Architecture & Landscape Architecture, Art, Design, History of Art & Music

Postgraduate Opportunities 2019

Influencing the world since 1583
“Edinburgh isn’t so much a city, more a way of life … I doubt I’ll ever tire of exploring Edinburgh, on foot or in print.”

Ian Rankin
Best-selling author and alumnus
For more than 400 years the University of Edinburgh has been changing the world. Our staff and students have explored space, won Nobel Prizes and revolutionised surgery. They’ve published era-defining books, run the country, made life-saving breakthroughs and laid the foundations to solve the mysteries of the universe.

Our distinguished alumni include NASA astronaut Piers Sellers, former MI5 Director-General Dame Stella Rimington, Olympians Sir Chris Hoy and Katherine Grainger and historical greats such as philosopher David Hume, suffragist Chrystal Macmillan, who founded the Women’s International League for Peace and Freedom, and physicist and mathematician James Clerk Maxwell.

International collaboration
An internationally renowned centre for academic excellence, we forge world-class collaborations with partners such as the California Institute of Technology (Caltech), Stanford University, the University of Melbourne, Peking University, the University of Delhi and the University of Kwazulu-Natal. As a member of the League of European Research Universities and the Coimbra Group, we link up with leading institutions across Europe.

Linking research and commerce
We were one of the first UK universities to develop commercial links with industry, government and the professions. Edinburgh Innovations promotes and commercialises our research excellence and can assist you in taking the first step to market, through collaborative research, licensing technology or consultancy.

Enhancing your career
We are committed to embedding employability in your University experience and have an impressive track record for graduate employment. From volunteering schemes to our sector-leading careers service, we provide you with opportunities to develop your skills, knowledge and experience, giving you an edge in the competitive job market.

TOP 50
We’re consistently ranked one of the top 50 universities in the world. We’re 18th in the 2019 QS World University Rankings.

4th
We’re ranked fourth in the UK for research power, based on the 2014 Research Excellence Framework.*

83%
The majority of our research – 83 per cent – is considered world leading or internationally excellent.*

TOP 100
We are ranked in the top 10 in the UK and in the top 100 in the world for the employability of our graduates.†

£373m
In 2016/17 we won £373 million in competitive research grants.

24
We are associated with 24 Nobel Prize winners.

13th
We’re ranked 13th in the world’s most international universities.‡ Since 2010, we have taught students from 82 per cent of the world’s countries.

* Times Higher Education, Overall Ranking of Institutions
† Times Higher Education, Global Employability University Ranking 2017
‡ Times Higher Education, The World’s Most International Universities 2017
Taught masters programmes

Edinburgh College of Art (ECA) offers a range of taught postgraduate qualifications: MSc, MA, MFA, MArch, MMus and MLA.

They all give you the opportunity to pursue an area of interest in greater depth, or to develop more specialised skills to further your career. These programmes will also equip you with the skills necessary to pursue further research.

A Master of Science (MSc) is a widely recognised postgraduate qualification, indicating masters-level study within music and architecture respectively. Similarly a Master of Landscape Architecture (MLA) is awarded for landscape architecture.

Additionally at ECA a significant number of our postgraduate programmes culminate in either an MA (Master of Art) or an MFA (Master of Fine Art). The key difference is that the MA runs for one year (two semesters plus the summer period for project work) and the MFA runs for two years (over four semesters). Most programmes offer progression routes from the MA to the MFA.

Although our postgraduate programmes are associated with and managed by individual schools within ECA, some have an embedded, cross-disciplinary pedagogy. For example, the MSc Material Practice, delivered jointly by Edinburgh School of Architecture and Landscape Architecture (ESALA) and the School of Design, is intended for students from a variety of disciplines.

Art programmes

Contemporary Art Practice

MA 1 yr FT (2 yrs PT available for UK/EU students), MFA 21 mths FT

Programme description

This studio-based programme offers a constructive, critical environment for artists wishing to develop their practice. Our international students produce artworks in a range of media, using print, sound, performance, photography, video, sculpture and digital animation. You will receive a studio space and a studio tutor. Teaching is primarily by one-to-one tutorials and mixed year group critiques with a year-round programme of visiting artists. We emphasise the centrality of conversation and dialogue to developing innovative art and create a supportive environment to nurture risk-taking as fundamental to producing ambitious original art.

Courses examine key contemporary art developments and ways in which artists can self organise, collaborate and curate opportunities to exhibit. We emphasise the application of theory to practice, and vice versa, and you will collaborate on self-organised exhibitions at ECA and at our partners (currently Embassy Gallery, The Number Shop, WhiteSpace and Suede Gallery). Theory courses encourage creative and academic responses to key contemporary art debates and we insist on research projects that are connected to studio work. Graduates produce exhibitions internationally, and have been selected for major residencies, exhibitions and prizes such as Bloomberg New Contemporaries, Saatchi New Sensations, Glasgow Film Festival and Edinburgh International Art Festival.

Programme structure

You will study key debates and issues central to the development of contemporary art. For example, the studio-based course Practice will encourage you to critically evaluate working methods and theoretical positions, through tutorials, group critiques and workshops. This is supported by a seminar-based course Methods, where you will work collaboratively to examine key texts on contemporary art and produce short presentations to stimulate discussion. Assessment is essay-based but we support creative approaches that use catalogue, artist book and online digital platform media. Our teaching is supported by regularly trips to national exhibitions, such as Glasgow International (GI), the Baltic in Newcastle, DCA in Dundee and Home in Manchester. We offer you a designated studio space and a wide range of equipment, technicians and resources such as printmaking, metal, wood, casting, painting, photography, reprographic and digital facilities.

Career opportunities

This programme enables you to develop an ambitious art practice and provides you with the organisational and economic knowledge to thrive as a self-employed artist. You will also be qualified to teach studio art in higher education and to work in the contemporary art sector.

Entry requirements

Normally a UK 2:1 honours degree or its international equivalent (www.ed.ac.uk/international/graduate-entry). You may be asked to participate in an interview via Skype. You must submit a portfolio as part of your application.

English language requirements

Contemporary Art Theory

MA 1 yr FT (2 yrs PT available for UK/EU students)

Programme description

This programme encourages a creative, holistic and practical knowledge of this increasingly expanded field, grounding practical schooling in fields such as criticism, art writing and curating, in knowledge of key histories and theories of contemporary art. The programme addresses issues raised by the practices of contemporary art, criticism and curating as a means of encouraging you to contribute both critically and practically. Artists think and act. Being contemporary means engaging with multiple perspectives and different ways of working. Students of contemporary art theory conduct research in relation to a broad range of creative, cultural and historical contexts in ways that are speculative, witty, philosophical, organisational, social and economic.

You will apply aesthetics, art theory and criticism, art historiography, anthropology, and critical theory to engage with contemporary art’s variety of media, technologies, images, artefacts, tactics, texts, cultural contexts and professional practices.

Programme structure

Coursework is based on a strategy of blended learning, combining the latest open-source educational technology with more conventional face-to-face lecture, seminar and workshop-based teaching methods. Particular emphasis is placed on the importance of peer learning, group work, field work and experiential learning.

Research projects are student-led, personalised and supervised by a team of academic staff who aim to support whichever direction is most appropriate to your interests, skills and strengths. Theory students form an integral part of our graduate school, writing, producing and commissioning projects in a family of media and adapting approaches drawn from an increasingly wide array of disciplines.

Career opportunities

This programme will enable you to develop the creative, organisational and economic knowledge required for a career in the contemporary art world, as a critic or a curator. You will also be qualified to teach studio art and theory in higher education and to work as a self-employed artist.

Entry requirements

Normally a UK 2:1 honours degree or its international equivalent (www.ed.ac.uk/international/graduate-entry). You may be asked to participate in an interview via Skype. You must submit a portfolio as part of your application. If you do not meet the academic entry requirements, we may still consider your application on the basis of your portfolio and/or relevant professional experience. Please contact us to check before you apply.

Design programmes

www.ed.ac.uk/pg/731

Taught masters programmes

Application on the basis of your portfolio and/or relevant professional experience. You must submit a portfolio as part of your application. If you do not submit a portfolio, we may still consider you on the basis of your portfolio and/or relevant professional experience.

Programme structure

The main focus of your programme will be the production of a short animated film. Although there is no set limit, most students produce a piece of between five and 12 minutes in length. This will be part of a substantive body of practical and written work that will also be submitted as part of your application.

Programme structure

This programme engages you in structured teaching through a series of design labs, which provide thematic focus to open project briefs, encouraging independent interpretation in the design studio. These labs have several aims for developing your design based skills – to develop the innovative use of analytical design research methods; to encourage application of contemporary methods of production and prototyping to discover new insights; and to facilitate cutting-edge forms of communication, interaction and dissemination of your work.

Programme structure

This programme engages you in structured teaching through a series of design labs, which provide thematic focus to open project briefs, encouraging independent interpretation in the design studio. These labs have several aims for developing your design based skills – to develop the innovative use of analytical design research methods; to encourage application of contemporary methods of production and prototyping to discover new insights; and to facilitate cutting-edge forms of communication, interaction and dissemination of your work.

Career opportunities

Our graduates find work in four main areas: animation, broadcast and web design, interactive animation; composing and visual effects; and data visualisation. Many of our graduates have gone on to careers as award-winning independent filmmakers or have followed the studio route and worked with companies such as the BBC, Channel 4, or with directors such as Tim Burton and Sylvain Chomet. We encourage you to think about a future career in academia leading to emerging fields of inquiry, including digital humanities, developmental studies and emergent forms of design.

Design for Change

Programme structure

Opportunities to undertake a work-based dissertation with a local, national, or international organisation. MA students then complete their dissertation. MFA students take a summer placement with a digital organisation then study Case Studies in Design Informatics and Data Ethics. The central premise is that you might be building and the values behind them. The central premise is that you might be building and the values behind them. The central premise is that you might be building and the values behind them.

Design Informatics

Programme structure

In this programme, you will develop an awareness of how to affect dynamic perspectives and practices employed by the fragile networks embedded in these communities. This programme is ideal if you are looking to broaden your specialist approaches from a range of disciplines with an open-ended process of making and hacking. Human designers as researchers, who weave the interstices of traditional design practices with a sense of curiosity regarding inequality and instability. This new breed are seeking to understand the diversity of sociocultural contexts, through an agile programme of hacking, making and materialising new products and services. For more information, see: www.designinformatics.org/postgraduate

Fashion

Programme description

This programme offers you an opportunity to take your design ideas to the next level, to create remarkable, challenging and visionary work that will help to transform the fashion industry and contribute your original insights to the ever-evolving world of design. You will develop an enhanced awareness of fashion as your portfolio, culminating in a showcase of your collection at our annual fashion show. You will be encouraged to challenge your existing knowledge by developing new skills that are indigenous to the ECA fashion experience, such as Design Book presentation initiative, creative cutting, and accessibility and surface-led design. We also ask you to consider topical fashion industry issues such as ethics, sustainability, social responsibility and diversity. Working with our Diversity Network, you will be encouraged to develop emotionally-considerate design solutions to address diversity of age, skin tone, size, and gender through innovation in all aspects of design research and process.

Programme structure

In Year 1, you will be encouraged to be highly experimentally, analysing a diverse spectrum of research archives in addition to creating your own innovative and innovative-fashion research archives. You will be asked to consider the following meanings of fashion: exploring the functional aspects of your ideas on real people. This frees you from standard fashion design constraints by not focusing on commercial contexts, allowing innovation and creativity to evolve. At the end of the year you will create a small design preview showcase for prestigious end of year fashion show to attract potential employers. In Year 2 you will refine your vision to a full collection presentation, paying close consideration to identifying a real-world context for your design work. You will be highly autonomous and independent; directing your own time management for your collection design and manufacture.

Career opportunities

As one of the UK’s leading institutions for the study of fashion, we graduate students are highly regarded by industry – alumni include designers such as Gucci, Balenciaga, H&M, Burberry, Cerruti, Alexander McQueen, Nicole Fahri, Stella McCartney and Issa, to name but a few.

Entry requirements

Normally a UK 2:1 honours degree, or its international equivalent (see page 52). You must submit a portfolio of fashion design projects as part of your application. If you do not meet the academic entry requirements, we may still consider your application on the basis of your portfolio and relevant professional experience. Please contact us to check before you apply.

Design programmes (continued)

Film Directing

MA 1 yr FT, MFA 21 mths FT

Programme description
This programme takes a practice-based collaborative approach to studying for an award in Film Directing (Documentary) that integrates practical film making with an analysis of contemporary practice. You will make a creative documentary or non-fiction film that defies genre definition and pushes the boundaries of narrative. 

Entry requirements
Normally a UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/international/graduate-entry), in a relevant subject area. You should have a substantial filmic experience in filmmaking and experience in directing. You should specify whether you wish to study documentary or non-fiction film directing in your online application. You must submit a portfolio as part of your application. If you do not meet the academic entry requirements, we may still consider your application on the basis of your portfolio and/or relevant professional experience. Please contact us to check before you apply.

Glass

MA 1 yr FT, MFA 21 mths FT

Programme description
Glass is a medium that crosses a range of disciplines and is used by artists, craftspeople and designers alike. This award-winning programme explores a range of glass design that encourages process-rich risk-taking, and in collaboration with the Scottish Documentary Institute, the University’s internationally-acclaimed research centre in documentary film making.

Programme structure
This programme is project-led and delivered through workshops and regular individual tutorials. It integrates practical studio work with theoretical and written studies from the screen cultures course which is run independently. Your work is initially organised around micro-films that enhance your awareness of film language and your technical skills. Visiting lecturers deliver cinematography and sound workshops. You will then prepare and shoot your graduate film, backed up by editorial tutorials and project support from a tutor, before it is edited and finished with input from group critiques. You may also attend or volunteer with Edinburgh Film Festival and the Edinburgh Pitch, to observe and engage with key players from the international documentary world.

Career opportunities
Our students work on a wide range of roles, including producers, director, writer, production or location manager, researcher, editor, assistant director or performer. Alumni have worked in the studio production of major films, or on high profile projects for BBC and Channel 4. They have also worked closely with the Scottish Documentary Institute, the University’s internationally-acclaimed research centre in documentary film making. 

Career opportunities
Alumni have worked in a wide range of creative career paths. The variety of projects, approaches and opportunities we offer enable you to apply your knowledge and experience of the design process and your considerable skills to many disciplines. Typically though our graduates leave to become members of a graphic design agency. Our extensive links with major industry and high-technology projects and research, and our range of visiting speakers, ensures you will be aware of the full range of career possibilities and have a strong footing from which to develop your career. Previous career paths have included experiential design, packaging, advertising, digital design, interior design, exhibition design, design research, marketing, retail design, exhibition design, multimedia, design management, and education.

Entry requirements
A UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/international/graduate-entry), in graphic design or a relevant subject. You must submit a portfolio as part of your application.

English language requirements
See page 52.

Fees and funding

Illustration

MA 1 yr FT, MFA 21 mths FT

Programme description
Postgraduate study in illustration reflects the diversity of the subject and the opportunities that exist in such areas as publishing, advertising, design, graphic design, environmental design, art galleries and museums. We welcome applicants with a variety of approaches to illustration, from both academic and non-academic backgrounds. You will be encouraged to explore various methods with support from accomplished and respected staff, all who have understanding and expertise in the art of illustration. Facilities include excellent individual working spaces with access to a state-of-the-art facility and professional resources. There are life drawing classes, workshops and field trips. You will also have the chance to study bookbinding, book arts, digital technologies and web publishing. The programme also includes working with writers, designers and publishers in collaboration and in live briefs. Many of our postgraduates have gone on to win prestigious awards in events such as the V&A Student Illustration Awards, AOI, Image Nation, Folio Society, Penguin Book Awards, 3x3, Raffled and D&AD Student Awards.

Programme structure
Illustration offers an excellent opportunity for independent, focused study. MA students produce a body of practical and written work on an agreed topic, with critical and reflective aspects, and a final exhibition. Self-directed projects are connected to set projects, workshops and collaborative student design agencies. You will combine practical studio work with theoretical and written studies, including professional practice, in preparation for industry employment. A lecture/seminar series examines the wider context of your studies, presented by contemporary artists, illustrators and designers. Illustration includes working to a brief and demands a high level of visual literacy of the illustrator. Working at this level reflects a global sense of identity and ambition. We will provide you with individual workspace in a shared studio.

Career opportunities
Graduates explore a diverse and exciting range of careers, including working as picture book illustrators, designers, freelance illustrators, artists and craftsmen, or in leading agencies.

Entry requirements
Normally a UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/international/graduate-entry), in illustration or a related subject that gives appropriate grounding for postgraduate study. You should demonstrate knowledge of the subject and its contemporary practice. You must submit a portfolio as part of your application. If you do not meet the academic entry requirements, we may still consider your application on the basis of your portfolio and/or relevant professional experience. Please contact us to check before you apply.

English language requirements
See page 52.

Exterior Design

MA 1 yr FT

Programme description

The main aim of this programme is not to provide a single definition of interiors, but to support you in developing a definition of your own and the skills you will need to practice that definition. The programme covers the study and design of interior spaces in relation to a wide range of public and private environments. We will support you to investigate your own innovative design projects. We will require you to explore the design potential of existing buildings and find new uses for old or redundant spaces through the design of contemporary interiors. We use the city of Edinburgh as a focus for our projects. You’ll be encouraged to focus on the aspects of interior design that you find most interesting or personally relevant, and take charge of the direction of your coursework. Your main project is supported by a series of smaller projects, allowing you to engage with other elements of interior design, design competitions and exhibitions.

Programme structure

This programme integrates practical studio work with theoretical and written studies, including professional practice elements to prepare you for employment in the industry, and a lecture/seminar series to examine the wider context of your studies. The aim is to encourage and support postgraduate students who wish to explore interior design as a means of expressing ideas and opinions. You are also encouraged to undertake a course outside of interior design to develop your thinking beyond interiors and to gain valuable experience in a related field. You will be encouraged to reflect upon this experience, in relation to your interior paradigm, as part of your wider portfolio.

Projects are based in existing historic buildings in Edinburgh, usually in need of regeneration and often significant to communities or the wider city. There is also an element of exterior design in the programme, whereby you will be responsible for the design and construction of the ECA Interiors show at the Free Range Exhibition, London.

Career opportunities

We have an enviable record of success as our graduates gain interior design work here in the UK and overseas, or set up their own businesses. Graduates have also gone on to undertake further academic study at masters level and further afield around the world.

Entry requirements

Normally a UK 1st honours degree, or its international equivalent (see page 52 for information on international graduate entry), in a relevant subject such as interior design, interior architecture, architecture, landscape architecture, product design, or 3D design. You must submit a portfolio as part of your application. If you do not meet the academic entry requirements, we may still consider your application on the basis of your portfolio and/or relevant professional experience. Please contact us to check before you apply.

Jewellery

MFA 21 mths FT

Programme description

You’ll have the opportunity to create and present a significant body of work and will graduate with the confidence to establish yourself within or beyond the field as an independent designer or creative practitioner elsewhere in the creative industries. This highly practical programme will see you exploring and developing your personal approach to a variety of approaches, from the traditional practices of the goldsmiths’ and silversmiths’ trade to the contemporary influences of art, craft, design, technology and science.

You’ll work in a vibrant, well-equipped environment, with bench spaces and access to machine and CAD workshops and studios. You’ll also have access to the range of facilities across the University to explore your work in an interdisciplinary environment.

Programme structure

The MFA runs over two academic years and is four semesters long, culminating in an assessment of your production of a body of practical and written work on an agreed self-initiated studio project. Your study will combine practical studio work with theoretical and written studies, including professional practice elements to prepare you for employment in the industry, and a lecture/seminar series that will examine the wider context of your studies.

Career opportunities

Our connections both in the UK and abroad will provide you with valuable networks to help you establish your career.

Graduates typically establish their own studios or find work with jewellery companies, creative organisations or specialist employers, while many others become part of the next generation of academics. We offer a programme that focuses on creating industry-ready professionals with students establishing their own studios or finding employment with national universities or well-known companies like the Scottish Goldsmiths Trust, the Scottish Gallery or the Dovecot Studios.

We have an impressive track record in annual competitions such as the national Goldsmiths Company New Designers Award for jewellery (won in 2014 and 2013), JOYA Barcelona, Contemporary Jewellery Award (won in 2019), Talente, the postgraduate student categories of the Craftsmanship and Design Awards in London and invited exhibitions such as Silver Schools, 2010 in Legnica, Poland, the Cominelli Foundation 2012 exhibition, Italy and CONNECT T’ 2013, SOFA Chicago USA.

Entry requirements

Normally a UK 1st honours degree, or its international equivalent (see page 52 for information on international graduate entry), in a relevant subject such as jewellery, silversmithing, metalwork, or have pursued careers in related design industries such as automotive interiors and interior design.

Performance Costume

MFA 21 mths FT

Programme description

This exciting programme of study, which aims to develop the craft and philosophy of costume design for live performance, screen or site-specific installations, is unique in its approach. You will develop your concepts and creativity by interpreting a text or exploring a theme, through consideration of the human, movement and the performance environment. Instruction in the skills of pattern cutting, textile manipulation, millinery, puppetry, set design, Computer Aided Design (CAD), welding, knitting, illustration and life drawing will help you expand your skill base. You will work on developing a comprehensive understanding of fabric, costume design and cutting, while exploring the historical and dramatic perspectives of the discipline and the process of performance. This creative freedom, and the combination of the practical developing alongside the conceptual, will provide you with a wide a range of skills and a flexibility valued and highly respected by the industry.

Postgraduate students are ideally placed to study the interaction between costume and the other arts such as fashion, textiles, jewellery, film and TV, animation, illustration, installation, music and dance, and to take part in collaborations inside and outside of the University.

This is an interdisciplinary programme, which develops your creative practice in costume design. Knowledge of the practical and theoretical aspects of costume design is expected, but you needn’t be a trained costume designer, you’ll be supported in sourcing work experience and other hands on opportunities to further develop your real world skills and experience.

Programme structure

This project-led programme is assessed by the production of a body of practical and written work on an agreed self-initiated topic which can take advantage of the many local and international performance-based opportunities. Your project could be led by narrative, theme or performance medium. It should offer scope for sustained research and design development for costume design. Your study will combine practical studio work with theoretical and written studies, including professional practice elements to prepare you for employment in the industry, and a lecture/seminar series which will examine the wider context of your studies.

Career opportunities

Postgraduate studies in performance costume open up access to a wide range of work for the stage and screen. You will benefit from the superb range of work for the stage and screen. You will benefit from the superb range of work for the stage and screen. You will benefit from the superb range of work for the stage and screen. You will benefit from the superb range of work for the stage and screen. You will benefit from the superb.

Textiles

MFA 21 mths FT

Programme description

This programme offers a rich and stimulating exploration of materials and textile processes. It has applications spanning a broad range of contexts and offers scope to think in terms of boundaries which may define what textiles can be. We’ll nurture the development of your interests through focused research. With subjects tailored to your own curiosity and around textiles, this variety of approaches within each cohort creates a rich environment for innovation. This breadth is also reflected in the range of staff working on the programme, with a stimulating mix of backgrounds from print, embroidery and design, fashion, textiles, and fine and applied arts.

While embedding the rudiments of the techniques and facilities of the discipline, we encourage you to embrace the possibilities available and consider the collaborative partnerships and excellent facilities that the wider School and University can offer to enrich your projects. Through our links with fashion and textile industries, you’ll be supported to find a work placement during your studies, gaining valuable industry experience.

Programme structure

This programme is project-led. You will produce a body of work on an agreed topic, culminating in real world practical outcomes.

Classes are offered in drawing skills, technical workshops in the dye lab, print room, and our Computer Aided Design (CAD) suite for digital printing and CAD embroidery. Your study will combine practical studio work closely entwined with theoretical and written studies, including professional practice elements to prepare you for employment in the industry. A lecture/ seminar series will help you examine the wider context for your project, and will help you to articulate your ideas through the written and spoken word.

Career opportunities

This programme can offer a route into careers in many areas, including the fashion and textile industries, and beyond. Graduates in textiles have an excellent track record, going on to work directly in design studios in London, Paris and Milan, in companies such as Rinoche English, Alexander McQueen, Stella McCartney, and Burberry. Our graduates have additionally gone on to become stylist, fashion buyers, and fine artists, or have pursued careers in related design industries such as automotive interiors and interior design.

Entry requirements

Normally a UK 2:1 honours degree, or its international equivalent (see page 52 for information on international graduate entry), in a related subject. You must submit a portfolio as part of your application. If you do not meet the academic entry requirements, we may still consider your application on the basis of your portfolio and/or relevant professional experience. Advanced Sustainable Design

**MSc 1 yr FT**

**Programme description**
This programme helps you conceive, refine and explain sustainable strategies in the built environment. The programme is scenario based, delivered in a series of studio projects supplemented with workshops and seminars on aspects of sustainable design. There is an opportunity to study environmental simulation techniques and discover how these can influence wider issues in the built environment.

We address the complex relationship of design to contemporary sustainable agendas and engage in cultural and professional debates that increasingly influence the production of architecture.

This programme is affiliated with the University’s Global Environment & Society Academy: www.ed.ac.uk/global-environment-society

**Programme structure**
The first semester is a combination of seminars and workshops on the theoretical underpinnings of sustainable design. Alongside this is a series of design projects at the scale of both settlements and building systems. We set many of the projects in a variety of global contexts that reflect the international nature of our students.

The second semester offers an immersive design project that allows you to form your own building programmes and test them in real contexts. You conclude your studies with a comprehensive dissertation research project that can advance your own interests and can be shaped to your preferred career path.

**Career opportunities**
As the call for a more sustainable built environment increases, architects, designers, engineers and planners who can produce solutions are in demand. With this qualification you’ll be best placed to embrace these opportunities and advance your career. Even if you follow an unrelated path, the experience and skill development in communication, team work and project management that you’ll gain from the programme will be a valuable addition to your resume. Our graduates work in specialist sustainable design consultancies, and design practice across a variety of disciplines. Many of our students choose to continue their academic development through PhD study.

**Entry requirements**
Normally a UK 2:1 honours degree or its international equivalent (www.ed.ac.uk/international/graduate-entry), in a relevant subject. You must submit a portfolio as part of your application. If you do not meet the academic entry requirements, we may still consider your application on the basis of your portfolio and/or relevant professional experience. Please contact us to check before you apply.

**English language requirements**
See page 52.

**Fees and funding**
For fees see page 52 and for funding information see page 54.

Architectural & Urban Design

**MSc 1 yr FT**

**Programme description**
The programme provides specialist training in design for candidates who already hold an undergraduate degree in architecture. The programme aims to expose you to a range of cutting-edge approaches, strategies, research and experimentation techniques in architectural design.

**Programme structure**
The programme is structured around a series of design projects, augmented by lecture- and seminar-based teaching in urban design and contemporary architectural theory.

The programme also involves fieldwork in a selected international city. Our previous destinations have included Florence, Olbia, Bari, Mumbai and Calcutta.

**Career opportunities**
On completion of this programme, you will have added a significant qualification to your existing architectural degree, one that is held in high regard by potential employers. The skills and learning you will gain will help you to pursue a career as an architect or architectural engineer at a higher level, or branch out into a particular specialism.

**Entry requirements**
A professional qualification in architecture, usually a five-year programme, with a strong portfolio of design work with clear author/co-author attribution. You must submit a portfolio as part of your application. We may consider a four-year qualification in architecture if your portfolio is of sufficient standard, with evidence of further experience in architecture or a similar field, such as art, landscape architecture, urban planning, digital design or industrial design; please contact us to check before you apply.

**English language requirements**
See page 52.

**Fees and funding**
For fees see page 52 and for funding information see page 54.

* Edinburgh School of Architecture & Landscape Architecture
ESALA programmes (continued)

Architectural Conservation

MSc 1 yr FT

Programme description
Our highly-regarded Architectural Conservation programme is more than 40 years old; it is the longest-established graduate historic preservation programme in the UK. Whether you’re approaching the field from an architectural, historical, geological or other viewpoint, this programme will guide you through the foundations and challenges of this important means of nurturing cultural and national identity.

You will benefit from learning on our historic campus (located in Edinburgh’s World Heritage Site), and from the wealth of academic and intellectual activities associated with an internationally-renowned university.

You’ll be part of the Scottish Centre for Conservation Studies (SCCS), a specialist teaching and research unit that provides the depth of expertise and resources that makes this programme one of the few of its kind in the UK to be recognised by the Institute of Historic Building Conservation.

Placements and volunteering opportunities are also available through our partnerships with relevant organisations, allowing you to demonstrate your skills in a practical setting.

Programme structure
The programme is assessed through individual written papers, group projects, presentations and report writing. An intensive field trip to Germany (optional) will give you the chance to explore conservation issues in another setting. Following the taught courses, you will research and write a dissertation of 15,000 words on an aspect of architectural conservation.

Career opportunities
This programme aims to provide you with the broad base of knowledge and skills necessary to embark on a career in one of the many professional sub-disciplines of historic preservation, ranging from heritage management to conservation architecture. Crucially, your qualification will be extremely well regarded thanks to its recognition by the Institute of Historic Building Conservation, the UK’s official organisation of architectural preservation professionals. Recent graduates are now working as architects, conservation architects, building surveyors, interior designers and conservation policy officers for employers including commercial architects such as Page/Park, Historic Scotland and the National Trust, and the preservation foundation of Palm Beach, Florida.

Entry requirements
Normally a UK 2:1 honours degree or its international equivalent (www.ed.ac.uk/international/graduate-entry).

English language requirements
See page 52.

Fees and funding
For fees see page 52 and for funding information see page 54.

Architectural History & Theory

MSc 1 yr FT (2 yrs PT available for UK/EU students)

Programme description
This programme is intended for students who seek advanced training in the history and theory of architecture. It provides methodological and conceptual tools essential for contemporary research and affords the opportunity for the in-depth study of a select topic in the history and theory of architecture.

The programme will provide you with a firm basis in the methodological and theoretical paradigms of architectural history. Through a combination of coursework and supervised dissertation research, with optional internships, you will acquire both a breadth of historical understanding and rigorous research practices.

Programme structure
This programme comprises two compulsory courses focused on methodology, and four option courses that draw on staff research expertise, followed by a 15,000 word supervised dissertation.

Additionally, you may enrol in courses offered by allied disciplines such as history of art, archaeology, architectural conservation, history, literature and others. The flexible profile of the programme reflects the diversity of positions within the fields of architectural history and theory, making it suitable for students from a broad range of backgrounds and with a variety of interests and career objectives.

Career opportunities
The programme provides preparation for doctoral research, work in industries that document and interpret the built environment, work in museums and conservation agencies or journalism/media.

Entry requirements
Normally a UK 2:1 honours degree or its international equivalent (www.ed.ac.uk/international/graduate-entry).

English language requirements
See page 52.

Fees and funding
For fees see page 52 and for funding information see page 54.

Programme Director
Dr Richard Anderson
Tel +44 (0)131 650 8204
Email richard.p.anderson@ed.ac.uk

We offer a prestigious array of international visiting critics, and facilities recognised as among the best in the industry.
ESALA programmes (continued)

Architecture (ARB/RIBA Part 2)

MArch 21 mths FT

Programme description
This is an exciting and innovative programme of study, based in one of the most beautiful and architecturally important cities in the world. The programme combines flexibility with rigour, allowing you to select from an exciting menu of studio courses and a choice of curricular pathways through the degree.

ARB/RIBA
The programme has Architects Registration Board (ARB) prescription and Royal Institute of British Architects (RIBA) validation. RIBA validation was achieved in 2011 and again in 2017. For further information about ARB and the prescription of architectural qualifications, visit: www.arb.org.uk/prescription-process

Programme structure
You will undertake a series of advanced level research exercises and design projects, engaging with cultural, theoretical, environmental, structural, and aesthetic questions. Non-studio courses encompass technology, contemporary architectural theory, and management practice and law.

The programme emphasises studio-based investigation within a stimulating environment that enables creativity, experimentation and critical engagement with architectural design. It offers the opportunity to select from:

• studios linked across the full two years
• a series of discrete thematic studios that vary from year to year.

During the course of the programme you will complete a comprehensive design project, accompanied by an illustrated report explaining its theoretical, environmental and technical dimensions. Projects are developed by way of drawings, models, digital representations and written reports. The trajectory of your work during the programme is documented in an academic portfolio at the end of the second year.

Career opportunities
The MArch forms the second stage in a process that will enable you to register and practise as a professional architect in the UK.

Entry requirements
A UK 2:1 honours degree in architecture prescribed by the Architects Registration Board (ARB) at Part 1 or equivalent standard demonstrated in your portfolio. You must submit a portfolio and a CV as part of your application.

If you do not hold an ARB Part 1 qualification, you will need to obtain qualifications at Part 1, Part 2 and Part 3 level before being eligible for registration. For further details, please contact the ARB: www.arb.org.uk

English language requirements
See page 52.

Fees and funding
For fees see page 52 and for funding information see page 54.

Programme Director Adrian Hawker

Art, Space & Nature

MA 1 yr FT, MArch 21 mths FT

Programme description
This programme considers the relationships between various creative disciplines to provide a framework of advanced study where you can develop practical and academic interest in the visual arts and architectural and environmental practice. The programme attracts a multidisciplinary group, primarily of artists, architects and designers, who wish to develop interdisciplinary skills in response to complex environmental issues.

A major objective of the programme is to expand your personal development by introducing new modes of practice through direct engagement with site-specific projects and installations. Its principal focus is site-informed spatial exploration and project development, where you will be provided with a project base from which to address varying scales of contemporary issues, from embodied and sensory values, site and place making and cultural landscapes, to carbon innovation and environmental change.

Programme structure
The programme is primarily studio-based, with students benefiting from one-to-one teaching and small group critiques. Inter-related project and reflective courses provide a correlation between practice and theory, while encouraging you to professionally integrate research, creative practice and contemporary cultural theory as a pathway for individual development.

Through regular group seminars each student is compelled to position their personal approach in respect of the broad multidisciplinary expertise of the group, reinforcing individual, disciplinary perspectives through enriched understanding.

Programme tutors are practising artists, architects and landscape architects, complemented by a wide range of disciplinary input from across the humanities and social and physical sciences. We have excellent relationships with a wide range of institutions such as the Edinburgh Centre for Carbon Innovation, An Lanntair Gallery in the Western Isles and the RSPB Flows to the Future project.

We also link with scientific centres across the University through the Biological Architecture Lab and the Queen’s Medical Research Institute.

Career opportunities
Through our range of excellent contextual projects you will develop a portfolio of advanced practical work addressing a range of contemporary issues while being underpinned with theoretical insights. The programme carries a high degree of prestige based on our reputation to educate a new generation on the values and skills of interdisciplinary practice currently in demand across the creative industries. The portfolio and expertise developed through this programme will demonstrate a significant breadth and depth of creative skills to bring new and informed conceptual thinking to any space, site or landscape.

Entry requirements
A UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/international/graduate-entry). You must submit a portfolio of recent work and a study proposal as part of your application.

English language requirements
See page 52.

Fees and funding
For fees see page 52 and for funding information see page 54.

Programme Director Donald Urquhart

ESALA programmes (continued)

Cultural Landscapes
MSc 1yr FT

Programme description
This programme is intended for students who seek training in the history, theory and practices associated with cultural landscapes. It provides methodological and conceptual tools essential for contemporary research and affords the opportunity for the in-depth study of a theme that characterises contemporary landscape research and practice.

The programme will provide you with a strong theoretical and methodological framework for studying historic and contemporary cultural landscapes. Through a combination of coursework, fieldwork projects and supervised project/dissertation research, you will acquire a breadth of theoretical understanding and rigorous research practices.

The programme is transdisciplinary in its approach, taking into account theories and approaches drawn primarily from visual and material culture studies, cultural geography, anthropology, architectural theory, literature, contemporary art theory and public art practice.

Programme structure
This programme is structured around three compulsory courses, two thematic courses, one option course, and either a supervised dissertation of 15,000 words or a 10,000-word project proposal with an associated research portfolio.

The range of thematic pathways and option courses available is determined by key areas of staff research in the College of Arts, Humanities & Social Sciences and is designed to change according to course availability.

Career opportunities
This programme is designed to provide the necessary preparation for a doctoral degree, or enhance your theoretical knowledge of cultural landscapes for a professional career outside academia. It can provide you with the required skills and qualifications to find employment in the public, private and voluntary sectors, including the creative industries.

Teaching is through a combination of lectures, seminars, tutorials, practical sessions and studios. Projects encourage original thinking and independent achievement within a framework of team-working and creative ability.

Entry requirements
A UK 2:1 honours degree or its international equivalent (www.ed.ac.uk/international/graduate-entry).

English language requirements
See page 52.

Fees and funding
For fees see page 52 and for funding information see page 54.

Design & Digital Media
MSc 1yr FT (2yrs PT available for UK/EU students)

Programme description
This is a unique programme of study that addresses digital technology applied to design, including its social, cultural and philosophical implications. Based on a lively studio environment, the programme develops wide skills in digital techniques and a critical framework to appraise the application of these technologies to design.

Our programme is design- and technology-led and there are significant demands on our students to create innovative work across a range of creative contexts, including visual design, user interface and experience, interactive media, mobile web applications, animation, gaming and virtual environments.

Programme structure
Teaching is through a combination of lectures, seminars, tutorials, practical sessions and studios. Projects encourage original thinking and independent achievement within a framework of team-working and creative ability.

Career opportunities
The prospects for employment are diverse. During this programme, you will develop design projects in, for example, animation, interaction, video and mobile games, the web and social media, e-commerce and entrepreneurship, media installations, performance and more. Our graduates work in all these areas, as well as advertising, education, television and journalism. The programme is also ideal if you are considering continuing on to advanced research at a doctoral level.

Entry requirements
Normally a UK 2:1 honours degree or its international equivalent (www.ed.ac.uk/international/graduate-entry). The subject discipline is not as important as aptitude and commitment to study in this area. We may also consider your application if you have equivalent professional experience; please contact us to check before you apply.

English language requirements
See page 52.

Fees and funding
For fees see page 52 and for funding information see page 54.

Programme Director
Jules Rawlinson
Email jules.rawlinson@ed.ac.uk

Digital Media Design
MSc 1yr FT (2-6yrs PT)

Programme description
This innovative programme offers the best of studio-based design learning in an online context.

You will work together, and with colleagues located on campus in Edinburgh, to realise imaginative design outcomes and acquire wide skills in digital visual and audio techniques.

You will investigate practice contexts for application across the arts, entertainment, performance and industry. You will also probe the social, cultural and commercial implications of such developments.

The programme addresses the needs of practitioners, managers, decision-makers and educators who want to be informed by first-hand knowledge of the technical possibilities of digital technology and an awareness of social, cultural and business contexts.

Programme structure
Teaching is through a combination of streamed/podcasted lectures, online seminars/tutorials and virtual studio activities.

Projects bring out original thinking and independent achievement within a framework of independent study, virtual team-working and creative ability.

You will also engage closely online with colleagues following our highly successful programmes in Design & Digital Media and Sound Design.

Career opportunities
The prospects for employment are diverse. Recent graduates from the closely allied on-campus programmes in Design & Digital Media are now working in multimedia and web design for architectural and urban design practices, advertising, computer system design and management, and tertiary level teaching. The programme is also ideal if you are considering continuing on to advanced research at a doctoral level.

Entry requirements
A UK 2:1 honours degree or its international equivalent (www.ed.ac.uk/international/graduate-entry). The subject discipline is not as important as your aptitude and commitment to study in this area. We may also consider your application if you have equivalent professional experience (especially continuing professional development), please contact us to check before you apply.

English language requirements
See page 52.

Fees and funding

European Masters in Landscape Architecture (EMiLA)

EMiLA 21 mths FT

Programme description
This is a two-year, professionally accredited programme offered jointly by five of Europe's leading landscape architecture institutions: Edinburgh School of Architecture & Landscape Architecture; Academy of Bouwkunst, Amsterdam; Leibniz Universität, Hannover; École Nationale Supérieure du Paysage (ENSP), Versailles; and Escola Tècnica Superior d’Arquitectura (ETSAR), Bº. The programme offers you a unique disciplinary experience and an opportunity to plot your own, advanced route through landscape architectural education to fit your aspirations, interests and skills. You will be immersed in very different European cultural and pedagogical environments, greatly enriching your perspective and development as a designer. The five partners approach the technical, aesthetic and ecological issues of landscape architecture in very different ways, at scales ranging from the urban site to the rural region. You will therefore experience a wide range of landscapes, methods and skills, establish links to private- and public-sector employers across Europe, and be exposed to the daily life and culture of some of Europe's most diverse and exciting cities and regions.

Programme structure
The programme is based on the principle of student mobility. You will study for two semesters in Edinburgh and choose two of the partner institutions to study for at least one semester each. Courses include design studios, seminars, tutorials and lectures, which vary with the institution and semester. At the midpoint of the programme, all students converge for a summer workshop run by one EMiLA partner on a rotating basis. These workshops are designed to be substantive and fun, and to stimulate thinking about the future challenges the landscape architecture profession will face. The programme has been reviewed by the International Federation of Landscape Architects (IFLA) and currently has 'Candidate Accreditation' status with the Landscape Institute.

More information: www.emila.eu

Career opportunities
Graduates of the Edinburgh programme at the University of Edinburgh have outstanding employability prospects internationally. Our graduates are currently engaged by some of the world's leading design offices.

Entry requirements
An undergraduate honours degree in landscape architecture. We will also consider your application if you have an undergraduate honours degree in architecture and a portfolio that demonstrates a strong interest in landscape architectural issues.

As part of your application you must indicate the institutions you would prefer to attend during the two semesters away from Edinburgh. Whilst we will take your preferences into consideration, we cannot guarantee that places will be available in your preferred institutions.

You must familiarise yourself with the language requirements of the partner institutions before you apply. It is your responsibility to ensure you meet the language requirements of your preferred institution(s) before you begin your studies.

English language requirements
See page 52.

Fees and funding
For fees see page 52 and for funding information see page 54.

ESALA programmes (continued)

Landscape Architecture

MLA 21 mths FT

Programme description
This programme is professionally accredited by the Landscape Institute and provides you with professionally focussed landscape architectural skills.

We offer the only professional, degree-level programmes in landscape architecture in Scotland and they are some of the best delivered worldwide. This programme focuses on landscape architectural design and is taught by a range of project types and contexts, concerned with building a sustainable future for the landscape we inhabit.

Landscape architecture is a discipline that focuses on intervention in the landscape through the activities of design, planning and management. Landscape is defined as outdoor spaces, environments and relationships between people and places. Landscape architecture is concerned with landscapes of all types, both urban and rural and at all scales from the garden to the region. It is distinguished by its position at the interface of art and design and the physical, natural and social sciences.

The programme benefits from the studio-based learning typical of an art college environment. Contextual subjects are delivered from within landscape architecture and from the wider university community. Uniquely, plant science is taught at the Royal Botanic Garden Edinburgh (RBGE). The programme therefore benefits from the intimate small scale nature of ECA and the wider worldwide reputation of the University and RBGE. Edinburgh itself is a unique and exciting centre for study and the landscapes of the Scottish Highlands and the Borders inspire creativity.

The programme has a long and excellent relationship with employers worldwide and contributes to professional practice through its links with public bodies and other agencies.

Programme structure
The programme focuses on four landscape design portfolio courses which contain a variety of design options you can choose from based on factors such as previous experience or personal interest. These are set on real sites with contemporary issues, with differing scales and complexity, and with stakeholders actively framing or informing the design process. The courses become increasingly complex and self-directed as the programme progresses and they are supported via aligned contextual and technological courses. The programme culminates in a major design project you develop with support from staff.

Career opportunities
Our graduates are hugely in demand. Currently, almost all of our graduates gain rewarding employment soon after graduation. Some go on to study research-led degrees (PhD). Many become leaders in the field worldwide.

Entry requirements
Normally a UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/international/graduate-entry), in an appropriate subject such as geography, planning or ecology. You should have a strong interest in landscape architecture and show creative potential. You must submit a portfolio of recent work as part of your application.

English language requirements
See page 52.

Fees and funding
For fees see page 52 and for funding information see page 54.

The University of Edinburgh
Edinburgh College of Art Postgraduate Opportunities 2019

Landscape & Wellbeing

MSC 1 yr FT (2 yrs PT available for UK/EU students)

Programme description
Delivered by an expert academic team, including members of OPENspace, the international research centre for inclusive access to outdoor environments, this programme takes an innovative, interdisciplinary approach to the study of salutogenic landscapes and the importance of the environment for human health and wellbeing.

The programme provides a unique opportunity for academics and practitioners working in landscape architecture, planning, design, geography, public health, psychology, epidemiology, horticulture and ecology to understand the planning and design of salutogenic landscapes. The programme offers the most advanced theoretical and methodological access to the latest research in the field.

You will be encouraged to translate research into practice, develop a better understanding of the evidence base to inform your work and guide more effective environmental interventions.

Programme structure
The programme combines lectures, seminars and project work with student-led oral and graphic presentations, essays and a supervised dissertation. Guest lecturers from within OPENspace’s network of professional contacts will further augment the programme.

It is structured around four compulsory courses and three option courses, drawn from landscape architecture, architecture, and other schools within the wider University.

Career opportunities
This programme provides preparation for work in sectors including public health, urban development, green infrastructure planning, human geography, horticulture and therapeutic environments, in addition to deepening engagement with landscape and wellbeing for established practitioners in architecture, landscape architecture and health. It is also an excellent preparation for students wishing to undertake doctoral level research.

Entry requirements
Normally a UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/international/graduate-entry), in a relevant subject.

We may also consider your application if you have equivalent experience; please contact us to check before you apply.

English language requirements
See page 52.

Fees and funding

Email c.ward-thompson@ed.ac.uk
Material Practice

Programme description
We live in a material world. Materials form the spaces in which we live and the objects that we use. Materials create and, unfortunately, may destroy the environments that we inhabit. Even in an increasingly digital age, in which the global economy and market continues to expand, the physical nature of materials is always present but it changes and is subject to contextual particularities, such as traditional practices, availability of resource and skills, and emerging materials and technologies such as digital fabrication.

The programme focuses on process: the direct experience of using and making with materials; how materials are used in creative works, design and production; and how new opportunities and ideas may evolve through reflective practice. The programme employs a cross-disciplinary approach and uses the workshops and expertise across Edinburgh College of Art. You will work with many materials, including glass, textiles, metals, timber and concrete, and will access and use various methods of digital fabrication such as additive manufacture and CNC routing and laser cutting.

The programme addresses directly important contemporary issues of economy, inclusion and sustainability, through practical, collaborative and individual projects. It is available to students from a variety of design and creative material practice, art, design, craft, and architecture backgrounds and from more traditional technologically-based disciplines, such as engineering, who are looking to expand their skills and understanding in both material techniques and collaborative practice.

Programme structure
The programme is largely workshop- and studio-based, and you will gain experience and expertise from a variety of tutors, support staff and technicians. Periods will be spent in different workshops to explore materials and technique including metals, glass, textiles and architecture. As you progress through the programme you will acquire both skills and understanding of various materials, and apply these in a series of projects that consider contemporary issues, culminating in a self-directed project, developed from your own experience.

Career opportunities
Opportunities exist with the many and various cross-disciplinary practices that operate in design professions, such as product design, marketing and architecture and art practice. Graduates can direct their career, having furthered their skills, explored and developed cross-disciplinary design and creative practice and explored contemporary issues and themes. During the programme there will be opportunities to meet with other designers and industry representatives.

The programme will also help those that wish to develop their own practice as fabricators, designers, artists or contractors.

Entry requirements
Normally a UK 2:1 honours degree or its international equivalent (www.ed.ac.uk/international/graduate-entry). You must submit a portfolio of recent work as part of your application. If you do not meet the academic entry requirements, we may still consider your application on the basis of your portfolio and/or relevant professional experience. Please contact us to check before you apply.

English language requirements
See page 52.

Fees and funding
For fees see page 52 and for funding information see page 54.

Urban Strategies & Design

Programme description
Jointly delivered by Edinburgh School of Architecture & Landscape Architecture and the School of Energy, Geoscience, Infrastructure and Society at Heriot-Watt University, this programme builds on the historic expertise and knowledge developed in both. It is taught by academic researchers with international research experience, links, and interests in a range of urban-related themes and geographical areas. This wealth of knowledge and the use of contemporary teaching is integrated into the programme’s delivery. The programme encourages the adoption of a comprehensive approach to the delivery of socially sustainable urban transformation, from local-specific to global regional interventions. You will study the wide and diverse range of social, economic and political processes that influence the development of the contemporary urban environment. The programme also enables you to acquire the tools and skills to propose urban projects of diverse scales and specificities.

Students on the programme come from a range of multidisciplinary backgrounds and work collaboratively to understand how urban design approaches respond to contemporary urban transformations. This analysis is framed not only from a western perspective but acknowledges that urban transformations in the urban north are increasingly interlinked with activities in the urban south. Course structure involves traditional lectures, seminars, excursions and other relevant group activities. The city of Edinburgh offers a unique laboratory for exploration of current urban design issues. Its renaissance ‘Geddesian’ planning history and more contemporary international planning pedagogy and consultancy links to urban institutions and bodies, particularly in the global south, provides a good platform from which to support student-led, location based dissertations. The programme seeks to address the gap between architecturally driven urban design and higher-level, spatial planning-driven urban design, bringing together a range of approaches relevant to urban design that are currently being developed within professional and disciplinary practices, from engineering to human geography.

Programme structure
You will study four compulsory courses at Heriot-Watt University, and one compulsory course and one option course at the University of Edinburgh. Students who wish to write an Africa- or Latin America-focused dissertation, will choose an option such as Latin American Cities. Following coursework completion, you will write your dissertation, on an urban themed topic of your choice.

Career opportunities
Graduates will be able to consider local and international career opportunities, in disciplines such as architecture, planning, landscape architecture, urban planning strategies and development planning, in the formal, (public and private) voluntary, or international development sector. You may also go on to further academic research such as a PhD.

Entry requirements
Normally a UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/international/graduate-entry). We do not require an architecture or urban design qualification, but expect you to demonstrate a broad interest in issues of urban design strategy planning and its relationship to issues at local, national and global level.

English language requirements
See page 52.

Fees and funding
For fees see page 52 and for funding information see page 54.

Art in the Global Middle Ages

MSc 1 yr FT (2 yrs PT available for UK/EU students)

Programme description
This programme is designed for students seeking a distinctive and unique perspective on the arts of the Middle Ages. Visual culture, throughout the medieval period, is addressed from a global viewpoint. The programme combines study of the arts and their audiences in Europe (particularly France, Italy and the Netherlands) and early medieval Britain and Ireland with the arts of South Asia, Japan and China, focusing on cultural exchange and trans-regional interactions. One example is the practice of exchanging gifts; its traditions, the diplomatic significance of such interactions, and intellectual consequences. The programme will also consider issues concerning pilgrimage and conquest, and will address questions arising from study of the rise of global trade and travel. These embrace such topics as:
- material exchange;
- shared artistic vocabularies;
- pilgrimage;
- literature and its uses;
- artistic and technological exchange; and
- the taste of the exotic.

The programme includes the possibility of taking an internship in a museum, public institution or similar organisation.

The programme aims to:
- introduce you to research in medieval history of art at the highest level;
- open up issues of global cultural exchange for academic debate; and
- draw attention to contemporary resonances stemming from study of medieval visual culture; and
- prepare students for further scholarly research, or for a career working with medieval objects, images or works of art, in museums, libraries, archives, and other collections.

Programme structure
This programme is taught through a combination of small-group seminars and tutorials, one-to-one supervision and private study. You will be examined through coursework and a dissertation.

Career opportunities
Should you be considering advanced study in art history, this programme provides the perfect preparation, as you will have gained both a strong foundation in the discipline and identified a particular area of interest. This study may, in turn, lead to an academic career, or a rewarding position in the cultural heritage field.

Entry requirements
A UK 2:1 honours degree with a mark of at least 65 per cent, or its international equivalent (www.ed.ac.uk/international/graduate-entry).

English language requirements
See page 52.

Fees and funding
For fees see page 52 and for funding information see page 54.

History of Art, Theory & Display

MSc 1 yr FT (2 yrs PT available for UK/EU students)

Programme description
This programme offers you a number of ways in which to explore your chosen field of study and is perfect for providing you with a comprehensive overview, prior to taking on more specialised studies. You’ll examine art in its historical contexts, the theoretical frameworks of interpretation and their relationship as physical objects to practices and concepts of display. You have the opportunity to put your learning into practice through an optional internship within one of Edinburgh’s many museums or galleries.

Equally spread over the pre- and post-1800 periods, the programme content will allow you to develop an excellent knowledge of the discipline of art history, advanced research abilities and valuable vocational experience.

Programme structure
Teaching includes a mixture of small-group work, individual tutorials, research seminars, lectures, and an optional internship, subject to availability. Approximately half of the working week involves independent study and research. Formal assessment is by means of essays, project work, a poster session, presentations and a dissertation.

Career opportunities
The wide-ranging nature of this programme will equip you for further, more specialised study, and potentially a future academic career. The vocational element of your learning is the ideal stepping-stone to a career in art history, possibly within one of the many institutions that make up Edinburgh’s rich cultural fabric. You’ll also have gained an array of highly transferable skills, such as communication, curatorial practice and project management, which will prove an asset in any career.

Entry requirements
Normally a UK 2:1 honours degree with a mark of at least 65 per cent, or its international equivalent (www.ed.ac.uk/international/graduate-entry).

English language requirements
See page 52.

Fees and funding
For fees see page 52 and for funding information see page 54.

History of Art programmes (continued)

Modern & Contemporary Art: History, Curating & Criticism

www.ed.ac.uk/pg/424

Taught masters programmes

MSc 1 yr FT (2 yrs PT available for UK/EU students)

Programme description

This programme will deepen your knowledge and understanding of the history and theory of modern and contemporary art, and prepare you for further research and/or a range of careers in the art world.

The programme focuses on academic study. You can also opt for a cultural sector internship in or near Edinburgh. There are two compulsory courses, Research, Theories and Methods and Cultures and Politics of Display, and a selection of option courses that covers the latest developments in contemporary art theory and attends to the complexities of modern art. An external Fellow in Contemporary Art Theory and Curating, a leading voice in the field, will teach you, normally for two weeks in March. Your work culminates in a dissertation of around 15,000 words. Extracurricular research seminars will introduce you to emergent trends and world-class researchers.

Programme structure

The programme is delivered through a mix of large and small group teaching, individual tutorials and supervision, while research seminars enhance the student experience. You will be taught by research-active staff, including leading experts in their fields. You are also expected to undertake independent study and research. Formal assessment is by means of academic essays, a dissertation, and project work where appropriate.

The optional internship involves learning in a work environment.

Career opportunities

The comprehensive nature of this programme, including its specialised option courses, will equip you for a confident start in a range of art-world careers, and related work contexts and will be invaluable if you are interested in an academic or curatorial career.

Entry requirements

A UK 2:1 honours degree or its international equivalent (www.ed.ac.uk/international/graduate-entry) in a relevant subject.

English language requirements

See page 52.

Fees and funding

For fees see page 52 and for funding information see page 54.

Acoustics & Music Technology

www.ed.ac.uk/pg/478

Taught masters programmes

MSc 1 yr FT (2 yrs PT available for UK/EU students)

Programme description

Taking the science of musical sound as your focus, you’ll work in a cross-disciplinary environment, using theoretical and experimental work to explore the musical, technical and multimedia applications of acoustics and audio technology.

The programme aims to:

• provide a broadly-based, scientifically-oriented foundation in the area of music, acoustics and audio technology.
• develop skills in research, computation, design and analytical problem-solving;
• create a multidisciplinary learning environment that will prepare you for careers in which a strong understanding of music/audio technology is required; and
• develop an ability to appreciate, understand and develop the creative potential of sound design.

The emphasis of this programme is on science and technology in the context of musical and multimedia applications. More information: www.acoustics.ed.ac.uk/amt_msc/

Programme structure

The MSc is taught by a combination of lectures, seminars, tutorials and practical work. Courses are assessed through a combination of report submissions and written examinations. In the final three months, you will carry out an individual project, which is assessed by submission of a dissertation.

Career opportunities

A knowledge of the science behind music can prove a great asset in your career. Qualified technicians and producers are in demand in all areas of music, as are acoustic scientists. This programme will provide you with the perfect foundation for further study if you’d prefer to continue on an academic path. The highly transferable skills you’ll gain in communication and project management will also take you further up whichever career ladder you choose to climb.

Entry requirements

A UK 2:1 honours degree or its international equivalent (www.ed.ac.uk/international/graduate-entry) in a science, electronic or music-related subject. If you do not meet the academic entry requirements, we may still consider your application if you have professional experience; please contact us to check before you apply.

Composition

MMus 1 yr FT (2 yrs PT available for UK/EU students)

*Subject to approval

Programme description

Music at Edinburgh has a long history of excellence in composition. This programme aims to support you in exploration of your musical horizons, your musical language and your relationship to currents in the wider compositional world. Many contemporary styles are supported through a range of skills and development courses that explore concepts of timbre, structure, digital audio, computer-based composition, instrumental composition, improvisation and studio craft.

This programme is delivered by a team of active composers, whose significant reputations as both artists and teachers in the world of composition will prove inspirational and invaluable. You will also have the chance to work with digital designers, sound designers, other musicians and a host of other disciplines taught at Edinburgh College of Art.

Programme structure

This programme combines courses that will help you hone your craft, and your thinking about composition in the wider sense. You will develop a range of individual project work and collaborate with other creative disciplines.

Career opportunities

This taught programme deliberately aims to expand your potential to work across the field of contemporary music composition. While here, you’ll develop your individual compositional voice, be this as a sonic artist or instrumental composer. Highly competitive, the world of music composition is also highly rewarding. As well as instilling and developing the skills you need to realise your creative potential, this programme will provide you with a valuable network of like-minded creatives. This will help you to find a place within the musical world – invaluable when looking to gain a foothold in the industry; in addition, you will have gained transferable skills (such as realising and performing pieces, organising and collaborating with others). Such skills map valuably across the culture sector.

Composers graduating from the University of Edinburgh have gone on to make music for computer games, for major international festivals, completed PhDs in composition, worked in community music, developed software tools and systems and composed music for film. The programme also provides an opportunity for you to enhance your business and management skills in the media industry as they pertain to music and sound.

The Edinburgh Film Music Orchestra, an ensemble run by students and staff of the programme, currently performs film music and often features performances of compositions by MMus Composition for Screen students.

Programme structure

This programme is structured around four compulsory courses and two option courses. You will also complete a final project by creating a music composition for a screen media environment, along with an accompanying written essay component.

Career opportunities

The rise of the internet and other multimedia platforms for film, TV and video games has significantly improved career prospects for composers. This programme will not only set you apart from the competition but will also position you within a network of peers and industry professionals who can assist you in getting your work to the screen. Recent graduates are now working as presenters, composers, designers and project managers in TV and for organisations such as Tinsebox.

Entry requirements

Normally a UK 2:1 honours degree or its international equivalent (www.ed.ac.uk/international/graduate-entry) in a sound-related discipline, such as music, sound engineering, acoustics, film, animation or art/design. We may also consider your application if you have a background in another relevant discipline, such as computer science, architecture, education, cognitive science or psychology.

You must have significant experience in composition or a musically related creative activity (e.g. improvisation, sound installation or creative coding). You must submit a portfolio as part of your application.

If you do not meet the academic entry requirements, we may still consider your application on the basis of your portfolio and/or relevant professional experience. Please contact us to check before you apply.

English language requirements

Music programmes (continued)

Musicology

MMus 1 yr FT (2 yrs PT available for UK/EU students)

Programme description
This programme offers an intense introduction to methodologies and research techniques in musicology, covering both classical and popular music, autonomous works and functional music, for example for religious ceremonies or for the screen. You'll learn the methodologies and research techniques necessary to analyse specific source material and learn to address the more philosophical questions raised, such as those of history, canons and archival research, performance studies, fieldwork, semiotics, the body, race, diaspora, gender, sexuality and consumption. Drawing on the very broad range of research at Edinburgh, it allows you to pursue, in greater depth, an area of special interest and/or to develop more specialised skills to further your career.

Programme structure
The programme comprises six courses and a 15,000-word dissertation. Taught courses include: Introduction to Musicology; Research Methods; Music, Philosophy and Politics; Popular Music; and focused research into specific areas of music study. Teaching is by a combination of staff- and student-led seminars, presentations and field trips. The programme is designed to help you become increasingly independent in your study while providing the necessary supervisory support. The dissertation is written over the summer on a supervised topic of your choice.

Career opportunities
On graduating, you will be equipped with the skills necessary to pursue a higher research degree, or take your knowledge into areas, such as music teaching, music criticism and journalism, arts administration and curatorship, and music librarianship.

Entry requirements
Normally a UK 2:1 honours degree, or its international equivalent, in another subject and you have a good reading knowledge of music.

English language requirements
See page 52.

Fees and funding
For fees see page 52 and for funding information see page 54.

Sound Design

MSc 1 yr FT (2 yrs PT available for UK/EU students)

Programme description
This MSc is targeted at individuals interested in exploring the domain of sound in the wider context of new media theory and technology. It is strongly interdisciplinary and ranges from the study of film sound to interactive audio design, sound installation and web design. It will provide you with knowledge, skill and understanding in a range of sound design situations both commercial and experimental. Graduates of the programme will be armed with professional, practical, analytical and critical skills to take into sound-related industries or on towards further academic study, such as a PhD. The Reid Studio is our new surround-sound mixing and production studio, and our Russolo Room offers industry-standard recording equipment and software. Our Sound Lab, which hosts a number of fully equipped workstations, is also available for your use.

Programme structure
Students will attend a combination of lectures, seminars, tutorials and practical sessions supported with occasional input from external professionals in the field of sound design and related areas.

Career opportunities
Thanks to the rich cross-disciplinary course of study this MSc provides, you will graduate with advanced skills in multimedia, audio production, post-production and other digital technologies which are applied to sound design. This will allow you to take on commissions in professional sound design, or pursue your own creative path. Our graduates are now working in theatre, TV and video games and for various sound studios. You will gain a wide variety of transferable skills, such as research, teamwork and communication that increase your employability.

Entry requirements
Normally a UK 2:1 honours degree or its international equivalent (www.ed.ac.uk/international/graduate-entry) in a relevant subject such as music, sound design, sonic arts, media arts, sound engineering, acoustics, film, animation or art/design, accompanied by a portfolio introducing us to some recent work that you are proud of. If you do not meet the academic entry requirements or if you do not have a sound-related degree, we may still consider your application if you have significant professional sound-related experience supported by a substantial portfolio. Please contact us to check before you apply.

English language requirements
See page 52.

Fees and funding

The University of Edinburgh
Edinburgh College of Art Postgraduate Opportunities 2019
Research at Edinburgh College of Art

We provide a highly dynamic and supportive research environment for our large and diverse graduate community.

All of our research students benefit from Edinburgh College of Art’s (ECA’s) interdisciplinary approach and all our doctoral students are assigned two research supervisors. Your second supervisor may be from another discipline within ECA, or from somewhere else within the College of Arts, Humanities & Social Sciences or elsewhere within the University, according to the expertise required. On occasion, more than two supervisors will be assigned, particularly where the programme brings together multiple disciplines: www.eca.ed.ac.uk/eca-home/research

Research centres and collaborations at ECA

The Atelier Network brings together researchers, practitioners, teachers and learners in ECA and in the School of Social & Political Science. Through the coordination of teaching and research in the arts and social sciences across the University, Atelier seeks to create a stronger sense of collective identity in order to drive forward interdisciplinary approaches to research and teaching. The Atelier Network is the central point for promoting and facilitating existing and new linkages across the wider College of Arts, Humanities & Social Sciences, and with external partners including museums, galleries and collectives across the city: www.eca.ed.ac.uk/research/atelier

creatives-and-social-sciences-network

The Centre for Design Informatics aims to be an agent of change, making a difference to society through computational thinking and design, and improving things, bit by bit. A collaboration between ECA and the School of Informatics at the University, our vision is for Scotland to be a world leader in designing with data. Research at the centre is action-led and design-based. It is a community within the School. ‘Studying at the University of Edinburgh encouraged me to approach critical thinking through independent research, while benefiting immensely from the excellent faculty and community within the School.’

David Fortin, PhD Architecture

The Scottish Music and Health Network draws on our experience in music informatics, musical acoustics, the psychology and neuroscience of music, community music, music and disability, and orchestral outreach, as well as pioneering work in the uses of music in therapy and social reconstruction in zones of conflict such as the Balkans, Caucasus and the Middle East. Our activities are supported by strong community links with orchestras, schools, hospitals, prisons, NGOs and local authorities: http://msd.ea.ed.ac.uk

OPEnSpace is a research centre focusing on open access to outdoor environments. Its work covers all types of landscape, in urban or countryside contexts, and looks at the benefits it can offer and the barriers to access. Good design for inclusive access is central to a number of policy areas: health and wellbeing, social inclusion, tourism, countryside access, urban renaissance and sustainability, environmental justice, safety and crime, and the implementation of the Disability Discrimination Act and race relations legislation. Our work is cross-cutting, drawing on multidisciplinary expertise to explore how public open space, urban parks and squares, green spaces and rural areas can contribute to quality of life. www.openspace.ea.eca.ac.uk

The Scottish Centre for Conservation Studies (SCCS) is a multidisciplinary architectural conservation research and teaching unit, based at ECA. Established in 1990 (with predecessor programmes stretching back to 1968), the SCCS focuses on both practical and theoretical aspects of conservation research. Much is externally funded – for example, by Historic Scotland, the Arts and Humanities Research Council and the British Geological Survey – and there are extensive national and international research links: https://sites.ea.ed.ac.uk/scss/

The Scottish Documentary Institute (SDI) is an internationally-recognised documentary research centre within ECA, specialising in documentary training, production and distribution. It runs training initiatives, such as the annual Bridging the Gap scheme funded by Scottish Screen and Creative Skillset’s Film Skills Fund. It organises master-classes, screenings and workshops, and hosts many visiting filmmakers of international repute. Our aim is to stimulate and inspire the documentary scene in Scotland, and beyond, by focusing on creative excellence with an international outlook: www.scottisdocumentaryinstitute.com

Research opportunities

We offer three types of research programme:

PhD
As a Doctor of Philosophy (PhD) candidate you pursue a research project under continuous guidance, resulting in a thesis that makes an original contribution to knowledge. You will gain specialist background knowledge for your intended research, and develop the skills to research in that field.

MPhil
The Master of Philosophy (MPhil) resembles a PhD but generally takes two years instead of three and does not carry the same requirement for original contribution to knowledge. You pursue your individual research project under supervision, submitting your thesis at the end of the project.

MSc by Research
An MSc by Research is based on a research project tailored to your interests. It lasts one year if studying full-time. The project can be a shorter alternative to an MPh or PhD, or a precursor to either – including the option of an MSc project expanding into MPhil or PhD work as it evolves.

Entry requirements
Normally a UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/international/graduate-entry), in a subject related to your chosen programme. Some research programmes require a UK masters degree or its international equivalent. In addition, some programmes will require a portfolio and some will require a research proposal. Please check the specific entry requirements for your programme online before applying.

If you do not meet the academic entry requirements, we may still consider your application on the basis of your portfolio and/or relevant professional experience.

You may also be interested in research areas offered by the School of Engineering, the School of History, Classics & Archaeology or the School of Languages, Cultures & Education.

www.ed.ac.uk/studying/prospectus-request

The University is piloting PhDs by online learning. If you’re interested in studying with us this way, we’d love to investigate possibilities in some of our areas of research.

“Studying at the University of Edinburgh encouraged me to approach critical thinking through independent research, while benefiting immensely from the excellent faculty and community within the School.”

David Fortin, PhD Architecture

Architecture

PhD 3 yrs FT (6 yrs PT available for UK/EU students)
MPhil 2 yrs FT (4 yrs PT available for UK/EU students)
MSc by Research 1 yr FT (2 yrs PT available for UK/EU students)

Research is central to the study of architecture within the Edinburgh School of Architecture & Landscape Architecture (ESLA). It motivates our intellectual and creative activities and underpins our collaborations with a range of important international and UK-based institutions. We actively promote interdisciplinary approaches to research in architecture. Our expertise and interests range across:

Architectural Conservation
Our focus includes conservation theory and history; urban conservation; conservation technology; and the challenges of bridging the gulf between heritage and new architecture.

Architectural History, Theory and Criticism
We have particular strength in: the history of architecture in Britain and the British colonial world (18th and 19th centuries); Germany, Central Europe and Russia; Modernism in Europe, North America and Africa; Renaissance Italy; the history of landscape; the history of technology; the international history of mass housing and urban development; the theory and philosophy of architecture; the philosophy of place; and critical enquiry and methodology.

Design-led Research and Studio Practice
We focus on research design, informed by contemporary architectural and cultural theory; studio pedagogy; research-led teaching; and methodologies of urban research and fieldwork.

Digital Media and Design
We have expertise in: the spatial, social and philosophical implications of media; the relationship between computers and design practice; computational design; mobile computing; media studies; and e-commerce.

Technology, Environment and Sustainability
We offer expertise related to the building envelope: concrete construction; design and manufacturing; and sustainable design in both qualitative and quantitative senses, looking at environmental response, design theory, rural planning and user-centred solutions.

The MSc by Research programme comprises a compulsory research methods course, the choice of one optional course and a 20,000-word dissertation based on independent research. Students pursuing MPhil or PhD programmes are required to undertake research training, which can take the form of a semester-long module or shorter intensive training courses, and may consist of workshops on research methodologies designed for students working in art, architecture and allied disciplines. Alternatively, MPh and PhD students may take a combination of the short postgraduate skills training courses offered by the Institute for Academic Development (see page 51).

English language requirements
See page 52.

Fees and funding
For fees see page 52 and for funding information see page 54.

Programme Director: John Lowrey
Tel +44 (0)131 650 2314
Email j.lowrey@ed.ac.uk
The Architecture by Design PhD offers you the opportunity to pursue design-led research at the highest level. The word 'by design' refers to your mode of research, mode of practice and mode of exposition. Therefore, it is important to understand how your 'by design' method informs and directs a thesis over a particular research duration, and how the development of your 'by design' methodology is not only an important aspect of the thematic process but also important to how your thesis is finally presented.

This PhD can be pursued through many lines of techniques of architectural inquiry, spanning design, buildings, technology, history, sustainability, conservation, theory, criticism, city, visuality, communication, philosophy, politics, environment, landscape, information technology and digital media. Your output must contain original works such as designs, built work, drawings, models, photographs, video, sculptures, installations or websites and include documentation of the processes by which the work was produced. Your research culminates in a professionally presented text of not more than 50,000 words and a comprehensive record of the exhibited material (images, drawings, photographs) contained in a coherent and accessible format (bound thesis and/or CD/DVD).

To complement your academic supervision, you will have the opportunity to participate in a range of lectures and workshops, contributing to the development of specific, transferable and professional skills. You may also be offered the opportunity to contribute to teaching within ESALA. If so, you will be offered support and training to help develop your teaching skills more effectively.

Facilities

Our full facilities will be available to you, including extensive digital and specific material workshops. You will have the opportunity to contribute to our healthy design presentation culture, print and e-publication output, international debate across a range of design-related fields and the organisation of symposia and conferences.

Emma Davie and Morag McKinnon were jointly awarded the Scottish BAFTA for Best Director 2013.

I Am Breathing has contributed to increased sign-ups to the MND Association and its fundraising activities, lending people with MND a new public voice.

Case study: Edinburgh's research with impact

Raising awareness of Motor Neurone Disease worldwide

Produced by the Scottish Documentary Institute within ECA, I Am Breathing is a documentary film that has been instrumental in raising awareness of Motor Neurone Disease (MND) worldwide. The film’s directors, Emma Davie and Morag McKinnon, both from ECA, created the acclaimed and award-winning film in partnership with MND sufferer Neil Platt, after an exploration into the ethics and aesthetics of making a film with – rather than about – a man dying of the disease.

Project background

Neil Platt approached the filmmakers in 2008, asking them to film his story. His main hope for the film was that it would enable him to communicate his experience of the disease as he lost articulacy in life. Combining Neil’s own text with his words, his family and friends, and clinicians participated, the directors were able to create new ways of enabling the ‘subject’ of a film to engage with his audience.

Project results

Since Neil’s death, I Am Breathing has been distributed worldwide and screened more than 400 times across 45 countries, and won numerous awards, including the Scottish BAFTA for Best Director 2013. The film’s directors, Emma Davie and Morag McKinnon, both from ECA, created the acclaimed and award-winning film in partnership with MND sufferer Neil Platt, after an exploration into the ethics and aesthetics of making a film with – rather than about – a man dying of the disease.

I Am Breathing has been distributed worldwide and screened more than 400 times across 45 countries, and won numerous awards, including the Scottish BAFTA for Best Director 2013.
Research opportunities

Collections & Curating Practices

MSc by Research 1 yr FT (2 yrs PT available for UK/EU students)

The dual focus of this distinctive programme will enable you to pursue research-focused study while developing a rigorous understanding of current debates and practices in the field of curatorship. Delivered in partnership with flagship cultural institutions, this programme directly responds to a growing need for graduates able to work at the interface of academic research and the curatorial profession. It offers a rigorous framework for intellectual development and innovation, combining supervised independent research with seminar teaching and unique opportunities for live project delivery. You will gain critical, analytical, interpretative and other research skills that are transferable to further academic research, curatorial settings and to other careers. Collections and Curating Practices is devised and delivered in cooperation with National Museums Scotland, the National Library of Scotland, the National Galleries of Scotland, Taster Rick Kelly, The Fruitmarket Gallery, and the University of Edinburgh’s own Special Collections.

You will be assigned a research supervisor at the outset of your programme. The compulsory course examines the theories and methods of collecting and curatorship. Practical sessions cover topics from object handling to copyright and accreditation. The programme is flexible: your research will be driven by your interests and the current debates in the field including those relating to cultural policy, restitution and decolonisation. The compulsory course gives you an opportunity to benefit from the expertise of academic and curatorial staff drawn from across the University, professionals employed by our partners, and guest specialists. A guided research placement is offered to small groups of students who will work collaboratively to share and develop innovative interdisciplinary contemporary curatorial practices. Compulsory courses comprise Artistic and Anthropological Research Methods: Atelier: Visual & Material Research; and a major Artistic & Anthropological Research Project supervised by a team of artists and anthropologists. You will also complete two courses drawn from elsewhere in the College of Arts, Humanities & Social Sciences.

You will participate fully in Ateliers: Making Research Material Across the Arts & Social Sciences, a research network between Edinburgh College of Art and the School of Social & Political Science, attached to its Journal Visual Culture in Britain (Roundtable). It conducts knowledge exchanges with a range of partners in Scotland including National Museums Scotland, Edinburgh Sculpture Workshop, Atlas (Skye) and Deveron Arts (Huntly). You will be encouraged to participate in doctoral training programmes and in the rich social, artistic and academic life of both subject areas. Graduates will be able to continue to PhD study in the inter-discipline of art and anthropology. The programme will also provide the focus and rigour required to support doctoral funding applications. It is also possible to apply to this programme as a 1+2 year route to a PhD in art or in social anthropology, jointly supervised by staff in both subject areas.

Contemporary Art & Anthropology*

MSc by Research 1 yr FT (2 yrs PT available for UK/EU students)

*Subject to approval

This is a new programme in contemporary art practice and theory, and anthropology. It builds on strong research links between our School of Art and Social anthropology in the School of Social & Political Science. The programme seeks to explore and develop the convergence of the anthropological turn in contemporary art with the visual, material and practice turns in social anthropology, fostering a new art and anthropology inter-discipline.

The programme is aimed at graduates with a relevant artistic background, keen to cultivate artistic research informed by new approaches in social anthropology, and at anthropology graduates who wish to pursue visual and material research practices informed by the latest developments in contemporary art. It is equally suitable for artists or anthropologists interested in working collaboratively to share and develop innovative interdisciplinary contemporary curatorial practices.

Compulsory courses comprise Artistic and Anthropological Research Methods: Atelier: Visual & Material Research; and a major Artistic & Anthropological Research Project supervised by a team of artists and anthropologists. You will also complete two courses drawn from elsewhere in the College of Arts, Humanities & Social Sciences.

You will participate fully in Ateliers: Making Research Material Across the Arts & Social Sciences, a research network between Edinburgh College of Art and the School of Social & Political Science, attached to its Journal Visual Culture in Britain (Roundtable). It conducts knowledge exchanges with a range of partners in Scotland including National Museums Scotland, Edinburgh Sculpture Workshop, Atlas (Skye) and Deveron Arts (Huntly). You will be encouraged to participate in doctoral training programmes and in the rich social, artistic and academic life of both subject areas. Graduates will be able to continue to PhD study in the inter-discipline of art and anthropology. The programme will also provide the focus and rigour required to support doctoral funding applications. It is also possible to apply to this programme as a 1+2 year route to a PhD in art or in social anthropology, jointly supervised by staff in both subject areas.

Creative Music Practice

PhD 3 yrs FT (6 yrs PT available for UK/EU students)

The PhD in Creative Music Practice is an opportunity for you to pursue practice-led research in the field of music at the highest level. This will involve research that combines textual and musical outputs. For example, composition, performance (either of original or pre-existing repertoire), installation, sound design, and interactive music software.

The outputs take the form of a portfolio, performance or recording, as well as theoretical work and documentation of the processes by which the music was made (video, photographs, recordings, sketches, studies, web pages, etc). The musical outputs are explicitly linked to the textual material. This link may take various forms: musical material might exemplify, contextualise or expand an idea elaborated in the text, and vice versa. The programme requires candidates to critically evaluate and articulate the relationship of textual to extra-textual media in the formation of musical knowledge.

The format of the PhD thesis consists of a text of not more than 50,000 words, as well as the documentation of the process, contained in a coherent and achievable format. Where a thesis relates to live musical performances, documentation in the form of high-quality audio and video recordings is central to the submitted materials.

Typical applicants to this programme include:

• composers theorists who wish to carry out research into and practice of particular compositional models;
• performers who wish to deepen their practice through musicalological research;
• computer music composers who wish to develop documented hardware/software systems for their music;
• performers with a need to study the techniques and organology of period instruments; and
• instrument builders/researchers seeking historical techniques found in evidence from the original instruments.

English language requirements

Cultural Studies

PhD 3 yrs FT (6 yrs PT available for UK/EU students)

MSc by Research 1 yr FT (2 yrs PT available for UK/EU students)

This transdisciplinary programme supports a range of research topics in visual and urban cultural studies, with a particular interest in place and memory, semiotic landscapes, materiality of writing, photography and visual knowledges, curatorial practices and multimodality in representation of research. Your research project will benefit from academic collaborations across architecture and history of art in ECA, and from co-supervision with staff in sociology, comparative literature, Canadian studies, Chinese cultural studies, social history and religious studies. You will also benefit from our collaborative exchanges and contacts with local and international research networks, cultural and heritage institutions and archives.

These programmes enable you to study cultural phenomena, practices and texts at an advanced level, critically engaging with theories and methodologies of transdisciplinary cultural research. Your projects will benefit from the diverse research expertise of staff from the Edinburgh School of Architecture & Landscape Architecture, from our collaborative exchanges with colleagues across ECA and a broad range of contacts with local and international research networks, cultural and heritage institutions and archives.

For the MSc by Research, you are required to complete two courses selected in discussion with your supervisor, providing methodological and theoretical grounding for your research project, and a 20,000-word dissertation based on your independent research. The PhD is a major piece of independent research, preparing you for a future in academic scholarship. It is obtained by research and presentation of a thesis of 80,000-100,000 words. As a student you will have two supervisors with whom you will work closely throughout the research period. You will be required to take a research skills and methods course selected in consultation with your supervisors. In addition to regular meetings with your supervisor, you will participate in postgraduate seminars and conferences and have opportunities to experiment with publications and curatorial projects.

Design

This programme lets you explore the space of contemporary philosophies as they influence and are impacted by computers, networked communications and ubiquitous media. It includes compulsory coursework, option courses and the opportunity for original research, packaged in manageable work units. You will be researching alongside students studying more technical courses, and can dip into these. The programme examines theories and philosophies of digital media, technological change, the mass media, gaming, data mining, computation, artificial intelligence, and the social and cultural contexts in which such developments take place.

Students of this programme will be part of a dynamic community of researchers, exploring many aspects of computing: its social ramifications, social media, the world of e-commerce, e-entrepreneurship, e-learning, project-based composition and artistic works, digital architecture and urbanism, new media consumption practices, the co-creation of media, changes to the household, links between vision and sound, and more. Students on the programme benefit from access to a broad range of expertise and research in digital media and culture.

Digital Media & Culture

MSc by Research 1 yr FT (2 yrs PT available for UK/EU students)

This programme is for students who have a background in digital media, human-computer interaction, artificial intelligence, interaction design, composition, architecture, and art or design practice, and wish to extend their study through a series of practical, research-led projects. Students work in collaborative contexts to develop skills in conceptualising and implementing creative projects that make extensive use of digital technologies. The compulsory element of the course is Digital Studio Practice, which is supported by postgraduate research methods training and a series of optional, lecture-based courses, reading courses and a final dissertation. On completion of the programme, you will be able to contribute knowledgeably and critically to practice-led research that involves advanced technologies. The programme provides an opportunity for you to test your aptitude for PhD study in the area.

History of Art

MSc by Research 1 yr FT (2 yrs PT available for UK/EU students)

The MSc by Research programme is for students with a good general knowledge of the subject area, who wish to focus their interests and deepen their knowledge of a specific topic.

To complete the programme you would normally submit two, 5,000 word, independent research essays, on topics chosen in consultation with your supervisor. You are also required to complete the History of Art compulsory course Research Theories and Methods (which is assessed via a 3,000 word essay) plus one further course (which may be chosen from a broad range of taught postgraduate options courses, assessed by a 4,000 word essay, or a credit bearing language course or other suitable option). At the end of the summer, you are required to submit a 15,000-word dissertation.

All our research students benefit from ECA’s interdisciplinary approach and are assigned two research supervisors. Your second supervisor may be from another discipline within ECA, or from elsewhere within the University, according to the expertise required. On occasion more than two supervisors will be assigned, particularly where the programme brings together multiple disciplines.

Facilities
You will benefit from opportunities within the thriving studios in ECA’s historic Lauriston Place campus, along with the exhibitions and events associated with a vibrant art college and wider University. Together there is an extensive range of student support facilities provided, including libraries, student societies, support services and accommodation.

Fees and funding
For fees see page 52 and for funding information see page 54.

Interdisciplinary Creative Practices

MSc by Research 1 yr FT (2 yrs PT available for UK/EU students)

This is an innovative research programme exploring diverse exchanges between the creative arts, humanities and physical and social sciences. It combines research and practice to provide a critical environment within which you are encouraged to challenge existing disciplinary definitions. It focuses on interdisciplinary research methodologies and experiments with creativity across media and fields of knowledge, including new technologies when appropriate.

Drawing on resources within Edinburgh College of Art and the wider University, this is a programme that is tailored to support your individual research project, for which a proposal should be submitted as part of the application process.

Prospective students might have had experience as creative practitioners beginning to engage with interdisciplinary working methods or have completed study in a specific subject and now seek to apply that knowledge through creative practice. In special cases equivalent experience may be considered as an alternative for previous degree qualifications.

Landscape Architecture

PhD 3 yrs FT (6 yrs PT available for UK/EU students)
MPhil 2 yrs FT (4 yrs PT available for UK/EU students)

We offer a rare opportunity to work within a strong landscape architecture research culture that is recognised internationally and reflected in the range of collaborations with other leading researchers. Our innovative, practice-led research engages with developing agendas in the public realm, urban open space, green space networks and sustainable, healthy environments. Our research profile includes the following areas:

- Inclusive access to outdoor environments, led by the OPENspace research centre. This takes a cross-cutting approach to explore how public open space, urban parks and squares, green spaces and rural areas can contribute to quality of life. Our work includes a focus on the benefits to be gained from getting outdoors and the barriers currently experienced by different users, particularly those from disadvantaged groups.

- Innovative, practice-led design research, especially involving collaborations with artists and designers from disciplines outside landscape architecture.

- Environmental perception, including empirical research on the transactional nature of people’s engagement with place.

- Landscape design and planning to support young children, teenagers, older people, and other age groups and sectors within the population.

- The history and theory of landscape architecture, including development of the public role of the landscape architect in the 19th and 20th centuries.

- Research on salutogenic environments (the health-enhancing qualities of engagement with certain types of landscape) and on discerning the mechanisms behind any links between wellbeing and the natural environment.

Programme Director: Francisca Lima
Tel: +44 (0)131 651 5801
Email: franciscalima@ed.ac.uk

All of our research students benefit from ECA’s interdisciplinary approach.
Research opportunities
You may propose projects in any area for consideration. Please consult our staff profile pages to see our interests and availability.

• Institute for Music in Human and Social Development.
• Edinburgh University Collection of Historic Musical Instruments
• ECA Digitals
• Acoustics and Audio Group

Some of our current hubs of research activity include:

• Music and the human sciences, including music psychology and education, and the use of new technologies. You will submit a portfolio of original compositions in place of a thesis. The portfolio should normally include one major work, the performance of which would occupy an entire evening (such as an opera). Part or all of the portfolio may consist of computer-based or electronic fixed media works, interactive works or works involving new media. There is no requirement for an additional thesis or commentary to accompany the portfolio, but you will be required to develop an understanding of the cultural context of your work. Please consult our staff profile pages to see our supervision specialisms and availability, spanning electroacoustic, algorithmic, computer music and music for screen.

About Edinburgh College of Art

Edinburgh College of Art (ECA) is internationally recognised and is situated at the heart of one of Europe's most vibrant and creative capital cities.

We comprise the School of Art, the School of Design, Edinburgh School of Architecture and Landscape Architecture (ESALA), the School of History of Art and the Reid School of Music. At postgraduate level we offer exciting opportunities for collaboration across these subject areas, knowledge exchange with the industrial and cultural sectors, and partnerships with local, national and international groups, events and institutions.

Research excellence

We performed exceptionally well in the Research Excellence Framework (REF) 2014. Across all of our submissions, 100 per cent of our research environment profile ratings were either 4* world leading or 3* internationally excellent. In art and design: history, practice and theory, we were ranked seventh in the UK for research power (Research Fortnight REF 2014). In music, drama, dance and performing arts we were ranked in the top 20 for both research quality and research power (Research Fortnight REF 2014). In our joint submission with Heriot-Watt University for architecture, 73 per cent of our research was ranked 4* world leading or 3* internationally excellent.

A world-leading learning experience

As a postgraduate student at ECA, you will be able to take advantage of a vast array of opportunities for interdisciplinary study and creativity across a wide range of lectures, workshops and seminars in our impressive studios and learning spaces.

Situated in the UNESCO World Heritage site of Edinburgh’s Old Town, ECA offers some of the largest working spaces of any UK art college, with many of our studios enjoying uninterrupted views of Edinburgh Castle and across the city – truly, an inspiring place to begin the next stage of your creative journey.

Our world-leading teaching staff will inspire you to create work of the highest quality, in a cosmopolitan environment that is stimulating, supportive, flexible and challenging. We foster quality and distinctiveness in our students’ work, mixing traditional skills and new technologies. We are committed to delivering a flexible, imaginative education and want you to make the most of your talents and to realise your potential. If you want to be challenged, are passionate about your work and want to develop skills and innovative thinking, then this is the place for you.

Facilities and resources

At ECA we offer all our postgraduate students access to studio areas and hotdesks. Additional study areas for ECA students include any number of environments, from bench to specialist technical facilities to the great outdoors.

We encourage our students to embrace the interdisciplinary methods of our teaching, so whatever you register for when you begin your study, you may find yourself working with colleagues in a great range of places and using any of our impressive facilities. The University is investing in the ECA estate and facilities to further develop our flexible, stimulating, supportive and sustainable learning and research environment for students and staff.

Below is a summary of the tools you will have at your fingertips, followed by more detailed information about the individual subject areas, on the following pages:

• Drawing studios, machine workshops and individual studio space for specific programmes;
• Comprehensive workshop facilities for architectural model-making;
• Bookbinding and printing facilities;
• Access to the Royal Botanic Garden Edinburgh’s resources and collections;
• Surround-sound, purpose-built music studios for mixing and production;
• Historical musical instrument collections;
• Access to national and international theatres and dance, film, TV and opera companies;
• Digital and analogue darkrooms and full-length portraiture photography studios;
• Dedicated sculpture and art studios, which can also be used as exhibition space;
• Industry-standard recording equipment for music and film;
• A sound lab with fully equipped individual workstations;
• Our neo-classical sculpture court for exhibitions and events;
• Mac and PC computer suites providing individual workstations;
• A sound lab with fully equipped individual workstations;

Collections of the University

The University of Edinburgh has one of the world’s great collections, which has been growing ever since its foundation in 1583. Our collections include rare books, archives and manuscripts, art, historical musical instruments and a wide range of museum objects from geological specimens to anatomical models. If laid out end to end, we would have almost 60 kilometres of shelving and storage space devoted to our heritage material, from 1st-century Greek papyrus fragments to new works of sculpture. This is curated by specialist staff across 45 sites and used for our teaching and research and by the wider public community.

The Centre for Research Collections in the Main Library is the hub for all our collections, where specialist curators make them available for study, research and pleasure. Postgraduate students are welcome to study original objects and have made many important research discoveries while working on the archives. You will find an incredible range of material in our collections that is available nowhere else in the world.

“What makes Edinburgh so unique is that the quality of teaching is really superb, the city itself is so full of art, and there are so many opportunities in Edinburgh that you would not get anywhere else.”

Emily Stoller-Patterson, MSc Modern & Contemporary Art: History, Curating and Criticism
Facilities and resources (continued)

Architecture and landscape architecture
Edinburgh School of Architecture and Landscape Architecture (ESALA) operates in the heart of Edinburgh, in Minto House on Chambers Street and at our Lauriston Place campus (see campus map, page 56).

In our design programmes, the studio has always been the space for the production of individual creative work, and our studios continue to have central importance in supporting the aims of many of our programmes. All of ESALA’s postgraduate, studio-based programmes have individual studio spaces with associated computer facilities.

But the emphasis on the studio is not exclusive. We have one of the best-equipped architecture workshops in the UK. You can work (weld, lathe, construct, vacuum form, drill, cut) with a wide range of materials (steel, timber, concrete, plastics, glass, granite, brick, latex, resin, gel-tex) under qualified and enthusiastic supervision. Rapid prototyping and CNC laser cutting are also fully supported.

We offer dedicated computing facilities with a range of specialist software that includes support for 2D and 3D design systems such as Rhino, building information modelling (BIM) packages and environmental simulation workstations. This is complemented with a range of in-house scanning, plotting and printing facilities, with access to photographic and video equipment as well as dedicated editing suites.

Our students benefit from a range of specialist libraries. Our Art and Architecture Library in Minto House contains more than 20,000 books on art, art history and theory, architectural design, theory and practice, architectural history, construction, sustainable design, planning and urban design, landscape architecture and landscape history, professional practice, presentation techniques, CAD and digital media. Our Lauriston Place campus library also holds specialist architecture and landscape architecture collections. You will also have access to the University’s Main Library which holds an archive collection of around 50,000 architecture slides, from the buildings of ancient Greece to the 21st century.

Our studios are surrounded by the printmaking workshop, metal workshop, wood workshop, casting room, kiln shed, carving bays and spray room – all with specialist technical support. You will also have access to our darkrooms and photographic equipment, as well as the ECA digital suite. Our studios are next to the ECA library and close to both the University’s Main Library and the National Library of Scotland.

In addition, your location in the capital of Scotland allows you free access to numerous organisations and galleries, which are all dedicated to the preservation, promotion and display of art in all its forms.

Our students enjoy the facilities of many national organisations including the National Galleries of Scotland, National Museums Scotland, Historic Scotland, National Library of Scotland, National Archives of Scotland, the Royal Scottish Academy and the Royal Commission on the Ancient and Historical Monuments of Scotland.

In Edinburgh also plays host to a wide array of specialist art galleries, exhibition spaces and institutes including The Fruitmarket Gallery, Ingleby Gallery, Stills Gallery, Scotland’s Centre for Photography, Dovecot Studios (centre for weaving and tapestry), Edinburgh Printmakers, and Inverleith House (at the Royal Botanic Garden Edinburgh) – among others.

Our students benefit from a range of in-house scanning, plotting and printing facilities, art history and theory, architectural design, theory and practice, architectural history, construction, sustainable design, planning and urban design, landscape architecture and landscape history, professional practice, presentation techniques, CAD and digital media. Our Lauriston Place campus library also holds specialist architecture and landscape architecture collections. You will also have access to the University’s Main Library which holds an archive collection of around 50,000 architecture slides, from the buildings of ancient Greece to the 21st century.

Our studios are surrounded by the printmaking workshop, metal workshop, wood workshop, casting room, kiln shed, carving bays and spray room – all with specialist technical support. You will also have access to our darkrooms and photographic equipment, as well as the ECA digital suite. Our studios are next to the ECA library and close to both the University’s Main Library and the National Library of Scotland.

In addition, your location in the capital of Scotland allows you free access to numerous organisations and galleries, which are all dedicated to the preservation, promotion and display of art in all its forms.

Our students enjoy the facilities of many national organisations including the National Galleries of Scotland, National Museums Scotland, Historic Scotland, National Library of Scotland, National Archives of Scotland, the Royal Scottish Academy and the Royal Commission on the Ancient and Historical Monuments of Scotland.

In Edinburgh also plays host to a wide array of specialist art galleries, exhibition spaces and institutes including The Fruitmarket Gallery, Ingleby Gallery, Stills Gallery, Scotland’s Centre for Photography, Dovecot Studios (centre for weaving and tapestry), Edinburgh Printmakers, and Inverleith House (at the Royal Botanic Garden Edinburgh) – among others.

Design
Our postgraduate design studios have a wide range of resources and facilities available to suit the broad nature of their creative work, including a printmaking workshop, a metal workshop, wood workshop and digital 3D suite – all with specialist technical support. Our design informatics studio has its own hack lab with soldering equipment, 3D printer, Arduino and Tinker kits, iBeacons, LEAP Motion and quadcopter. Our studios are located at the Lauriston Place campus (see campus map, page 56).

Design-related students also benefit from our emphasis on an interdisciplinary approach – everyone has access to resources from a range of specialisms.

Animation
Animation provides a fully equipped stop-frame animation studio, a model-making workshop and an equipment loan facility that provides cameras, lights and audio recording equipment. There are production studios, where animation students across all levels work side by side, and a post-production studio with multiple Final Cut Pro editing suites. Our hand-based animation uses a digital workflow with high-end digital SRUs connected to Macs running Dragonframe software for both 2D and 3D stop-frame (as used on films such as ParaNorman and Frankenweenie).

The dedicated CG Animation Studio has 18 workstations running Autodesk 3D Studio Max, Maya, Mudbox, Rhino and Adobe Production Premium.

Design Informatics
Our design informatics studio, called the T-Room, features individual workspaces, dedicated lecture space, an ideas wall (white board), visualisation and projection technologies (2D and 3D), moveable LCD screens, soldering bays with extraction, fabrication space, Arduino and Tinker kits, iBeacons, and LEAP Motion. Other workshops across the campus are shared with students on programmes such as product, sculpture, jewellery and interior design who provide facilities for metal and wood-working, model-making and prototyping, including 3D printers and CNC-laser cutters, Rapid prototyping machines, a 3D scanner and a CNC router/jewelling machine. Many of the informatics courses will be delivered using the specialist computing facilities at the School of Informatics.

Fashion
Fashion and performance costume students can access fully equipped studios for design and garment production. Access to knitwear and accessory making, flatbed screen-printing, digital printing, drawing studios and dedicated computer facilities are available as relevant to your area of research and design study.

Film
Film students have access to a variety of film and video equipment. We offer comprehensive HDV shooting and editing facilities, prime lenses, a RED Digital cinema camera (RED Scarlet with Arri Ultra Prime Lenses), editing suites, a workshop/TV studio and a range of lighting and audio equipment to be used on location. While there is a focus on the digital outcomes of project work, we also allow you to work with a 16mm traditional film camera. We also offer industry standard equipment such as Arri location lights, Sennheiser microphones, sound device mixers and Marantz recorders for use on location.

Graphic design
Graphic design students have shared workspaces in a studio with lockable storage for personal items and the use of computer and print workshop resources, whereas the animation students are an invaluable part of the teaching process. You are also welcome to sit in on undergraduate classes where appropriate.

You will have access to workshops and talks from visiting specialists, and you can participate in national competitions.

Glass
Students working with glass benefit from custom-built facilities including CAD software, a traditional print workshop and a range of sewing machines and Cabinets. You will also have access to all workshops across ECA, including a metal working and metal fabrication workshop with its own dedicated technician. A dedicated design and visualisation computer lab is situated directly beneath our studio in Evolution House.

Jewellery
Jewellery students are provided with a dynamic environment in which to experiment with, and explore, materials and concepts. Facilities include shared bench spaces, machine/special project workshops and a design studio. Our award-winning work and exhibiting results from such investigations have been internationally recognised as innovative and dramatic.

Performance costume
As well as individual student space in a studio, you will have access to a well-equipped pattern cutting and sewing room. Other communal facilities include a digital print suite for textiles, CAD embroidery machines, laser cutting workshop, a 3D printing suite, and metalwork and woodwork workshops.

Product design and interior design
For students of product design and interior design our facilities include well-equipped studios, including space for quick, low-fidelity model-making, and a computer facility with access to a large format plotter printer. Two workshops, shared with sculpture students, are run by helpful, friendly technicians. These spacious facilities house a large variety of equipment, such as a 3-axis CNC machine, a 3D scanner, a CNC router/jewelling machine and a CNC plasma cutter. You will also have access to all workshops across ECA, including a metal working and metal fabrication workshop with its own dedicated technician. A dedicated design and visualisation computer lab is situated directly beneath our studio in Evolution House.

Textiles
Our textiles students enjoy excellent facilities, including a well-equipped print room with full-length print beds, a large format heat transfer press and dyeing facilities. This is complemented by a digital print suite and a range of sewing machines including CAD embroidery. You will have your own designated desk or workstation in a large, open-plan studio.
Facilities and resources (continued)

History of Art

Our ECA library in Evolution House, on the Lauriston Place campus (see campus map, page 56), houses our collection of more than 350 art periodical subscriptions and some 85,000 books, videos, DVDs, maps and slides. Our history of art journals are held in the Main Library in George Square. We also have a rapidly growing collection of film-based media, covering not only works of art and architecture but also conservation, history, culture and film studies. Recently, we have invested in our collection of avant-garde and experimental films, particularly from the surrealists of the 1920s and 1930s.

The University’s fine arts collection contains more than 1,200 items, and is notable for its Dutch and Flemish art of the 17th and 18th centuries, Scottish portraits, and modern Scottish art. Both abstract and figurative traditions are well represented.

We provide a large collection of our own digital images, as well as offering access to image collections licensed from vendors such as ARTSTOR (a database of hundreds of thousands of images in the areas of fine arts, crafts, architecture, photography, design and more), the Bridgeman Collection, and SCARN (Scottish Cultural Resources Network).

Our Visual Arts Research Institute supports and manages collaborative and interdisciplinary research projects in all areas of visual culture, and the University’s own gallery, the Talbot Rice Gallery, is one of Scotland’s leading public spaces for contemporary visual art.

Edinburgh is home to numerous cultural, state and not-for-profit organisations involved with the preservation and promotion of art, including the Edinburgh International Festival, Edinburgh Festival Fringe, Edinburgh International Book Festival, Edinburgh International Film Festival and Edinburgh Art Festival. Students also have the opportunity to register as members of the Association of Art Historians.

Music

ECA has professional-standard resources for creative music technology, teaching and research, and you will enjoy generous access to these facilities.

The Reid Concert Hall in Bristo Square is one of the University’s most attractive listed buildings. It is home to the ‘Music Classroom’, a concert hall with an exceptional acoustic. With an organ considered to be one of the finest of its kind in the UK, as well as two Steinway D concert grand pianos, the Reid Concert Hall provides an outstanding and coveted recording space for music of virtually any genre and aesthetic.

The Reid Studio, within the same building, has point-to-point cabling from the hall to the mixing desk/patch bays. It was designed in 2010 by Michael Edwards, Kevin Hay and several expert postgraduate students and colleagues, so is custom built to ensure the best outcomes for postgraduate students.

Alison House, also in the Central Area, (see campus map, page 56) offers a suite of six studios, including a compact recording facility and two multi-user music technology laboratories.

Our music students have access to an array of IT equipment, including state-of-the-art listening facilities. We offer a well-equipped music technology lab, with a large collection of open source and commercial software, and a dedicated postgraduate study lab with Sibelius and Finale.

The Reid Music Library, situated within the Main Library, is exceptionally well stocked with around 20,000 books, 65,000 scores and more than 8,500 sound recordings, containing many rarities and valuable first editions.

Collections relating to Scots culture, including all types of traditional Scottish music, and the John Levy Archive of mainly religious and court music from south Asia and the Far East, are housed in the University’s School of Scottish Studies Archives, which are also accessible to music students.

The Talbot Rice Gallery is one of Scotland’s leading public spaces for contemporary visual art.
Employability and graduate attributes

At ECA we believe it is essential to equip you with all the right skills to carry out the highest quality research and to step into the career path of your choice.

For taught postgraduates, IAD provides a subject-related and transferable skills programme to help you settle into postgraduate life, succeed during your studies and move confidently to the next stage of your career. We offer on-campus and online workshops and one-to-one study skills consultations, plus online advice and learning materials. Workshops and learning resources cover key topics tailored to different academic stages, including: pre-arrival sessions; getting started with your studies; critical reading, writing and thinking; managing your exams; and planning for and writing up your dissertation.

IAD also provides a comprehensive programme of transferrable skills training, resources and support for researchers completing a doctorate. The workshop programme is designed to help you successfully prepare for the various milestones of your PhD, from getting started with your research to writing up and preparing for the viva, as well as developing personal and professional skills that can be transferred to your future employment.

Workshops cover topics such as writing skills, reference management tools, statistics, preparing for conferences, delivering presentations, time and project management, and personal development. IAD also offers online resources and planning tools to help you get your research started, plus support for tutoring and contemporary research, demonstrating, and research public engagement and communication.

Careers Service

Our Careers Service plays an essential part in your wider student experience at the university, offering a range of tailored careers and personal development guidance and support. We support you to recognise the wealth of possibilities ahead, while at university and after graduation, helping you explore new avenues, tap into your talents and build your employability with confidence and enthusiasm.

We provide specialist support for postgraduate students. From exploring career options to making decisions, from CV writing to interview practice, from Employ.ed internships to graduate posts and from careers fairs to postgraduate alumni events, we will help you prepare for the future.

We sustain and continually develop links with employers from all industries and employment sectors, from the world’s top recruiters to small enterprises based here in Edinburgh. Our employer team provides a programme of opportunities for you to meet employers on campus and virtually, and advertises a wide range of part-time and graduate jobs.

More information: www.ed.ac.uk/careers/postgrad

Platform One

Platform One is an online meeting place where members of the University community, past and present, can gather. It aims to provide a supportive environment where students, alumni, staff and volunteers can share knowledge and experiences. Together, we form a single community that meets on Platform One. Join us and find out more about the people and possibilities.

More information: www.ed.ac.uk/platform-one

Backring bright ideas

LAUNCH.ed is the University’s award-winning programme for student entrepreneurs. Each year, LAUNCH.ed works with hundreds of students to assess their ideas and develop their business skills and helps many start their businesses. We have helped Edinburgh students and alumni launch almost 100 new businesses in the last three years, ranging from language tuition to robotics companies.

More information: www.LAUNCH.ed.ac.uk
Applications and fees

We have an online application process for all postgraduate programmes. It’s a straightforward system with full instructions, including details of any supporting documentation you need to submit.

When applying, you will set up an account, which lets you save your application and continue at another time.

Full guidance on our application system: www.ed.ac.uk/postgraduate/applying

General requirements
Our usual entrance requirement for postgraduate study is a UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/international/graduate-entrance), in a subject related to your chosen programme. You will also need to meet the University’s language requirements (see www.ed.ac.uk/english-requirements and following). Some programmes will require a portfolio and some will require a research proposal. As entry requirements, including portfolio contents, for individual programmes vary please check online for the details of the specific programme you wish to apply for.

For information on applying for PhD study, such as identifying a potential supervisor, visit: www.ed.ac.uk/postgraduate

References
For applications to taught programmes, the normal requirement is one reference, although an additional reference may be requested in individual cases. For applications to research programmes, two references are required. You should check the entry online for exact requirements for your intended programme of study. For general guidance on references, visit: www.ed.ac.uk/postgraduate/references

Deadlines
Some programmes have application deadlines. Please check the programme entry online for details. Earlier application is recommended, particularly where there is a high demand for places or when a visa will be required. Should you wish to submit a late application, please contact us for guidance.

Some funding applications have strict deadlines, and in some cases you need to have an offer for your University programme before you can apply for funding. Please check the procedures and deadlines for your individual funding options.

English language requirements
Students whose first language is not English must show evidence of one of the qualifications below.

Art in the Global Middle Ages; Collections & Curating Practices; Cultural Studies (MScR, PhD); History of Art (MScR, MPhil, PhD); History of Art, Theory & Display; Modern & Contemporary Art; History, Curating & Criticism

• IELTS: total 7.0 (at least 6.5 in each module).
• TOEFL-IBT: total 100 (at least 23 in each module).
• PTE(A): total 67 (at least 56 in each of the Communicative Skills sections but 61 in Writing).
• CAE and CPE: total 185 (at least 175 in each module).
• Trinity ISE: ISE III (with a pass in all four components).

All other taught programmes
• IELTS: total 6.5 (at least 6.0 in each module).
• TOEFL-IBT: total 92 (at least 20 in each module).
• PTE(A): total 61 (at least 56 in each of the Communicative Skills sections).
• CAE and CPE: total 176 (at least 169 in each module).
• Trinity ISE: ISE II (with distinctions in all four components).

Acoustics & Music Technology; Architectural Conservation; Architectural History & Theory; Composition; Composition for Screen; Design & Digital Media; Design for Change; Digital Composition & Performance; Digital Media Design (Online); Fashion; Glass; Graphic Design; Illustration; Interior Design; Jewellery; Landscape & Wellbeing; EMLA; Musical Instrument Research; MusicoLOGY; Performance; Costume; Product Design; Textiles; and all other research programmes

• IELTS: total 7.0 (at least 6.0 in each module).
• TOEFL-IBT: total 100 (at least 20 in each module).
• PTE(A): total 67 (at least 56 in each of the Communicative Skills sections).
• CAE and CPE: total 185 (at least 169 in each module).

Tuition fees
The following table provides an overview of indicative fee levels for programmes commencing in 2019.

Please note:
• International students starting full-time taught programmes of study lasting more than one year will be charged a fixed annual fee.
• All other students on full-time and part-time programmes of study lasting more than one year should be aware that annual tuition fees may be subject to revision and are typically increased by approximately five per cent per annum. This annual increase should be taken into account when you are applying for a programme.
• In addition to tuition fees, your programme may be subject to an application fee and additional costs/programme costs may apply. Please check the latest programme information online.

For UK/EU students

The scholarships have provided me with a wonderful opportunity to study at a premier institution. I wish to work in academia in the future and so my PhD will provide me with the necessary training and qualification to allow me to meet my goals.

Shrutti Chaudhry, PhD Sociology, Edinburgh Global Research Scholarship and College of Arts, Humanities & Social Sciences Research Studentship

Get in touch

Contact us
For all enquiries regarding our taught programmes, email ecapgddegrees@ed.ac.uk

For all enquiries regarding our research programmes, email ecaresearchdegrees@ed.ac.uk

Edinburgh College of Art
Lauriston Place
Edinburgh EH3 9DF
Tel +44 (0)131 651 5736
www.eca.ed.ac.uk

To discuss your PhD proposal, you should identify and contact potential supervisors: www.eca.ed.ac.uk/people

Visit us
Our Postgraduate Open Day is your opportunity to come and meet current staff and students. Our next campus-based Open Day takes place on 14 November 2018. For more information, visit: www.ed.ac.uk/postgraduate-open-day

Our visits to you
If you are unable to visit the University, we attend events throughout the year so you can meet and speak to us in person.

UK and Europe: www.ed.ac.uk/postgraduate/uk-eu-events

International: www.ed.ac.uk/international/our-visits-overseas

Chat online
We offer all postgraduate students monthly online information sessions. To find out more and see when the next session will be: www.ed.ac.uk/postgraduateonline-events

For international students, Edinburgh Global runs two online chat sessions each month. These are timed to give students in all timezones a chance to get involved. You can find out more and register online: www.ed.ac.uk/international/chat-to-us-online

Detailed maps can be found at: www.ed.ac.uk/maps
On 23 June 2016 the UK electorate voted in a national referendum to leave the European Union. At the time of going to print, there was no immediate, material change known that would impact on applicants for 2019 entry. However we recommend that you check online for the latest information before you apply: www.ed.ac.uk/news/eu

The University’s standard terms and conditions will form an essential part of any contract between the University of Edinburgh and any student offered a place here. Our full terms and conditions are available online: www.ed.ac.uk/student-recruitment/terms-conditions

The front cover shows a baroque guitar, attributed to Matteo Sellas, that was made in Venice, Italy, around 1640. It has a small peanut-shaped body, ornate decoration and five pairs of gut strings called courses. It was donated to us in the Anne Macaulay Collection in 1977 and is now part of the University’s Collection of Historic Musical Instruments, one of the world’s most important musical heritage repositories.

The item in this illustration is part of the University’s unique Centre for Research Collections, a rich resource for all our students, staff and the wider community.
