How to Apply
We ask all candidates to complete an online application and a personal statement which should indicate your reasons for applying to the programme. For full details about the application process and deadlines please visit our website. We run a staged admissions process and thereby it is important to check the website for the given deadlines throughout the application cycle. This will also give you the most up-to-date information about requirements. We recommend submitting your application by June in order to allow plenty of time to organise your move to Edinburgh especially if you require a visa. To apply online please visit the specific programme pages at business-school.ed.ac.uk

Fees
Fees for entry are listed on our website under each individual Masters programme.

Scholarships
We offer a range of generous scholarships. Please visit our website for details.

As one of the leading business schools in Europe, at one of the world’s best universities, we have achieved an enviably high quality of teaching and research, as well as a natural connection to business. What really sets us apart however, is a willingness to look beyond accepted business thinking, to create debate and spark new ideas.

Edinburgh is a leading international centre for business and finance. It’s also a beautiful, inspirational city. And, here in the University of Edinburgh Business School, you have a School that is right at the heart of the city, at the heart of business.

Not only is the Business School part of a University that is ranked 18th in the QS World University Rankings (2019), but it also holds triple accreditation from AACSB, EQUIS and AMBA. Triple accreditation underscores the quality of everything we do from our teaching to our research and has been awarded by three of the most highly regarded business accreditation bodies. In today’s challenging business world it is imperative that students equip themselves with the knowledge and skills that are in demand not just today but into the future. We believe our portfolio of Masters are at the forefront of the latest ideas and techniques that will assist the business world.

If you’d like to find out more about the School or our programmes, simply email msc@business-school.ed.ac.uk and our Admissions Team will help you with your enquiry. Or, better still, come and visit us yourself. I think you’ll be suitably inspired.

Wendy Loretto
Dean of the Business School
A thriving European capital city, Edinburgh blends history, culture and a world-class arts scene with the entrepreneurial energy and fresh thinking you’d expect from the UK’s second-largest financial centre. Easy to reach and well connected to Europe and beyond, it’s no surprise that for generations creative thinkers have made Edinburgh their home.

EDINBURGH
A CITY WITH SPARK

A capital with character
A UNESCO World Heritage Site, Edinburgh’s Georgian and Victorian architecture characterise much of the city. Despite its status as a thoroughly contemporary capital, here is a city whose centre is home to a royal palace, an extinct volcano and a truly iconic cliff-top castle.

Bursting with life, Edinburgh boasts four universities, major international arts festivals and a host of galleries, theatres and concert halls. People from all over the world have settled here – a fact celebrated by the strong ethnic flavour of the city’s restaurants, bars and cafés.

A walk in the bustling heart of Edinburgh is a walk of contrasts and surprises. Edinburgh brings all the advantages of a major European capital, yet ours is a manageable city whose compact centre rewards exploration.

A country to discover
Within just a few miles of the Business School await East Lothian’s beaches, villages and famous golf courses. The town of St Andrews, the game’s birthplace, is less than two hours from Edinburgh.

Further afield, Scotland, authentically one of Europe’s last great wildernesses, delights the inquisitive with mountains, lochs, wildlife and seven thousand miles of stunning coastline. Combined, they result in a breathtaking natural backdrop for activities including hiking, mountain biking, surfing and kayaking.

A city with spirit and spark
An entrepreneurial spirit engulfs Edinburgh and is evidenced by a prosperous and diverse economy, leading-edge research and a healthy local, national and international business community. Central to this dynamic mix, the University of Edinburgh Business School offers a learning environment that is every bit as stimulating and progressive.

A pioneering city, at the University of Edinburgh the UK’s most powerful computer helps drive a vibrant biosciences sector. The search for renewable energy finds a focus here too, and several global financial institutions – banks, insurance companies, investment houses and brokers – are headquartered in the city. It’s the ideal location for the School’s unique approach to strategic leadership.

A place of inspiration
With so much innovation, research and collaboration going on, it’s natural that the city attracts the world’s leading thinkers and business people. The School is perfectly placed to both contribute to first-rate research and thinking, and to connect with those working at the very top of their sectors. Guest speakers regularly present to our students, engage in debate with our faculty and lead our aspiring entrepreneurs by example. It’s engagement that has paid dividends; year-on-year the University has inspired and supported a record number of business start-ups.

Edinburgh is a city of influence too; as the seat of the Scottish Parliament the city provides access to the Civil Service and public sector and government organisations.
The city’s 450,000 population exceeds one million during the peak of the festival season in August.

**FOUR FACTS ABOUT EDINBURGH**

**01**
Edinburgh is regularly voted as one of the most desirable places to live and visit.

**02**
Edinburgh’s Hogmanay is one of the world’s greatest New Year party celebrations.

**03**
A year-round festival city, Edinburgh is home to festivals celebrating theatre, film, books, arts and science.

**04**
Edinburgh is the UK’s second largest financial centre and home to the Scottish Parliament.
Granted its Royal Charter in 1583, the University of Edinburgh which we are a key part of is one of the oldest in the United Kingdom. More than 200 years ago its central role in the Scottish Enlightenment helped create a bright new reason-based approach to the human condition. Today that legacy inspires a modern, forward-looking institution, world-class academics and more than 35,000 students from across the globe who have chosen to study at Edinburgh.
INSPIRATIONAL PEOPLE
INSPIRATIONAL EDINBURGH

Scientists, Politicians, Writers, Philosophers, Athletes, Innovators, Astronauts. All have found inspiration at Edinburgh.

An International Network

Our MSc alumni network is nearly 4,000 members strong. Our graduates work in a wide variety of destinations across the world so wherever you find yourself working in your future career, we will link you up to a like-minded network of professionals.

Jessica Shannon
Eastlink, Halifax, Canada
MSc in Human Resource Management

“When I was researching Business Schools the University of Edinburgh immediately stood out — the mix of modules on offer, the small groups and its reputation.”

Christopher Smith
James Quator, New York, USA
MSc in International Business and Emerging Markets

“It was an enriching experience, with lots of different perspectives from a broad range of people from different countries. It’s probably the most diverse experience I’ve ever had.”
David Kovacs
Rocket Internet, Berlin, Germany
MSc in Marketing

“I chose Edinburgh because it was a University with a very good reputation. My classmates were a very varied group and it was great that they had different experiences. Group work exercises were really interesting with so many different perspectives. The School itself is superb, really well outfitted and there are a lot of facilities for working and taking breaks.”

Branden Beatty
Médecins Sans Frontières (MSF), Kenya
MSc in Carbon Finance

“Edinburgh pioneered the first ever MSc in Carbon Finance. I believe the programme speaks to the progress Scotland has made using market-based mechanisms to manage climate change mitigation.”

Wei (Kevin) Zhang
Chint Electrics, Shanghai, China
MSc in Marketing & Business Analysis

“The programme gave me a deeper knowledge and understanding of the marketing area. I got a lot of help from the lecturers and Professors. The diversity on the programme was brilliant with classmates from South Africa, North America, Asia and Europe – this mix has meant a great social life. Most of my classmates have work experience so I learnt a huge amount from them. The programme also gave me the opportunity to do lots of interesting simulations. The market research projects were really great.”

Shoba Maheson
Bank Negara, Malaysia
MSc in Accounting & Finance

“My employers sponsored me to come from Malaysia to study overseas for a year. My final decision came down to the brand name and reputation of Edinburgh. The experience of living in Edinburgh was wonderful. The city was so beautiful and so unpolluted. The Professors are unbelievable – they show you a whole different perspective.”
The University of Edinburgh Business School takes its place among the world’s leading business schools. Our triple accreditation is testament to our inspirational teaching, game-changing research and diverse engagement with global business.

WELCOME TO OUR TRIPLE ACCREDITED BUSINESS SCHOOL

At the heart of our dynamic School is a faculty of more than 100 specialist academics, a vibrant student population of 1,600 and a suite of valued undergraduate, postgraduate and executive education programmes.

Committed to corporate engagement

Much more than simply a source of knowledge, our School connects our Masters students with local, national and international businesses, innovators and entrepreneurs.

Our commitment to corporate engagement and our strong sector-wide links are found in our sponsored research, our executive education programmes, events hosting individual guest speakers to themed events such as our Start Up Festival or Media Series, Entrepreneurship Club and at the centre of our student projects and treks.

Revolutionary research

The lifeblood of any major business school, here at Edinburgh we aim for research that sets agendas, leads change and revolutionises future business strategy.

Placing original research and thinking at the core of the MSc curricula, our research clusters are staffed by teams whose work has real influence in business, government and the public sector. We embrace both applied and methodological research and nurture thinking that’s brave, bold and provokes debate. Our passion for research has resulted in truly groundbreaking work in finance, credit scoring and public management.

An international impact

Our students, like many of our teaching faculty, bring an international background in terms of both nationality and career.

Our 2017/18 Masters intake comprised students from 69 separate nationalities. It’s a healthy mix that creates a lively sharing of ideas and insights into different cultures.

The diversity we welcome also reflects the global nature of today’s businesses. Our MSc programmes get to the core of international business and finance to address key issues of the day.

Equipped for ambition

The Business School fosters ambitious plans to continue building on our success and to stand among leading business schools worldwide.

Substantial investments have been made in our facilities and in hiring academic and support staff that can best cater to the needs of our students. Our purpose built school features lecture theatres, a café and The Hub – a well equipped library space offering essential databases, journals and leading financial information services. MSc students enjoy full access to Datastream, Osiris, Thompson ONE Banker, CRSP (Centre for Research in Security Prices) and Compustat.

business-school.ed.ac.uk
IN 2017/18
OUR MSc STUDENTS JOINED US FROM:

- Asia/Australasia: 57%
- Western/Eastern Europe: 24%
- UK: 6%
- South/Central America: 5%
- North America: 5%
- Africa/Middle East: 3%
- North America: 5%
- Africa/Middle East: 3%

1,600 Business School students are enjoying the experience of a lifetime - 600 of them pursuing postgraduate studies.
Some of our students enjoying the Student Ambassador BBQ.

FIVE FACTS ABOUT OUR SCHOOL COMMUNITY

01
Our MSc programmes in 2017/18 welcomed students from over 69 different nations

02
90% of our School’s academic staff hold a PhD

03
Our School aims for research that sets agendas, leads change and revolutionises future business strategy

04
Substantial investment has delivered a bespoke environment built with student and staff needs paramount

05
Our staff are made up of 37 different nationalities
As the employment market continues to improve, competition will continue to intensify. With a Masters from the University of Edinburgh you will develop the knowledge and skills required to stand out from the crowd and achieve your goals.

**ENJOY A PROFESSIONAL DEVELOPMENT JOURNEY WITH A WORLD CLASS MASTERS**

Balancing academic theory, crucial soft skills and the very latest industry practice, our MSc programmes are respected by employers and valued by graduates. Our growing portfolio covers a broad range of general and specialised management disciplines – increasing employability for both first-time management students and for those seeking a tightly focused in-depth programme.

**A commitment to your professional development**

Each Masters student undertakes a personal and professional development journey that challenges, engages and prepares them for real-world success. We encourage you to take ownership of your professional development so your experience is tailored and unique. Our supportive faculty will be by your side to develop robust, relevant learning geared to maximising your potential.

**Skills**

Equipping you with the skills to achieve your development goals and maximise your own potential.

**Opportunities**

Engaging you with the business community.

**Network**

Helping you build your confidence in networking and grow your professional network.

**Real-world experience**

Many of our Masters programmes offer a route to real-world practice via a student project. Each project sees students applying knowledge and skill, and establishing connections with businesses and sectors. Many of our students use their dissertation to conduct research for a corporate partner.

**At the heart of knowledge exchange**

Strong industry links give us the latest understanding of global trends and the key skills and attributes employers are prioritising. Our powerful interactions with business places the School at the heart of cutting-edge consultancy, research and recruitment assistance. Our ties with industry bodies are just as solid, and include relationships with the Chamber of Commerce, Chartered Banker Institute and The Marketing Society. These connections and activities are central to our Masters students’ professional development journey.

Adding to this is the Edinburgh entrepreneurship club (E-Club). Hosted by the School, the club’s growing membership now exceeds 800 students, alumni and entrepreneurs from the business community. Fostering the entrepreneurial spirit, the club hosts events including pitching competitions and business planning activities. The E-Club supports students both in strengthening valuable networks and in negotiating each stage of the entrepreneurial process.

**Tailored careers support for Masters students**

Every on-campus Masters student benefits from quality careers guidance provided by the Business School’s Student Development Team and the University’s own award-winning Careers Service. The Student Development Team exists to help students maximise their potential in the global market. Their activities are structured around three pillars – skills, networks and opportunities.
Our Guest Speakers

Engaging with the Best in the Business

Students are given the chance to learn from and engage with a number of corporate guest speakers via our Business School and University wide events as well as via programme specific lectures. In addition, this gives students the opportunity to make contact with future potential employers and discover more about potential career paths. Below are just a handful of the names we have welcomed:

Lord Karan Bilimoria
Founder and Chairman, Cobra Beer

Dominic Barton
Global MD, McKinsey & Company

Gareth Williams
CEO, Skyscanner

Ian Marchant
formerly CEO, SEE

Donald MacRae
Chief Economist, Lloyds Banking Group

Angus Cockburn
CFO, Aggreko

Jann Brown
Managing Director, Cairn Energy

Angus Gillespie
VP, Shell

John Abate
Amazon

Dr Clare Wood
Head of Portfolio Risk, Kames Capital

Bill MacDonald
MD Scotland, Accenture

Richard Cousins
CEO, Compass Group

John Bernard
Global Marketing Director, Mozilla Firefox

Alastair Darling
Former Chancellor of the Exchequer

Steve Bateman
Executive Director and Head of Banking, Santander Bank
Our strongly vocational MSc is closely in line with professional practice and is an ideal fit if you’re from a quantitative background. This is a programme that will challenge you academically and, through practical applications and case studies, one that will set you up for future roles within Accounting and Finance.

**Structure and assessment**
Following induction and welcome week, Semester 1 comprises four of the six core courses your MSc is built upon.

In Semester 2 you’ll take two more core courses as well as two specialised, annually reviewed option courses. Learning is achieved via a mix of lectures, set reading, exercises and case studies. Each course component features a combination of formal examination, individual/group assessment and presentations.

**Dissertation**
Your MSc concludes with a dissertation: a personal piece of work inspired by course learnings and focused on your career ambitions.

Thanks to the School’s close industry ties, many students take on a live issue from the accounting and finance sectors. Past topics have included: Introducing IFRS to Accounting; Social and environmental disclosures; Comparable accounting policies; Performance persistence of mutual funds; Director’s trading; Management accounting and strategy; Earnings management and What is fair value?

**Career progression**
Your MSc will equip you for a range of roles. Post-programme careers typically include: international accounting; international regulations; investment and security analysis; portfolio management; corporate finance management; accounting and corporate restructuring.

**Valued by employers**
Recent graduates from our Finance portfolio of Masters programmes have gone on to work for a range of organisations including:
- Bank Indonesia
- Citibank
- EY
- Ford Motor Company
- Fives
- Grant Thornton
- Moen Consulting Group
- Mynt (Globe Fintech Innovations Inc.)
- Revenue Department of Indonesia
- Ruihua Certified Public Accountants
- Swiss Re
- The Kraft Heinz Co.
- Zamanbroker Insurance

**Accreditations**

**CFA**
This MSc participates in the CFA Institute CFA Programme Partner Initiative (’CFA PP’) meaning it is judged by the Institute as covering at least 70% of the CFA curriculum.

**ACCA**
Students on the MSc Accounting and Finance programme benefit from ACCA exemptions from specific papers at the Fundamentals level.

**CIMA**
The University of Edinburgh is an official University partner of CIMA and as such graduates from our MSc in Accounting and Finance will be able to join CIMA through an accelerated route designed specifically for MBA and Masters in Accounting graduates. This route will allow graduates from the programme to take the CIMA master’s gateway assessment.

NB: accreditations are reviewed annually. The above information is correct at time of printing July 2018.

**LEARNING OUTCOMES**

Know and apply accounting and finance theory

Explain and apply international accounting standards

Critically evaluate financial statement information

Evaluate and compare different investments
**PROGRAMME STRUCTURE**

---

**GRADUATE PROFILE**

Kartika Nindya Putri
Revenue Manager for Kraft Heinz Company

MSc in Accounting and Finance

After graduation, I joined the corporate finance function in an FMCG company. With the industry being very fast paced and challenging, I have found that the analytical skills and the ability to adapt to rapidly changing situations which I learnt at the School, have been vital.

The programme combines learning from textbooks with learning from real practice – and this improved my ability to think critically and present ideas in a structured way. Moreover, we had the freedom to tailor the courses based on our own interests.

---

For more information on application and entry requirements please see back page or visit our website. [business-school.ed.ac.uk/msc/accounting-finance](http://business-school.ed.ac.uk/msc/accounting-finance)
Our MSc delivers the knowledge, understanding and skills Bank and Financial Institution Managers require to operate effectively and globally. Successful management underpins successful economies and on this programme you’ll consider the structural, financial and risk and asset management functions of banks.

Approaching banking as an industry requiring multidisciplinary management, across your MSc you’ll encounter an emphasis on what and how managerial decisions are made. Uniquely, your programme will ask you ‘what skills do managers in risk functions need to be technically excellent at their job?’ Research by the Business School’s Credit Research Centre (CRC) provides a strong academic base that’s backed by a passionate faculty and the School’s impeccable links to industry and guest speakers.

Structure and assessment
Following induction and welcome week, you’ll be studying four core courses in Semester 1. Semester 2 brings two more core courses and two annually reviewed option courses.

Learning is achieved through lectures, set reading, exercises and case studies. Each course component uses a combination of formal examination, individual/group assessment and presentations.

Dissertation
Your MSc concludes with a dissertation. Focused on your career plans and inspired by course learning, your dissertation is your own unique piece of work. Thanks to the School’s ties with industry, opportunities exist to offer you a live issue a particular company is facing.

Previous dissertation topics have included: Estimating a credit risk model for consumer loans; A critical review of capital adequacy regulations; An evaluation of liquidity risk models; Use of internal credit risk ratings at private banks; Competition in retail banking: How do banks set interest rates?; Determinants of bank profitability; An empirical analysis of bank mergers; An empirical analysis of the popularity of credit risk model estimation techniques; Risk management and corporate governance in banking; Incentives in CEO pay and impacts on risk taking; Credit risk management of commercial loan portfolio: An empirical analysis of bank efficiency; Assessing risk in launching new financial products; Measuring shareholder risk in international banks.

Career progression
Your MSc prepares you for a number of key financial management positions. Post-programme roles have included: Risk Management Consultant; Credit Risk Analyst; Securities/Credit Officer; Banking Regulatory Consultant; Audit/Compliance Analyst; Financial Services Regulatory Advisor; Governance and Risk Officer; Risk Manager (Modeling) and Portfolio Risk Manager.

Valued by employers
Recent graduates from our Finance portfolio of Masters programmes have gone on to work for a range of organisations including:

- Bank Negara Malaysia
- Central Bank of Azerbaijan
- Citibank
- China Minsheng Bank
- IKB Deutsche Industriebank AG
- Shenwan Hongyuan Securities Co. ltd

Your MSc, Accredited by CBI
Your MSc programme is fully accredited by the Chartered Banker Institute (CBI). Upon graduation, you will be eligible to use the professional designation of Chartered Banker, alongside MCIBS accreditation.

Your automatic Student Membership of the Institute opens the door to exclusive sector events. You’ll also be subscribed to CBI’s Chartered Banker publication.

LEARNING OUTCOMES

- A knowledge of the economic roles and structure of banks in different economies
- Knowledge and understanding of the different types of risks that banks face and how to measure them
- Knowledge and understanding of company financial statements
- Knowledge and understanding of statistical and econometric concepts
- Knowledge and understanding of risk models
- Knowledge of the economic and financial environments in which banks operate
- Detailed knowledge and understanding of credit scoring

Supplementing your four core courses, Semester One includes ‘An Introduction to SAS’. This programme teaches you to run programs in an SAS environment, to input and manipulate data in SAS, and to output data results in various forms. As the leader in business analytics software and services, SAS transforms data into insights that give a fresh perspective on business. SAS is used at more than 70,000 sites in 136 countries, including 91 of the top 100 companies on the 2013 Fortune Global 500’ list.

**GRADUATE PROFILE**

**Theodoros Stamoulis**
Credit Risk Professional at JP Morgan Chase & Co.

**MSc in Banking and Risk**

In 2015-2016, I was working in DeutscheBank in Munich as a junior Financial Controller performing financial controlling and analysis for private banking clients. Aside from this, I have also worked for 5 years in Greece as a Junior Investment Consultant in a private investment consulting company where I planned and executed financial investment projects collaborating directly with senior analysts. I graduated from the University of Edinburgh with an MSc degree in Banking and Risk Management which was completed in August 2017 and I am currently working in JP Morgan Asset Wealth management division in Edinburgh in an international banking environment as a credit risk analyst.

Among the courses I have studied and was assessed were Credit Risk Management, Econometrics Applications in Banking, Risk Management and the Basel Accords, Statistics for Finance, Financial Engineering, Banking Theory and Central Banks, concentrating on major types of Risk such as Operational, Market, and Credit and the skills learned from these modules have given me an excellent foundation for building a career as a Banking professional. I believe the knowledge and skills built up during this time make every Banking and Risk graduate the perfect candidate for a role in the risk division of major investment banks.

Everything I did throughout this year was extremely important but I think the most valuable part was the combination of lectures and learning with extra-curricular activities such as visits to financial institutions, financial conferences and the immediate application of what I have learned into my workplace.

For more information on application and entry requirements please see back page or visit our website. [business-school.ed.ac.uk/msc/banking-risk](http://business-school.ed.ac.uk/msc/banking-risk)
This is the age of Big Data. Organisations hold more information about their business environments than ever before. Increasingly, these organisations are recognising the role of data in gaining insights and out-thinking competitors. Our MSc addresses the growing demand for trained analysts capable of taking on complex challenges, informing decisions and contributing to solutions.

On this course you will gain a critical understanding of varied business environments, problems and processes. You will learn how business analytics drives improvement, innovation and entrepreneurial action. And through exposure to live business tasks, you’ll be challenged and made ready for this flourishing jobs market.

Structure and assessment

Our MSc is offered as a one-year full-time course. Following induction and welcome week, you will complete four core courses in Semester 1. This is followed by four option courses in Semester 2. The programme concludes with a dissertation.

Through a combination of lectures, supervised discussions and lab sessions, you will learn to recognise and understand essential theory. You’ll also gain hands-on problem-solving experience across a number of group projects. And, crucially, you will learn how to apply state-of-the-art software and analytics tools to typical issues faced by business managers.

Dissertation

Your dissertation is the sum total of the knowledge, skills and insights you’ve gained on your course. It should reflect your career plans and can be academic or industry-based. Thanks to the School’s impressive business links you could be working on a live issue currently being faced by an organisation. Dissertation work can typically result in internships, valuable networking and in access to career assistance.

Career progression

More and more businesses are recognising the value of data-driven insights, and this highly vocational MSc will open up a variety of career opportunities. You will leave your course with the specialist knowledge employers are seeking. You’ll also have benefited from additional skills development opportunities on offer via our Student Development Team such as presentation giving or interview techniques. When combined with the key concepts, methods and real-world experience this MSc delivers, graduates will be equipped for roles including: business consultant, business analyst, business intelligence & analytics consultant, metrics & analytics specialist, analytics associate, data analyst, solution architect, business process analyst, management consulting associate, and operational research consultant.

Valued by employers

Recent market forecasts suggest that the worldwide revenues for big data and business analytics will grow from $130.1 billion in 2016 to more than $203 billion in 2020 (Source: IDC). It is anticipated that demand for data analytics employees will continue to grow.

Graduates across the School’s MSc courses regularly secure posts with leading employers. With demand for Analytics professionals growing, the School is confident that this MSc will place you in an excellent position to advance your career.

LEARNING OUTCOMES

Understand and critically apply the concepts and methods of business analytics

Identify, model and solve decision problems in different settings

Interpret results and solutions, and identify appropriate action for managerial situations, whether problems or opportunities

Create viable solutions to decision-making problems

Recognise, understand and apply the language, theory and models of the field of business analytics

Critically analyse, synthesise and solve complex unstructured business problems

Drive business improvement, innovation and entrepreneurial action

Make ethical decisions that impact on the long-term welfare of organisations and their communities
A rise in technology based interactions between various economic actors have resulted in an unprecedented amount of data being generated and gathered by organisations. This gold mine of data is yet to be exploited by a large number of organisations to help build intelligence and assist with decision making, driving innovation, and outranking competition. Our MSc programme is designed to train you in descriptive, predictive and prescriptive analytics to make the best out of this gold mine and to respond to the increasing demand for analytics professionals in the job market.

For more information on application and entry requirements please see back page or visit our website. business-school.ed.ac.uk/msc/business-analytics
We are proud to have pioneered this programme dedicated to professionals in the field of low carbon finance and investment. Join this MSc and you’ll be joining a course with a unique focus on the business opportunities and financial flows driven by society’s response to climate change.

It’s a response that is expected to drive trillions of dollars of new investment over the coming decades. Delivering this investment will require professionals with a deep understanding of the mechanisms that will regulate new financial flows like carbon markets and climate investment funds.

This is a programme that will appeal to you if you’re a first degree graduate in business, economics, engineering or another social or physical science discipline. Our students also typically bring work experience alongside their desire for a new career in carbon finance, investment, consulting or related policy and regulatory roles. Ensuring our teaching keeps pace with advances, our MSc is delivered by industry-experienced academics, external experts and practitioners in carbon finance.

Structure and assessment
Following induction and welcome week, in Semester 1 you will study four of the programme’s seven core courses. Three more follow in Semester 2, including a semester-long group Carbon Consulting Project. Semester 2 also brings an option course, enabling you to specialise in a key area. Learning is achieved through lectures, set reading, interactive exercises and case studies. Each course component uses a combination of formal examination, individual/group assessment and presentations.

Dissertation
Your MSc concludes with a dissertation. Your own personal piece of work, your dissertation is inspired by all of the year’s learning and should focus on your career plans. Your studies will provide plenty of scope for a dissertation subject. Past topics have included: Carbon finance in specific sectors, technologies, countries, carbon markets or standards; Comparative studies of the efficiency of alternative carbon financing instruments; Analysis of carbon pricing, risk or risk management; Exploring the relationships between energy finance and carbon finance; New developments in carbon accounting, taxation or auditing and International policy frameworks and carbon finance.

Career progression
Your MSc is highly vocational. It will equip you with the knowledge and skills essential for a job in carbon finance. Graduates from the MSc in Carbon Finance will typically pursue a career in:
- Carbon credit development
- Low carbon portfolio management
- Renewable energy investment
- Policy or regulatory roles (e.g. with Government or NGOs)
- Carbon trading
- Carbon consulting
- Carbon accounting
- Climate finance management

Employers typically include: banks, asset management firms, large industrials, consultancies, regulators and carbon start-ups.

The Business School also provides initial membership to the Association of Carbon Professionals.

Valued by employers
The School has earned a reputation as a global leader in climate change education. It’s a standing that is strengthened by our co-delivery of the MSc in Carbon Management at the Edinburgh Centre for Carbon Innovation. We also maintain strong relationships with the UK Green Investment Bank; Shell; Scottish 2020 Climate Group; Climate Bonds Initiative and the Carbon Disclosure Project (CDP). The result is that leading employers will recognise and rate your MSc. Our Carbon Finance graduates over the last few years have secured positions with firms including:
- Bloomberg New Energy Finance
- Capgemini UK
- China Emissions Exchange
- CITIC Securities
- Climate Smart
- Deloitte France
- Det Norske Veritas
- Edge Chile
- Green Climate Fund
- Project Gaia
- UNDP (United Nations Development Programme)
- Unilever

Learning Outcomes
- Explain and evaluate the current state of climate change science and key climate change policy initiatives
- Explain and apply principles of finance in the energy sector
- Describe and critically evaluate the structure and dynamics of the major global, regional and national level carbon markets
- Explain and apply practices and procedures of carbon accounting
- Describe and evaluate the challenges and opportunities for low-carbon investment

| Organising for Social Change: Strategy, Governance and Innovation |

**Graduate Profile**

**Abel Rasgado**
Commercial Manager at Mainstream Renewable Power
MSc in Carbon Finance

During the programme, I had the opportunity to work in an advisory project related to life cycle analysis for wind projects at the Green Investment Bank. The MSc helped me make a career change from investment banking to renewable energy development and investment. I am currently working at an Irish company, Mainstream Renewable Power, with a global presence in Latin America, Africa and Asia where I am responsible for project valuations, PPA negotiations and business development.

The most valuable part of my MSc was gaining an understanding of the climate issue that we are facing as human beings from a scientific standpoint and the obstacles that exist to successfully transmit that knowledge to the decision makers such as companies, investors and governments and move from theory to actions. Besides such interesting knowledge, I also learned about the specifics of valuing renewable energy projects and different technologies.

For more information on application and entry requirements please see back page or visit our website.

MSc in Entrepreneurship and Innovation

The impact of technology and globalisation means markets are changing more rapidly than ever. On this vibrant MSc you’ll gain the skills to innovate, spot opportunities and become an invaluable asset to companies of all sizes. The inclusion of project-based core courses will see you applying your new knowledge and understanding to real-life business challenges organisations are facing.

While start-ups showcase entrepreneurship and innovation in its most obvious sense, these behaviours are also crucial for larger, more established organisations. For these businesses, the effective use of resources supports and grows innovations across product, service, process and management.

This MSc will prepare you for a wide spectrum of career paths. Ideal for both business and non-business graduates, it will enable you to satisfy the demand for smart, entrepreneurial people who can identify and act on opportunities.

Structure and assessment
Following induction and welcome week, in Semester 1 you’ll study six core courses. In Semester 2 you will also tailor studies to your career ambitions via four option courses.

On this MSc you’ll learn through lectures, set reading and case study analysis. Assessment is via a combination of formal examination, individual/group assessment and presentations.

Two of the option courses are project-based giving you the opportunity to address live innovation and entrepreneurship challenges with real life organisations.

Dissertation
The culmination of your MSc, the dissertation brings the year’s learning together in one unique piece of work. You can choose a research dissertation, or a dissertation with an acute business focus - for example, a business plan or project. Your work should reflect your career ambitions.

Potential subjects for dissertations could include strategic entrepreneurship; business angel finance and early-stage risk capital; technology commercialisation; business model innovation; digital innovation and entrepreneurial ecosystems.

Career progression
This MSc is ideal if you are motivated by making a difference and impacting on business practice and growth. Across the Master’s programme you will develop skills that can be applied to new and established ventures across a range of sectors. This MSc is also a great fit if you’re looking to start your own venture now or in the future.

Roles can typically include managing innovation within existing organisations; developing a start-up business; taking over a family business or policy and business development in agencies that support innovation.

Valued by employers
Your Master’s degree will give you the skills, knowledge and experience to take on a number of entrepreneurial roles. You can expect to be equipped for posts including:

• Innovation Manager
• Venture founder
• Policy and business development roles across the private and public sector
• Senior roles within a family-run business

For more information on application and entry requirements please see back page or visit our website.

The Edinburgh eClub

The Edinburgh Entrepreneurship Club unites students, alumni, researchers, faculty, university staff and colleagues from the wider community. Common to all is the goal of fostering the entrepreneurial spirit. Membership will give you valuable networking opportunities as well as adding to your knowledge of the entrepreneurial process.

- The club hosts activities including:
- Visits from guest speakers
- Annual Startup Festival
- Two Entrepreneurs in Residence who provide members with one-to-one advice
- Two pitching competitions - sponsored by Santander to the tune of £1,000

GRADUATE PROFILE

**Elizabeth Harris**

Business Analyst at Accenture

**MSc in Entrepreneurship and Innovation**

Before the Business School, I was at the School of Social and Political Sciences at Edinburgh studying International Relations. During my studies, I interned and worked for a local charity, EUSA, and an electronics manufacturer. Now, I’m working at Accenture’s Global Innovation Centre - The Dock - and bringing together my past experience and learning from my Masters to bring new innovations to Accenture’s clients.

As my degree focused on innovation and I’m now in an Innovation Centre, it was very helpful in preparing for my future career. It has helped me to not only learn about the different approaches and considerations, both methodological and commercial, for developing new products and services, but also implementing innovation concepts in our consultancy projects. Additionally, the Masters course and Business School were very helpful in gaining exposure to different companies and how they innovate and use different techniques.
Combining up-to-the-minute theory with practical application, our MSc in Finance will prepare you for diverse roles. Carefully devised core courses deliver a robust grounding in corporate finance, financial analysis and financial markets. Building upon this learning, in Semester 2 a highly flexible structure enables you to tailor your studies, or to specialise in one of three specific areas: Corporate Finance, Energy Finance and Markets, and Finance and Investment.

However you focus your studies, you will develop an in-depth, practical knowledge of key financial theories, models and frameworks. Crucially, you’ll also gain the understanding to confidently apply your new skills to real-world business situations.

Benefit From an Array of Finance Expertise
Our programme draws from the expertise and research of our Finance academics in order to give students a flexible and robust education that will allow them to pursue a number of different career options.

You can delay your decision on which area to specialise in until you arrive on campus and start your programme thereby giving you a chance to make a more informed decision. Indeed you can also opt to mix and match rather than having to specialise if you so wish. We feel this powerful, vocational MSc will give you a world-class grounding alongside opportunities to specialise.

Connections that count
The School’s long-standing industry links are exemplified by our work in the Centre for Financial Markets Research, the Credit Research Centre and the Centre for Business Climate Change.

The MSc in Finance participates in the CFA Institute® CFA Program Partner Initiative (“CFA PP”). This means that the MSc in Finance is judged by the Institute as covering in some way at least 70 per cent of the CFA curriculum. The degree will therefore assist those who choose to study for the CFA qualification.

Structure and assessment
Following a comprehensive induction and welcome week, Semester 1 comprises four of your programme’s five core courses. In Semester 2 you’ll study the remaining core course as well as specialist courses. At this point you can tailor your studies via one of the three Degree Pathways thereby specialising in Corporate Finance, Energy Finance and Markets, or Finance and Investment or broaden your learning by selecting a mix of option courses. Your work will be assessed by a combination of individual and group essays and reports, group presentations, mid-semester exams, and formal degree exams.

Dissertation
The culmination of your course, your dissertation can take the form of a business report or a business plan. Your topic should reflect your career ambitions and, if you’re following a Degree Pathway, relate to that Pathway’s content.

Career progression
You can typically expect to be qualified for positions with companies like the Big 4, with investment and commercial banks; market and consumer research centres; fund management firms; energy utilities and consultancies, as well as with public sector departments responsible for the finance sector; energy and climate-change policy.

This MSc could lead to a multitude of roles depending on whether you specialise in the area of Investment, Corporate Finance or Energy Markets or choose to combine a mixture of the available electives. Potential roles are varied and include for example:

Corporate Finance related roles such as:
• Corporate Banking Executive
• Investment Banking Associate
• Strategy Consulting Associate

Energy related roles such as:
• Commodities Analyst
• Energy Consultant

Investment related roles such as:
• Equity Analyst
• Market Risk Analyst
• Portfolio Manager

Valued by employers
Prominent names from across the finance sector rate the School’s financial teaching. Recent graduates from our Finance portfolio of Masters programmes have gone on to work for a range of organisations including:
• Artemis Investment Management
• Blackrock Investment Management Ltd.
• Creative Capital
• Dacheng Fund Management Co.
• Deloitte
• HSBC
• KPMG
• London Stock Exchange
• Mandiri Sekuritas
• Morgan Stanley
• Nordea
• PriceWaterhouseCoopers
• Standard Life Investments

For more information on application and entry requirements please see back page or visit our website.

business-school.ed.ac.uk/msc/finance
**Programme Structure**

**Semester 1**
- Financial Markets and Investments
- Corporate Finance
- Statistics For Finance
- Financial Statement Analysis

**Semester 2**
- Quantitative Research Methods in Finance
- CORE ELECTIVES (Energy Finance & Markets)
  - Energy Finance
  - Energy and Environmental Markets
- Dissertation

**Summer**
- Options
  - If not specialising, choose any 3 electives.
  - For Investment or Corporate Finance, choose 2 from your stream, and 1 other from any stream.
  - For Energy Finance and Markets, choose 1 from this speciality.

**Learning Outcomes**

**Apply and critically evaluate finance and investment theory with particular reference to the operation of global financial markets**

**For the Corporate Finance Pathway:**
- Critically evaluate the financial control of an organisation

**For the Investment Pathway:**
- Apply and critically evaluate the construction and analysis of portfolios of investments incorporating a range of asset classes

**For the Energy Markets Pathway:**
- Critically evaluate how key regional and global energy markets are structured and how they work

Semester 2’s specialist Degree Pathways are summarised below:

**Corporate Finance Pathway**
On this Pathway you will study theories essential to financial management practices. You will also develop skills to recognise the financial behaviours of corporations. By studying corporate finance practices, you will gain the knowledge and understanding to utilise these techniques.

**Energy Finance and Markets Pathway**
This pathway will prepare you for roles in the energy, finance or public sectors. You will encounter practical applications of the financial modelling and analytical techniques seen in the execution of energy projects, and those used for trading execution in the wider energy market.

**Finance and Investment Pathway**
Delivering a specialist education in finance and investment, on this Pathway you’ll gain practical knowledge on the processes and mechanics underlying investment. You will develop a global perspective on investment markets and asset classes, and acquire the skills to practice investment-related mathematics.
Market functions make significant societal impacts. How well financial markets operate influences real-world issues including job creation and credit approval. The first programme of its type in the world, our new MSc Finance, Technology and Policy has been developed as an interdisciplinary response to the knowledge gap created by the relentless pace of technological transformation in financial services and markets.

**Structure and assessment**
Following induction and welcome week, Semester 1 comprises five of the eight core courses your MSc is built upon. Semester 2 comprises a further three core courses and a selection of option courses. Across the programme, learning is achieved via a combination of methods including lectures, seminars, workshops, student presentations and research assignments. Opportunities for experiential learning are offered via projects sponsored by external organisations.

**Dissertation**
Your MSc concludes with a dissertation. Informed by your course learnings, your dissertation is an individual research project on topics at the intersection of finance and technology, or financial technology and policy. It is possible also to include all three elements within one topic. Dissertations can take the form of a business report – which may be industry sponsored – or a business plan.

**Career progression**
Students graduating from this programme will be equipped to apply for a broad range of positions. These include posts as product developers or managers in financial technology product-based firms, and fund managers and product development team leads in Fi trading/investment desks and back offices. Further opportunities include roles in market and consumer research enterprises, regulatory agencies and in government ministries and departments. The programme also opens the door to positions in the voluntary sector and to further research at PhD level.

**Valued by employers**
Graduates across the School’s MSc courses regularly secure posts with leading employers. Given the growth of the Fintech industry and the move of many financial institutions to embracing the disruptive nature of Fintech, the School is confident that knowledge and skills gained from completing this MSc will place you in an excellent position to advance your career.

**Our MSc in Finance, Technology and Policy applies principles of financial economics, sociology, and practical programming and big data analysis to help students focus on solving real problems and developing the skillsets that are relevant for employers now and in the future. Students can also tailor their degrees to include other relevant aspects of operating within the Fintech space.**

**The Edinburgh Futures Institute**
This Master’s degree is being launched as part of the newly established Edinburgh Futures Institute at the University. Although led by the Business School, this programme is drawing on the expert knowledge and research from across a number of disciplines within the University allowing for students to benefit from different approaches and viewpoints on how to tackle complex problems such as the ones being faced globally by the financial markets and financial services firms. We have also sought and received input in the development of the programme from industry partners including Fintech Scotland and its members.

Decades of relentless technological advancements and new regulations have substantially altered how financial services are delivered. Today’s financial markets and products are more complex than ever, with algorithms, rather than humans, now executing the majority of trades in financial markets, determining the credit-worthiness and interacting with consumers in the delivery of financial services. The skills required to succeed within the finance sector have thus inevitably become more complex, with financial institutions, looking to take advantage of the growing availability of big data, demanding increasing levels of technological and financial sophistication from new recruits as well as existing workers. The ability to develop complex technical solutions is now prized as much as the understanding of the economic interactions generating big financial and consumer data. Our MSc in Finance, Technology and Policy has been developed to equip you with the skills to meet these existing industry challenges and future ones.

A MESSAGE FROM THE PROGRAMME DIRECTOR . . .

Dr Gbenga Ibikunle

Decades of relentless technological advancements and new regulations have substantially altered how financial services are delivered. Today’s financial markets and products are more complex than ever, with algorithms, rather than humans, now executing the majority of trades in financial markets, determining the credit-worthiness and interacting with consumers in the delivery of financial services. The skills required to succeed within the finance sector have thus inevitably become more complex, with financial institutions, looking to take advantage of the growing availability of big data, demanding increasing levels of technological and financial sophistication from new recruits as well as existing workers. The ability to develop complex technical solutions is now prized as much as the understanding of the economic interactions generating big financial and consumer data. Our MSc in Finance, Technology and Policy has been developed to equip you with the skills to meet these existing industry challenges and future ones.
**PROGRAMME STRUCTURE**

**SEMESTER 1**
- Financial Markets and Investment
- Financial Valuation
- Python Programming
- Data Value Chains and Constellations
- Markets Design and Policy

**SEMESTER 2**
- Modelling, High Frequency Trading and the Sociology of Finance
- Modern Financial Market Microstructure
- Introductory Applied Machine Learning
- Select 30 credits worth of option courses (either 2 or 3 courses in total)

**SUMMER**
- Dissertation

**OPTIONS**
- Optimisation Methods in Finance
- The Human Factor
- Cybercrime (and cybersecurity)
- Artificial Intelligence, Risk and the Law
- Technology, Entrepreneurship and Commercialisation
- Innovation-driven Entrepreneurship
- Ethics of AI
- Financial Engineering
- Behavioural Finance
- Investment Management
- SAS Programming for Financial Analysis

For more information on application and entry requirements please see back page or visit our website. [business-school.ed.ac.uk/msc/finance-technology-policy]

**LEARNING OUTCOMES**

Demonstrate an advanced knowledge of key theoretical finance and economic concepts underpinning financial markets

Critically compare, contrast and evaluate the different machine learning techniques in terms of their applicability to solving problems in finance, this can be demonstrated by students using appropriate software to apply techniques to a given set of data

Have an in-depth understanding of the relationships existing among the key global financial systems; for example, how bond yields dictate investment in equity and its derivatives

Conduct valuation of financial instruments and projects within relevant regulatory contexts

Trade financial instruments on exchanges/trading platforms by using state-of-the-art software packages and harnessing the power of relevant real-time financial data

Demonstrate an appreciation of the role played by policies in shaping financial services delivery and financial markets

Critically evaluate markets by being able to competently present arguments on the criticisms of the current set up and offer the basis for the development of alternative technology-based markets and financial services products

Demonstrate an appreciation of the social dimensions of technology use in financial markets
The portfolio of Human Resource Management responsibilities is evolving. Our fully accredited MSc is ideal for the next generation of managers – those who will embrace broader policies connected to areas like incentive design and work-life balance. Join this course and you will develop intimate, specialist knowledge of HRM concepts. You’ll gain the people-management skills crucial to modern business and essential to success across dynamic organisations.

This is a programme that acknowledges the implications of changing economic, financial, demographic and political landscapes. You’ll be taught by a faculty producing internationally recognised research on topics including recruitment, remuneration and retirement.

**Structure and assessment**
Following induction and welcome week, you will study four core courses in Semester 1. Semester 2 brings the two remaining core courses, and two option courses that allow you to specialise. Learning is achieved through lectures, set reading, exercises and case studies. Each course component is assessed using a combination of formal examination, individual/group assessment and presentations.

**Dissertation**
Your dissertation brings together all your course learning and insights. This is a unique project – a chance to express your knowledge - and should align with your career ambitions. Thanks to the School’s extensive links with industry, it’s possible you could base your dissertation on a live company issue.

Previous dissertation topics have included: Bonus schemes and motivation; Diversity in the workplace; Executive pay and performance; The effectiveness of LinkedIn as a recruitment tool; A study of redundancy survivors; Talent management and people analytics in HR; Motivation of knowledge workers; The impact of music on performance; and Rewards and recognition in the public sector.

**Career progression**
Your MSc will prepare you for a wide range of potential positions across the HRM sector. Roles can include: Careers Advisor; Equality and Diversity Officer; HR Analyst; HR Advisor; HR Compliance Administrator; HR Employee Benefits Manager; HR Generalist; HR Manager; HR Rewards Manager; Recruitment Manager and Reward Analyst.

Valued by employers
Leading employers will recognise and value your Master’s degree from the University of Edinburgh. Recent graduates from our Management portfolio of Masters (including HRM) programmes have gone on to work for a range of organisations including:

- Accenture
- Baker McKenzie
- Capita HR Solutions
- FDM Group
- Jet Airways India Ltd
- REED
- Virgin Money
- Willis Tower Watson

**Your MSc - Accredited by CIPD**
The CIPD is the main professional body to accredit and award professional Human Resources qualifications. The CIPD’s qualifications are the recognised professional standard for HR and training specialists working across the UK’s public, private and charity sectors.

**LEARNING OUTCOMES**

- Demonstrate an understanding of key terms, theories/concepts and practices within the field of HRM
- Obtain through elective courses an in-depth knowledge of specific Human Resource Management-related theories, skills and practices through elective courses
- Develop an ability to undertake qualitative and quantitative research and apply this knowledge in the context of an independently constructed work (i.e. dissertation)
- To be able to identify and appreciate the significance of ethical issues in HR practices and the management of people in the workplace
## Programme Structure

### Semester 1
- Core Competencies for HR Professionals
- Organisational Behaviour
- Human Resource Management in Context
- Reward Management

### Semester 2
- Managing Employment Relations
- Methods of Research in HRM
- Students choose 2 option courses
  - Option 1
  - Option 2

### Summer
- Dissertation

### Options
- Change Management
- Employment Law
- Global Diversity and Equality Management
- Global Talent Management
- HR Issues in Outsourcing
- Leadership and Management Development

---

### Graduate Profile

**Vera Schneider**  
Management Consultant at Accenture  
**MSc in Human Resource Management**

I was hired by a large consumer goods company for a HR consultancy position regarding a major business and HR transformation. The MSc equipped me perfectly in terms of the underlying theories as well as the state of the art practice and knowledge for that role. I then joined Accenture as a management consultant in the field of talent and organisation, where I am helping to shape the future of HR for world-leading organisations operating in different industries.

Looking back, I would come to the exact same decision when applying for an MSc programme in the field of HR as I benefited personally, academically and especially professionally. Moreover, the programme is CIPD accredited which gives you access to ample resources and an international HR practitioners network.

For me the interaction during group work with people from all kind of personal and academic backgrounds enabled me not only for a deep cultural experience but also allowed me to learn more about myself. Pursuing the programme as an experienced student who has already worked in HR, I very much enjoyed the application of academic knowledge on practical topics such as case studies and real-life examples.

For more information on application and entry requirements please see back page or visit our website.  
MSc in International Business and Emerging Markets

Across a dynamic global economy, emerging markets are developing increasing significance. Suited, but not limited, to those with a background in commerce and finance, our MSc will focus your studies on the challenges faced in today’s globalisation context.

These challenges are varied. They include issues like global governance in international business, the development of corporate strategy, business internationalisation and attracting foreign direct investment. This programme has been prepared to equip you with the skills and knowledge you’ll need to address these questions, and to operate successfully in countries with different cultures, institutions, laws and business practices.

If you’re from an emerging economy, you will gain knowledge of contemporary thinking in corporate strategy. You’ll study crucial areas including technology, financial management, business economics and development-related public policies. Students from established economies will gain an understanding of how businesses can benefit from the globalisation of the world economy and the rapid development of new economic powerhouses.

However you approach the programme, you’ll work alongside the School’s Student Development Team. Here, in the Business Lab environment, you will develop the personal skills essential to effectively dealing with peoples and businesses in a multicultural context.

Structure and assessment
Following induction and welcome week, you will study three core courses and one option course in Semester 1. Semester 2 brings two more core courses alongside two option courses. These are drawn from an extensive, annually reviewed list. Learning is achieved through lectures, set reading and case studies. Assessment methods comprise a combination of formal examination, individual/group assessment and presentations.

Dissertation
Your MSc concludes with a dissertation. This personal piece of work brings all of your year’s learning together. Your dissertation should have a focus on international business and emerging markets, and it should align with your career plans.

Previous topics chosen by students include: The role of Government in business development in Dubai; How can entrepreneurs enhance the tourist potential of Malawi?; Microfinance and informal lending activities of women entrepreneurs in Africa; Promoting technological innovation to emerging markets and Diversification strategy of firms from emerging markets.

Career progression
This programme could lead to a multitude of roles, including:
Analysts, Business consultant, Corporate Manager, Human Resources Manager, various roles in Investment Banking, Project management roles, Sales and distribution positions.

Valued by employers
Recent graduates from our Management portfolio of Masters programmes (including International Business and Emerging Markets) have gone on to work for a range of organisations including:
• Amazon
• Antal Russia
• Bahana Securities
• C3 Creative Code and Content
• Clínicas del Azúcar
• Coco-Mat
• Commerz Business Consulting
• Fairmont The Palm (Dubai UAE)
• FMC Technologies
• Greenland Holding Group Company Ltd
• Infor

Group Consultancy Projects
Working in a team, and supported by academic staff, you will carry out a hands-on company projects. This part of your course connects you with a real business clients as you apply course learning to genuine challenges. Recent projects have supported:
• Scottish Businesses entering China, India and Latin America
• Early stage Colombian companies looking to internationalise.

LEARNING OUTCOMES

Understanding of the key issues relating to the competitiveness of international business

Understanding of the key issues relating to international business from both a theoretical and business perspective

Appreciation of the dynamism of individual nations, and especially emerging markets including China, India and other transitional economies

Techniques and skills to work effectively with companies on specific international business projects
## Programme Structure

### Semester 1
- Developing Knowledge-based International Businesses in Emerging Economies
- Doing International Business Projects with Emerging Markets 1
- Current Debates in International Business and Emerging Markets
- Students choose 1 option course
  - Option 1

### Semester 2
- Doing Business Projects in Emerging Markets 2
- Research Methods for International Business
- Students choose 2 option courses
  - Option 1
  - Option 2

### Summer
- Dissertation

Please note courses are subject to change and correct at time of printing.

### Options
- Semester 1
  - Accounting and Financial Management
  - Marketing Management
  - Organisational Behaviour
  - Service Management
  - The Entrepreneurial Challenge: Creating a New Venture
- Semester 2
  - Global Creative Industries
  - Organising for Social Change: Strategy, Governance and Innovation
  - Financial Analysis
  - Global Financial Markets and Emerging Economies
  - Global Strategic Management: Issues and Perspectives
  - Corporate Responsibility & Governance in a Global Context
  - International Marketing Strategy

### Graduate Profile

**Syliva Zhao Zhou**
Research Associate, Gerson Lehrman Group
MSc in International Business and Emerging Markets

The knowledge that I learnt from the professors, for instance Economics, International Strategy and Entrepreneurial Venture, as well as its emphasis on Emerging Markets, has been really helpful when working back in China. Besides that I have also gained skills that cannot be taught. Through interactions with fellow students and professors, academic staffs from different background, I have earned communication and social skills that I did not sign up for, which is significantly valuable when interacting with clients and colleagues.

I was offered an internship of Digital Marketing Executive at Rabbie’s Trail Burners, a tourism company based in Edinburgh after I did a consulting project as part of the Doing Business with Emerging Market class. I then decided to come back to China and start my career in Shanghai. I am now in my current job with GLG, my team offers investment research support to top financial institutions. I am now working on several projects across regions with different clients.

This might sound unreal to some of you, but my favourite memory was actually the time I spent in the library working on my dissertation. I was under a lot of pressure, and the dissertation was really hard. But now when I look back, I am grateful for those days and I thank Dr. Rick Woodward for supervising me and helping me throughout the whole process, I have learnt so much from it.

---

For more information on application and entry requirements please see back page or visit our website. [business-school.ed.ac.uk/msc/international-business](http://business-school.ed.ac.uk/msc/international-business)
MSc in International Human Resource Management

An organisation’s people are often both its most valuable and costly resource. Globalisation, changing demography and shifting economic and political landscapes are imposing new thinking, new opportunities and new practices on effective HR management. It’s a genuinely exciting time for this discipline and its practitioners.

Combining practice and theory, our fully accredited Masters concentrates on developing knowledgeable HR professionals who are primed to operate across national borders. With a true international focus, our programme places you at the forefront of research-led education. Thanks to carefully developed core and option courses, you will graduate from this MSc with the confidence and ability to apply learning and knowledge to a variety of real-world international HR issues.

Structure and assessment
Following induction and welcome week, four core courses make up Semester 1. In Semester 2 you’ll study two more core courses and, allowing you to specialise, two option courses. Learning is achieved through a combination of lectures, tutorials, presentations, research assignments, and the year-end dissertation. A range of assessments include team presentations, essays and formal degree exams.

Dissertation
Your dissertation unites all of the year’s learning in one unique piece of work. Your chosen subject should have an international HRM focus, and it should reflect your career ambitions. Examples might include topics like Repatriation; Expatriate management and Transfer of HR practices from headquarters to subsidiaries.

Career progression
Your MSc is focused on your employability. It will help you stand out by equipping you with specialist knowledge, insights and practical skills. The specialist knowledge it delivers opens the doors to positions including:

- International careers advisor
- Quality and diversity officer
- International HR analyst
- Employee benefits manager
- Compliance administrator
- HR rewards, personnel, or recruitment manager

Valued by employers
Leading employers will recognise and value your Master’s degree from the University of Edinburgh. Recent graduates from our Management portfolio of Masters programmes (including International HRM) have gone on to work for a range of organisations including:

- Adecco
- AON
- Deutsche Bank
- Mitsubishi UFJ Financial Group
- SymbaSync Ltd
- UN Refugee Agency (UNHCR)
- VFS Global
- World Profile Group

Your MSc - Accredited by CIPD
Reflecting its high standards and vocational strength, your MSc is fully accredited by the Chartered Institute of Personnel and Development (CIPD). The CIPD is the main professional body to accredit and award professional Human Resources qualifications. The CIPD’s qualifications are the recognised professional standard for HR and training specialists working across the UK’s public, private and charity sectors.

LEARNING OUTCOMES

Demonstrate an understanding of key terms, theories/concepts and practices within the field of HRM

Obtain, through elective courses, an in-depth knowledge of specific HRM-related theories, skills and practices

Appreciate the implications of increasing globalisation for the management of human resources, with particular reference to HRM in multinational corporations

Develop an ability to undertake qualitative and quantitative research and apply this knowledge in the context of an independently constructed work (i.e. dissertation)

To be able to identify and appreciate the significance of ethical issues in HR practices and the management of people in the workplace
### Programme Structure

#### SEMESTER 1
- Core Competencies for HR Professionals (IHRM)
- Organisational Behaviour
- International HRM Policies and Practices
- Reward Management

#### SEMESTER 2
- Multinational Enterprises & Comparative Employment Relations
- Methods of Research in HRM

Students choose 2 option courses
- Option 1
- Option 2

#### SUMMER
- Dissertation

#### OPTIONS
- HR Issues in Outsourcing
- Global Diversity and Equality Management
- Global Talent Management

---

**Border-free business**

International. It’s just one word, but it’s at the heart of your MSc in International Human Resource Management. This course builds upon the long-standing success of our Human Resource Management MSc to offer a programme with a strong international emphasis and a clear focus on the distinct disciplines of global HR. Course names across the two programmes may be similar but the teaching will be tailored towards an international focus for this particular MSc.

**Designed for destinations**

Robust, up-to-the-minute theory and practice equip graduates to work in almost any territory.

**Global - just like our graduates**

Students join our School from across the world, establish valuable networks and learn key skills from one another.

---

**Graduate Profile**

**Amy Lindley**

People Advisor at Captify Technologies Ltd

**MSc in International Human Resource Management**

At the end of my studies I gained an HR Assistant position at Yieldify, a marketing technology start-up based in London. After 9 months I followed my manager to Captify and took a step up to a HR Advisor role. I love working in smaller companies where I can help create new HR policies and processes. A Master’s degree from one of the best business schools in the world definitely stands out on my CV, and hugely influenced my quick progression.

Beyond all else, the learning environment was the most valuable part of my time in the International HRM programme. It was a learning hothouse comprising focussed and highly qualified teaching staff, a dedicated student development team, and motivated peers from many countries and cultures.

I doubt I will forget the Burns Night dinner hosted by the Business School; a wonderful celebration of Scottish culture shared with great friends I met on the programme... and a few wee drams of the local malt.

For more information on application and entry requirements please see back page or visit our website.

[business-school.ed.ac.uk/msc/international-human-resource-management](http://business-school.ed.ac.uk/msc/international-human-resource-management)
Without good management there can be no cohesion, teamwork, direction – or business success. Equally valuable if you’re a new-start, and if you’re progressing an existing career, our MSc blends classic management techniques with contemporary thinking. It is especially beneficial if you’re approaching the course from a non-business background like engineering, sciences, social sciences and the arts.

On this course, ranked in the top 10 in the UK by the Financial Times (2017), an emphasis on practical skills will take you beyond the theory. Via workshops, simulation exercises, teamwork and the application of strategies you’ll find yourself at the heart of real-life management challenges. The result is greatly enhanced employability from an MSc packed with the insight, theories and skills successful management depends on.

Key areas you will develop include effective management in an ever-changing business environment, an awareness of how to analyse and resolve contemporary management problems and the ability to acquire, analyse and validate data.

**Structure and assessment**

Following induction and welcome week, you’ll study four option courses in Semester 1. Semester 2 brings the Methods of Research core course and three option courses you’ll select from an extensive, annually updated list. Learning is achieved through lectures, set reading, exercises and case studies and is assessed by formal examination, individual/group assessment and presentations.

**Dissertation**

Your MSc concludes with a dissertation. This gathers together all of the year’s learning in one personal piece of work. Your dissertation topic is your own choice, but it should reflect your career plans. Previous topics have included: How far does Human Resource Management influence the management of change?; Fair Trade: Improving the livelihood of poor coffee farmers in Ethiopia; Consumer expectation and adoption of online banking in China; Building a sound relationship with customers through loyalty programmes and The impact of job losses on organisational commitment: Implications for HRM.

**Career progression**

Your MSc is focused on enhancing your employability. It is highly regarded by leading employers, with graduates securing positions at a variety of firms including well-known names such as KPMG, McKinsey & Co and Deloitte. Graduates in this programme will typically pursue roles in a wide variety of areas including: Auditing, Business development, Finance, Management consulting, Management, Marketing or PR, Project Management, and Strategy consulting.

**Valued by employers**

An MSc in Management prepares you to make an impact across a variety of businesses and sectors. Recent graduates from our Management portfolio of Masters programmes have gone on to work for a range of organisations including: • 2M Consultancy
• Deloitte
• GlaxoSmithKline Investment Co Ltd
• KPMG
• Mastercard
• McKinsey & Co
• Nordea
• PwC
• United Microelectronics Corporation
• US Bank
• Vanguard

**Group Consultancy Projects**

During your MSc you may elect for a course which involves a consultancy project; this involves working closely with companies or businesses as part of a team to assist with a real-life active project. In most cases, the client will ask you to write a report which you will research and develop during the taught component of the course. Furthermore, there is likely to be an opportunity to present your findings back to the business. Topics range from broad, strategic issues to more specialised business matters. Your group will have to work together to produce clear and practical recommendations while meeting deadlines. Last year a number of students on our MSc in Management programme embarked on an international consultancy project working with a hotel group based in Gran Canaria, Spain.

**LEARNING OUTCOMES**

- Demonstrate a general knowledge framework and understanding of key functions in management as applied in practice
- Obtain through electives in-depth knowledge and understanding in more specific management related areas
- Identify and appreciate the ethical issues in management decision areas
- Obtain an understanding of how to undertake qualitative and quantitative research and apply this knowledge in the context of a major independent work (e.g. final dissertation)
**PROGRAMME STRUCTURE**

  - Leadership and Management Development
  - Marketing of Services
  - Organising for Social Change: Strategy, Governance, and Innovation
  - Outward Investment from Emerging Markets
  - Technology Entrepreneurship and Commercialisation

**GRADUATE PROFILE**

**Andrea Wiesinger**  
Account Manager at Amazon Germany  
MSc in Management

I made most key learnings for my future career during the various group projects in this programme. Working with students from various disciplinary backgrounds showed me how to seek diverse perspectives on topics and how to disconfirm my own beliefs in order to achieve great results together.

After graduation, I started my position as an Account Manager at Amazon Germany where I am initiating and developing strong relationships with sellers in the German Marketplace as well as working on business solutions to better serve customers.

Next to the academic insights, studying at the University of Edinburgh Business School gave me the opportunity to connect with like-minded people from all over the world. For me, the international network and friendships that resulted from my studies in Edinburgh are the most valued part of my student experience there.

For more information on application and entry requirements please see back page or visit our website.

Marketing professionals are at the heart of the strategic decisions behind successful products and services. From development through production, pricing, distribution and promotion, these decisions impact both customers’ needs and company bottom line. Making the right calls requires sound knowledge of marketing fundamentals.

This MSc will help you develop a career as a critical, reflective marketer. Tailored to graduates from a general business or management-related discipline, our programme will offer you in-depth marketing expertise. A robust course emphasises the integration of theory and practice with the skills and knowledge employers are looking for. Delivered by a faculty drawn from the School’s vibrant Marketing Group, you will benefit from a variety of multi-sector research activities, findings and debates.

**Structure and assessment**

Your MSc begins with a comprehensive induction and welcome week. This is followed by the four core courses that make up Semester 1. In Semester 2 you will partake in one further core course and then select three option courses from an annually reviewed list. These courses focus on specific areas, allowing you to match your studies to your career goals.

Learning is achieved through lectures, set reading and case studies, and assessed using a combination of formal examination, individual/group assessment and presentations.

**Dissertation**

Your MSc concludes with a dissertation that unites all of the year’s learning in one unique piece of work. Your dissertation subject will typically relate to your interest in an aspect of marketing, an emerging trend or a particular company or sector. Often, topics reflect career plans.

Previous subjects have included: Consumers as supporting actors: a cross-cultural study of film consumption in Brazil and the UK; An examination of mobile apps in the geotargeting of fashion consumers; A study of body image and consumption behaviour in UK fitness centres; To what extent do loyalty schemes generate brand loyalty for retailers?; Ethical consumption in Greece: quantitative insights into attitudes towards fairtrade products; More than a game: the symbolic consumption and identity construction of football fans in the UK and US; A cross-cultural study of the relationship between brand personality and brand equity amongst grey consumers.

**Career progression**

Your MSc in Marketing can lead to varied client or agency positions across marketing, branding, digital and public relations. Typical graduate roles include: Marketing Manager; Agency Account Coordinator/Executive; Product/Brand Manager; Product Development Manager; Brand Strategist; Marketing Communications Coordinator; Media Planner; Marketing Data Analyst; Sales Account Manager; Digital/Social Media Marketing Manager and Public Relations Manager.

**Guest Speakers**

Our programme attracts a range of talented marketing practitioners and academics who will share their experiences and expertise with you. In addition to being embedded into individual courses, these guest speakers will engage with you in programme-wide workshops and site visits.

**Talks have included subjects such as:**

- Social media and digital marketing
- Branding in the alcohol industry
- The use of mobile applications to drive revenues
- Behavioural economics
- Sports marketing
- Digital virtual goods
- Use of data insights in campaign development
- Working in agencies
- Masterclass in pitching
- Rebranding products
- Experiential marketing

**Valued by Employers**

Your MSc in Marketing will prepare you for a variety of career paths and destinations. Recent graduates from our Marketing portfolio of Masters programmes have gone on to work for a range of organisations including:

- Amazon
- EY
- IPG Mediabrands
- Louis Vuitton
- MAM Babyartikel
- Movent (A Group M/WPP Group)
- ONE Championship
- RBS
- Star Fashion Group
- Trivago
- TLC Marketing Worldwide

For more information on application and entry requirements please see back page or visit our website. [business-school.ed.ac.uk/msc/marketing](http://business-school.ed.ac.uk/msc/marketing)

- Critically evaluate the Marketing function and the role it plays in achieving organisational success both in commercial and non-commercial settings
- Evaluate and act upon the ethical and environmental concerns linked to Marketing activities

Graduate Profile

Lars Haitjema
Social Advertising Consultant (Medior) at IPG Mediabrands

MSc in Marketing

The fundamental way my degree has prepared me for my future career is the focus on creating different points of view for every situation and thought process. By challenging everything, I've found myself becoming more creative and able to apply this to my daily duties.

The most valuable part of the degree to me has been the ability to create lifelong connections with people all over the world. Everyone from my year is working somewhere else. Everyone can help each other and offer insights in to certain business areas or questions. Furthermore, the university offers such a vast wealth of knowledge through the library, this has helped me achieve immense in depth knowledge of the subjects which still helps me every day.

I met my girlfriend a few months in to the programme. But in all seriousness, my favourite memory of the year must be the graduation ceremony. Everyone was glowing with happiness and pride and we were all celebrating our achievement together.
Marketing professionals are frequently utilising data analysis and predictive modelling to shape key decisions. Increasingly, these activities are being seen in areas including customer profiling, data mining and forecasting. Led by a quantitative approach, our MSc will offer you an in-depth study of the marketing and management science disciplines behind these interventions.

This programme is ideal if you’re from a general business or management-related field. It delivers a unique learning experience that will see you exploring the theoretical marketing foundations and business modelling approaches at the heart of marketing decisions.

Reflecting this, core and elective courses are shared equally between marketing and management science, giving you expertise in both areas. Delivered by the School’s renowned Marketing faculty, this programme also benefits from the School’s Management Science Group whose expertise and experience informs a number of the courses.

Structure and assessment
Following a comprehensive induction and welcome week you will study four core courses in Semester 1. Enabling you to tailor your MSc, in Semester 2 four option courses are chosen from an extensive, annually reviewed list. Learning is achieved through lectures, case study and computer-based tutorials, group work and set readings. You work will be assessed using a combination of formal examination, individual/group assessment and presentations.

Dissertation
Your MSc concludes with a dissertation. This brings all of your year’s learning together in one unique piece of work that should reflect your career plans.

Past topics have included: Sales forecasting in the fast-moving consumer goods industry; Good debt – Bad debt: an investigation into the use of credit scoring techniques in assessing default of customers; The use of simulation in business decision-making: insights from manufacturers and retailers; Does measurement matter? An examination of the use of marketing metrics in small and medium-sized businesses; data mining in the clothes industry: a case study on the harvesting of customer data in a national clothing retailer; To what extent can performance measures improve marketing effectiveness in multinational companies? and Distribution decisions: how can decision trees and resource allocation models assist managers?

Career progression
Your MSc will give you the knowledge and practical skills essential for a range of roles. Examples include:
- Consumer/Market/Social Researcher;
- Trend Analyst;
- Data Insight Analyst;
- Marketing Campaign Analyst;
- Data Mining Statistician;
- Business/Marketing Consultant;
- Credit Analyst;
- Account Planner;
- Marketing Communications Manager;
- Digital Marketing.

Valued by Employers
Your MSc is highly rated by a broad range of recruiters. Recent graduates from our Marketing portfolio of Masters programmes have gone on to work for a range of organisations including:
- Adapty
- American Express
- Analytic Partners
- Brandwatch
- Google
- Henkel
- Kantar Media
- Semantix Sweden
- Sopra Steria
- Tesla Motors China

Guest Speakers
The School regularly welcomes industry speakers from a variety of sectors. Guests have included:
- Sainsbury’s Bank Database Marketing Manager
- Accenture Global Head of Strategy
- AEGON Head of Strategy
- First ScotRail Managing Director
- Glenmorangie Operations Director
- Lloyds TSB Chief Economist
- Roche Group CEO
- Royal Bank of Scotland Head of Group Analytics
- Scottish Development International Operations Director
- Shell General Manager of Oil Market Analysis
- Siemens Chief Financial Officer
- Tesco Chairman
- VisitScotland Head of International Marketing
- Weber Shandwick Managing Director
- Wolfson Microelectronics Co-Founder and Non-Executive Director

Talks have included subjects such as:
- Market analysis for online games
- Digital marketing strategies for a bank
- Risk management methodologies used in public, private and NFP organisations
- Tackling the credit cycle and too big to fail
- New market analysis for an online travel site
- Incentives, models and the credit crunch

- Discuss the challenges facing marketing decision-makers in modern organisations
- Collect, analyse and synthesise a range of information sources to inform discussion on topical issues in marketing and business analysis
- Explain, apply and evaluate qualitative and quantitative approaches to marketing and business analysis problems

GRADUATE PROFILE

Melissa Jaramillo Lopez
Senior Consultant, EY
MSc in Marketing and Business Analysis

For my undergrad, I studied industrial engineering and social sciences in Colombia. Before starting the MSc, I worked a couple of years in small consultancy doing business analysis, and then a couple of years as a Business Analyst looking at economic trends, performance improvement, and market analysis. During my studies, I fell in love with Edinburgh and I decided to stay, so after graduating from the MSc I started a job as a Senior Consultant with one of the Big 4. I work for UK major banks helping to innovate and improve their processes to provide even better services for all us.

In the MSc I put in practice a full range of skills required for my job. For example, every day at work I talk about customer journeys and service delivery. I am constantly thinking critically to solve questions around the value delivered to the customer. I work in multi-cultural teams to deliver projects in demanding timelines, and I need to clearly communicate my ideas to different audiences in challenging environments, just to cite a few examples of the skills I gained that prepared me for my career.

Rather than the most valuable, what was invaluable of the MSc are the friendships I made that I am sure I will keep for life. You suddenly gain this family from different backgrounds and languages along with valuable lessons about subjects you would never imagine to learn about. For example all the traditions of Indian weddings, the secrets of Austrian baking, or the similarities between Latin American and Philippino people.
Making an Application

ARE YOU READY FOR THE CHALLENGE?

Finding out more
We encourage you to attend one of our Open Days or make an appointment to come and visit the campus. If you are not able to make it to campus you also have the opportunity to find out more by meeting some of our staff and alumni at various Masters Fairs taking place globally. Details of forthcoming events and opportunities are posted on our website. We can also arrange one-to-one sessions with our Student Recruitment Manager or Programme Directors either via Skype or telephone.

Educational and professional experience

Entry requirements
The entry requirement is normally a UK first or 2:1 Honours degree from a University. Our website clarifies international equivalents to the desired UK 2:1/1st Honours degree. Individual programmes may have slightly different requirements so please visit our website for up-to-date information.

Professional experience requirement
Work experience is not required, although relevant experience may increase your chances of acceptance. Conditional offers can be made whilst you wait for a final degree result/language score result.

English language
If English is not your first language, you must satisfy one of the following requirements:

- Internet based Test of English as a Foreign language (TOEFL) – Overall score of 100 or above (with a score of at least 20 in each section).
- International English Language Testing System (IELTS): Overall score of 7.0 or above (with a score of at least 6.0 in each section)
- Cambridge Certificate of Proficiency in English (CPE): 185 (at least 169 in each module)
- Cambridge Certificate in Advanced English (CAE): 185 (at least 169 in each module)
- Pearson Test of English (PTE): Overall score of 67 or above (with a score of at least 56 in each section).
- Trinity Integrated Skills in English (TSE): ISE III (with a pass in all four components)
