Postgraduate Opportunities 2020

GeoSciences

Influencing the world since 1583
“Edinburgh isn’t so much a city, more a way of life … I doubt I’ll ever tire of exploring Edinburgh, on foot or in print.”

Ian Rankin
Best-selling author and alumnus
Influencing the world since 1583

For more than 400 years the University of Edinburgh has been changing the world. Our staff and students have explored space, won Nobel Prizes and revolutionised surgery. They’ve published era defining books, run the country, made life saving breakthroughs and laid the foundations to solve the mysteries of the universe.

Our distinguished alumni include NASA astronaut Piers Sellers, former MI5 Director General Dame Stella Rimmington, Olympians Sir Chris Hoy and Dame Katherine Grainger, who founded the Women’s International League for Peace and Freedom, and physicist and mathematician James Clerk Maxwell.

International collaboration
An internationally renowned centre for academic excellence, we forge world class collaborations with partners such as the California Institute of Technology (Caltech), Stanford University, the University of Melbourne, Peking University, the University of Delhi and the University of KwaZulu Natal. As a member of the League of European Research Universities and the Coimbra Group, we link up with leading institutions across Europe.

Linking research and commerce
We were one of the first UK universities to develop commercial links with industry, government and the professions. Edinburgh Innovations promotes and commercialises our research excellence and can assist you in taking the first step to market, through collaborative research, licensing technology or consultancy.

Enhancing your career
We are committed to embedding employability in your University experience and have an impressive track record for graduate employment. From volunteering schemes to our sector leading careers service, we provide you with opportunities to develop your skills, knowledge and experience, giving you an edge in the competitive job market.

TOP 50
We’re consistently ranked one of the top 50 universities in the world. We’re 20th in the 2020 QS World University Rankings.

4TH
We’re ranked fourth in the UK for research power, based on the 2014 Research Excellence Framework.*

83%
The majority of our research – 83 per cent – is considered world leading or internationally excellent.*

TOP 100
We are ranked in the top 10 in the UK and in the top 100 in the world for the employability of our graduates†.

£403m
In 2017/18 we won £403 million in competitive research grants.

19
There are 19 Nobel Prize winners who are alumni of the University or have been members of academic staff here.

22ND
We’re ranked 22nd in the world’s most international universities‡. Since 2010, we have taught students from more than 160 countries.

* Times Higher Education, Overall Ranking of Institutions
† Times Higher Education, Global Employability University Ranking 2018
‡ Times Higher Education: The World’s Most International Universities 2019
Increasing wealth, global population and urbanisation is resulting in unprecedented rates of climate and environmental change. This poses formidable challenges for both biodiversity and humanity. It is clear that we must find a path for a sustainable future in a world that focuses on real-world problems and challenges. We seek to explore and tackle these issues through our new MSc programme, focused on the subject matter and the courses you will complete, that enable you to put valuable skills into practice. Prior trips have included visits to countries such as Nepal, South Africa, Iceland, Kenya, Malaysia, the Maldives, Morocco, Cyprus and Italy, as well as more local field trips to destinations around Scotland and the UK. Information on field trips are included in the programme entries in this prospectus.

At the School of Geosciences, we believe in providing opportunities for everyone. We are pleased to advise that we do not charge extra fees for compulsory field trips. Full travel and accommodation costs are covered by your programme.

Our online learning environment offers you a flexible way to study a postgraduate programme whilst maintaining your professional and personal commitments. Our dedication to a supportive online community enables you to have the "Edinburgh experience" wherever you are in the world. Just like our on-campus degrees, our online programmes are delivered by dedicated academics, many of whom are leaders in their field. They will be active and present in online tutorials and other discussions as well as being contactable directly or via our online support team. You will participate in a collaborative and dynamic learning environment with people from all over the world who want to interact, learn and engage together.

Our programmes place a strong emphasis on practical experience and experiential learning. Field trips are an excellent way in which to explore the factors and forces that shape our world and the environments in which we live. A number of our programmes incorporate residential field trips that will enhance your learning experience and enable you to put valuable skills into practice. Prior trips have included visits to countries such as Nepal, South Africa, Iceland, Kenya, Malaysia, the Maldives, Morocco, Cyprus and Italy, as well as more local field trips to destinations around Scotland and the UK. Information on field trips are included in the programme entries in this prospectus.

At the School of Geosciences, we believe in providing opportunities for everyone. We are pleased to advise that we do not charge extra fees for compulsory field trips. Full travel and accommodation costs are covered by your programme.
Carbon Management

MSc 3 yrs PT (2 yrs accelerated study)

Programme description
Our online MSc, Carbon Management is a groundbreaking development of the award-winning campus-based MSc Carbon Management programme. Building on the proven success and content of the established residential programme, this new online programme provides you with high-level knowledge, skills and training in the business, economics and science of carbon management. The programme is designed for graduates who want an advanced academic qualification in tackling climate change management by industry, NGOs and government, with the flexibility that online learning provides. The programme is affiliated with the University’s Global Environment & Society Academy (GESA): www.ed.ac.uk/global-environment-society

Programme structure
The programme is organised into four component certificates:

- PgCert Climate Change Management
- PgCert Carbon Innovation
- Applied Carbon Methods (you must successfully complete both other certificates before taking this final component).

You will graduate with the postgraduate diploma if you take only the first two components.

COMPULSORY COURSES PREVIOUSLY OFFERED INCLUDE:

- Climate Change Impacts and Adaptation
- Climate Change Mitigation
- Climate Change & Corporate Responsibility
- Carbon Economics
- Climate Change Measurement
- Energy & Climate: Applied Carbon Methods
- Dissertation.

Studying online
As a student of one of our online programmes, you will:

- have the flexibility to study when most convenient for you;
- be able to study from anywhere with an internet connection;
- have access to all University services and relevant academics;
- become part of a rich and varied online community; and
- learn the latest developments from people working at the leading edge in your field.

To try our Virtual Learning Environment, please visit our demo: demo.climate.ed.ac.uk

Career opportunities
Through our existing MSc Carbon Management programme we boast excellent relationships with sector-relevant employers, as well as a great alumni network covering more than 60 countries. This provides unrivalled opportunities to collaborate on research projects and find new positions in the field of carbon management. The main employment opportunities for our graduates are in climate change consultancy, renewable energy and carbon management project development, or as government or non-governmental organisation (NGO) climate change advisors. Several of our graduates are now studying for climate change-focused PhDs.

Entry requirements
A UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/ international/graduate-entry) in any subject. We will also take any professional experience into account.

English language requirements
See page 28.

Fees and funding
For fees see page 28 and for funding information see page 30.

Climate Change Management

PgCert 1 yr PT

Programme description
Based upon our highly successful on-campus MSc Carbon Management (see page 6), this online programme utilises a blend of interactive content, videos, virtual case studies and online discussions to explore the science and business responses to climate change. We examine the leading ways in which this global challenge can be addressed, covering adaptation and mitigation solutions across a wide range of sectors and regions. The programme is designed for those who have a passion for tackling climate change and who require the flexibility that online learning provides.

This programme is affiliated with the University’s Global Environment & Society Academy (GESA): www.ed.ac.uk/global-environment-society

Programme structure
The programme comprises three compulsory courses that move from the science of climate change and its impacts, through the key adaptation and mitigation solutions, to examination of the business response to climate change, and the risks and opportunities it presents.

This certificate may be studied as a standalone qualification. Alternatively it may form one third of the online MSc Carbon Management, or half of the new online diploma in Carbon Management.

COMPULSORY COURSES PREVIOUSLY OFFERED INCLUDE:

- Climate Change Impacts & Adaptation
- Climate Change Mitigation
- Climate Change & Corporate Responsibility

Studying online
As a student of one of our online programmes, you will:

Taught masters programmes

Earth Observation & Geoinformation Management
MSc 1 yr FT (2 yrs or 3 yrs PT available for UK/EU students)

Programme description
This interdisciplinary programme will equip you with the analytical and communication skills to work in this important and growing field. It will suit students with a background in environmental or geographical sciences who have already come across remote sensing, or those with a background in physics, computer science or engineering looking for a career in an applied area. Graduates from the programme will be well prepared to pursue subsequent research or find relevant employment. This programme builds on our successful Geographical Information Science (GIS) programme, which was the first of its type in the world and has a heritage of almost 30 years.

Programme structure
This programme comprises taught courses and an individual dissertation.

COMPELLARY COURSES PREVIOUSLY OFFERED INCLUDE:
- Active Remote Sensing: Radar and Lidar
- Passive Earth Observation: New Platforms, Sensors, and Analytical Methods
- Spatial Modelling and Analysis
- Research Practice and Project Planning
- Dissertation

RECOMMENDED OPTION COURSES
In consultation with the Programme Director, you will choose from a range of option courses. We have previously offered:
- Semester 1: Ecosystems and Environmental Change; Principles of Environmental Sustainability; Marine Systems and Policies; Atmospheric Quality and Global Change; Encountering Cities: Introduction to Spatial Analysis; Principles of GIS; Frameworks to Assess Food Security; Distributed GIS; Paper 3: Environmental Governance; Forests and Environment; Marine Infrastructure and Environmental Change; Participation in Policy and Planning; Waste Reduction and Recycling; Environmental Impact Assessment; Environmental Economics; Applications in Ecological Economics; Global Environmental Politics; Resource Politics and Development; Governance, Development and Poverty in Africa; Principles of Sustainable Development; Climate Change Management
- Semester 2: Ecological Economics Field Methods in Research and Practice; Field Trip

Programme description
The MSc programmes will prepare students for the global, environmental and geographical business world. The programmes will equip students with a broad understanding of economic principles. Graduates with this postgraduate training are in greater demand than ever before.

Programme structure
You will learn through lectures, group work, applied data collection/analysis, and field trips. You will meet professional, informal group discussion, games and individual study, as well as the spring study tour. After two semesters of taught courses, you will begin work on your individual dissertation. You will be able to choose from a wide selection of option courses in order to suit individual interests and career goals.

COMPELLARY COURSES PREVIOUSLY OFFERED INCLUDE:
- Foundations in Ecological Economics: Applications in Ecological Economics: Environmental Evaluation
- Ecological Economics Field Methods in Research and Practice

RECOMMENDED OPTION COURSES
In consultation with the Programme Director, you will choose from a range of option courses. We have previously offered:
- Energy & Society I: Key themes and issues; Energy in the Global South
- Economic Issues in Public Policy; Political Issues in Public Policy
- Environmental Sustainability; Controversies in Science and Technology; Case Studies in Sustainable Development; Science, Knowledge and Expertise; Development, Science and Technology; The Human Dimensions of Environmental Sustainability; Controversies in Science and Technology; Economic Issues in Public Policy; Political Issues in Public Policy

Career opportunities
UK research councils cite a major skills gap in the energy sector, one of the biggest growth sectors in our economy in recent years. Demand is high for sound evidence on behavioural change, public engagement with energy issues, and public support for community and commercial investments in low carbon energy generation. You will translate complex science into effective policies and business opportunities. We are committed to helping you meet prospective employers and network within the field. Our links with government departments, energy relevant NGOs and key industry players who want to make use of these skills, allow us to organise careers events and dissertations conducted with external partner organisations.

Entry requirements
A UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/internationalgraduatedegreeentry). We may also consider a UK 2:2 honours degree, or its international equivalent, with appropriate work experience.

English language requirements
See page 28.

Fees and funding
For fees see page 28 and for funding information see page 30.

Programme Administrator Elspeth Martin

Programme description

This course is designed for students who wish to study international development in a theoretical and practical context. It offers a broad range of option courses, enabling students to specialize in areas of particular interest. The course provides a solid foundation for further study at the PhD level or for careers in a wide range of sectors, including government, NGOs, and international organizations.

Entry requirements

A UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/internationalgraduate-entry). We may also consider a UK 2:2 honours degree, or its international equivalent, with relevant work experience, a strong personal statement, and relevant supporting reference.

English language requirements

The University of Edinburgh
Geosciences Postgraduate Opportunities 2020

Taught masters programmes

MSc 1 yr FT (2 or 3 yrs PT available for UK/EU students)

Environment, Culture & Society

Programme description

This course is designed to provide students with a comprehensive understanding of the cultural and social dimensions of environmental issues. Through a combination of coursework and a dissertation, students will develop the skills needed to engage in research and policy-making.

Entry requirements

A UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/internationalgraduate-entry). We may also consider a UK 2:2 honours degree, or its international equivalent, with relevant work experience, a strong personal statement, and relevant supporting reference.

English language requirements

See page 28.

Fees and funding

For fees see page 28 and for funding information see page 30.

Programme Administrator Paula Escobar
Tel +44 (0)131 650 2543
Email geos.postgrad@ed.ac.uk

www.ed.ac.uk/pg/395

Programme structure

You will study three compulsory courses and three options, balancing lectures, seminars, workshops and a dissertation.

RECOMMENDED OPTION COURSES

- Understanding Environment and Development: Development, Science and Technology; Disasters and Development; Displacement and Development; Economic Issues in Public Policy; Ecosystem Services; 1: Ecosystems and Global Change; Energy and Society: 1: Key Concepts in Development; Environmental Valuation; Forests and Environment; Frameworks to Assess Food Security; Principles of Environmental Sustainability: Anthropology and Environment; Anthropology and Environment; Anthropology of Global Health; Case Studies in Sustainable Development; Corporate Social Responsibility and the Law; Critical Perspectives on Mental Health and Wellbeing in the Global South; Energy Policy and Politics; Environmental Impact Assessment; Gender and Development; Global Environmental Politics; Human Dimensions of Environmental Change and Sustainability; International Political Economy; International Security; Interpreting Development: Institutions and Practices; Participation in Policy and Planning; Political Ecology; Sustainability of Food Production; The International Politics of Money; Waste Reduction and Recycling; Water Resource Management.

Field trip

A two-week trip to Nepal provides experience of interlinked environment and development issues. You will conduct group research projects and reflect on the role and ethics of fieldwork in academia and beyond.

Career opportunities

This MSc suits those seeking roles in international or national development agencies, think tanks, NGOs, environmental consultancies or the private sector, or going on to PhD study. Potential roles include ecologists and environmentalists, in areas like sustainable agriculture and aquaculture.

Entry requirements

A UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/internationalgraduate-entry). We may also consider a UK 2:2 honours degree, or its international equivalent, with relevant work experience, a strong personal statement, and relevant supporting reference.

English language requirements

See page 28.

Environmental Protection & Management

MSc 1 yr FT (2 or 3 yrs PT available for UK/EU students)

Programme description

This programme is open to students with a 2:1 honours degree, or its international equivalent (www.ed.ac.uk/internationalgraduate-entry). It is designed to provide a comprehensive understanding of the principles of environmental protection and management, with a focus on practical skills and application.

Entry requirements

A UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/internationalgraduate-entry). We may also consider a UK 2:2 honours degree, or its international equivalent, with relevant industry experience.

English language requirements

See page 28.

Fees and funding

www.ed.ac.uk/pg/31

“...the programme has helped me get a deeper understanding of economics, anthropology, gender issues and policies. Moving forward, I plan to be more involved in initiatives that promote social mobility and justice among poor communities, especially in being able to access vital resources like renewable energy.”

Anita Owiti, MasterCard Foundation Scholar, MSc Environment & Development
Taught masters programmes

Environmental Sustainability

**MSc 1 yr FT (2 or 3 yrs PT available for UK/EU students)**

**Programme description**

Ensuring the environmental sustainability of society is one of the major challenges facing humanity in the 21st century. How can we meet the needs of the world’s growing population without threatening the ecological processes that support human wellbeing? How can economy and energy systems be restructured to combat climate change? What policies foster sustainability? How can the necessary changes in the behaviour of organisations and individuals be promoted? This MSc explores these and other questions. You will be encouraged to think across different disciplines to understand sustainability and policy perspectives for a stronger understanding of sustainability and how it can be achieved. This will be attractive to organisations promoting sustainable development or seeking to reduce human impacts on the environment.

**Programme structure**

This programme comprises six taught courses and a dissertation.

**COMPULSORY COURSES PREVIOUSLY OFFERED INCLUDE:**

- Principles of Environmental Sustainability
- Case Studies in Sustainable Development,
- Dissertation.

**RECOMMENDED OPTION COURSES**

- Political Ecology
- Forests and Global Change
- Soil Science Concepts and Application
- Foundations in Ecological Economics
- Economic Dimensions of Environmental Change
- Participation in Policy and Planning
- Political Ecology
- Sustainability of Food Production
- Understanding Environment and Development: Waste Reduction and Recycling

**Career opportunities**

You will be prepared for roles within environmental consultancy, national and local government, non-profit organisations, education or research. Your choice of option courses and dissertation project can be used to tailor your course to support your intended career path. Recent graduates are employed in sustainability-related roles by organisations such as AMEC, Carnegie Wave Energy, EON, ERM, AECOM, Friends of the Earth, German Council for Sustainable Development, Global Justice Now, Institute for European Environmental Policy, International Energy Agency, London Borough of Camden, Marine Conservation Society, Northumbrian Water Group, OECD, Ofgem, PwC UK, John Muir Trust, The Scottish Government, Transport for London, UNFCCC secretariat, World Resources Institute and Zero Waste Scotland.

**Entry requirements**

A 2:1 honours degree, or its international equivalent (www.ed.ac.uk) in a science or engineering subject, or a recognised professional qualification. Students may also be considered on an individual basis. Applicants whose first language is not English should have a minimum IELTS score of 7.0 (reading 7.0, writing 6.5, speaking 6.5, listening 6.0) or an equivalent internationally recognised English test score or qualification.

**Fees and funding**

For fees see page 28 and for funding information see page 30.

Food Security

**MSc 1 yr FT (2 or 3 yrs PT available for UK/EU students)**

**Programme description**

Food security has become a critically important issue for societies around the globe. Indeed, growing evidence points to emerging patterns of change that suggest a combination of structural and political factors have led to increases in the incidence and severity of food insecurity. In consultation with your Personal Tutor, you will choose from a range of options to ensure your studies can be tailor-made to your personal career aspirations.

**Programme structure**

The programme comprises six taught courses and a dissertation.

**COMPULSORY COURSES PREVIOUSLY OFFERED INCLUDE:**

- Frameworks to Assess Food Security
- Sustainability of Food Production
- Interrelationships in Food Systems
- Professional and Research Skills in Practice
- Dissertation

**RECOMMENDED OPTION COURSES**

- Economic Dimensions of Environmental Change
- Understanding Environment and Development: Waste Reduction and Recycling

**Career opportunities**

Graduates of this programme are now working in a variety of GIS roles worldwide in the public and private sector organisations, for employers such as Microsoft, Google, General Electric Aerospace, The World Bank, British Antarctic Survey, Grassland and Livestock Studies in Sustainable Development, Ecosystem Services 1: Ecosystems and Global Change (including GM crops, the impact of climate change and new responses to food security to real world scenarios. Recent destinations have included Italy, Scotland’s capital is attractive for organisations seeking to influence national environmental sustainability debates, giving access to interesting case studies and opportunities for networking. The programme takes an international perspective, with a focus on regions in the global north.

**Entry requirements**

A 2:1 honours degree, or its international equivalent (www.ed.ac.uk) in geography, environmental science, engineering, social science, economics, politics or other relevant subject. This programme is not suitable for applicants pursuing a career in food security/hygiene or related areas.

**Fees and funding**

For fees see page 28 and for funding information see page 30.

GeoEnergy

**MSc 1 yr FT (2 or 3 yrs PT available for UK/EU students)**

**Programme description**

This programme is aimed at students who would like to pursue a geoenergy-related career in the future energy sector, as it transitions from dependence on fossil fuels to low carbon alternatives. Our aim is to offer a programme that capitalises on subsurface (geological) knowledge to assist in this transition, opening a diverse range of career pathways in future geoenergy technologies, the disposal of energy-related wastes and the evolving hydrocarbon industry.

**Programme structure**

The programme builds on the strength and reputation of the research groups within the School of GeoSciences, which specialise in the use of the subsurface for geoenergy applications. These include: carbon capture and storage (CCS); radioactive waste disposal and extraction; unconventional and conventional hydrocarbons; wet and dry geothermal heat; and subsurface fluid tracing using noble gases and stable isotopes.

**COMPULSORY COURSES PREVIOUSLY OFFERED INCLUDE:**

- Future Geoenergy Resources
- Geothermal Engineering
- Environmental Geochemistry
- Geohazard Analysis
- Nuclear Waste Management: Principles, Principles & Practice
- Frameworks to Assess Food Security
- Sustainability of Food Production
- Interrelationships in Food Systems
- Professional and Research Skills in Practice
- Dissertation

**RECOMMENDED OPTION COURSES**

- Subsurface Enhanced Oil Recovery
- Environmental Impact Assessment
- Environmental Valuations
- Forests and Global Change
- Soil Science Concepts and Application
- Interrelationships in Food Systems
- Professional and Research Skills in Practice
- Dissertation

**Career opportunities**

This programme comprises a series of taught courses and a dissertation.

**Fees and funding**

For fees see page 28 and for funding information see page 30.

Geographical Information Science & Archaeology

MSc 1 yr FT (2 or 3yr PT available for UK/EU students)

Programme description

This programme offers you the chance to develop a detailed understanding of the application of geographical information science (GIS) and related technologies in the field of archaeology. The programme has a distinctive Scottish flavour, and you will benefit from the guidance of internationally-recognised staff. The programme combines the pedigree of Edinburgh’s GIS expertise with a long-established reputation in archaeological teaching and research. You will gain a broad understanding of the use of GIS in archaeological surveying, recording and research and will be equipped with the analytical and communication skills necessary to work in this vibrant area. Demand for the application of GIS within archaeology is growing at an unprecedented rate, including searching for new archaeological sites, determining the societal context of existing sites and examining the interplay between successive occupations of a site. The proven ability of our GIS graduates in employment means our programme is held in high regard by a wide range of employers.

Programme structure

The programme is organised into two semesters of taught courses, delivered through lectures and seminars, after which you will work, with fellow students from across the world.

RECOMMENDED OPTION COURSES

In consultation with the Programme Director, you will choose from a range of option courses. We have previously offered: Active Remote Sensing; Radar and Lidar; Business Geographics; Exploring the Past with Data Science; Passive Earth Observation: New Platforms, Sensors, and Analytical Methods; Principles of GIS; Practice of Remote Sensing; Principles of Geographical Information Science; Quantitative Methods and Reasoning in Archaeology; Space, Place and Time: the Archaeology of Built Environments; Technological Infrastructures for GIS; The Scottish Lowlands: Archaeology and Landscape before the Normans; Visual Analytics.

Field trip

There is a field trip to Highland Perthshire in October, focusing on project management and techniques for capturing geospatial information.

Career opportunities

Graduates will be able to continue to study or to pursue a career in surveying, illustration and 3D visualisation, digital archiving, heritage management, terrain modelling, database management, geomatics or consultancy. Our GIS graduates have worked in both public and private sector organisations, including Historic Scotland, English Heritage, the Royal Commission on the Ancient and Historical Monuments of Scotland, thinkWhere (formerly Forth Valley GIS) and CFA Archaeology.

Entry requirements

A 2:1 honours degree, or its international equivalent (www.ed.ac.uk/ international/graduate-entry). We may also consider a UK 2:2 degree, or its international equivalent, with relevant industrial or business experience.

English language requirements

See page 28.

Global Environment Challenges

PgCert 9 mths or 1 yr FT (2 yrs PT)

Programme description

Thiscertificate is split into three taught courses, which are delivered through an exciting mixture of online modes, including video lectures, study guides, self-directed and guided reading as well as a range of interactive online reflection and discursive activities. Due to the highly flexible nature of this certificate, it is ideal if you want to gain a further qualification with minimum interruption to your work or family commitments. Using our virtual learning environment, you will develop your IT skills and make contact with fellow students from across the world.

Managing Environmental Change

MSc 1 yr FT (2 or 3 yrs PT available for UK/EU students)

Programme description

Humans have changed the environment so profoundly that many scientists consider this a new epoch – the Anthropocene. This programme provides cutting edge learning on the social and environmental forces shaping the Anthropocene, and the ways in which these changes can be managed.

In particular, we focus on the ecology of planetary life support systems, and interactions between these systems and human wellbeing, examining the possibilities for human societies to develop in resilient and adaptive ways. We also focus on how environmental change is, and should be, managed, with frequent opportunities for engagement with practitioners, policy makers and business.

Programme structure

You will study five compulsory courses, including a field course, and one option course. During the summer you will undertake a four-month professional placement focused on Managing Environmental Change.

Programme description

This programme provides cutting edge learning on the social and environmental forces shaping the Anthropocene, and the ways in which these changes can be managed.

In particular, we focus on the ecology of planetary life support systems, and interactions between these systems and human wellbeing, examining the possibilities for human societies to develop in resilient and adaptive ways. We also focus on how environmental change is, and should be, managed, with frequent opportunities for engagement with practitioners, policy makers and business.

Programme structure

You will study five compulsory courses, including a field course, and one option course. During the summer you will undertake a four-month professional placement focused on Managing Environmental Change.

Programme description

Managing Environmental Change

This programme provides cutting edge learning on the social and environmental forces shaping the Anthropocene, and the ways in which these changes can be managed.

The University of Edinburgh
Geosciences Postgraduate Opportunities 2020

**Marine Systems & Policies**

**Programme description**

This course is a joint venture with Scotland’s Rural College. Soils form the basis of all agricultural production, but they also store water, mediate the impact of pollutants, provide biological habitats, and are involved in dealing with society's waste. They are a source of food, fibre and materials, and are involved in provisioning, regulating and cultural ecosystem services. Our trees and forests face new plant health risks that require sustainable solutions that will allow us to increase the global food supply while preserving the integrity of agricultural and non-agricultural ecosystems. Our trees and forests face new plant health risks that require sustainable solutions that will allow us to increase the global food supply while preserving the integrity of agricultural and non-agricultural ecosystems.

**Fees and funding**

For fees see page 28 and for funding information see page 30.

Research at the School of GeoSciences

As the largest grouping of geoscientists in the UK, we offer an extensive range of research opportunities for postgraduates.

The University of Edinburgh has an unbroken record of teaching and research in the earth sciences going back to 1770, when Robert Ramsay became the first Professor of Natural History. James Hutton and Arthur Holmes were prominent among those who set an academic tradition in Edinburgh that continues today through the University’s earth sciences and environmental sciences (including geography) teaching and research.

Home of leading research
Our interactive and interdisciplinary research environment allows us to tackle difficult research questions, from causes of past glaciations to interactions of earth, climate and society. The ambition and quality of our research was reflected in the Research Excellence Framework (REF) 2014, when 78 per cent of our research in earth sciences and environmental sciences was rated 4* world leading or 3* internationally excellent on the overall quality profile.

Backed by industry
The School receives strong backing from industry, particularly in areas such as hydrocarbons and carbon capture and storage. We receive support from the Scottish Government energy directorate, Thailand, the European Union and from major UK research councils, including the Natural Environment Research Council, Engineering and Physical Sciences Research Council and the Economic and Social Research Council.

Research community
Postgraduate research at the School of GeoSciences is represented by the following three research institutes:

Geography and the Lived Environment
This institute generates agenda-setting research that engages with understanding of the relationships between people, society and the environment. Researchers seek to investigate key areas of contemporary and historical societal concern, including the energy transition, development, climate change, inequalities, land use change, ecosystem services, social justice, health and wellbeing, and urbanisation. The Lived Environment refers to those aspects of the Earth system that are experienced by people – not as it is purely conceptualised or theorised, but as it is lived. It is a multidisciplinary concept that brings together environmental science, geography, economics, policy, social science and computer science.

Global Change
This institute seeks to improve the scientific understanding of past, present and future changes in the Earth system through measurements, theory and computational modeling. Better understanding of the Earth system allows us to inform policymakers and to develop effective mitigation strategies, which, if implemented, would minimise the economic and humanitarian implications of changes in climate and the Earth system. Our research incorporates some of the most compelling scientific challenges of the 21st century. To address these questions we nurture an interdisciplinary research and teaching environment, integrating expertise across the institute, the School of GeoSciences and, more broadly, throughout the University and beyond.

Earth and Planetary Sciences
This institute undertakes research that informs the solutions to address global challenges relating to resources, natural hazards and the environment. Our researchers seek better understanding of chemical and physical properties of materials, the origin and history of pore fluids, minerals, rock assemblages, and magmas, and their interactions at all scales within the Earth. We develop new seismological, electromagnetic, gravitational, magnetic and industrial seismic methods to interrogate the Earth remotely for such information.

Dynamic leaders
The School has many high-profile academics who are leaders in their field. Stuart Haszeldine is the world’s first Professor of Carbon Capture and Storage. He co-leads Scottish Carbon Capture and Storage, the UK’s largest such group (a collaboration between the University of Edinburgh, Heriot-Watt University and the British Geological Survey). He is a member of the CCS Advisory Group to the UK Department of Business, Energy and Industrial Strategy, and works with the Scottish Government energy directorate.

Gabriele Hegerl FRS is Professor of Climate System Science. She studies the causes of observed changes in climate, and seeks to detect the emerging signal of greenhouse gas increases in temperature data. She also studies the causes of change in climate variability and extremes as well as change over the past millennium. Professor Hegerl is involved in the Intergovernmental Panel on Climate Change. She was a member of the Summary for Policymakers writing team in the Fourth Assessment Report, and a member of the Synthesis Report writing team in the Fifth Report.

Simon Kelley is the Head of the School of GeoSciences and Professor of Isotope Geochemistry. One of his main research interests is measuring the rates and timescales of geological processes. Simon has worked on dating large igneous provinces, ultra-high pressure metamorphism in subduction zones, and the provenance of individual grains in ancient silt and sands. Simon’s research also extends to online teaching where he led a project to develop the virtual microscope for Earth science, an open educational resource: www.virtualmicroscope.org

International collaborations
A commitment to international partnerships is intrinsic to the School’s research ethos. We have established research links on every continent.

Some projects are global in scope, such as the calculation of surface temperatures across oceans, determining the rate at which cosmic rays bombard the Earth’s surface at different latitudes, or human transnational processes such as migration and globalisation.

Other projects focus on specific regions and communities, for example addressing issues of gender and social equality for community forest projects in South Asia, or examining archaeological evidence to evaluate the role of climate in environmental and cultural change.

Examples of our research partnerships can be found on the following page.

Our research collaborations

We work with a wide range of research institutes, centres and universities around the world. Here is a selection of our partnerships.

Centre for Research on Environment, Society and Health
CRESH fosters collaborations between scientists whose research is focused on exploring how physical and social environments can influence health: cresh.org.uk

Centre for Science at Extreme Conditions
The aim of the CSEC is to promote the study of materials at extremes of pressure and temperature and in electromagnetic fields: www.csec.ed.ac.uk

Centre for Sustainable Forests & Landscapes
The Centre aims to combine expertise from the public and private sectors, and across social and natural sciences, to guide policymakers and empower stakeholders to address some of the forest and landscape science and management challenges: www.ed.ac.uk/sustainable-forests-landscapes

Edinburgh Materials and Micro-Analysis Centre
We provide integrated and interdisciplinary facilities for the application of microbeam analytical techniques to material analysis: www.ed.ac.uk/geosciences/EMMAC

Edinburgh Research Partnership in Engineering and Mathematics
ERPerm, a consortium involving the University of Edinburgh, Heriot-Watt University and Edinburgh Napier University, is organised into six joint Research Institutes dedicated to world-class research, innovation and education in engineering and mathematical science: www.erp.ac.uk

Edinburgh Seismic Research
The School and the University of Edinburgh have a national and international reputation in exploration geophysics: www.geos.ed.ac.uk/geom scientific centre, creating an ideal environment for teaching and research.

International Centre for Carbonate Reservoirs
ICCR is a strategic alliance between Edinburgh and Heriot-Watt universities investigating the recovery of hydrocarbons from carbonate reservoirs: www.iccr.org.uk

National Centre for Earth Observation
The NCEO is a partnership of scientists and institutions that are using data from Earth observation satellites to monitor global and regional changes in the environment: www.nceo.ac.uk

Scottish Carbon Capture and Storage
Led by the School of GeoSciences, this is the largest such grouping in the UK, with world-class expertise in hydrocarbon geoscience, industrial-scale chemical engineering, carbon capture and innovative CO2 use and power plant design: www.sccs.org.uk

Scottish Universities Environmental Research Centre
This is a collaborative facility operated by the Universities of Edinburgh and Glasgow, providing world-class analytical facilities. It hosts several national Natural Environment Research Council facilities: www.gla.ac.uk/research/az/suerc

UK Geotraces
UK Geotraces is part of an international consortium founded to understand the oceanic cycles of key trace elements and isotopes: www.geotraces.org

For more information about our research centres, please visit: www.ed.ac.uk/geosciences/research
Research opportunities

We offer the following range of research programmes:

MSc by Research
The master of science by research programme offers you the opportunity to acquire research skills by undertaking a single year (if studying full time) of independent study within the School’s research interests.

Master of Philosophy
An MPhil resembles a PhD but only requires a minimum of two years’ study (full time), including an extended piece of supervised research. This does not carry the same requirement for original contribution to knowledge as a PhD. You’ll pursue your individual research project under supervision and submit a thesis.

Doctor of Philosophy
As a PhD student you will undertake an original research project under individual supervision. Your studies will take at least three years, and to qualify for your doctorate your thesis must be judged to represent an original contribution to knowledge. In some cases it is also possible to study a 1+3 programme, comprising a year of MSc study leading on to a PhD.

Entry requirements
A UK undergraduate degree, or its international equivalent, in a related subject. We may also consider your application if you have other qualifications or experience. Please check the specific entry requirements for your programme online before applying.

Support
As a research student, you will be affiliated to one of our research institutes, benefiting from an excellent peer-supported network. As groupings of researchers with related interests, the institutes provide a forum for development of ideas, collaboration, and dissemination of results, and an environment for training, development and mentoring of research students and early career researchers.

Career opportunities
Many of our graduates go on to postdoctoral research roles in universities and research institutes internationally. Others are now working as geologists, geophysicists, biogeoscientists and environmentalists for companies including BP, the Met Office and the International Seismological Centre.

More information
Enquiries for PhD, MPhil and MSc by Research programmes should be directed to:

Research institutions
Our research programmes in geology and geophysics draw on expertise from the School’s Earth & Planetary Science research institute.

Research profile
The Earth & Planetary Science research institute studies the physical and chemical properties, origin and history of the Earth, and encompasses the major disciplines of geology, geochemistry, geodynamics, meteorology and geophysics. We bring together different fields to understand the way in which the Earth’s subsurface works – from atoms to plates, and on timescales ranging from seconds to billions of years.

We have special expertise in: mineralogy; igneous, metamorphic and experimental petrology; palaeontology; sandstone and carbonate diagenesis; tectonics; rock physics and chemistry; petroleum geoscience; seismic imaging; and seismic sequence stratigraphy.

Our research is applied to areas as diverse as carbon capture and storage and the examination of diamonds from the lower mantle. The Edinburgh Earth Observatory, part of the Earth & Planetary Science research institute, is a multidisciplinary research unit, providing a strategic focus and support base for the University’s expertise in the geosciences. Its main research focus is on understanding the Earth and its environment through the effective exploitation of both in situ and remote observations. The Earth & Planetary Science research institute, and our associated, new Joint Graduate School, established by the Edinburgh Research Partnership in Engineering and Mathematics, now contains Europe’s largest grouping of subsurface research geologists and specialist geophysicists in a single city. Recent graduates are now working for the British Antarctic Survey, as geophysicists, geologists and hydrogeologists for various employers, and as postdoctoral researchers for the Moredun Group and for universities worldwide from Cambridge to New Zealand.

English language requirements
See page 28.

Fees and funding
The School receives sizeable studentship quota allocations from research councils and also offers studentships provided by successful consortium bids and research grants. School-funded scholarships are also available. For fees see page 28 and for funding information see page 30.

Human Geography

MSc by Research 1 yr FT (2 yrs PT available for UK/EU students)

This programme’s emphasis on independent research allows you to work closely with scholars who are leaders in their field. Research may be in any area of social, urban, environmental, development, political, economic, historical or cultural geography that is supported by the Human Geography Research Group. It is co-delivered with the University’s Graduate School of Social Science. We offer a balance between general and specialist research training. The programme is recognised by the Economic and Social Research Council (ESRC) and the Arts and Humanities Research Council. A programme highlight is the postgraduate conference where students present their research in progress. The programme can stand alone as a masters, or form the first year of a 1+3 ESRC-backed PhD programme.

RECOMMENDED OPTION COURSES

In consultation with the Programme Director, you will choose from a range of option courses. We particularly recommend:

- Conducting Research in Human Geography: Methodological Debates in Human Geography: Core Quantitative Data Analysis 1 and 2, Research Skills in the Social Sciences: Data Collection; Dissertation in Human Geography.

Research group

Our research programmes in geography draw on expertise from the School's Human Geography Research Group, part of the Geography and the Lived Environment research institute.

Research profile

The Human Geography Research Group is recognised for its leading contribution to research at the forefront of the field. The Group's research efforts provide challenging new insights to core geographical concerns through four research themes:

- Just Geographies: Building upon human geography’s long-standing concern with the production and consequences of inequality and uneven development.
- Materialising Geographies: Examining the relationship between materiality, technology and geography.
- Lived Geographies: Concerned with how social, economic, political and cultural processes emerge from and shape people's daily lives at home, work and in public.

We have expertise in a wide range of regions, including the UK and continental Europe, South Asia, Australia, North and South America, Canada, the Caribbean and the Middle East.

Our research programmes in geography draw on expertise from the School's Human Geography Research Group, part of the Geography and the Lived Environment research institute.

Training and support

The School is a recognised as a provider of the Economic & Social Research Council (ESRC) Research Training 1+3 postgraduate training programme and also has studentships from successful consortium bids. School-funded scholarships are also available. For fees see page 28 and for funding information see page 30.

Palaontology & Geobiology

MSc by Research 1 yr FT (2 yrs PT available for UK/EU students)

Research profile

The University has world-class expertise in the core disciplines of geology, palaontology, ecology and evolutionary biology. This new programme, run by the Centre for Geobiology & Geochemistry, gathers leading researchers in these topics from across the University and the wider Scottish community, giving you the opportunity to learn from leaders in the field.

The programme comprises three compulsory courses: Research Planning and Management in Geosciences; Project Design and Literature Analysis; Topics in Palaeobiology and Evolution, plus a choice of option courses and a dissertation.

Dissertation

The dissertation will demonstrate your ability to conduct independent research by exploring a topic of your choosing in the broad fields of palaontology, palaeoecology, evolutionary biology, geochemistry and geobiology. You should submit a brief outline of your proposed research project at the time of application and this will be developed in consultation with prospective supervisors. You will be appointed a principal supervisor and a second supervisor to guide and monitor your work. Supervisors may be drawn from outside the University, allowing you to extend your research in a wide range of potential subject areas.

Fieldwork

You will have the opportunity to conduct hands-on fieldwork on the Isle of Skye, one of the best places in the world to find fossils from the Middle Jurassic part of the Jurassic Period, including some of the first colonal long-necked dinosaurs and primitive flesh-eating tyrannosaurs. You will also be able to take part in annual trips to world-renowned fossil sites around Edinburgh, where the sciences of geology and palaeontology were forged in the 18th and 19th centuries.

Facilities

You will have access to world-class analytical facilities, including ion microscopes, electronprobe, SEM, and computed tomography scanners.

English language requirements

See page 28.

Fees and funding

For fees see page 28 and for funding information see page 30.

The University of Edinburgh GeoSciences Postgraduate Opportunities 2020

Case study: Edinburgh’s research with impact

Acidification in the deep seas

Currently of great concern is the question of how climate change will impact deep-sea habitats, such as deep-sea coral reefs that support high biodiversity. These habitats are intrinsically difficult to access and are often out of sight and out of mind for many people.

The School of GeoSciences’ Dr Sebastian Hennige and Professor Murray Roberts were appointed to lead a report for the Convention on Biological Diversity (CBD) on the impacts of ocean acidification on marine biodiversity: www.cbd.int/doc/publications/cbd-ets75-en.pdf

They also produced a background document on acidification in cold-water areas to support the CBD’s voluntary specific workplan for countries, on biodiversity in cold-water areas within the CBD’s jurisdictional scope.

Project background

Dr Hennige and Professor Roberts’ research focuses on the impacts of environmental change on marine life – in particular on tropical and deep sea coral, and how this can integrate into sustainable management.

Recent evidence from their research has highlighted how ocean acidification can cause structural degradation of cold-water reef habitats, potentially leading to less biodiversity support in the future, a key concern highlighted by the CBD.

Project results

Dr Hennige and Professor Roberts’ reports and background documents on acidification in cold-water areas have directly supported the introduction of the CBD’s voluntary specific workplan on biodiversity in cold-water areas within the jurisdictional scope of the Convention which countries within the convention will be able to adopt.

Key FT: Full-time. PT: Part-time.
About the School of GeoSciences

At the School of GeoSciences we examine the interactions between the Earth’s geology, atmosphere, oceans and life, as well as considering our own role and impact on our planet.

The effect of these complex relationships is vitally important to our world’s future, which means the skills and knowledge you develop here will put you in an exceptional position to help make that future better. We provide dedicated expertise across our teaching areas of ecology, environmental sciences, geography, geology, geophysics, meteorology and oceanography. Spanning the spectrum of the geosciences, including both natural and social sciences, we offer opportunities that are both interdisciplinary and international in focus.

Illustrious past, exciting future

While we can draw upon a rich geological heritage (James Hutton, the father of modern-day geology, was an Edinburgh alumnus), we pride ourselves on our innovation. The School is at the forefront of new developments and thought leadership. Our current staff and research collaborations build upon established prestige and reputation, continuing to break new ground in their understanding and application of geosciences principles.

Learn from the leaders

You will be very well placed to benefit from the latest research and industry practice, which our staff will bring to your learning experience. We are one of the largest groupings of geoscientists and geographers in the UK, and the quality of our research is among the best. We were ranked second for research power in earth systems and environmental sciences (Research Excellence Framework (REF) 2014) following a review by the Interdisciplinary Panel on Climate Change’s Fifth Assessment Report, while one was a reviewer for the report. We also have a double winner of the World Meteorological Organization’s Norbert Gerzberg Prize and the world’s first Professor of Carbon Capture and Storage. One of our academics is also an elected Fellow of the Royal Society (FRS) for their work on climate science.

Collaborations

The city of Edinburgh is a dynamic hub for the geosciences with a high concentration of businesses and other organisations working in the field. Our programmes are strengthened through collaboration with a range of internal and external partners including the University’s other schools, such as the Business School, the School of History, Classics & Archaeology and the School of Social & Political Science, and Scotland’s Rural College (SRUC). We work closely with industry, through Edinburgh Innovations (the University’s commercialisation office), to find practical answers to tomorrow’s problems. We are privileged to host lectures by representatives from government, business and civil society, who contribute to our programmes, courses and dissertation supervision, providing you with the skills and contacts needed to fulfil your ambitions.

We host and manage a number of national facilities on behalf of the Natural Environment Research Council (NERC) including:

- The Ion Microprobe Facility
- The Geophysical Equipment Facility
- The Field Spectroscopy Facility

Our technical and research staff will provide training, and help you identify the most relevant methods for your research projects or develop new techniques.

The scanning electron microscope, electron probe micro-analyser and secondary ion mass spectrometry instruments enable imaging, chemical and isotopic analysis of solid materials to one micron resolution. Our X-ray µCT instrument enables 3D and 4D imaging of natural materials and experiments. The cosmogenic nuclide facility enables isotopic analysis of rocks and sediments to understand landscape evolution. Our inductively coupled plasma mass spectrometry and laser ablation facility enables high precision elemental and simultaneous isotope ion analyses for a wide range of liquid and solid materials. Results from this may be coupled with those from the isotope ratio mass spectrometry facility to understand oceanic and biogeochemical responses to past and current climate change.

We also host the UK Biochar Research Centre (UKBRC) laboratory and pyrolysis facilities which produce the UKBRC Standard Biochars, a set of research-grade biochars used by more than 100 research groups worldwide.

In addition to ground-based field instrumentation, and a boat for river, lake and coastal work, our Airborne GeoSciences Facility boasts an Eco Diamond HK36 small aircraft and UAVs supporting research in ecology, atmospheric chemistry, micrometeorology, forest studies, geomorphology, agricultural science, archaeology and palaeontology.

Computing-intensive research in geographic information systems (GIS), meteorological and climate modelling, geophysics, and analysis of space and satellite data, is supported by access to our in-house GIS suite and software licences, and the Edinburgh Computer and Data Facility parallel computing and Database facilities. Specialist training in the use of these facilities is provided.

You will also have access to national and international supercomputing, laboratory, experimental and field facilities. We are regular visitors to X-ray synchrotron facilities in Europe and the USA for our research.

Finally, we use field stations and facilities worldwide for research projects in the Antarctic, Arctic and tropics, on research ships in the world’s oceans, through aircraft sampling the atmosphere and via remote sensing data from satellites.

Facilities and resources

Facilities are an essential asset for our research and teaching. We have a full range of laboratory, field and workshop facilities available to you, extending from facilities for sample preparation and mineralogical, physical and inorganic chemical analysis of rock, soil, plant, water and gaseous samples, to state-of-the-art research facilities.

Collections of the University

The University of Edinburgh has one of the world’s great collections, which has been growing ever since its foundation in 1583. Our collections include rare books, archives and manuscripts, art, historical musical instruments and a wide range of museum objects from geological specimens to anatomical models. If laid out end to end, we would have almost 60 kilometres of shelving and storage space devoted to our heritage material, from 1st century Greek papyrus fragments to new works of sculpture. This is curated by specialist staff across 45 sites and used for our teaching and research and by the wider public community.

The Centre for Research Collections in the Main Library is the hub for all our collections, where specialist curators make them available for study, research and pleasure. Postgraduate students are welcome to study original objects and have made many important research discoveries while working on the archives. You will find an incredible range of material in our collections that is available nowhere else in the world.

Postgraduate Open Day

13 November 2019

www.ed.ac.uk/postgraduate-open-day
Community

Our supportive academic community provides a dynamic environment in which you can truly thrive. We offer you numerous opportunities to access study support, develop new skills, share knowledge, exchange ideas and socialise with like-minded colleagues.

We strongly believe that our students learn a great deal from each other. You will join an active and motivated community that interacts, learns and engages together. You will have opportunities to bond with your programme cohort and other students in the School through regular networking and social opportunities. These include our annual postgraduate ceilidh (a traditional Scottish dance), student-organised black tie ball, end of semester celebrations and other events with a uniquely Scottish flavour, such as Burns Suppers. In addition, staff and visiting experts and academics deliver exciting lectures and seminars which are open to all of our students – there really is something for everyone.

Further opportunities are available through Edinburgh University Students’ Association which has a host of societies, sporting activities and social events waiting for you. It is one of the oldest students’ associations in the UK and is an excellent way of getting to know other students.

Access to research institutes
Our academic research staff and postgraduate students are affiliated to one of our three research institutes:
• Earth & Planetary Sciences
• Geography and the Lived Environment
• Global Change

The institutes provide a forum for the development of ideas, collaboration and dissemination of results. They also provide an environment for training, development and mentoring of research students and early-career researchers. Each institute has an active seminar series, drawing distinguished external guests and internal speakers, which you will be encouraged to attend and participate at.

Research Gradschool
You will become a member of our student-run Gradschool, an excellent peer-support network that spans the School and organises social events, lectures and conferences. Gradschool welcomes new research students with a range of events, including an organised weekend away to the mountains, the GradSchool conference, regular GradTalk seminars and a spring ceilidh.

Social responsibility and sustainability
The University recognises climate change as the most significant global challenge of the 21st century and continuously works to adopt a whole institution approach and become more socially responsible and sustainable. The University has been awarded the Sustainability Institution of the Year Award in the internationally acclaimed Green Gown Awards. Within the University, Social Responsibility and Sustainability support the creation of a sustainable and socially responsible environment. If you wish to learn more about social responsibility and sustainability, the new Co-Curricular Pathways initiative is an innovative model that promotes active student-led learning with opportunities for experiential learning in the community: www.ed.ac.uk/sustainability

Environment & Society Research Mixer
Early in Semester 2, a Research Mixer brings our postgraduate community together with sustainability practitioners from the public and private sectors. This is a chance for practitioners, academics and postgraduate students to share their interests and knowledge and to explore dissertation project ideas. Many dissertation partnerships develop at our Research Mixer.

Employability and graduate attributes

As a GeoSciences graduate you will have excellent academic and career prospects – working with industry, staying in academia or entering government and non-government organisations.

Institute for Academic Development
All postgraduate students can benefit from our Institute for Academic Development (IAD), which provides information, events and courses to help you develop the skills you will need throughout your studies and in the future. IAD events also offer the perfect opportunity to meet and network with other postgraduates from across the University.

Further information is available online: www.ed.ac.uk/iad/postgraduates

For taught postgraduates, IAD provides a popular study-related and transferable skills support programme. It is designed to help you settle into postgraduate life, succeed during your studies and move confidently to the next stage of your career. We offer on-campus and online workshops and one-to-one study skills consultations, plus online advice and learning materials.

Workshops and learning resources cover key topics tailored to different academic stages, including: pre-arrival sessions; getting started with your studies; critical reading, writing and thinking; managing your exams; and planning for and writing up your dissertation.

IAD also provides a comprehensive programme of transferable-skills training, resources and support for researchers completing a doctorate. The workshop programme is designed to help you successfully prepare for the various milestones of your PhD, from getting started with your research, to writing up and preparing for the viva, as well as developing personal and professional skills that can be transferred to your future employment.

Workshops cover topics such as writing skills, reference management tools, statistics, preparing for conferences, delivering presentations, time and project management, and personal development. IAD also offers online resources and planning tools to help get your research started, as well as support for tutoring and mentoring, and public engagement and communication.

Careers Service
Our Careers Service plays an essential part in your wider student experience at the University, offering a range of tailored careers and personal development guidance and support. We support you to recognise the wealth of possibilities ahead, while at university and after graduation, helping you explore new avenues, tap into your talents and build your employability with confidence and enthusiasm.

We provide high-quality, tailored support to all students. From exploring career options to making decisions, from CV writing to interview practice, from Employ.ed internships to graduate recruitment and from careers fairs to postgraduate alumni events, we will help you prepare for the future.

We sustain and continually develop links with employers from all industries and employment sectors, from the world’s top recruiters to small enterprises based here in Edinburgh. Our employer team provides a programme of opportunities for you to meet employers on campus and virtually, and advertises a wide range of part-time and graduate jobs.

More information: www.ed.ac.uk/careers/postgrad

Platform One is an online meeting place where members of the University community, past and present, can gather. It aims to provide a supportive environment where students, alumni, staff and volunteers can share knowledge and experiences. Together, we form a single community that meets on Platform One. Join us and find out more about the people and possibilities.

More information: www.ed.ac.uk/platform-one

Back ing bright ideas
Edinburgh Innovations, the University’s commercialisation service, offers free support to student entrepreneurs including one-to-one business advice and a range of workshops, bootcamps, competitions and networking events. Successful recent clients include David Hunter, inventor of the performance tracking golf watch Shot Scope; Orfeas Boteas, creator of the Dehumaniser sound effects software used by Hollywood movies and blockbuster video games; and Enactus Edinburgh, a team of student social entrepreneurs who represented the UK in the Enactus World Cup with their local and international projects.

Learn to teach
We encourage all of our research students to carry out demonstrating and tutoring work for the School’s undergraduate programmes. This work is strongly supported by training and coaching, to ensure you get the most out of the experience and can gain a new skillset from it.

“I just want to thank the School. It was an excellent year and a really amazing experience. To be honest, I couldn’t have enjoyed this masters without all my friends and colleagues... this wouldn’t have been the same experience without them.”

Laura Toledano, MSc Environment & Development
Applications and fees

We have an online application process for all postgraduate programmes. It’s a straightforward system with full instructions, including details of any supporting documentation you need to submit.

When applying, you will set up an account, which lets you save your application and continue at another time.

Full guidance on our application system is available at: www.ed.ac.uk/postgraduate/applying

General requirements

Our usual entrance requirement for postgraduate study is a UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/international/graduatedegree), in a subject related to your chosen programme. You will also need to meet the University’s language requirements (see below).

References

For applications to taught programmes, the normal requirement is one reference, although an additional reference may be requested in individual cases. For applications to research programmes, two references are required. You should check online for exact requirements for your intended programme of study. For general guidance on references, visit: www.ed.ac.uk/postgraduate/references

Deadlines

Masters

Early application is recommended given the high demand for places and in instances where a visa is required. Should you wish to submit a late application, please contact us for guidance. If you are applying for funding, in most cases you will need an offer to study with us before you can make your funding application – and many of our scholarships have deadlines in the spring.

Please note that in most instances a deposit of £1,500 is required to secure your place on a taught masters programme.

PhD

There are no official deadlines for our PhD programmes and applications are welcome throughout the year. However, many of our funding opportunities have deadlines and you may need an offer to study with us before you can make your funding application.

English language requirements

You must demonstrate a level of English language competency at a level that will enable you to succeed in your studies, regardless of your nationality or country of residence. We accept the following English language qualifications at the grades specified:

All MSc, MScR and PgCert programmes, and PhD Human Geography & Environmental Studies

- IELTS Academic: total 7.0 (at least 6.0 in each module).
- TOEFL-iBT: total 100 (at least 20 in each module).
- PTE Academic: total 67 (at least 56 in each of the Communicative Skills sections; the Enabling Skills sections are not considered).
- CAE and CPE: total 185 (at least 169 in each module).
- Trinity ISE: ISE II (with a pass in all four components).

All MPhil and PhD programmes (except PhD Human Geography & Environmental Studies – see above)

- IELTS Academic: total 6.5 (at least 6.0 in each module).
- TOEFL-iBT: total 92 (at least 20 in each module).
- PTE Academic: total 61 (at least 56 in each of the Communicative Skills sections).
- CAE and CPE: total 176 (at least 169 in each module).
- Trinity ISE: ISE II (with distinctions in all four components).

Please note:

- English language requirements can be affected by government policy so please ensure you visit our degree finder to check the latest requirements for your programme: www.ed.ac.uk/postgraduate/degrees
- Your English language qualification must be no more than three and a half years old at the beginning of your programme, unless you are using IELTS, TOEFL, PTE Academic or Trinity ISE, in which case it must be no more than two years old.
- We also accept recent degree-level study that was taught and assessed in English in a majority English-speaking country (as defined by UK Visas & Immigration), or at a university in a non-majority English-speaking country which has specifically been approved by the University of Edinburgh’s Admissions Qualifications Group. A list of approved universities is published on our website. If you are not a national of a majority English speaking country, then your degree must be no more than three and a half years old at the beginning of your programme of study.
- We do not require you to take an English language test before you apply.

Abbreviations: IELTS – International English Language Testing System; TOEFL-iBT – Test of English as a Foreign Language Internet-based Test; PTE – Pearson Test of English; CPE – Certificate of Proficiency in English; CAE – Certificate in Advanced English; Trinity ISE – Integrated Skills in English; www.ed.ac.uk/englishrequirements

Field trip fees

Full fees for your costs of travel, accommodation and subsistence on compulsory field trips will be covered by the programme. However, any incidental or personal expenses during the study tour must be met by the student.

Tuition fees

The following table provides an overview of indicative fee levels for programmes commencing in 2020.

Please note:

- International students starting full-time taught programmes of study lasting more than one year will be charged a fixed annual fee.
- All other students on full-time and part-time programmes of study lasting more than one year should be aware that annual tuition fees are subject to revision and are typically increased by approximately five per cent per annum. This annual increase should be taken into account when you are applying for a programme.
- In addition to tuition fees, your programme may be subject to an application fee and additional costs.

Programme costs may apply. Please check the latest programme information online.

Asylum seeker tuition fee status and scholarship

Information for applicants seeking asylum from within the United Kingdom, who wish to commence a programme of study at the University in 2020, is available online. This includes our tuition fee rates and scholarship opportunities: www.ed.ac.uk/student-funding/asylum

Tuition fees for EU students

EU students enrolling in the 2020/21 academic year will be admitted as Scottish/EU fee status students. Taught masters students will be eligible for the same tuition support as Scottish domiciled students from the Student Awards Agency Scotland (SAAS).

* Figure shown is the 2019/20 fee level

All other fees quoted are indicative of 2020/21 fee levels. Because these figures are indicative, it is important you check online before you apply and check the up-to-date fee level that will apply to your specific programme: www.ed.ac.uk/student-funding/fee-postgraduate
A large number of scholarships, loans and other funding schemes are available for your postgraduate studies. It is only possible to show a small selection in print. To see the full range, please visit: www.ed.ac.uk/student-funding/postgraduate

Awards are offered by the School of GeoSciences, the College of Science & Engineering, the University of Edinburgh, the Scottish, UK and international governments and many funding bodies.

While securing funding is competitive, the School of GeoSciences makes every effort to find funding support for students with proven academic merit, enthusiasm to study with us and a good case for financial backing. Additionally, many students find their own funding from a variety of external sources.

Here we list a selection of potential sources of financial support for postgraduate students applying to the School of GeoSciences. This list was correct at the time of printing but please check the full and up to date range online (see above).

University of Edinburgh Alumni Scholarships
We offer a 10 per cent scholarship towards postgraduate fees to all alumni who graduated from the University as an undergraduate, and to all students who spent at least one semester studying at the University on a visiting programme: www.ed.ac.uk/student-funding/alumni-scholarships

Key
- Taught masters programmes
- Masters by Research programmes
- Research programmes

Scholarships at the University of Edinburgh
- Edinburgh Global Research Scholarships
  These scholarships are designed to attract high-quality international research students to the University: www.ed.ac.uk/student-funding/global-research
- MasterCard Foundation Scholars Programme (Africa)
  A number of scholarships for applicants who are residents and citizens of a Sub-Saharan African country will be available for eligible masters programmes. The scholarships cover full tuition fees and expenses for accommodation and maintenance for African scholars with few educational opportunities: www.ed.ac.uk/student-funding/mastercardfdn
- Principal’s Career Development PhD Scholarships
  These provide a valuable opportunity for PhD students to undertake training and skills development and offer opportunities in areas such as teaching, public engagement, entrepreneurship, data science, and research. Each award covers the UK tuition fee and a stipend: www.ed.ac.uk/student-funding/development
- School of GeoSciences Studentships
  A number of part-funded UK/EU and international PhD studentships are offered annually: www.ed.ac.uk/geosciences/postgraduate/funding

Research council awards
Research councils offer awards to masters and PhD students in most of the Schools within the University of Edinburgh. All postgraduate applications from the research councils must be made through the University, through your School or College office. Awards are made for both taught and research programmes.

Normally only those UK/EU students who have been resident in the UK for the preceding three years are eligible for a full award. For some awards, candidates who are EU nationals and are resident in the UK may be eligible for a fees-only award. The UK Government has confirmed that EU postgraduate research students commencing their studies in 2020/21 will retain their fee status and eligibility for research council support for the duration of their programme: www.ed.ac.uk/student-funding/research-councils

The University also offers a number of scholarships in partnership with the following overseas government agencies:
- Mexico
  Banco de Mexico and the Banco de Mexico's FIDEXH trust (FIDEXH): www.fidexh.org.mx
- Fundacion Mexicana para la Educacion, la Tecnologia y la Ciencia (FUNDEN): www.fundemx.org
- Pakistan

Loans available for study at the University of Edinburgh
The University of Edinburgh is a participating institution in the following loans programmes, meaning we certify your student status and can help with the application process.

- The Canada Student Loans Program

The University is eligible to certify Canadian student loan applications: www.ed.ac.uk/student-funding/canadian-loans

- Erasmus+
  The Erasmus+ Master Loan helps masters students with their living and tuition costs when studying in an Erasmus+ country other than where they live or where they took their first degree. For more information: erasmusplus.org/master-loan

- Postgraduate Doctoral Loans England
  Student Finance England offers postgraduate loans for doctoral study, payable to eligible students and divided equally across each year of the doctoral programme: www.gov.uk/postgraduate-loan

- Postgraduate Doctoral Loans Wales
  Student Finance Wales offers loans for postgraduate doctoral study, payable to eligible students, divided equally across each year of the doctoral programme: www.studentfinancewales.co.uk/postgraduate-students/postgraduate-doctoral-loan

- Postgraduate Loans (PGL) England

Student Finance England offers postgraduate loans for taught and research masters programmes, payable to eligible students: www.gov.uk/postgraduate-loan

- Postgraduate Loans (PGL) Northern Ireland

Student Finance Northern Ireland offers eligible students a tuition fee loan for taught and research programmes, at certificate-, diploma-, and masters level, which will be paid directly to the University: www.studentfinanceeni.co.uk

- Postgraduate Loans (SAAS) Scotland and EU

The Student Awards Agency Scotland offers eligible students tuition fee loans for taught and research programmes at diploma and masters level, which will be paid directly to the University. Full-time students resident in Scotland can also apply for a non-income assessed living cost loan: www.saas.gov.uk

- Postgraduate Master’s Finance Wales

Student Finance Wales offers eligible postgraduate finance for taught masters programmes: www.studentfinancewales.co.uk

- US Student Loans

The University is eligible to certify loan applications for US loan students. Full details on eligibility and how to apply can be found online: www.ed.ac.uk/student-funding/us-loans

Other sources of funding
The following are examples of the many scholarships and support schemes available to students from particular countries who meet certain eligibility criteria.

- Chevening Scholarships
  A number of partial and full funding scholarships are available to one-year masters students: www.chevening.org

- Commonwealth Scholarships
  Scholarships available to students who are resident in any Commonwealth country, other than the UK: www.dfid.gov.uk/cscuk

- Marshall Scholarships (USA)
  Scholarships available to outstanding US students wishing to study at any UK university for at least two years: www.marshallscholarship.org

“...The Scottish Government’s initiative to attract international students through the Saltire Scholarship Scheme, as well as the University of Edinburgh’s help and support for international students, has helped provide me with an opportunity that I would never have conceived of prior to starting my studies at Edinburgh...”

Robert Stark, MSc: High Performance Computing, Scotland’s Saltire Scholarship
The School of GeoSciences is based in several buildings across two University campuses. The Head of School and the main offices are at King’s Buildings, about two miles south of the city centre. The Institute of Geography and the Edinburgh Centre for Carbon Innovation are in the historic Old Town of Edinburgh.

For more information about taught MSc programmes, contact the relevant programme administrators:

For Energy, Society and Sustainability, Marine Systems & Policies; GeoEnergy; and Managing Environmental Change contact:

Kathryn Will

Visit us
Our Postgraduate Open Day is your opportunity to come and meet current staff and students. Our next campus-based Open Day takes place on 13 November 2019. For more information, visit: www.ed.ac.uk/postgraduate-open-day

If you are unable to visit Edinburgh, contact info@geos.ed.ac.uk and we can arrange a video call with your prospective Programme Director or register your interest in a virtual Open Day.

Our visits to you
If you are unable to visit the University, we attend events throughout the year so you can meet and speak to us in person.

UK and Europe: www.ed.ac.uk/postgraduate/events
International: www.ed.ac.uk/international/our-visits-overseas

Chat online
We offer all postgraduate students online information sessions. To find out more and see when the next session will be: www.ed.ac.uk/postgraduate/online-events

For international students, Edinburgh Global also offers regular online chats. To find out more: www.ed.ac.uk/international/chat-to-us-online

Follow us
Follow the School of GeoSciences online:
Student Experiences Blog: www.edingeoslife.com

Facebook www.facebook.com/geosciences
Instagram www.instagram.com/uoegeosciences
On 23 June 2016 the UK electorate voted in a national referendum to leave the European Union. EU postgraduate taught students enrolling in the 2020/21 academic year will be admitted as Scottish/EU fee status students and eligible for the same tuition support as Scottish domiciled students for the duration of their studies. This will still be the case in the event of a Brexit no deal scenario. For the latest information for students and applicants from the EU, please visit our website: www.ed.ac.uk/news/eu

The University’s standard terms and conditions will form an essential part of any contract between the University of Edinburgh and any student offered a place here. Our full terms and conditions are available online: www.ed.ac.uk/student-recruitment/terms-conditions
