“Edinburgh isn’t so much a city, more a way of life … I doubt I’ll ever tire of exploring Edinburgh, on foot or in print.”

Ian Rankin  
Best-selling author and alumnus
Influencing the world since 1583

For more than 400 years the University of Edinburgh has been changing the world. Our staff and students have explored space, won Nobel Prizes and revolutionised surgery. They’ve published era-defining books, run the country, made life-saving breakthroughs and laid the foundations to solve the mysteries of the universe.

Our distinguished alumni include NASA astronaut Piers Sellers, former MI5 Director-General Dame Stella Rimington, Olympians Sir Chris Hoy and Dame Katherine Grainger and historical greats such as philosopher David Hume, suffragist Chrysta Macmillan, who founded the Women’s International League for Peace and Freedom, and physicist and mathematician James Clerk Maxwell.

International collaboration
An internationally renowned centre for academic excellence, we forge world-class collaborations with partners such as the California Institute of Technology (Caltech), Stanford University, the University of Melbourne, Peking University, the University of Delhi and the University of KwaZulu-Natal. As a member of the League of European Research Universities and the Coimbra Group, we link up with leading institutions across Europe.

Linking research and commerce
We were one of the first UK universities to develop commercial links with industry, government and the professions. Edinburgh Innovations promotes and commercialises our research excellence and can assist you in taking the first step to market, through collaborative research, licensing technology or consultancy.

Enhancing your career
We are committed to embedding employability in your University experience and have an impressive track record for graduate employment. From volunteering schemes to our sector-leading careers service, we provide you with opportunities to develop your skills, knowledge and experience, giving you an edge in the competitive job market.

TOP 50
We’re consistently ranked one of the top 50 universities in the world. We’re 20th in the 2020 QS World University Rankings.

4TH
We’re ranked fourth in the UK for research power, based on the 2014 Research Excellence Framework.*

83%
The majority of our research – 83 per cent – is considered world leading or internationally excellent.*

TOP 100
We are ranked in the top 10 in the UK and in the top 100 in the world for the employability of our graduates.†

£403m
In 2017/18 we won £403 million in competitive research grants.

19
There are 19 Nobel Prize winners who are alumni of the University or have been members of academic staff here.

22ND
We’re ranked 22nd in the world’s most international universities.‡ Since 2010, we have taught students from more than 160 countries.

* Times Higher Education, Overall Ranking of Institutions
† Times Higher Education, Global Employability University Ranking 2018
‡ Times Higher Education: The World’s Most International Universities 2019
Increasing wealth, global population and urbanisation is resulting in unprecedented rates of climate and environmental change. This poses formidable challenges for both biodiversity and humanity. At the School of Geosciences, you will be uniquely placed to explore and tackle these issues through our range of MSc programmes, which span a wide range of natural and social sciences.

We support an intellectual and cultural environment that focuses on real-world problems and challenges. We seek to remove barriers between disciplines, stimulate ambition and encourage internal and external collaboration. Through our programmes, you can seek to understand the interconnected processes that shape our planet, share your understanding and engage together.

Join one of the largest and most successful groupings of geoscientists and geographers in the UK, as we address the most compelling issues of our time.

**Carbon Innovation**

**Programme description**

Based upon our highly successful on-campus MSc Carbon Management, this online programme uses a blend of interactive content, videos, virtual case studies and webinars, online discussions to explore the economics and policy of climate change management. You will gain a detailed understanding of the economics of climate change, carbon footprinting, ecosystem valuation, energy systems and energy policy through the interdisciplinary nature of the programme.

This programme is designed for graduates with a passion for tackling climate change and who require the flexibility that online learning provides. The programme is affiliated with the University’s Global Environment & Society Academy (GEASA). [www.ed.ac.uk/global-environment-society](http://www.ed.ac.uk/global-environment-society)

**Programme structure**

This certificate may be studied as a standalone qualification. Alternatively, it may form one third of the online MSc Carbon Management, or half of the new online diploma in Carbon Management.

**COMPULSORY COURSES PREVIOUSLY OFFERED INCLUDE**

- Climate Change Impacts and Adaptation
- Business and Climate Change
- Climate Economics
- Climate Change Management
- Low Carbon and Green Investment
- Environmental Impact Assessment
- Energy Systems
- Water Resource Management
- Waste Reduction and Recycling
- Energy & Society
- International Climate Change Law
- International Food Systems
- Marine Infrastructure and Environmental Change
- Innovation in Sustainable Food Systems

**RECOMMENDED OPTION COURSES**

In consultation with the Programme Director, you will choose from a range of option courses. We have previously offered:

- Global Strategic Management: Issues and Perspectives
- Baseline and Mitigation: Methodologies and Applications
- Corporate Responsibility & Governance in a Global Context
- Low Carbon and Green Investment
- Environmental Impact Assessment
- Energy Systems
- Water Resource Management
- Waste Reduction and Recycling
- Energy & Society
- International Climate Change Law
- International Food Systems
- Marine Infrastructure and Environmental Change
- Innovation in Sustainable Food Systems

**Career opportunities**

A strength of this MSc is the employability of our graduates. The programme, which won the PricewaterhouseCoopers award for “Teaching Employable Skills”, provides the opportunity to interact with businesses in the carbon innovation sector and to undertake dissertation research as part of work-based projects with a range of external collaborators. The 2015 Paris Agreement gave rise to a huge demand for those who can combine scientific, technical, economic and social understanding and skills in the areas of carbon management and climate change. It is that ability to combine technical and socioeconomic understanding and knowledge which this MSc cultivates. Our graduates enjoy roles from government employees and NGO researchers, to renewable energy project developers and commercial carbon management consultants. The MSc also provides a grounding for postgraduate research, such as a PhD.

**Entry requirements**

- A UK 2:1 honours degree, or its international equivalent ([www.ed.ac.uk/internationalgraduate-entry](http://www.ed.ac.uk/internationalgraduate-entry)) in any subject. You will also have any professional experience in account.

**Fees and funding**

For fees see page 28 and for funding information see page 30.

Carbon Management

MSc 3 yrs PT (2 yrs accelerated study)

Programme description
Our online MSc Carbon Management is a groundbreaking development of the award-winning campus-based MSc Carbon Management programme. Building on the proven success and content of the established residential programme, this new online programme provides you with high-level knowledge, skills and training in the business, economics and science of carbon management. The programme is designed for graduates who want an advanced academic qualification in tackling climate change management by business, industry, NGOs and government, with the flexibility that online learning provides. The programme is affiliated with the University’s Global Environment & Society Academy (GESA); www.ed.ac.uk/global-environment-society

Programme structure
The programme is organised into three component certificates:
- PgCert Climate Change Management
- PgCert Carbon Innovation
- Applied Carbon Methods (you must successfully complete both other certificates before taking this final component).

You will graduate with the postgraduate diploma if you take only the first two components.

COMPULSORY COURSES PREVIOUSLY OFFERED INCLUDE:
Climate Change Impacts and Adaptation; Climate Change Mitigation; Climate Change & Corporate Responsibility; Carbon Economics; Climate Change Measurement; Energy & Climate; Applied Carbon Methods; Dissertation.

Studying online
As a student of one of our online programmes, you will:
- have the flexibility to study when most convenient for you;
- be able to study from anywhere with an internet connection;
- have access to all University services and relevant academics;
- become part of a rich and varied online community; and
- learn the latest developments from people working at the leading edge in your field.

To try our Virtual Learning Environment, please visit our demo: demo.climate.ed.ac.uk

Career opportunities
Through our existing MSc Carbon Management programme we boast excellent relationships with sector-relevant employers, as well as a great alumni network covering more than 60 countries. This provides unrivalled opportunities to collaborate on research projects and find new positions in the field of carbon management. The main employment opportunities for our graduates are in climate change consultancy, renewable energy and carbon management project development, or as government or non-governmental organisation (NGO) climate change advisors. Several of our graduates are now studying for climate change-focused PhDs.

Entry requirements
A UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/international/graduate-entry) in any subject. We will also take any professional experience into account.

English language requirements
See page 28.

Fees and funding
For fees see page 28 and for funding information see page 30.

Climate Change Management

PgCert 1 yr PT

Programme description
Based upon our highly successful on-campus MSc Carbon Management (see page 6), this online programme utilises a blend of interactive content, videos, virtual case studies and online discussions to explore the science and business responses to climate change. We examine the leading ways in which this global challenge can be addressed, covering adaptation and mitigation solutions across a wide range of sectors and regions. The programme is designed for those who have a passion for tackling climate change and who require the flexibility that online learning provides.

This programme is affiliated with the University’s Global Environment & Society Academy (GESA); www.ed.ac.uk/global-environment-society

Programme structure
The programme comprises three compulsory courses that move from the science of climate change and its impacts, through the key adaptation and mitigation solutions, to examination of the business response to climate change, and the risks and opportunities it presents.

This certificate may be studied as a standalone qualification. Alternatively it may form one third of the online MSc Carbon Management, or half of the new online diploma in Carbon Management.

COMPULSORY COURSES PREVIOUSLY OFFERED INCLUDE:
Climate Change Impacts & Adaptation; Climate Change Mitigation; Climate Change & Corporate Responsibility.

Studying online

Earth Observation & Geoinformation Management

MSc 1 yr FT (2 yrs or 3 yrs PT available for UK/EU students)

Programme description
The interdisciplinary programme will equip you with the analytical and communication skills to work in this important and growing field. It will suit students with a background in environmental or geographical sciences who have already come across remote sensing, or those with a background in physics, computer science or engineering looking for a career in an applied area. Graduates from the programme will be well prepared to pursue subsequent research or find relevant employment. This programme builds on our successful Geographical Information Science (GIS) programme, which was the first of its type in the world and has a heritage of almost 30 years. 

Programme structure
This programme comprises taught courses and an individual dissertation.

COMPULSORY COURSES PREVIOUSLY OFFERED INCLUDE:

RECOMMENDED OPTION COURSES
In consultation with the Programme Director, you will choose from a range of option courses. We have previously offered:
- Semester 1: Ecosystems and Climate Change; Principles of Environmental Sustainability; Marine Systems and Policies; Atmospheric Quality and Global Change; Encountering Cities: Introduction to Spatial Analysis; Principles of GIS; Frameworks to Assess Food Security; Distributed GIS; Semester 2: Environmental Governance; Forests and Environment; Marine Infrastructure and Environmental Change; Participation in Policy and Planning; Waste Reduction and Recycling; Environmental Impact Assessment: Policies; Political Economy; Energy and Society; Case Studies in Sustainable Development; Sustainability of Food Production; Understanding Environment and Development.

Field trip
This programme includes a residential project management and field study weekend in the Scottish Highlands.

Career opportunities
Graduates will benefit from our proven track record in helping students progress to roles with a diverse range of employers in the public, private and third sectors. Our graduates have entered employment with well-known organisations such as Amey Infrastructure Services, British Airways, EBR, General Electric, Google, Hewlett Packard, Intergraph, Microsoft, Oracle, The Royal Bank of Scotland, Scottish Water, Sopra Group, SIR Consulting, Food and Agricultural Organisation of the United Nations, and the World Bank, as well as continuing in academia.

Entry requirements
A UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/ internationalgraduate-entry).

English language requirements
See page 28.

Fees and funding
For fees see page 28 and for funding information see page 30.

Email benjamin.mcna@ed.ac.uk

Key FT: Full time. PT: Part time.

Ecological Economics

MSc 1 yr FT (2 yrs or 3 yrs PT available for UK/EU students)

Programme description
This programme is run in collaboration with Scotland’s Rural College. It focuses on how to make sustainability and environmental management work in practice for local and regional actors. You will examine principles and techniques that facilitate collaborative working, with perspectives of power and interests. You will develop transdisciplinary perspectives on the energy trilemma and integrative qualitative and quantitative analytical skills.

COMPULSORY COURSES PREVIOUSLY OFFERED INCLUDE:
- Environmental Economics Applications in Ecological Economics: Internationalisation; Ecological Field Methods in Research and Practice; Dissertation.

RECOMMENDED OPTION COURSES
In consultation with the Programme Director, you will choose from a range of option courses. We have previously offered:
- Semester 1: Ecosystems and Climate Change; Principles of Environmental Sustainability; Marine Systems and Policies; Atmospheric Quality and Global Change; Encountering Cities: Introduction to Spatial Analysis; Principles of GIS; Frameworks to Assess Food Security; Distributed GIS; Semester 2: Environmental Governance; Forests and Environment; Marine Infrastructure and Environmental Change; Participation in Policy and Planning; Waste Reduction and Recycling; Environmental Impact Assessment: Policies; Political Economy; Energy and Society; Case Studies in Sustainable Development; Sustainability of Food Production; Understanding Environment and Development.

Field trip
The Ecological Economics Field Methods and Practice course includes a study tour. You will work in teams to design, implement, and complete a small research project on a real-world sustainability problem. This gives you experience with project design, data collection and analysis prior to starting your dissertation. Previous trips have tended to go to Africa, though the destination is subject to change in light of factors such as costs, climate change concerns, and on-going research.

Career opportunities
UK research councils cite a major skills gap in the energy sector, one of the biggest growth sectors in our economy in recent years. Demand is high for sound evidence on behavioural change, public engagement with energy issues, and public support for community and commercial investments in low carbon energy generation. You will translate complex science into effective policies and business opportunities. We are committed to helping you meet prospective employers and network within the field. Our links with government departments, energy relevant NGOs and key industry players who want to make use of these skills, allow us to organise careers events and dissertations conducted with external partner organisations.

Entry requirements
A UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/ internationalgraduate-entry). We may also consider a UK 2:2 honours degree, or its international equivalent, with relevant work experience, a strong personal statement and supportive reference; please contact us to check before you apply.

English language requirements
See page 28.

Fees and funding
For fees see page 28 and for funding information see page 30.

Taught masters programmes

Environment & Development
MSc 1 yr FT (2 yrs or 3 yrs PT available for UK/EU students)

Programme description
This MSc explores interdependencies between pressing environmental concerns and development pressures and themes related to these global agendas from an informed theoretical perspective, with an adding concern for social justice claims and praxis. It draws on expertise from across the University, especially development geography, social and political sciences and environmental studies, providing a unique critical realist perspective. It will challenge you to cultivate cross-cutting and globally relevant research thinking, that is theoretically grounded, through focused on particular issues, places, and systems and provides insights to real-world applications. The programme is affiliated with the University’s Global Development Academy. www.ed.ac.uk/global-development

Programme structure
You will study three compulsory courses and three options, balancing lectures, seminars, workshops and visits, followed by a dissertation.

RECOMMENDED COURSES PREVIOUSLY OFFERED INCLUDE:
Understanding Environment and Development: Development; Principles and Practices; Research and Practice; Fieldwork; Dissertation.

RECOMMENDED OPTION COURSES
In consultation with your Personal Tutor, you will choose from a range of option courses. We have previously offered; Atmospheric Quality and Global Change; Development; Science and Technology; Disasters and Development; Displacement and Development; Economic Issues in Public Policy; Ecosystem Services 1: Ecosystems and Global Change; Energy and Society 1: Key Issues; Environmental Valuation; Forests and Environment; Frameworks to Assess Food Security; Principles of Environmental Sustainability; Anthropology and Environment; Anthropology of Global Health; Case Studies in Sustainable Development; Corporate Social Responsibility and the Law; Critical Perspectives on Mental Health and Wellbeing in the Global South; Energy Policy and Politics; Environmental Impact Assessment; Gender and Development; Global Environmental Politics; Human Dimensions of Environmental Change and Sustainability; International Political Economy; International Security; Interpreting Development; Institutions and Practices; Participation in Policy and Planning; Political Ecology; Sustainability of Food Production; The International Politics of Money; Waste Reduction and Recycling; Water Resource Management.

Field trip
A two-week trip to Nepal provides experience of interlinked environment and development issues. You will conduct group research projects and reflect on the role and ethics of fieldwork in academia and beyond. Career opportunities
This MSc suits those seeking roles in international or national development agencies, think tanks, NGOs, environmental consultants or the private sector, or going on to PhD research. Relevant roles include ecologists and environmentalists, in areas like sustainable agriculture and aquaculture.

Entry requirements
A UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/ internationalgraduate-entry). We may also consider a UK 2:2 honours degree, or its international equivalent, with relevant work experience, a strong personal statement and a relevant supportive reference.

English language requirements
See page 28.

Environmental Protection & Management
MSc 1 yr FT (2 yrs or 3 yrs PT available for UK/EU students)

Programme description
This programme is in collaboration with Scotland’s Rural College (SRUC). Human activities are recognised as having an increasingly significant effect on the Earth’s biosphere. Our use of natural resources, deforestation, soil erosion, the release of potentially toxic compounds and pathogens, and the increase in greenhouse gases are all examples of pressures that have potentially serious consequences for humanity and other life on Earth. This programme will give you a fundamental understanding of the issues affecting the Earth, enabling you to play a vital role in devising and enacting strategies to protect and conserve the environment, both in Europe and beyond.

Programme structure
This programme involves taught courses plus a research dissertation.

COMPELLARY COURSES PREVIOUSLY OFFERED INCLUDE:
Atmospheric Quality and Global Change; Land Use/Environmental Interactions; Professional and Research Skills in Practice; Dissertation.

RECOMMENDED OPTION COURSES
In consultation with the Programme Director, you will choose from a range of option courses. We have previously offered; Environmental Impact Assessment; Soil Protection and Management; Waste Reduction and Recycling; Marine Systems and Policies; Introduction to Environmental Modelling; Carbon Capture and Transport; Encountering Global Environments; Environmental Geochronology; Foundations in Ecological Economics; Human Dimensions of Environmental Change and Sustainability; Principles of Environmental Sustainability; Understanding Global Issues and Issues; Environmental Valuation; Encountering Global Environments; Environmental Change and Sustainability; Sustainability of Food Production; Participation in Policy and Planning; Forests and Environment; Cities; Climate Change and Corporate Strategy; Principles and Practice of Remote Sensing; Political Ecology; Ecosystems and Global Change; Soil Science Concepts and Application; Water Resource Management.

Field trip
An integral, week-long study tour lets you refresh skills learned on the programme and develop new tools and techniques, useful during your career. Recent tours have usually been held in InMil, in the Atlas Mountains in Morocco. In addition to the formal taught component, there are opportunities to experience the local culture. There may also be a short tour during induction week, to allow you to get to know your fellow students and visit the Highlands of Scotland.

Career opportunities
Our graduates often find employment in the environmental sector or choose further study with a PhD. Recent graduates are working in roles such as environmental protection officer, coral reef fieldwork leader and planning consultant for employers such as SEPA, Talisman Energy and the Archipelago Institute of Marine Conservation. There are consultancy opportunities, policy roles and roles in environmental regulators, government and NGOs.

Entry requirements
A UK 2.1 honours degree, or its international equivalent (www.ed.ac.uk/ internationalgraduate-entry). We may also consider a UK 2:2 honours degree, or its international equivalent, with relevant work experience, a strong personal statement and a relevant supportive reference.

English language requirements
See page 28.

Fees and funding
For fees see page 28 and for funding information see page 30.

Anita Owili, MasterCard Foundation Scholar, MSc Environment & Development

“The programme has helped me get a deeper understanding of economics, anthropology, gender issues and policies. Moving forward, I plan to be more involved in initiatives that promote social mobility and justice among poor communities, especially in being able to access vital resources like renewable energy.”

Programme description
For fees see page 28 and for funding information see page 30.

www.ed.ac.uk/pg/30

Key FT: Full time. PT: Part time.

www.ed.ac.uk/pg/395

www.ed.ac.uk/pg/31
Environmental Sustainability

MSc 1 yr FT (2 or 3 yrs PT available for UK/EU students)

Programme description Ensuring the environmental sustainability of society is one of the major challenges facing humanity in the 21st century. How can we meet the needs of the world’s growing population without threatening the ecological processes that support human wellbeing? How can economy and energy systems be restructured to combat climate change? What policies foster sustainability? How can the necessary changes in the behaviour of organisations and individuals be promoted? This MSc explores these and other related questions. You will be encouraged to think across different disciplines to develop scientific, socioeconomic and policy perspectives for a better understanding of sustainability and how it can be achieved. This will be attractive to organisations promoting sustainable development or seeking to reduce human impacts on the environment. Scotland’s capital is attractive for organisations seeking to influence national environmental sustainability debates, giving access to interesting case studies and opportunities for networking. The programme takes an international perspective, with a focus on regions in the global North.

Programme structure

This programme comprises six taught courses and a dissertation.

RECOMMENDED OPTION COURSES

In consultation with your Personal Tutor, you will choose from a range of option courses. We have previously offered: Atmospheric Quality and Global Change; Climate Change and Corporate Strategy; Development: Principles and Practice; Ecosystems and Global Change; Energy and Society: Environmental Governance and Policy; Environmental Impact Assessment; Environmental Valuation; Forests and Environmental Governance; Geospatial Analysis: Human Dimensions of Environmental Change; Participation in Policy and Planning; Political Ecology; Sustainability of Food Production; Understanding Environment and Development; Waste Reduction and Recycling; Water Resource Management.

Career opportunities

You will be prepared for roles within environmental consultancy, national and local government, non-profit organisations, education or research. Your choice of option courses and dissertation project can be used to tailor your studies to support your intended career path. Recent graduates are now working in a variety of GIS roles worldwide in government, public and private sector organisations, for employers such as Microsoft, Google, Google Earth Engine, the Royal Institute of Chartered Surveyors, amongst others.

Food Security

MSc 1 yr FT (2 or 3 yrs PT available for UK/EU students)

Programme description Food security has become a critically important issue for societies around the globe. Intertwined between demographics, changes in diet, trade liberalisation, an increased focus on conservation, technological innovations including GM crops, the impact of climate change and new responses to climate change, land degradation and biodiversity loss particularly in terms of energy, water and nutrition all affect food security. With such a rapid growth in this area, there is an increasing demand for qualified experts to contribute to policy creation and legislation in food production and the supply chain. This programme offers you the opportunity to develop proficiency in the area and multidisciplinary research approach to address all of these issues, as well as an understanding of the technical, agronomic, environmental, economic and socio-political factors that influence food security. You will be equipped with the analytical and communication skills to contribute to humanity’s efforts to achieve and sustain food security during the 21st century.

Programme structure

The programme comprises six taught courses and a dissertation.

MSc 1 yr FT (2 or 3 yrs PT available for UK/EU students)

Programme description The programme is aimed at students who would like to pursue a geosciences-related career in the future energy sector, as it transitions from dependence on fossil fuels to low carbon alternatives. Our aim is to offer a programme that capitalises on subsurface (geological) knowledge to assist in this transition, opening a diverse range of career pathways in future energy technologies, the disposal of energy-related wastes and the evolving hydrogen industry.

The programme builds on the strength and reputation of the research groups within the School of GeoSciences, which specialise in the use of the subsurface for geoenvironmental applications. These include: carbon capture and storage (CCS); radioactive waste disposal; storage and extraction; unconventional and conventional hydrocarbons; wet and dry geothermal heat; and subsurface fluid tracing using noble gases and stable isotopes.

Programme structure

The programme comprises a series of taught courses and a dissertation.

GeoEnergy

MSc 1 yr FT (2 or 3 yrs PT available for UK/EU students)

Programme description This programme is aimed at students who would like to pursue a geosciences-related career in the future energy sector, as it transitions from dependence on fossil fuels to low carbon alternatives. Our aim is to offer a programme that capitalises on subsurface (geological) knowledge to assist in this transition, opening a diverse range of career pathways in future energy technologies, the disposal of energy-related wastes and the evolving hydrogen industry.

The programme builds on the strength and reputation of the research groups within the School of GeoSciences, which specialise in the use of the subsurface for geoenvironmental applications. These include: carbon capture and storage (CCS); radioactive waste disposal; storage and extraction; unconventional and conventional hydrocarbons; wet and dry geothermal heat; and subsurface fluid tracing using noble gases and stable isotopes.

Programme structure

The programme comprises a series of taught courses and a dissertation.

GeoEnvironmental Science

MSc 1 yr FT (2 or 3 yrs PT available for UK/EU students)

Programme description The GeoEnvironmental Science (GEO) programme was the first of its type in the world and has a heritage of almost 30 years. The course is continually refreshed to keep abreast of latest technological changes and industry trends. Accredited by the Royal Institute of Chartered Surveyors, it offers expert understanding of the latest developments in geo-environmental science (GEO). It mixes practical training, theory and an ability to apply learned skills in any software environment, and offers hands-on experience in geographical problem solving.

Programme structure

This programme comprises two semesters of taught courses, delivered through lectures and seminars, and a dissertation.

www.ed.ac.uk/pg944

www.ed.ac.uk/pg74
Geographical Information Science & Archaeology

MSc 1yr FT (2 or 3 yrs PT available for UK/EU students)

Programme description
The programme offers you the chance to develop a detailed understanding of the application of geographical information science (GIS) and related technologies in the field of archaeology. The programme has a distinctive Scottish flavour, and you will benefit from the guidance of internationally recognised staff. The programme combines the pedigree of Edinburgh’s GIS expertise with a long-established reputation in archaeological teaching and research. You will gain a broad understanding of the use of GIS in archaeological surveying, recording and research and will be equipped with the analytical and communication skills necessary to work in this vibrant area. Demand for the application of GIS within archaeology is growing at an unprecedented rate, including searching for new archaeological sites, determining the societal context of existing sites and examining the interplay between successive occupations of a site. The proven ability of our GIS graduates in employment means our programme is held in high regard by a wide range of employers.

Programme structure
The programme is organised into two semesters of taught courses, delivered through lectures and seminars, after which you will work towards your individual dissertation.

COMPULSORY COURSES PREVIOUSLY OFFERED INCLUDE:
- GIS and Spatial Analysis for Archaeologists; Research Practice and Project Planning; Spatial Modelling and Analysis; Dissertation.

RECOMMENDED OPTION COURSES
In consultation with the Programme Director, you will choose from a range of option courses. We have previously offered: Active Remote Sensing; Radar and Lidar; Business Geographics; Exploring the Past with Data Science; Passive Earth Observation: New Platforms, Sensors, and Analytical Methods; Principles of Remote Sensing; Principles of Geographical Information Science; Quantitative Methods and Reasoning in Archaeology; Space, Place and Time; the Archaeology of Built Environments; Technological Infrastructures for GIS; the Scottish Lowlands: Archaeology and Landscape before the Normans; Visual Analytics.

Field trip
There is a field trip to Highland Perthshire in October, focusing on project management and techniques for capturing geospatial information.

Career opportunities
Graduates will be able to continue to study or to pursue a career in surveying, illustration and 3D visualisation, digital archiving, heritage management, terrain modelling, database management, geomatics or consultancy. Our GIS graduates have worked in both public and private sector organisations, including Historic Scotland, English Heritage, the Royal Commission on the Ancient and Historical Monuments of Scotland, thinkWhere (formerly Forth Valley GIS) and CFA Archaeology.

Entry requirements
A UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk international)graduate entry). We may also consider a UK 2:2 honours degree, or its international equivalent, with relevant industrial or business experience.

English language requirements
See page 28.

Fees and funding
For fees see page 28 and for funding information see page 30.

Global Environment Challenges
PgCert 9 mths or 1 yr FT (2 yrs PT)

Programme description
Human activity is changing the natural environment at an unprecedented rate. As a result, humanity faces a range of complex and interrelated challenges: global warming, ecosystem disruption, biodiversity loss, and, for many, increasing difficulty in meeting the basic human needs for energy, food, water and shelter. This part-time, online learning programme takes a multidisciplinary approach to understanding these contemporary environmental issues and will develop your capacity to address these issues in your professional life. Drawing on the University’s unique breadth of expertise, you will develop an in-depth appreciation of how human activity drives environmental change.

The programme draws multidisciplinary expertise from the University and beyond, through the Global Environment & Society Academy, a network of experts developing innovative solutions for the world’s most challenging problems. www.ed.ac.uk/global-environment-society

Programme structure
The certificate is split into three taught courses, which are delivered through an exciting mixture of online modes, including video lectures, study guides, self-directed and guided reading as well as a range of interactive online reflection and discursive activities. Due to the highly flexible nature of this certificate, it is ideal if you want to gain a further qualification with minimum interruption to your work or family commitments. Using our virtual learning environment, you will develop your IT skills and make contact with fellow students from across the world.

COMPULSORY COURSES PREVIOUSLY OFFERED INCLUDE:
- Global Environment Challenges; Climate Change Mitigation; Ecosystems Values and Management; Environmental Governance.

MSC GLOBAL CHALLENGES
This PgCert may form one third of an MSc in Global Challenges, with Global Health Challenges and Global Development Challenges making up the other two thirds. More information: www.ed.ac.uk/pg/923

Career opportunities
This certificate will equip you with the knowledge and skills needed for work with governments, NGOs, international aid organisations, United Nations agencies, the private sector, universities and other research institutions.

Entry requirements
A UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk international)graduate entry). In any subject. We will also consider applicants with a UK 2:2 honours degree, or its international equivalent, with appropriate professional experience.

English language requirements
See page 28.

Fees and funding
For fees see page 28 and for funding information see page 30.

Managing Environmental Change
MSc 1 yr FT (2 or 3 yrs PT available for UK/EU students)

Programme description
Humans have changed the environment so profoundly that many scientists consider this a new epoch – the Anthropocene. This programme provides cutting-edge learning on the social and environmental forces shaping the Anthropocene, and the ways in which these changes can be managed.

In particular, we focus on the ecology of planetary life support systems, and interactions between these systems and human wellbeing, examining the possibilities for human societies to develop in resilient and adaptive ways. We also focus on how environmental change is, and should be, managed, with frequent opportunities for engagement with practitioners, policy makers and business.

The programme provides strong connections to employers through the Centre for Sustainable Forests and Landscapes and includes a four-month professional placement in policy, management or research. You will develop a wide range of skills including digital media, research synthesis, policy briefings, teamwork and leadership.

Programme structure
You will study five compulsory courses, including a field course, and one option course. During the summer you will undertake a four-month professional placement focused on Managing Environmental Change.

COMPULSORY COURSES PREVIOUSLY OFFERED INCLUDE:
- Ecosystems and Global Change; Human Dimensions of Environmental Change; Applied Research Skills in Environment and Society; Environment Governance and Policy; Managing Environmental Change.

Career opportunities
Graduates may progress to roles in Scottish Government and local authorities, natural resource management agencies, non-governmental organisations, and across the private sector, or go on to PhD programmes and research roles. A number of employability skills have been integrated into the programme design, most obviously in the professional placement, meaning it is particularly strong for the development of job-market ready skills in interdisciplinary analysis at the interface of natural and social sciences, research skills, policy analysis and translating research into policy and practice. It also has a strong component of personal development, including leadership and group skills, analysis and decision-making techniques, and oral and written communication.

Entry requirements
A UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk international)graduate entry). In natural or social science. We will also consider applicants with a UK 2:2 honours degree, or its international equivalent, with appropriate professional experience.

English language requirements
See page 28.

Fees and funding
For fees see page 28 and for funding information see page 30.

Marine Systems & Policies

Programme description

This programme is run in collaboration with Scotland’s Rural College.

Soils & Sustainability

Programme description

This programme is run in collaboration with Scotland’s Rural College.

Sustainable Plant Health

Programme description

This programme is run in collaboration with Scotland’s Rural College.
Research at the School of GeoSciences

As the largest grouping of geoscientists in the UK, we offer an extensive range of research opportunities for postgraduates.

The University of Edinburgh has an unbroken record of teaching and research in the earth sciences going back to 1770, when Robert Ramsay became the first Professor of Natural History.

James Hutton and Arthur Holmes were prominent among those who set an academic tradition in Edinburgh that continues today through the University’s earth sciences and environmental sciences (including geography) teaching and research.

Home of leading research

Our interactive and interdisciplinary research environment allows us to tackle difficult research questions, from causes of past glacial environments of Earth, climate and society. The ambition and quality of our research was reflected in the Research Excellence Framework (REF) 2014, when 78% per cent of our research in earth systems and environmental sciences was rated 4* world leading or 3* internationally excellent on the overall quality profile.

Backed by industry

The School receives strong backing from industry, particularly in areas such as hydrocarbons and carbon capture and storage. We receive support from the EU as hydrocarbons and carbon capture and storage, from industry, particularly in areas such as hydrocarbons and carbon capture and storage.

Earth and Planetary Sciences

This institute undertakes research that informs the solutions to address global challenges relating to resources, natural hazards and the environment. Our researchers seek better understanding of chemical and physical properties of materials, the origin and history of life on Earth, the origin and history of life on Earth, the origin and history of life on Earth, the origin and history of life on Earth.

Dynamic leaders

The School has many high-profile academics who are leaders in their field. Stuart Haszeldine is the world’s first Professor of Carbon Capture and Storage. He leads the Scottish Carbon Capture and Storage, the UK’s largest such group (a collaboration between the University of Edinburgh, Heriot-Watt University and the British Geological Survey). He is a member of the CCS Advisory Group to the UK Department of Business, Energy and Industrial Strategy, and works with the Scottish Government energy directorate.

Gabriele Hegerl FRS is Professor of Climate System Science. She studies the causes of observed changes in climate, and seeks to detect the emerging signal of greenhouse gas increases in temperature data. She also studies the causes of change in climate variability and extremes as well as change over the past millennium. Professor Hegerl is involved in the Intergovernmental Panel on Climate Change. She was a member of the Summary for Policymakers writing team in the Fourth Assessment Report, and a member of the Synthesis Report writing team in the Fifth Report.

Simon Kelley is the Head of the School of GeoSciences and Professor of Isotope Geochemistry. One of his main research interests is measuring the rates and timescales of geological processes. Simon has worked on dating large igneous provinces, ultra-high pressure metamorphism in subduction processes, and the provenance of individual grains in ancient silts and sands. Simon’s research also extends to online teaching where he led a project to develop the virtual microscope for Earth science, an open educational resource: www.virtualmicroscope.org

International collaborations

A commitment to international partnerships is intrinsic to the School’s research ethos. We have established research links on every continent.

Some projects are global in scope, such as the calculation of surface temperatures across oceans, determining the rate at which cosmic rays bombard the Earth’s surface at different latitudes, or human transnational processes such as migration and globalisation.

Other projects focus on specific regions and communities, for example addressing issues of gender and social equality for community forest projects in South Asia, or examining archaeological evidence to evaluate the role of climate in environmental and cultural change.

Examples of our research partnerships can be found on the following page.

For more information about our research centres and institutes, please visit: www.ed.ac.uk/geosciences/research
Research opportunities

We offer the following range of research programmes:

**MSc by Research**

The master of science by research programme offers you the opportunity to acquire research skills by undertaking a single year of independent study within the School's research interests.

**Master of Philosophy**

An MPhil resembles a PhD but only requires a minimum of two years' study (full time), including an extended piece of supervised research. This does not carry the same requirement for original contribution to knowledge as a PhD. You'll pursue your individual research project under supervision and submit a thesis.

**Doctor of Philosophy**

As a PhD student you will undertake an original research project under individual supervision. Your studies will take at least three years, and to qualify for your doctorate your thesis must be judged to represent an original contribution to knowledge. In some cases it is also possible to study a 1+3 programme, comprising a year of MSc study leading on to a PhD.

**Entry requirements**

A UK undergraduate degree, or its international equivalent, in a related subject. We may also consider your application if you have other qualifications or experience. Please check the specific entry requirements for your programme online before applying.

**Support**

As a research student, you will be affiliated to one of our research institutes, benefiting from an excellent peer-supported network. As groupings of researchers with related interests, the institutes provide a forum for development of ideas, collaboration, and dissemination of results, and an environment for training, development and mentoring of research students and early career researchers.

**Career opportunities**

Many of our graduates go on to postdoctoral research roles in universities and research institutes internationally. Others are now working as geologists, geophysicists, biogeochemists and environmentalists for companies including BP, the Met Office and the International Seismological Centre.

**More information**

Enquiries for PhD, MPhil and MSc by Research programmes should be directed to:

**Atmospheric & Environmental Sciences**

**Research profile**

Global Change

Our overarching aim is to improve the scientific understanding of past, present and future changes in the Earth system through measurements, theory and computational modelling. Better understanding of the Earth system allows us to inform policymakers and to develop effective mitigation strategies, which, if implemented, would minimise the economic and humanitarian impacts of changes in climate and the Earth system. Our aim incorporates some of the most compelling scientific challenges of the 21st century. To address these questions, we nurture a multidisciplinary research and teaching environment, integrating expertise across the Institute, the School and more broadly throughout the University.

**Geography and the Lived Environment**

We seek to generate agenda-setting research that improves understanding of the relationships between people, society and the environment. Our research investigates key areas of contemporary and historical societal concern, including development, climate change, inequalities, land-use change, ecosystem services, health and wellbeing and urbanization. The lived environment refers to those aspects of the Earth system that are experienced by people — not as it is purely for academic purposes.

**English language requirements**

See page 28.

**Fees and funding**

The School receives sizeable studentship quota allocations from research councils and also offers studentships provided by successful consortium bids and research grants. School-funded scholarships are also available. For fees see page 28 and funding information see page 30.

Programme contact PGR Recruitment Secretary
Tel +44 (0)131 650 5422/5854
Email pgrsupport.geo@ed.ac.uk

---

**Geology & Geophysics**

**Research profile**

The Earth & Planetary Science research institute studies the physical and chemical properties, origin and history of the Earth, and encompasses the major disciplines of geology, geochemistry, geodynamics, meteorology and geophysics. We bring together a diverse and open research community that understand the way in which the Earth’s subsurface works – from atoms to plates, and on timescales ranging from seconds to billions of years.

We have special expertise in: mineralogy; igneous, metamorphic and experimental petrology; paleontology; sandstone and carbonate diagenesis; tectonics; rock physics and chemistry; petroleum geoscience; seismic imaging; and seismic sequence stratigraphy.

**Entry requirements**

A UK undergraduate degree, or its international equivalent, in one of the following subjects:

- Earth sciences
- Environmental sciences
- Economics
- Palaeontology
- Palaeoecology
- Meteorology
- Oceanography
- Planetary science
- Petroleum geology
- Physical geography
- Remote sensing

Additional experience in one of the following areas is desirable:

- Geology
- Geophysics
- Geoinformatics
- Geospatial analysis

You should normally have other qualifications or experience. Please check the specific entry requirements for your programme online before applying.

**Research institutes**

Research programmes in geology and geophysics draw on expertise from the School’s Earth & Planetary Science research institute.

**Research profile**

The Earth & Planetary Science research institute studies the physical and chemical properties, origin and history of the Earth, and encompasses the major disciplines of geology, geochemistry, geodynamics, meteorology and geophysics. We bring together a diverse and open research community that understand the way in which the Earth’s subsurface works – from atoms to plates, and on timescales ranging from seconds to billions of years.

---

**GeoSciences Individual Project**

MSc by Research 1 yr FT (2 yrs PT available for UK/EU students)

This masters by research programme is an opportunity to carry out a substantial piece of research in any of the major branches of geosciences:

- Atmospheric science
- Climate change
- Ecological sciences
- Environmental geochemistry
- Environmental geoscience
- Environmental sustainability
- Exploration geophysics
- Geoinformatics
- Geology
- Geophysics
- Glaciology
- Human geography
- Meteorology
- Oceanography
- Palaecology
- Petroleum geology
- Physical geography
- Remote sensing

The programme allows you to work on research throughout the year, and your work will be assessed primarily on your final dissertation. You can follow taught courses by arrangement with your supervisor, but none are required.

**Taught pathway option**

This pathway allows you to work on research throughout the year whilst also undertaking taught options. In this option 40 credits of taught courses are available.

The programme allows you to work on research throughout the year, and your supervisor will assess your work throughout the year. You can follow taught courses by arrangement with your supervisor, but none are required.

**English language requirements**

See page 28.

**Fees and funding**

Human Geography

MSc by Research 1 yr FT (2 yrs PT available for UK/EU students)

This programme’s emphasis on independent research allows you to work closely with scholars who are leaders in their field. Research may be in any area of social, urban, environmental, development, political, economic, historical or cultural geography that is supported by the Human Geography Research Group. It is co-delivered with the University’s Graduate School of Social Science. We offer a balance between general and specialist research training. The programme is recognised by the Economic and Social Research Council (ESRC) and the Arts and Humanities Research Council. A programme highlight is the postgraduate conference where students present their research to colleagues. The programme can stand alone as a master’s, or form the first year of a 1+3 ESRC-backed PhD programme.

Research opportunities

For fees see page 28 and for funding information see page 30.

See page 28.

Research Design in Human Geography

In consultation with the Programme Director, you will choose from a range of option courses. We particularly recommend: Conducting Research Interviews; Contemporary Theory: The Documents of Life; Explanation and Understanding in Social and Political Research; Intermediate Inferential Statistics: Testing and Modelling; Listening to Children; Research and Consultation; Political Ecology; Qualitative Methods and Ethnographic Fieldwork; Survey Methods and Data; Values and the Environment.

Core Quantitative Data Analysis 1 and 2

Contemporary Social Theory

Explanation and Understanding in Social and Political Research

The Documents of Life

Lived Geographies

• Concerned with how social, economic, political and cultural processes emerge from and shape people’s daily lives at home, work and in public.

• Materialising Geographies: Examining the relationship between materiality, technology and geography.

• Just Geographies: Building upon human geography’s long-standing concern with the production and consequences of inequality and uneven development.

• Nature’s Geographies: Focusing on interactions between nature and society, environment and culture.

Dissertation

The dissertation will demonstrate your ability to conduct independent research by exploring a topic of your choosing in the broad fields of palaeoecology, palaeontology, evolutionary biology, geochemistry and geology. You should submit a brief outline of your proposed research project at the time of application and this will be developed in consultation with prospective supervisors. You will be appointed a principal supervisor and a second supervisor to guide and monitor your work. Supervisors may be drawn from outside the University, allowing you to conduct research in a wide range of potential subject areas.

Fieldwork

You will have the opportunity to conduct hands-on fieldwork on the Isle of Skye, one of the best places in the world to find fossils from the Middle Jurassic period. During this field trip, you will explore the suspected site of the first fossilized dinosaur, as well as other Jurassic sites around Edinburgh, where the sciences of geology and palaeontology were forged in the 18th and 19th centuries.

Facilities

You will have access to world-class analytical facilities, including ion microprobes, electronprobe, SEM, and computed tomography scanners.

English language requirements

Palaontology & Geobiology

MSc by Research 1 yr FT (2 yrs PT available for UK/EU students)

Research profile

The University has world-class expertise in the core disciplines of geology, palaeontology, ecology and evolutionary biology. This new programme, run by the Centre for Geobiology & Geochemistry, gathers leading researchers in these topics from across the University and the wider Scottish community, giving you the opportunity to learn from leaders in the field.

The programme comprises three compulsory courses: Research Planning and Management in Geosciences; Project Design and Literature Analysis; Topics in Palaeobiology and Evolution, plus a choice of option courses and a dissertation.

Dissertation

The dissertation will demonstrate your ability to conduct independent research by exploring a topic of your choosing in the broad fields of palaeoecology, palaeontology, evolutionary biology, geochemistry and geology. You should submit a brief outline of your proposed research project at the time of application and this will be developed in consultation with prospective supervisors. You will be appointed a principal supervisor and a second supervisor to guide and monitor your work. Supervisors may be drawn from outside the University, allowing you to conduct research in a wide range of potential subject areas.

Fieldwork

You will have the opportunity to conduct hands-on fieldwork in the deep seas. You will also be able to take part in annual trips to world-renowned fossil sites around Edinburgh, where the sciences of geology and palaeontology were forged in the 18th and 19th centuries.

Facilities

You will have access to world-class analytical facilities, including ion microprobes, electronprobe, SEM, and computed tomography scanners.

English language requirements

See page 28.

Fees and funding

www.ed.ac.uk/research/impact

Research focuses on the impacts of environmental change on marine life – in particular on tropical and deep sea coral.

See more online: www.ed.ac.uk/research/impact

The University of Edinburgh

Geosciences Postgraduate Opportunities 2020

The University of Edinburgh

Acidification in the deep seas

Currently of great concern is the question of how climate change will impact deep-sea habitats, such as deep-sea coral reefs that support high biodiversity. These habitats are intrinsically difficult to access and are often out of sight and out of mind for many people. The School of Geosciences’ Dr Sebastian Hennige and Professor Murray Roberts were appointed to lead a research project on the Convention on Biological Diversity (CBD) on the impacts of ocean acidification on marine biodiversity: www.cbd.int/doc/publications/cbd-ts-79-en.pdf

They also produced a background document on acidification in cold-water areas to support the CBD’s voluntary specific workplan for countries, on biodiversity in cold-water areas within the CBD’s jurisdictional scope.

Project background

Dr Hennige and Professor Roberts’ research focuses on the impacts of environmental change on marine life – in particular on tropical and deep sea coral, and how this can integrate into sustainable management. Recent evidence from their research has highlighted how ocean acidification can cause structural degradation of cold-water reef habitats, potentially leading to less biodiversity support in the future, a key concern highlighted by the CBD.

Project results

Dr Hennige and Professor Roberts’ reports and background documents on acidification in cold-water areas have directly supported the introduction of the CBD’s voluntary specific workplan on biodiversity in cold-water areas within the jurisdictional scope of the Convention which countries within the convention will be able to adopt.

See more online: www.ed.ac.uk/research/impact

Research focuses on the impacts of environmental change on marine life – in particular on tropical and deep sea coral.

“I have been given the space necessary to explore all the possible angles of my research and decide which to focus on. Both my supervisor and Programme Director have always been welcoming and encouraging to my suggestions and I found a great balance of freedom to explore and work on my research, but also support when I needed it.”

Candela Sanchez Rodilla Espeso, MSc Human Geography
About the School of GeoSciences

At the School of GeoSciences we examine the interactions between the Earth’s geology, atmosphere, oceans and life, as well as considering our own role and impact on our planet.

The effect of these complex relationships is vitally important to our world’s future, which means the skills and knowledge you develop here will put you in an exceptional position to help make that future better. We provide dedicated expertise across our teaching areas of ecology, environmental sciences, geography, geology, geophysics, meteorology and oceanography. Spanning the spectrum of the geosciences, including both natural and social sciences, we offer opportunities that are both interdisciplinary and international in focus.

illustrious past, exciting future

While we can draw upon a rich geological heritage (James Hutton, the father of modern-day geology, was an Edinburgh alumnus), we pride ourselves on our heritage (James Hutton, the father of modern-day geology, was an Edinburgh alumnus). Our current staff and research collaborations build upon established prestige and reputation, continuing to break new ground in their understanding and application of geosciences principles. Learn from the leaders

You will be very well placed to benefit from the latest research and industry practice, which our staff will bring to your learning experience. The School is at the forefront of new developments and thought leadership. Our current staff and research collaborations build upon established prestige and reputation, continuing to break new ground in their understanding and application of geosciences principles.

Collaborations

The city of Edinburgh is a dynamic hub for the geosciences with a high concentration of businesses and other organisations working in the field. Our programmes are strengthened through collaboration with a range of internal and external partners including the University’s other schools, such as the Business School, the School of History, Classics & Archaeology and the School of Social & Political Science, and Scotland’s Rural College (SRUC). We work closely with industry, through Edinburgh Innovations (the University’s commercialisation office), to find practical answers to tomorrow’s problems. We are privileged to host lectures by representatives from government, business and civil society, who contribute to our programmes, courses and dissertation supervision, providing you with the skills and contacts needed to fulfil your ambitions.

We host and manage a number of national facilities on behalf of the Natural Environment Research Council (NERC) including:

• The Ion Microprobe Facility
• The Geophysical Equipment Facility
• The Field Spectroscopy Facility.

Our technical and research staff will provide training, and help you identify the most relevant methods for your research projects or develop new techniques.

The scanning electron microscope, electron probe micro-analyser and secondary ion mass spectrometry instruments enable imaging, chemical and isotopic analysis of solid materials to one micron resolution. Our X-ray μCT instrument enables 3D and 4D imaging of natural materials and experiments.

The cosmo-geochronology facility enables isotopic analysis of rocks and sediments to understand landscape evolution. Our inductively coupled plasma mass spectrometry and laser ablation facility enables high precision elemental and isotopic analysis for a wide range of liquid and solid materials. Results from this may be coupled with those from the isotope ratio mass spectrometry facility to understand oceanic and biogeochemical responses to past and current climate change.

We also host the UK Biochar Research Centre (UKBRC) laboratory and pyrolysis facilities which produce the UKBRC Standard Biochars, a set of research-grade biochars used by more than 100 research groups worldwide.

In addition to ground-based field instrumentation, and a boat for river, lake and coastal work, our Airborne Geosciences Facility boasts an Eco Diamond HK36 small aircraft and UAVs supporting research in ecology, atmospheric chemistry, micrometeorology, forest studies, geomorphology, agricultural science, archaeology and palaeontology.

Computing-intensive research in geographic information systems (GIS), meteorological and climate modelling, geophysics, and analysis of space and satellite data, is supported by access to our in-house GIS suite and software licences, and the Edinburgh Computer and Data Facility parallel computing and Datastore facilities. Specialist training in the use of these facilities is provided. You will also have access to national and international supercomputing, laboratory, experimental and field facilities. We are regular visitors to X-ray synchrotron facilities in Europe and the USA for our research.

Finally, we use field stations and facilities worldwide for research projects in the Antarctic, Arctic and tropics, on research ships in the world’s oceans, through aircraft sampling the atmosphere and using remote sensing data from satellites. This is supported by access to state-of-the-art research facilities.

Facilities are an essential asset for our research and teaching. We have a full range of laboratory, field and workshop facilities available to you, extending from facilities for sample preparation and mineralogical, physical and inorganic and organic chemical analysis of rock, soil, plant, water and gaseous samples, to state-of-the-art research facilities.

Collections of the University

The University of Edinburgh has one of the world’s great collections, which has been growing ever since its foundation in 1583. Our collections include rare books, archives and manuscripts, art, historical musical instruments and a wide range of museum objects from geological specimens to anatomical models. If laid out end to end, we would have almost 60 kilometres of shelving and storage space devoted to our heritage material, from 1st-century Greek papyrus fragments to new works of sculpture. This is curated by specialist staff across 45 sites and used for our teaching and research and by the wider public community.

The Centre for Research Collections in the Main Library is the hub for all our collections, where specialist curators make them available for study, research and pleasure. Postgraduate students are welcome to study original objects and have made many important research discoveries while working on the archives. You will find an incredible range of material in our collections that is available nowhere else in the world.

Postgraduate Open Day
13 November 2019
www.ed.ac.uk/postgraduate-open-day
**Community**

Our supportive academic community provides a dynamic environment in which you can truly thrive. We offer you numerous opportunities to access study support, develop new skills, share knowledge, exchange ideas and socialise with like-minded colleagues.

We strongly believe that our students learn a great deal from each other. You will join an active and motivated community that interacts, learns and engages together. You will have opportunities to bond with your programme cohort and other students in the School through regular networking and social opportunities. These include our annual postgraduate ceilidh (a traditional Scottish dance), student-organised black tie ball, end of semester celebrations and other events with a uniquely Scottish flavour, such as Burns Suppers. In addition, staff and visiting experts and academics deliver exciting lectures and seminars which are open to all of our students – there really is something for everyone!

Further opportunities are available through Edinburgh University Students’ Association which has a host of societies, sporting activities and social events waiting for you. It is one of the oldest students’ associations in the UK and is an excellent way of getting to know other students.

**Access to research institutes**

Our academic research staff and postgraduate students are affiliated to one of our three research institutes:

- Earth & Planetary Sciences
- Geography and the Lived Environment
- Global Change

The institutes provide a forum for the development of ideas, collaboration and dissemination of results. They also provide an environment for training, development and mentoring of research students and early-career researchers. Each institute has an active seminar series, drawing distinguished external guests and internal speakers, which you will be encouraged to attend and participate at.

**Research Gradschool**

You will become a member of our student-run Gradschool, an excellent peer-support network that spans the School and organises social events, lectures and conferences. Gradschool welcomes new research students with a range of events, including an organised weekend away to the mountains, the Gradschool conference, regular Grad Talk seminars and a spring ceilidh.

**Social responsibility and sustainability**

The University recognises climate change is the most significant global challenge of the 21st century and continuously works to adopt a whole institution approach and become more socially responsible and sustainable. The University has been awarded the Sustainability Institution of the Year Award in the internationally acclaimed Green Gown Awards. Within the University, Social Responsibility and Sustainability support the creation of a sustainable and socially responsible environment. If you wish to learn more about social responsibility and sustainability, the new Co-Curricular Pathways initiative is an innovative model that promotes active student-led learning with opportunities for experiential learning in the community: [www.ed.ac.uk/sustainability](http://www.ed.ac.uk/sustainability)

**Environment & Society Research Mixer**

Early in Semester 2, a Research Mixer brings our postgraduate community together with sustainability practitioners from the public and private sectors. This is a chance for practitioners, academics and postgraduate students to share their interests and knowledge and to explore dissertation project ideas. Many dissertation partnerships develop at our Research Mixer.

**Institute for Academic Development (IAD)**

All postgraduate students can benefit from the Institute for Academic Development (IAD), which provides information, events and courses to develop the skills you will need throughout your studies and in the future. IAD events also offer the perfect opportunity to meet and network with other postgraduates from across the University.

**Further information is available online:** [www.ed.ac.uk/iad/postgraduates](http://www.ed.ac.uk/iad/postgraduates)

For taught postgraduates, IAD provides a popular study-related and transferable skills support programme. It is designed to help you settle into postgraduate life, succeed during your studies and move confidently to the next stage of your career. We offer on-campus and online workshops and one-to-one study skills consultations, plus online advice and learning materials.

Workshops and learning resources cover key topics tailored to different academic stages, including: pre-arrival sessions; getting started with your studies; critical reading, writing and thinking; managing your exams; and planning for and writing up your dissertation.

IAD also provides a comprehensive programme of transferable-skills training, resources and support for researchers completing a doctorate. The workshop programme is designed to help you successfully prepare for the various milestones of your PhD, from getting started with your research, to writing up and preparing for the viva, as well as developing personal and professional skills that can be transferred to your future employment. Workshops cover topics such as writing skills, reference management tools, statistics, preparing for conferences, delivering presentations, time and project management, and personal development. IAD also offers online resources and planning tools to help you get your research started, as well as support for tutoring and demonstrating, and public engagement and communication.

**Careers Service**

Our Careers Service plays an essential part in your wider student experience at the University, offering a range of tailored careers and personal development guidance and support. We support you to recognise the wealth of possibilities ahead, while at university and after graduation, helping you explore new avenues, tap into your talents and build your employability with confidence and enthusiasm.

We provide high-quality, tailored support to all students. From exploring career options to making decisions, from CV writing to interview practice, from Employ.ed internships to graduate posts and from careers fairs to postgraduate alumni events, we will help you prepare for the future.

We sustain and continually develop links with employers from all industries and employment sectors, from the world’s top recruiters to small enterprises based here in Edinburgh. Our employer team provides a programme of opportunities for you to meet employers on campus and virtually, and advertises a wide range of part-time and graduate jobs.

More information: [www.ed.ac.uk/platform-one](http://www.ed.ac.uk/platform-one)

**Employability and graduate attributes**

As a GeoSciences graduate you will have excellent academic and career prospects – working with industry, staying in academia or entering government and non-government organisations.

**Platform One**

Platform One is an online meeting place where members of the University community, past and present, can gather. It aims to provide a supportive environment where students, alumni, staff and volunteers can share knowledge and experiences. Together, we form a single community that meets on Platform One. Join us and find out more about the people and possibilities.

More information: [www.ed.ac.uk/platform-one](http://www.ed.ac.uk/platform-one)

**Backing bright ideas**

Edinburgh Innovations, the University’s commercialisation service, offers free support to student entrepreneurs including one-to-one business advice and a range of workshops, bootcamps, competitions and networking events. Successful recent clients include David Hunter, inventor of the performance tracking golf watch Shot Scope; Orfeas Boteas, creator of the Dehumiser sound effects software used by Hollywood, movies and blockbuster video games; and Enactus Edinburgh, a team of student social entrepreneurs who represented the UK in the Enactus World Cup with their local and international projects.

**Learn to teach**

We encourage all of our research students to carry out demonstrating and tutoring work for the School’s undergraduate programmes. This work is strongly supported by training and coaching, to ensure you get the most out of the experience and can gain a new skillset from it.
Applications and fees

We have an online application process for all postgraduate programmes. It’s a straightforward system with full instructions, including details of any supporting documentation you need to submit.

When applying, you will set up an account, which lets you save your application and continue at another time.

Full guidance on our application system is available at: www.ed.ac.uk/postgraduate/applying

General requirements

Our usual entrance requirement for postgraduate study is a UK 2:1 honours degree, or its international equivalent (www.ed.ac.uk/international/graduate-entry), in a subject related to your chosen programme. You will also need to meet the University’s language requirements (see below).

References

For applications to taught programmes, the normal requirement is one reference, although an additional reference may be requested in individual cases. For applications to research programmes, two references are required. You should check online for exact requirements for your intended programme of study. For general guidance on references, visit: www.ed.ac.uk/postgraduate/references

Deadlines

Masters

Early application is recommended given the high demand for places and in instances where a visa is required. Should you wish to submit a late application, please contact us for guidance. If you are applying for funding, in most cases you will need an offer to study with us before you can make your funding application — and many of our scholarships have deadlines in the spring.

Please note that in most instances a deposit of £1,500 is required to secure your place on a taught masters programme.

PhD

There are no official deadlines for our PhD programmes and applications are welcome throughout the year. However, many of our funding opportunities have deadlines and you may need an offer to study with us before you can make your funding application.

English language requirements

You must demonstrate a level of English language competency at a level that will enable you to succeed in your studies, regardless of your nationality or country of residence. We accept the following English language qualifications at the grades specified:

**All MSc, MScR and PgCert programmes, and PhD Human Geography & Environmental Studies**

- IELTS Academic: total 7.0 (at least 6.0 in each module).
- TOEFL iBT: total 100 (at least 20 in each module).
- PTE Academic: total 67 (at least 56 in each of the Communicative Skills sections; the Enabling Skills sections are not considered).
- CAE and CPE: total 185 (at least 169 in each module).
- Trinity ISE: ISE II (with a pass in all four components).

**All MPhil and PhD programmes (except PhD Human Geography & Environmental Studies — see above)**

- IELTS Academic: total 6.5 (at least 6.0 in each module).
- TOEFL iBT: total 92 (at least 20 in each module).
- PTE Academic: total 61 (at least 56 in each of the Communicative Skills sections).
- CAE and CPE: total 176 (at least 169 in each module).
- Trinity ISE: ISE II (with distinctions in all four components).

Please note:

- English language requirements can be affected by government policy so please ensure you visit our degree finder to check the latest requirements for your programme: www.ed.ac.uk/postgraduate/degrees

- Your English language qualification must be no more than three and a half years old at the beginning of your programme, unless you are using IELTS, TOEFL, PTE Academic or Trinity ISE, in which case it must be no more than two years old.

- We also accept recent degree-level study that was taught and assessed in English in a majority English-speaking country (as defined by UK Visas & Immigration), or at a university in a non-majority English-speaking country which has specifically been approved by the University of Edinburgh’s Admissions Qualifications Group. A list of approved universities is published on our website. If you are not a national of a majority English speaking country, then your degree must be no more than three and a half years old at the beginning of your programme of study.

- We do not require you to take an English language test before you apply.

Abbreviations: IELTS − International English Language Testing System; TOEFL iBT − Test of English as a Foreign Language Internet-based Test; PTE – Pearson Test of English; CPE – Certificate of Proficiency in English; CAE – Certificate in Advanced English; Trinity ISE – Integrated Skills in English; www.ed.ac.uk/english-requirements/pg

Field trip fees

Full fees for your costs of travel, accommodation and subsistence on compulsory field trips will be covered by the programme. However, any incidental or personal expenses during the study tour must be met by the student.

Tuition fees

The following table provides an overview of indicative fee levels for programmes commencing in 2020.

Please note:

- International students starting full-time taught programmes of study lasting more than one year will be charged a fixed annual fee.
- All other students on full-time and part-time programmes of study lasting more than one year should be aware that annual tuition fees are subject to revision and are typically increased by approximately five per cent per annum. This annual increase should be taken into account when you are applying for a programme.

- In addition to tuition fees, your programme may be subject to an application fee and additional costs. Programme costs may apply. Please check the latest programme information online.

Asylum seeker tuition fee status and scholarship information

For applicants seeking asylum from within the United Kingdom, who wish to commence a programme of study at the University in 2020, is available online. This includes our tuition fee rates and scholarship opportunities: www.ed.ac.uk/student-funding/asylum

Tuition fees for EU students

EU students enrolling in the 2020/21 academic year will be admitted as Scottish/EU fee status students. Taught masters students will be eligible for the same tuition support as Scottish domiciled students from the Student Awards Agency Scotland (SAAS).

For full fees details, please check online for exact fee levels. Because these figures are indicative, it is important you check online before you apply and check the up-to-date fee level that will apply to your specific programme: www.ed.ac.uk/student-funding/tuition-fees/postgraduate

www.ed.ac.uk/geosciences
Funding

A large number of scholarships, loans and other funding schemes are available for your postgraduate studies. It is only possible to show a small selection in print. To see the full range, please visit: www.ed.ac.uk/student-funding/postgraduate

Scholarships at the University of Edinburgh

- Edinburgh Global Research Scholarships
  These scholarships are designed to attract high-quality international research students to the University: www.ed.ac.uk/student-funding/global-research
- MasterCard Foundation Scholars Programme (Africa)
  A number of scholarships for applicants who are residents and citizens of a Sub-Saharan African country will be available for eligible masters programmes. The scholarships cover full tuition fees and expenses for accommodation and maintenance for African scholars with few educational opportunities: www.ed.ac.uk/student-funding/mastercardfdn
- Principal’s Career Development PhD Scholarships
  These provide a valuable opportunity for PhD students to undertake training and skills development and offer opportunities in areas such as teaching, public engagement, entrepreneurship, data science, and research. Each award covers the UK tuition fee and a stipend: www.ed.ac.uk/student-funding/development
- School of GeoSciences Studentships
  A number of part-funded UK/EU and international PhD studentships are offered annually: www.ed.ac.uk/geosciences/postgraduate/funding

Research council awards

Research councils offer awards to masters and PhD students in most of the Schools within the University of Edinburgh. All studentship applications from the research councils must be made through the University, through your School or College office. Awards can be made for both taught and research programmes.

Normally only those UK/EU students who have been resident in the UK for the preceding three years are eligible for a full award. For some awards, candidates who are EU nationals and are resident in the UK may be eligible for a fees-only award. The UK Government has confirmed that EU postgraduate research students commencing their studies in 2020/21 will retain their fee status and eligibility for research council support for the duration of their programme: www.ed.ac.uk/student-funding/researchcouncils

The University also offers a number of scholarships in partnership with the following overseas government agencies:

- Mexico
  Banco de Mexico and the Banco de Mexico’s FIDERSH trust (FIDERSH): www.fidersh.org.mx
  Fundacion Mexicana para la Educacion, la Tecnologia y la Ciencia (FUNED): www.funedmx.org
- Pakistan
- Egypt
  Egypt’s Ministry of Education and Higher Education (MoEHE): www.moehe.gov.eg

Loans available for study at the University of Edinburgh

The University of Edinburgh is a participating institution in the following loans programmes, meaning we certify your student status and can help with the application process.

- The Canada Student Loans Program
  The University is eligible to certify Canadian student loan applications: www.ed.ac.uk/student-funding/canadian-loans
- Erasmus+
  The Erasmus+ Master Loan helps masters students with their living and tuition costs when studying in an Erasmus+ country other than where they live or where they took their first degree. For more information: erasmusplus.org.uk/master-loan
- Postgraduate Doctoral Loans England
  Student Finance England offers postgraduate loans for doctoral study, payable to eligible students and divided equally across each year of the doctoral programme: www.gov.uk/postgraduate-loan
- Postgraduate Doctoral Loans Wales
  Student Finance Wales offers loans for postgraduate doctoral study, payable to eligible students, divided equally across each year of the doctoral programme: www.studentfinancewales.co.uk/postgraduate-students/postgraduate-doctoral-loan
- Postgraduate Loans (PGL)
  Student Finance England offers postgraduate loans for taught and research masters programmes, payable to eligible students: www.gov.uk/postgraduate-loan
- Postgraduate Loans (PGL)
  Student Finance Northern Ireland offers eligible students a tuition fee loan for taught and research programmes, at certificate-, diploma-, and masters level, which will be paid directly to the University: www.studentfinance.ni.co.uk
- Postgraduate Loans (SAAS)
  Scotland and EU
  The Student Awards Agency Scotland offers eligible students tuition fee loans for taught and research programmes at diploma and masters level, which will be paid directly to the University. Full-time students resident in Scotland can also apply for a non-income assessed living cost loan: www.saas.gov.uk
- Postgraduate Student Loans England
  Student Finance England offers postgraduate loans for doctoral study, payable to eligible students and divided equally across each year of the doctoral programme: www.gov.uk/postgraduate-loan
- Postgraduate Student Loans Wales
  Student Finance Wales offers loans for postgraduate doctoral study, payable to eligible students, divided equally across each year of the doctoral programme: www.studentfinancewales.co.uk/postgraduate-students/postgraduate-doctoral-loan
- Postgraduate Loans (PGL)
  England
  Student Finance England offers postgraduate loans for taught and research masters programmes, payable to eligible students: www.gov.uk/postgraduate-loan
- Postgraduate Loans (PGL)
  Northern Ireland
  Student Finance Northern Ireland offers eligible students a tuition fee loan for taught and research programmes, at certificate-, diploma-, and masters level, which will be paid directly to the University: www.studentfinance.ni.co.uk

Other sources of funding

The following are examples of the many scholarships and support schemes available to students from particular countries who meet certain eligibility criteria.

- Chevening Scholarships
  A number of partial and full funding scholarships are available to one-year masters students: www.chevening.org
- Commonwealth Scholarships
  Scholarships available to students who are resident in any Commonwealth country, other than the UK: www.void.gov.uk/cscuk
- Marshall Scholarships (USA)
  Scholarships available to outstanding US students wishing to study at any UK university for at least two years: www.marshallscholarship.org

Robert Starr, MSc High Performance Computing, Scotland’s Saltire Scholarship

“The Scottish Government’s initiative to attract international students through the Saltire Scholarship Scheme, as well as the University of Edinburgh’s help and support for international students, has helped provide me with an opportunity that I would never have conceived of prior to starting my studies at Edinburgh.”

Robert Starr, MSc High Performance Computing, Scotland’s Saltire Scholarship
The School of GeoSciences is based in several buildings across two University campuses. The Head of School and the main offices are at King’s Buildings, about two miles south of the city centre. The Institute of Geography and the Edinburgh Centre for Carbon Innovation are in the historic Old Town of Edinburgh.

For more information about taught MSc programmes, contact the relevant programme administrators:

- For Energy, Society and Sustainability, Marine Systems & Policies; GeoEnergy; and Managing Environmental Change contact: Kathryn Will
  Tel +44 (0)131 650 2624

Visit us
Our Postgraduate Open Day is your opportunity to come and meet current staff and students. Our next campus-based Open Day takes place on 13 November 2019. For more information, visit: www.ed.ac.uk/postgraduate-open-day

If you are unable to visit Edinburgh, contact info@geos.ed.ac.uk and we can arrange a video call with your prospective Programme Director or register your interest in a virtual Open Day.

Our visits to you
If you are unable to visit the University, we attend events throughout the year so you can meet and speak to us in person.

UK and Europe: www.ed.ac.uk/postgraduate/events
International: www.ed.ac.uk/international/our-visits-overseas

Chat online
We offer all postgraduate students online information sessions. To find out more and see when the next session will be: www.ed.ac.uk/postgraduate/online-events

For international students, Edinburgh Global also offers regular online chats. To find out more: www.ed.ac.uk/international/chat-to-us-online

Follow us
Follow the School of GeoSciences online:

Facebook: www.facebook.com/geosciences
Instagram: www.instagram.com/uoegeosciences
On 23 June 2016 the UK electorate voted in a national referendum to leave the European Union. EU postgraduate taught students enrolling in the 2020/21 academic year will be admitted as Scottish/EU fee status students and eligible for the same tuition support as Scottish domiciled students for the duration of their studies. This will still be the case in the event of a Brexit no deal scenario. For the latest information for students and applicants from the EU, please visit our website: www.ed.ac.uk/news/eu

The University’s standard terms and conditions will form an essential part of any contract between the University of Edinburgh and any student offered a place here. Our full terms and conditions are available online: www.ed.ac.uk/student-recruitment/terms-conditions
