

Employed on Campus 2018 Internship Case Study

Osariemen Erhahon

2nd year Mechanical Engineering with Management student

What was your internship?

Project Management Intern at The Service Excellence Programme

Description of your role and responsibilities

Worked closely with the project managers of 2 Projects. Overlooking the Data preparation and collection phases of the UniForum Project as well as developing a new SharePoint Intranet for the Service Excellence Programme.

What interested you in this specific role?

An opportunity to experience project management in a real world setting after learning about it in the classroom.

How have you benefited from this experience?

Learned a lot about the project management process and got exposed to many communication, planning and change management tools.

What advice would you give to future interns?

Embrace whichever workplace you end up in from the first day, colleagues are very willing to help so feel free to get involved and ask questions.
