses run by the University can be found on the web at http://www.ed.ac.uk/schools-departments/information-services/services/help-consultancy/is-skills/taught. These courses are free to postgraduates if the topic is deemed necessary to your study by your supervisor.

Email Lists
When you enrol at the University you will get an email account, this is the default email contact address that we will use to get in touch with you. Therefore, if you would prefer to continue using another email address, it is your responsibility to re-route any emails from the University account to your personal one. It is University policy that any email sent to a university email address is seen as adequate contact.

Your university email address will also be added to the PPLS Postgraduate emailing list – ppls-postgrad@lists.ed.ac.uk. This will be used to inform you of any events happening in the School which may be of interest to you. You may also use this list to communicate with all other postgraduates within the School (please limit this to academic use). If you have any queries regarding the list, please contact the Postgraduate Office. Please note that the Postgraduate Office are the administrators for all postgraduate emailing lists and therefore have access to all messages sent.

In an attempt to minimise spam on PG emailing lists, we have restricted access to emails coming from the ‘@ed.ac.uk’ domain. If you are using the emailing lists please do so using your university account or your email will not be delivered.

Fire
Fire safety notices are posted throughout the Dugald Stewart Building and 7 George Square with details of where to assemble should the fire alarm go off out with the usual test time.

Health & Safety
All students should to read the Health & Safety regulations that are displayed on various notice boards. If students require out of hours access to the building they should request this from the Postgraduate Office.

Office Space
Office space for PhD students within the School is allocated at the beginning of each academic year. Office allocation is usually completed by the end of week 2.

Security / Personal Possessions
Students’ personal possessions are not covered by the University’s insurance policy. Please be sensible about security issues, leaving the doors of empty offices locked, and making sure that building doors are closed securely in the evenings and at weekends. If items do go missing please inform Security.

FREEDOM OF INFORMATION

The Freedom of Information (Scotland) Act 2002 gives a general right of access to all types of recorded information held by Scottish public authorities except where an exemption legitimately applies. Section 23 of the Act requires Scottish public authorities, of which the University of Edinburgh is one, to adopt, maintain, publish and review from time to time a publication scheme. The scheme must set out the sorts of information (or "information classes") that the University intends to publish as a matter of routine, how the information will be made available, and any charges that will be made for the information.

The University of Edinburgh is committed to openness and transparency. The University Court and the University's senior management fully support the aims and objectives of freedom of information and are committed to implementing the legislation. The publication scheme is intended to assist staff, students, prospective students and members of the general public to help them find themselves, as far as possible, the information that they are interested in. The University hopes that the publication scheme will become one of the principal methods of accessing information about the University.

The Legislation passed by the UK Government relating to Points-Based Immigration requires all universities to monitor the attendance of their international students. In the College of Humanities & Social Science, we intend to meet this duty by monitoring the attendance of all of our students, as this will give us a positive opportunity to identify and help all students who might be having problems of one kind or another, or who might need more support.
