Risk and Resilience: Global learning across the age span

15% discount offer* Publication date 20 October 2016

An edited volume with an international spectrum of contributors that places risk and resilience in health and social care in context. The chapters explore the issues of risk and resilience in health and social care, issues fundamental to some of the most complex decision making required by society, services, practitioners and members of the public. They look at issues of risk and resilience across the age spectrum, from children and young people to older adults. Three underpinning concepts are examined: location of responsibility and risk expertise; human rights and citizenship; agency and independence.

About the editors Professor Charlotte Clarke is Head of School, School of Health in Social Science at the University of Edinburgh; Sarah Rhynas, Alzheimer Scotland Post-Doctoral Fellow, School of Health in Social Science, University of Edinburgh; Professor Matthias Schwannauer is Professor of Clinical Psychology, School of Health in Social Science, University of Edinburgh; and Professor Julie Taylor is Professor of Child Protection in the School of Health and Population Science at the University of Birmingham and Birmingham Children’s Hospital NHS Foundation Trust.
