# Installing the Desktop Recorder via Learn

Install from the Software Centre (for managed PCs)
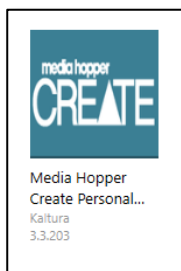

1. Launch the *Software Center* application from your Start Menu

2. Search for 'Media Hopper Create' using the box at the top right.

3. Click on the *Media Hopper* icon, and click *Install*

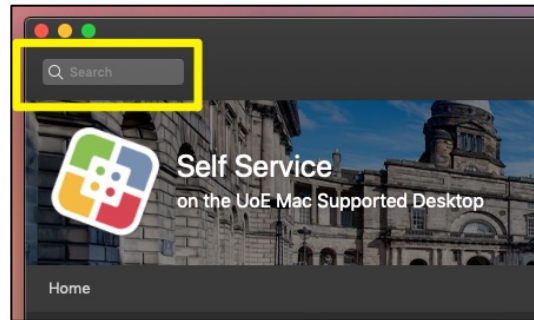

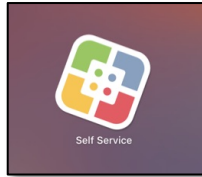

4. The Desktop Recorder will appear in your Start Menu with the name *Kaltura Capture*

5. Reload the content area within Learn and choose *Build Content > Media Hopper Create Media*.

6. Click on the *Add New* button and select *Launch Desktop Recorder* from the list.

   The Desktop Recorder will now open on screen.

Install from the Self Service software catalogue (for managed Macs)

1. Launch the *Self Service* application, either from your dock, Applications folder, or Launchpad.

2. Search for 'Media Hopper' using the box at the top left of the interface.

3. Click on the *Kaltura for Media Hopper* icon, and click *Install*

4. The Desktop Recorder will appear in your Applications folder with the name *Kaltura Capture*

5. Reload the content area within Learn and choose *Build Content*, then choose *Media Hopper Create Media.*

6. Click on the *Add New* button and select *Launch Desktop Recorder* from the list.

7. If the security warning appears (this warning message will only appear if your downloads are set to 'Mac App Store' only), click on the *Open* button.

8. The recorder will now open.
