## 1. What is it?

WP Reading Time is a plugin that lets you easily add an estimated reading time to your posts.

## 2. What does it do?

Activating the plugin will automatically add the reading time to the beginning of your posts content. This can be deactivated in the 'Reading Time' settings which can be accessed from the settings menu on the dashboard.

## 3. How does it work?

Reading Time counts the words and images on your post or page, and calculates a time based on the average speed an adult can read. Once you have enabled the plugin, you will see a link in 'Settings' > 'Reading Time'.

## 4. Settings

### Reading Time WP Settings

Reading Time Settings

Reading time label:  This value appears before the reading time. Leave blank for none.

Reading time postfix:  This value appears after the reading time. Leave blank for none.

Reading time postfix singular:  This value appears after the reading time, when lecture time is 1 minute.

Words per minute:  (defaults to 300, the average reading speed for adults)

Insert Reading Time before content:

Insert Reading Time before excerpt:

Exclude images from the reading time:

Include shortcodes in the reading time:

### Select Post Types to Display Reading Time On

Display on Posts:

Display on Pages:

Display on Media:

Display on Templates:

- 1) **Reading time label:** This is the text that will appear before the reading time. Leave blank for none.
  - 2) **Reading time postfix:** This text appears after the reading time. Leave blank for none.
  - 3) **Reading time postfix singular:** The text that appears after a singular reading time.
  - 4) **Words per minute:** The average reading speed (default is 300, the average reading speed for adults).
  - 5) **Insert reading time before content:** Enable this to add the reading time text before your post.
  - 6) **Insert reading time before excerpt:** Enable this to add the text before the post excerpt (shown on each post on your 'posts' page if your default homepage is set to 'posts').
-

- 7) **Exclude images in reading time:** Click to enable (Reading Time WP calculates images based on Medium's article on the topic here: <https://blog.medium.com/reading-time-and-you-bc2048ab620c>)
- 8) **Include shortcodes in reading time:** Click to include reading time for shortcuts inserted into your posts.
- 9) **Select Post Types to Display Reading Time On:** Here you can use where you want reading time to be displayed, by default it is displayed on pages, posts, and templates but it can be added to images and you can unclick the box to remove reading time from any of the post types.

## Examples:

Reading code before content:

Reading time before excerpt (before the post has been fully opened):

## 5. Shortcode:

You can also use shortcode (shortcode is a WordPress tag that you can enter on a post or page - this gets replaced with different content when viewed on the website).

Shortcode: `[rt_reading_time label="Reading Time:" postfix="minutes" postfix_singular="minute"]`

Or simply use `[rt_reading_time]` to return the number with no labels.

Want to insert the reading time into your theme? Use `do_shortcode('[rt_reading_time]')`

Further information can be found on the plugin website
