Methodological approaches for investigating endometrial function and endometriosis

European Society of Human Reproduction and Embryology

Edinburgh, United Kingdom
18-19 September 2017
Course description

This course, jointly organised by ESHRE and ASRM, is aimed at basic scientists and clinical researchers with an interest in endometrial function and endometriosis. It will provide an update on relevant methodological aspects endometrial and endometriosis research, including biobanking, genomics, cell biology, intracrinology, epidemiology, clinical trials, biomarkers and animal models. The latest knowledge will be reviewed to facilitate the generation and interpretation of biochemical, genetic/epigenetic, genomic, cell biology, and quality of life data relevant to endometriosis symptoms and targeted therapies.

Faculty

Christian Becker (United Kingdom), Siladitya Bhattacharya (United Kingdom), Asgi T. Fazleabas (U.S.A.), Caroline Gargett (Australia), Douglas Gibson (United Kingdom), Martin Götte (Germany), Erin Greaves (United Kingdom), Andrew Horne (United Kingdom), Lone Hummelshoj (United Kingdom), Sylvia Mechsner (Germany), Stacey Missmer (U.S.A.), Felice Petraglia (Italy), Matti Poutanen (Finland), Andrea Romano (The Netherlands), Philippa T.K. Saunders (United Kingdom), Krina Zondervan (United Kingdom)
