“Edinburgh isn’t so much a city, more a way of life … I doubt I’ll ever tire of exploring Edinburgh, on foot or in print.”

Ian Rankin
Best-selling author and alumnus
Welcome to the University of Edinburgh

Influencing the world since 1583
For more than 400 years the University of Edinburgh has been changing the world. Today, we continue to make our mark. While our world-leading experts educate the pioneers of tomorrow, we’re building on our strengths in data science and working with partners to establish the region as the data capital of Europe.

By choosing to study at Edinburgh, you’ll be investing in an education that will help you build a successful future. You’ll experience the very best in teaching and research. Through our hands-on and innovative approach we’ll help you become a successful learner-practitioner or researcher and equip you with the skills, insights and perspectives to enhance your employability and career prospects.

Our flexible programmes, world-class facilities and award-winning support services combine to ensure your university experience is exceptional and unique. You’ll also be living in a vibrant, historic, inspiring capital city with world-famous cultural festivals, where the mountains and beaches of Scotland are right on your doorstep. Come and join us.

“You are now in a place where the best courses upon earth are within your reach … such an opportunity you will never again have.”
Thomas Jefferson
American Founding Father and President (speaking to his son-in-law, Thomas Mann Randolph, as he began his studies in 1786).

Why choose the University of Edinburgh?

21 September
5 October

TOP 50
We’re consistently ranked one of the top 50 universities in the world. We’re 18th in the 2019 QS World University Rankings.

4TH
We’re ranked fourth in the UK for research power, based on the 2014 Research Excellence Framework.*

TOP 10
We’re ranked in the top 10 in the UK and in the top 100 in the world for the employability of our graduates.§

£10m
We awarded more than £10 million in undergraduate financial support in 2017/18.

2ND
Edinburgh is ranked the second best student city in the UK.†

20TH
We’re ranked 20th in the world’s most international universities‡. Since 2010, we have taught students from 160 countries.

* Times Higher Education, Overall Ranking of Institutions
§ Times Higher Education, Global Employability University Ranking 2018
† QS Best Student Cities 2018
‡ Times Higher Education, The World’s Most International Universities 2018

#### Placement MEarthPhys

- Geophysics & Geology with Professional Placement MEarthPhys
- Geophysics with Professional Placement MEarthPhys
Applications and admissions

We aim to give you the clearest advice possible about the application process and our requirements. The information provided on the next four pages offers an overview for anyone considering applying to the University. If you decide to apply, we advise you to check the more detailed information we provide online, including specific entry requirements for individual programmes.

How you apply
All applications to the University for full-time study are made online through UCAS. This includes applications from international students outside the UK. You can choose up to five different programmes or universities on your application, if you are applying to study medicine or veterinary medicine, up to four choices can be used for these subjects. Your fifth choice should be used for an alternative, back-up subject.

Your school or college will normally have access to UCAS Apply and be able to support you through the process. If you are applying independently, UCAS can provide further advice on how to apply. See: www.ucas.com

When you apply
Applications for entry in September 2020 can be submitted from 1 September 2019. To ensure your application is considered you should apply by the relevant deadline:

- 15 October 2019 – deadline for all applications for medicine and veterinary medicine.
- 15 January 2020 – deadline for all other UK and EU applicants.
- 30 June 2020 – deadline for all other international applicants. We advise international applicants to apply by 15 January but will accept applications until 30 June.

What you need to apply
You’ll need qualifications, a personal statement and a reference. For some specific programmes you may need to:

- come to an interview, for medicine, veterinary medicine, nursing, teacher education, or oral health sciences;
- submit a digital mini portfolio, for art, design and fine art;
- sit an admissions test, the University Clinical Aptitude Test (UCAT), for medicine; or
- provide evidence of relevant work or voluntary experience, for professional programmes.

You will also need to provide evidence of your English language skills through qualifications.

We call these our entry requirements.

Qualifications you need
The school or college qualifications you need to apply are set at the academic standard we require you to have already achieved, or to be capable of achieving, to be considered for an offer.

The subject pages in this guide give you an overview of the grade requirements that apply to our programmes in each subject area, for applicants who have Scottish Highers or Advanced Highers, A Levels, or an International Baccalaureate.

Because it is only possible to show an overview in print, please check the specific subjects and grades required for entry to individual programmes by looking at the detailed entry requirements online before you apply.

You can enter many of our programmes with Higher National Certificates (HNCs) and Higher National Diplomas (HNDs). These are qualifications usually taken in college. Direct entry into the second or even third year of some programmes is possible, depending on the HNC or HND subject and graded unit.

We accept lots of different qualifications from around the world, and can’t list them all in detail in print. Please check the full details online.

Standard and minimum entry requirements
The qualifications and grades you need vary by programme and may also depend on whether you are a widening access applicant.

We consider you to be a widening access applicant if you:

- live in a target postcode area; or
- attend a target school or college; or
- attend the Scottish Wider Access Programme (SWAP); or
- are care experienced; or
- have refugee status or are an asylum seeker.

You can find out more about all of these terms, and see if we will consider you to be a widening access applicant, on our online checker: edin.ac/widening-access

If you are a widening access applicant and you meet or are predicted to meet our minimum entry requirements, you will be guaranteed an offer of a place.

All other applicants will need to meet or be predicted to meet our standard entry requirements to be considered for an offer.

Our standard entry requirements are normally expressed with an upper and lower grade level, for example AAA to ABBB for SQA Highers, or AAA to ABB for A Levels. As competition for places is high and applications generally exceed the number of offers we can make, applicants who are made an offer of a place, can usually expect to be required to achieve the upper grade level. This is because offers are normally made to the highest qualified applicants. Times where this may not be the case, and you may receive an offer at the lower grade level are:

- if the number of applications to a programme is broadly similar to the number of offers we have available; or
- if you are a non-EU international applicant to a programme other than medicine.
Applications and admissions (continued)

English language entry requirements

Unless a higher level is specified in the programme-specific entry requirements online, our entry requirement for all programmes includes a pass in English at the following grades (or equivalent):
- SGSA National 5 grade C
- GCSE grade 4 or grade C
- IB Standard Level grade 5.

If you are not a national of a majority English speaking country, we accept the following tests:
- IELTS
- TOEFL iBT
- IGCSE English, First or Second Language
- Cambridge C1E
- Cambridge CPE
- Pearson Test of English
- Trinity ISE.

We also accept some qualifications taught in English from specific countries. Please check the full details online.

Your personal statement

When considering your personal statement, we look for evidence of motivation, commitment and readiness to study your chosen subject at higher education level. It is therefore vital that you demonstrate a strong interest in, and preparedness for, the programme you apply to.

If you are applying for a professional or vocational programme, you should demonstrate a clear understanding of the profession. This is normally supported by evidence of appropriate work experience, volunteering, or work shadowing, although we do recognise that not all students have equal access to such opportunities.

Additional requirements for specific programmes

If you are applying to study veterinary medicine, you must complete a Work Experience Summary (WES). A link to the WES, for you to complete and submit, will be sent to you when you apply.

Applicants to some professional programmes such as medicine, veterinary medicine and education, will be required to demonstrate that they meet the fitness to practice standards of the profession they will be training to enter.

Direct entry to second year

You can apply to enter the second year of many of our science, engineering and art and design programmes. For all other programmes, applications for second year entry are only considered in exceptional circumstances.

Deferred entry to the following year

Please contact the relevant college admissions team to check whether we will consider a deferred application. In some cases you may be advised to apply for immediate entry while on your year out. Applications to veterinary medicine, and from international students applying for medicine, will not be considered for deferred entry – you must apply during your year out.

Part-time study

You can study part time on the following programmes:
- BA Childhood Practice
- Bachelor of Divinity (BID)
- MA Religious Studies.

You should apply directly to the University to study part time, not through UCAS. For further advice, please contact the College of Arts, Humanities & Social Sciences.

What happens after you apply

After you apply, we will send you information about logging in to MyEd, which we will use to communicate with you about your application.

It is important that you also log in to UCAS Track regularly to check the progress of your application, and to note deadlines for responding to any offers you are made. Each of our Colleges has its own admissions team. This means that while the University has an overarching admissions policy, it is the responsibility of our Colleges to decide which applicants will be made an offer of a place.

We aim to inform you of our decision on your application as quickly as possible. Provided you have applied by the October or January deadline, you can expect to receive our decision by the end of March.

If you receive an offer from us, you may be invited to attend an Offer Holder Day. These typically take place between January and April. You will have the opportunity to meet academic staff from your chosen subject area, see the facilities and attend open information sessions. You may also be invited to attend one of our information events in the spring. These are held across the UK, around the world and online.

Disabled applicants

If you have a disability, health condition, or specific learning difficulty, we encourage you to declare this on your UCAS application. Your application will go through the selection process and be assessed on the same basis as all other applications. However, making us aware of your disability allows us to begin considering your support needs at the earliest stage.

If you declare a disability and are made an offer of a place of study, you are encouraged to contact our Student Disability Service as early as possible to ensure that we can make any necessary arrangements for the start of your studies. Alternatively, applicants attending one of our Offer Holder Days can arrange to speak to the Student Disability Service.

Our International Foundation Programme

We offer students from countries whose school leaving qualifications are at a lower level than that required for entry, or specific academic skills and English language proficiency. If successful, you will be eligible for entry to many of our four-year honours programmes. Further information is available online.

Our Privacy Statement

Before you apply, you can read information online about how we will use the personal data that we receive in your application and who we will share it with.

Our Terms and Conditions of Admissions

If you decide to apply to the University and are offered a place of study, please read our Terms and Conditions of Admissions online, before accepting our offer.

Further information

For further information, please go online:
- How to apply: www.ed.ac.uk/undergraduate/apply
- Entry requirements overview: www.ed.ac.uk/undergraduate/entry-requirements
- Check programme specific entry requirements: www.ed.ac.uk/undergraduate/degrees
- UCAS: UCAS can advise you on the process of applying and tracking your application: www.ucas.com

Alternatively, call 0371 468 0468 from the UK, or +44 330 3330 230 from outside the UK.

Contacts

College admissions teams

If we are unable to help you online, our College admissions teams are happy to advise you about admission to specific programmes:

Welcome to the College of Arts, Humanities & Social Sciences

Our global reputation for teaching and research helps us to attract the international research community's sharpest minds, which in turn means world-class teaching for our students.

We were ranked among the world's top 20 universities in several arts and humanities subjects in the QS World University Rankings by Subject 2018.

As the University's largest college, we host more than 24,000 students and 3,800 staff. We offer more than 300 undergraduate programmes across a broad range of subject areas from our 11 academic schools. We offer subjects from established and emerging fields in the arts, humanities and social sciences, including creative practices and professionally orientated areas. This diversity creates a vibrant atmosphere in which students from around the world can develop new skills, deepen their knowledge, and network with like-minded individuals in preparation for whatever challenging and interesting careers lie ahead.

If you have any queries about the programmes listed in this section, please contact the Admissions Office, or go online for further details.

Why choose Accounting at the University of Edinburgh?

Our MA accounting-related programmes are accredited by the Institute of Chartered Accountants of Scotland (ICAS), the Institute of Chartered Accountants in England and Wales (ICAEW), the Association of Chartered Certified Accountants (ACCA), the Chartered Institute of Public Finance & Accountancy (CIPFA), the Association of International Accountants (AIA) and the Chartered Institute of Management Accountants (CIMA).

Our exchange programme offers you exciting opportunities to study abroad Year 3 at one of our partner universities in Asia, Australia, Canada, New Zealand or the USA. Major accounting firms, as well as other large companies, regularly deliver talks to, and conduct recruitment activities with, our students both on course and through wider programme-related activities.

Introducing Accounting

Contemporary global business, be it for profit or not for profit, is fraught with complexity, tensions, and socio-political, economic and cultural challenges. Our accounting-related programmes will prepare you intellectually and practically to embrace these complexities, negotiate tensions and address the wider socio-political and cultural challenges through astute, fiscally appropriate and socially responsible accounting practice.

Our staff have a world-leading reputation as prominent researchers in the accounting discipline. Our teaching is therefore grounded in state-of-the-art contemporary research findings and literature. This helps to ensure that our graduates develop the necessary personal and professional competencies required to work across a range of roles in contemporary accounting practice, making them very attractive to prospective employers. Our programmes will provide an excellent foundation for those hoping to gain a professional accounting qualification and can also prepare you for careers in finance and other sectors.

Accreditation

If you wish to progress to a career as a fully qualified accountant, the accreditation of our programmes (see page 14) provides a high level of exemption from the professional examination requirements. Our accreditation from the Institute of Chartered Accountants of Scotland offers the maximum exemption available to accounting graduates.

Study abroad

The University’s Business School exchange programme offers you exciting opportunities to study abroad Year 3 at one of our partner universities in Asia, Australia, Canada, New Zealand or the USA. You may also study abroad through the University’s international exchange programme. To participate in our study abroad programme, you will need to achieve an average mark of at least 60 per cent in Year 1 to be eligible to study abroad in Year 3.

Additional costs

If studying abroad in Year 3, your costs will vary by country. In Year 4 you will undertake a dissertation and, depending on the field of study you choose, there may be costs associated with undertaking surveys and conducting interviews.

Career opportunities

Accountancy graduates can train to become a qualified accountant through a traineeship with an accountancy or commercial firm. Alternatively, you can also choose a career in taxation, finance or banking. Some of our graduates decide to follow a different direction and pursue employment in management positions in the public and private sectors or take up the opportunity to pursue further study at postgraduate level.

Arabic & Persian

Why choose Arabic & Persian at the University of Edinburgh?

We are ranked 4th in the UK for Middle Eastern & African Studies in the Complete University Guide 2019. Offering 16 languages and a wide range of joint programmes, we're passionate about enabling choice and broadening minds through flexible study of languages and cultures from around the globe.

We are the only university in Scotland to offer courses in the Muslim world's three main languages. It doesn't matter if you're a complete beginner, you can take Arabic and/or Persian to degree level. We also teach Turkish to intermediate level.

We have a long and well-established reputation for teaching Islam and the history, culture, languages and literatures of the Middle East. Arabic, for example, has been taught here since the middle of the 18th century.

Introducing Arabic & Persian

Located at the crossroads between Europe, Africa and Asia, the Middle East has played a pivotal role on the world stage since ancient times. An understanding of the Islamic world remains relevant in the 21st century.

Our Arabic and Persian programmes provide a unique opportunity to learn the region's languages in the context of its history, literature, culture, religion and politics, past and present. You'll also develop the critical, analytical and comparative skills to interpret and discuss key issues and concepts.

During your programme, you will have the opportunity to study a full range of material, from pre-Islamic poetry and Islamic philosophy, to modern literature and cinema. You'll also spend Year 3 abroad, turning classroom learning into living engagement with Middle Eastern culture.

Study with us and you'll be part of a small, friendly community, with great links to the Alwaleed Centre, fantastic resources (including our own library), and a regular programme of workshops, film screenings and guest seminars.

You'll be based at the heart of the University of Edinburgh in a world-leading festival city alive with culture. We have a particularly strong relationship with the Edinburgh International Film Festival (notably its film strand), are home to a thriving student Islamic Society, and have won awards for our work with local communities.

Career opportunities

More than 600 million people worldwide are native speakers of either Arabic, Persian or Turkish. An understanding of these languages and the cultures to which they open doors, is an excellent primer for a range of careers in the media, non-governmental organisations, industry, and the diplomatic and civil services.

With increasing migration in response to changing global dynamics, there is high demand for language graduates both at home and abroad, including in translation, interpreting and education. There are also opportunities to continue studying at postgraduate level.

Study abroad

Arabic students can choose between at least two countries in the Arabic-speaking world for their study abroad. Persian students will usually study abroad in a Persian-speaking country.

Additional costs

You will spend either a semester or a year (depending on your programme) at a university or institute in an Arabic- or Persian-speaking country as part of your programme. Costs vary according to the location.

In language tutorials, the groups are small and you get lots of personal attention. I appreciate the very high teaching standards offered and the enthusiasm and welcoming attitude of staff.”

Archie Vickers
3rd year MA (Hons) Arabic & Persian

Year by year...

Year 1
You will study elementary language, learning basic grammar and developing your vocabulary. You will also take courses in Islamic history, modern Middle Eastern history and courses from other academic areas.

Year 2
You will continue with your language study and take courses in the religion of Islam, Islamic and Middle Eastern cultures and courses from other academic areas.

Year 3
You will spend your third year in an Arabic-or Persian-speaking country, improving your language skills and undertaking independent study.

Year 4
You will continue to develop your language and translation skills and write your honours dissertation. You will also choose from a range of option courses dealing with different aspects of Islam and the Middle East.

Additional fees

Why choose Archaeology at the University of Edinburgh?

We’re ranked in the UK’s top 10 universities for archaeology in the QS World University Rankings by Subject 2018. Our programmes offer many opportunities for practical archaeological experience during vacations or as part of your final year dissertation. Students often get involved in staff projects, ranging from Scotland to Egypt. There are also opportunities to take part in external excavation and archaeological survey fieldwork in the UK and Europe.

You will study in a city full of resources and professional expertise, with key national archaeological institutions such as National Museums Scotland and Historic Environment Scotland. Edinburgh is home to many national commercial archaeology companies and important archaeological sites which date back to the Mesolithic period, providing opportunities for fieldwork and work experience.

Introducing Archaeology

Archaeology investigates the human past using material remains such as artefacts and excavated sites to reconstruct the economic, social and cultural life of early societies. At Edinburgh we have a rich tradition of archaeological teaching and research, specialising in European prehistory, the early civilisations of the Mediterranean and the Near East and Egypt.

You will be introduced to standard and innovative archaeological techniques and the practice and theory of archaeology. This will take in the study of science-based archaeology, including the study of animal and human bones and digital applications. You can choose to specialise by geographical area or period and to become involved in practical research or applied archaeology, for example through fieldwork.

Joint honours

Archaeology can also be studied as part of a joint honours programme with history, architectural history, geography, Scottish ethnology or social anthropology.

Study abroad

There are opportunities to study abroad in Year 3, either by applying for the School’s Erasmus+ exchange agreements or for one of the University’s many international exchanges beyond Europe. These cover practically every continent on the globe, from North and South America to Australasia and all of Asia. These are unique opportunities to immerse yourself in different university systems and cultures. There will normally be opportunities to complete archaeological fieldwork or other practical assignments in locations outside the UK.

Additional costs

In Year 1 you are expected to participate in an archaeological fieldwork project. Normally, the minimum requirement is three weeks of field experience. Archaeological projects often charge a participation fee. We are able to make a contribution towards your mandatory fieldwork in Year 1, and also to fieldwork and practical work in later years if it contributes to your programme, but the overall cost to you will depend on the type of work chosen and where it takes place (many of our projects are conducted abroad). In later years, you may opt to undertake additional practical archaeological work in the vacations following Years 2 and 3. If you study abroad in Year 3, your costs will vary by country.

Career opportunities

With an archaeological qualification from the University of Edinburgh, you will gain practical, social, intellectual and theoretical skills. You will become familiar with a range of disciplines, enabling you to demonstrate intellectual flexibility and the ability to quickly adapt to new situations. You’ll learn to think logically through developing sound research and analytical skills and you’ll be able to compile and critically evaluate evidence in order to formulate and present an argument coherently.

Through fieldwork, you’ll develop a range of practical archaeological skills that will enable you to appreciate more fully our human environment and its role in the contemporary world. Many archaeology graduates find employment as professional archaeologists working for government agencies, universities, museums and heritage organisations or applied archaeology companies/consultancies in the UK or elsewhere. Our graduates are well-rounded people with a range of transferable skills. These skills will give you the opportunity to pursue a broad range of careers, for example, in business, management, teaching, journalism, the police, or the civil service.

Why choose Architecture or Architectural History & Heritage at the University of Edinburgh?
Our architecture programmes are prescribed by the Architects Registration Board (ARB) and have full Royal Institute of British Architects (RIBA) validation. You will have opportunities to gain hands-on experience through embedded periods of integrated practice. As a place of outstanding architectural interest and a designated UNESCO World Heritage Site, Edinburgh offers you the perfect setting in which to study the built environment.

Introducing Architecture and Architectural History & Heritage
Architecture's scope is more than technical, environmental or historic expertise. Studying and practising architecture has the potential to shape culture, aspiration and community, to deepen our experience of the modern world and to imagine our futures.

In Architecture you will learn from leading architectural practitioners and researchers through architectural design exploration and proposition. Thematic approaches to briefs and sites are informed by theoretical and practical knowledge.

Our Architectural History & Heritage programme offers an unrivalled breadth of study in the historic built environment. It places the history of architecture, fine art, and heritage management within the context of urbanism and the cultural history of cities. You will learn about different architectures of the past, the relationship of buildings and urban environments to the societies that produce them, and techniques for recording and preserving historic structures and urban fabric.

‘Accreditation
All architecture students are admitted to the MA (Hons) Architecture programme. At the end of Year 2 you will have a choice of pathways enabling accelerated progress or the development of broader academic interests – either our three-year BA or our four-year MA (Hons), including a variant of the MA (Hons) with an exchange year abroad. Both programmes have ARB Part1 prescription and full Royal Institute of British Architects (RIBA) validation.

Joint honours
Architecture can also be studied as part of a joint honours programme with structural engineering. Architectural history can also be studied as part of a joint honours programme with history of art, social history or archaeology.

Placements
MA (Hons) Architecture includes a credited integrated practice work period in semester two of Year 3. For Architectural History & Heritage, placements are a core component of the programme in Years 3 and 4.

Study abroad
There are options for working and studying abroad in the honour years of our MA (Hons) programmes. The integrated practice working period in Architecture allows for work abroad. We also offer international exchanges with Erasmus+ partner institutions in Copenhagen, Madrid, Graz and Stuttgart during Year 3 as well as an Architectural History & Heritage exchange with the University of Virginia.

Additional costs
Architecture students will need to purchase specialist equipment, such as a drawing board and laptop, as well as pay for drawing and model-making materials and printing costs. Self-funded field trips and study visits are undertaken as part of the programme. No specialist equipment is required for the Architectural History & Heritage programme.

Career opportunities
Architecture students gain excellent skills in design, spatial awareness, problem-solving and project-based production, which combine into a strong and adaptable skill set. The BA and MA (Hons) Architecture programmes both offer routes into the architecture profession and our graduates typically continue their studies to qualify as architects working in a wide range of established and emerging contexts, including private practice, local and national government, or large commercial organisations both here in the UK and overseas.

Architectural history and heritage graduates can have careers in conservation, land management, heritage or historical consultancy.

Introducing Architectural History & Heritage

Architectural History & Heritage focuses on the study of architecture, fine art, and heritage management. You will study via distance learning as you undertake as part of the programme.

Further information and programme-specific entry requirements at www.ed.ac.uk/ug/16

BA (Hons) Art
Art W100
Intermedia Art W900
Painting W120
Photography W640
Sculpture W130
MA (Hons) – 5 years
Fine Art W150

Please select UCAS code W100 to apply for entry to Year 1 in the School of Art, a general year in which you will experience options including painting, photography, sculpture and intermedia art. At the end of Year 1 you will transfer to one of our specialist programmes in Intermedia Art, Painting, Photography or Sculpture.

Why choose Art at the University of Edinburgh?

Our staff include a mix of practicing artists, visual-culture theorists and curators, who publish and exhibit nationally and internationally.

In Years 1 and 2, you can select option courses from across Edinburgh College of Art and the wider University. Edinburgh is home to a vibrant and diverse contemporary art scene with an excellent mixture of world-class venues showcasing the best in contemporary art.

Introducing Art

Our undergraduate programmes provide a scholarly framework for students who wish to develop their art practice. We provide a broad-based environment, with enough rigour and focus to enable you to engage with the challenges of study in intermedia, painting, photography and sculpture, within the context of contemporary art practice.

Our students demonstrate imaginative responses to the world through curiosity and exploration and we prepare them to do this with an educational experience that offers depth, breadth and ambition. Our students are equipped with the talent, knowledge and expertise to lead, rather than simply respond to, innovation in art practice.

All programmes

We are at the forefront of introducing option courses that provide a breadth and depth of subject choice. We recognise your desire to immerse yourself in your discipline but believe your learning is enhanced if you are exposed to a wider range of methods and knowledge beyond the confines of the studio. In Years 1 and 2 your choice of option courses will allow you to construct a suite of courses that reflect your interests and enhance your main study.

In addition, a visual culture strand provides a multidisciplinary content for study across all our programmes except Fine Art. You will engage in a critical and creative dialogue with the work of your peers and gain an understanding of the nature of today’s diverse visual cultures.

Intermedia art

Intermedia art operates in a fine art context and is the area of artistic practice between different media. During the late 20th century visual art developments introduced new processes and situations, which expanded notions of artistic practice. You can work across a number of overlapping areas including sound, object-making, installation, performance, publications and video.

Painting

This programme focuses on developing confident, enquiring, resilient students. You will be able to research and articulate your practice, and question your position, and that of painting, within the wider context of contemporary visual culture. We put emphasis on drawing and research through visual thinking. Work can also be realised through practices such as printmaking, artists’ books, installation, digital media and photography. In the studio you will identify, reflect on and develop your personal, visual vocabulary through the languages of painting.

Photography

This programme prepares you for your career by encouraging you to develop a personal and contextualised vision of the world, and by developing your knowledge of equipment and technical facilities. You will develop a broad visual vocabulary and explore a range of fine art practices, using traditional photographic equipment and processes as well as the latest computer technology. We promote high levels of creative thinking allied to advanced technical skills, and underpinned by wide ranging research and academic rigour. Historical and contemporary contexts are vital to the provision of your work, which will reflect photography’s pivotal contribution to today’s visual culture.

Sculpture

Our sculpture programme supports the development of material and critical awareness through approaches pertinent to the expanded field. Our purpose-built studios are both practical and pertinent to the expanded field. Our sculpture programme supports the development of material and critical awareness through approaches pertinent to the expanded field. Our purpose-built studios are both practical and pertinent to the expanded field.

Year by year...

Year 1

You will develop core intellectual, visual and practical skills necessary to study art. You will follow a programme balanced between common projects and discipline-specific approaches in intermedia, photography, painting and sculpture, allowing you to choose a specialist subject study. You will study 60 credits of compulsory courses as well as 40 credits of options from across the wider University.

Year 2

You will focus on the development of visual ideas through appropriate materials, media and technical processes related to your chosen subject. Projects take place in the workshops and studios. You will present, evaluate and discuss work through technical workshops, tutorials, group discussions, critiques, exhibitions and presentations. You will choose 40 credits of option courses from across the wider University.

Year 3

You will develop your own research interests, supported by studio staff. These will be realised through a body of work exhibited at your final Degree Show. You may also wish to take a placement on a subject related to your practice.

Year 4 (Fine Art only)

You will write a history of art dissertation on a topic of your choice. Most of your time will be taken up with research, and production of your work in the art studios, culminating in the production and presentation of your artwork at the public Degree Show exhibitions.
### Business at the University of Edinburgh

Alongside being part of a world-renowned university, the University of Edinburgh Business School also holds accreditation from three of the most influential business accreditation bodies: AMBA, AACSB and EQUIS.

Across a range of courses, including bespoke student consultancy projects, you will have exciting opportunities to work closely with for-profit, public and third sector organisations, developing professional experience before you graduate.

We have an extensive network of corporate, public sector, political, and third sector partners who work actively with us on course design and delivery, career development planning, and bespoke engagement events and who support and facilitate sponsored dissertations, co-host public lectures, and offer internship and shadowing opportunities. Our very popular #makeyourmark two-day social enterprise challenge gives you the chance to create something that can make a positive social impact.

### Introducing Business

Contemporary global business, be it for profit or not for profit, is fraught with complexity, tensions, and socio-political, economic and cultural challenges.

Our business-related programmes will prepare you intellectually and practically to embrace these complexities, negotiate tensions and address the wider socio-political and cultural challenges facing contemporary businesses, governments and not-for-profit organisations.

### Programmes

|-----------|--------------------------|--------------------------|-------------------|----------------------|-------------------------------------|----------------------------------------|-------------------------------------|--------------------------------------|-------------------------------------|--------------------------|-------------------------|-------------------------|-------------------------|-------------------------|-------------------------|-------------------------|-------------------------|

### Why choose Business at the University of Edinburgh?

The main focus of our business programmes is on the management of organisations and their relationship, and responsibility, to employees, customers, wider stakeholders (shareholders; media; government) and society at large.

They examine the theories and methods behind contemporary management practice, exploring the relationships between people, organisations and their environment from a local, national, regional and global perspective.

You will study organisational policies, strategic planning, HR management, finance, marketing, business analysis and decision analytics, and technology.

You have the opportunity to take a broad approach or to focus on more specialist areas. Subject pathways allow you to combine business management with a wide range of specialisms, including accounting, finance, marketing, HR management, decision analytics, enterprise and innovation, and strategic economics.

You can study international business with or without a language. The structure of our programmes means that during the early years of study there is often the flexibility to change from one subject pathway to another.

### Joint honours

Business can also be studied as part of a joint honours programme with accounting, computer science, law, mathematics, psychology, or some European languages.

### Study abroad

Our exchange programme offers students on all our business programmes exciting opportunities to study abroad in Year 3 at one of our partner universities in Asia, Australia, Canada, New Zealand, the USA or across Europe. Exchange opportunities with European business schools are through the Erasmus+ programme.

If you are on an MA International Business programme you will spend Year 3 on a Business School study abroad programme. To participate in our study abroad programme, you will need to achieve an average mark of at least 60 per cent in Year 1 to be eligible to study abroad in Year 3.

### Additional costs

If studying abroad in Year 3, your costs will vary by country. In Year 4 you will undertake a dissertation and, depending on the field of study you choose, there may be costs associated with undertaking surveys and conducting interviews.

### Career opportunities

A key aim of our programmes is to combine academic knowledge with transferable skills in order to enhance your employability. Business graduates are highly valued by employers across the world. Our business-related programmes will help you develop the necessary personal and professional competences required to work across a range of roles central to contemporary business. You will have a choice of careers open to you, including management, consulting, finance, marketing and human resources.

**I love how involved you can be. There are so many opportunities to make new friends and establish yourself within the University.**

Shreya Bhalla

3rd year MA (Hons) Business Management
Why choose Celtic at the University of Edinburgh?

Celtic has been taught at the University since 1882. We are a leading centre for the study of minority languages in the Celtic context. As well as being immersed in Celtic culture beyond the classroom, our teaching staff are also highly active researchers, working at the cutting edge of linguistic and sociolinguistic research in the Celtic languages.

You'll be based at the heart of the University, in the city’s historic centre, close to our Main Library, the School of Scottish Studies Archives, and the National Library of Scotland, all of which have fantastic collections for students of Celtic.

There are opportunities to study abroad in Year 3 and you’ll graduate with the skills to capitalise on Celtic’s growing profile, both in Scotland and internationally.

Introducing Celtic

Celtic civilisations produced the earliest vernacular literature in Europe after Latin and Greek. Today, Celtic languages and cultures continue to flourish in writing, song, theatre, the media and more, with a broad international reach and growing numbers of new speakers and audiences.

Based in a city with a long-established Gaelic community, and with strong links to Bòrd na Gàidhlig, Celtic at Edinburgh is at the heart of this lively contemporary scene and leads the way for future language planning and maintenance, particularly for Scottish Gaelic.

As a student here, you’ll engage with a broad range of subjects in your first two years, and specialised thereafter, developing your expertise in the periods and disciplines that interest you most. At all levels, we have an extensive range of courses to choose from, covering extraordinarily rich literary and oral traditions from the Middle Ages to the present day.

Scottish Gaelic

It doesn’t matter if you’re a complete beginner or have studied Scottish Gaelic before, you can take Celtic as a single honours programme, or jointly with one of a number of other subjects. You’ll gain an interdisciplinary insight into Celtic’s wider historical and contemporary context and, although Scottish Gaelic language, literature and culture are at the heart of our programmes, you can also study Modern Irish and the medieval Celtic languages and literatures at honours level.

Study abroad

There are opportunities for you to study abroad through Erasmus+ and the University’s international exchange programme.

Additional costs

There may be additional costs if you choose to follow a programme with a study abroad element. Please check individual programme descriptions online for details.

Career opportunities

Thanks to an ever-broadening international reach, Celtic languages, literatures and cultures have a steady stream of enthusiastic new speakers and audiences.

In Scotland particularly, developments such as the Gaelic Language (Scotland) Act 2005, the creation of BBC Alba (the Gaelic digital television service) and the ongoing expansion of Gaelic-medium education have increased demand for highly educated Gaelic speakers or specialists in Celtic culture.

There are opportunities to continue studying at postgraduate level.

By year...

Year 1

If you are already qualified in Scottish Gaelic, you will study Gaelic 1F, focusing on Scottish Gaelic language and literature. If you are a beginner you will study Gaelic 1A, concentrating on language learning, introduction to Gaelic Language & Culture includes basic language learning opportunities. Celtic Civilisation 1A and 1B provide overviews of the historical and cultural history of the Celtic peoples from late antiquity to the present day, including language, literature, religion and art. You’ll also take courses from other subject areas to broaden the scope of your study.

Year 2

Two language courses expand and develop your familiarity with Scottish Gaelic language and literature. Gaelic 2A builds on the work of Gaelic 1A, while Gaelic 2B builds on the work of Gaelic 1B. Two Celtic literature courses enable you to explore medieval, early modern and modern literature in translation, covering the Irish, Welsh, and Scottish Gaelic literary traditions. These courses lead on to the medieval curriculum at honours level, while Gaelic 2A or 2B lead to both the medieval and modern curriculum. You’ll also take courses from other subject areas to broaden the scope of your study.

Year 3 & 4

You can develop your programme of study by choosing courses from both the modern and the medieval programmes. Medieval courses introduce the early Irish and Welsh languages and develop your study of Celtic literature, history and culture. Modern courses open up the study of literary, cultural, and historical aspects of Gaelic Scotland and Ireland from around 1600 to the present day, including linguistics and sociolinguistics, modern Irish language, and advanced Gaelic language work aimed at developing high-level oral and writing skills.

In Year 4, you will choose further specialist courses and will complete your dissertation.

Why choose Chinese at the University of Edinburgh?

We are ranked 12th in the world for arts and humanities in the QS World University Rankings by Subject 2018.

The University offers 16 languages, and a wide range of joint programmes. We’re passionate about enabling choice and broadening minds through flexible programmes in languages and cultures from around the globe.

We are the only university in Scotland to offer students undergraduate honours programmes in Chinese. All our programmes include a year abroad studying in either China or Taiwan.

Introducing Chinese

One of the world’s earliest civilisations, China is once again a major economic and political global power; one whose scale makes an understanding of regional and cultural differences essential.

Study Chinese at Edinburgh and you will learn Mandarin libraries, language learning facilities, and collections, including the Edinburgh University Library Chinese and East Asian Studies Collection of some 50,000 print and digital resources.

Additional costs

You will pay fees for the whole duration of your programme, plus standard expenditure such as books and living costs. The University Library Chinese and East Asian Studies Collection contains many prints and digital resources, but some additional costs may be incurred. Some scholarship money may be available to help with these costs. The costs are likely to vary between programmes, and may be subject to change.

Career opportunities

Employers look for the breadth of training and experience demonstrated by our graduates, who are in high demand in a wide variety of sectors, including the media, commerce, industry, and the civil service.

Many graduates are currently recruited by companies based in East Asia, an increasingly powerful player in the global economy, but with Scotland’s strategy to enhance engagement with China, opportunities for employment are increasing closer to home too. These include careers in translation/interpreting and education.

There are also opportunities to continue studying at postgraduate level. Year 4 in particular will focus on developing the research skills you’ll need if you choose this path.

You will engage with a broad range of subjects in Years 1 and 2 then specialise thereafter. Our programmes are designed for beginners, with regular classroom tuition from native Chinese speakers, and supported access to an extensive range of media resources. You’ll be based at the heart of the University of Edinburgh in a world-leading festival city with excellent links to China, a thriving East Asian cultural scene, and fantastic opportunities to learn more about classical and pre-modern Chinese history and culture, in preparation for your year in China.

You will complete your dissertation. Asian Studies is a small, friendly community, with its own Chinese Studies Peer Support Group, great links to the Confucius Institute for Scotland, and a regular seminar series featuring visiting speakers.

Please note that our Chinese programmes are not suitable for native or near-native speakers. The small class sizes in Chinese mean you quickly become a tight-knit group. It also allows lecturers to properly get to know you and your individual strengths and weaknesses.”

Why choose Classics at the University of Edinburgh?

Classics has achieved high student satisfaction levels in the National Student Survey (NSS) over the last five years, with 100 per cent of students on the MA (Hons) Classics programme saying they were satisfied in 2017.

Our programmes in Greek and Latin offer a rigorous and traditional linguistic training along with innovative choice of texts and approaches. This lets you reach very high standards whether or not you have studied the languages before and irrespective of previous linguistic knowledge. Courses in ancient history, classical art and archaeology, and classical literature in translation require no prior or linguistic knowledge, and cover the whole of the ancient Greek, Roman and Byzantine worlds.

Whichever programme you study, you will have opportunities to get involved in excavations run by members of staff, most recently in Italy and Macedonia.

Introduction to Classics

Classics will introduce you to the history, cultures, languages and literatures of some of the world’s most important civilisations. Whether you are interested in the archaeology of the Roman empire, the art of ancient Athens, the drama of Euripides, the epics of Homer and Virgil, or the history of Greece, Rome and Byzantium, you will be able to find a programme suited to your interests and ambitions.

Programmes

MA (Hons)
Ancient & Medieval History V190
Ancient History V110
Ancient History & Greek V17
Classical & Middle East Studies Q786
Classical Archaeology & Ancient History V113
Classical Archaeology & Greek Q843
Classical and Latin Q46
Classical Studies Q810
Classics Q800
Classics & English Language Q883
Classics & Linguistics Q881
Greek Studies Q700
Latin Studies Q800

Classics is a wide term which refers to the study of all aspects of ancient Greek and Roman civilisation. It also includes the study of those cultures that the Greeks and Romans came into contact with, of the Greek- and Latin-speaking civilisations that followed them, and of the reception of classical heritage in the modern world. You will learn from our range of expert teaching staff, who are drawn from many countries and maintain strong international links. We offer a wide choice of programmes with strengths across ancient history, Greek and Latin language and literature and classical art and archaeology. You will be able to choose from a broad range of courses in classics and related disciplines. In Years 1 and 2 you can also choose option courses from subjects as diverse as astronomy, criminology and modern languages, subject to availability and to timetabling restrictions. No previous knowledge is required to study ancient history, classical art and archaeology, or classical literature in translation and it is possible to learn Greek or Latin from scratch and to progress to the highest level by the end of your programme. By working with distant sources and inconclusive evidence, you’ll learn to think logically and to develop sound research and analytical skills. You’ll learn how to make links between what you already know and what you still need to find out. You’ll be taught how to compile and critically evaluate evidence in order to formulate and present an argument coherently. In addition to our School’s collections and those of the University’s library, you can apply for access to the outstanding collections of the National Library of Scotland and the National Museum of Scotland. Both are near the University.

Study abroad

There are opportunities to study abroad for Year 3, to go on excursions to ancient sites abroad, and to join fieldwork projects overseas. Study abroad can be applied for either through the School’s Erasmus+ exchange agreements with prestigious universities across Europe or through the University’s international exchanges beyond Europe. These cover practically every continent on the globe, from North and South America to Australasia. These are unique opportunities to immerse yourself in different university systems and cultures.

Joint honours

Classics can also be studied as part of a joint honours programme with Arabic, archaeology, divinity, English or Scottish literature, French, German, history, Italian, philosophy, Russian studies, Scandinavian studies, or Spanish.
Why choose Cognitive Science at the University of Edinburgh?

The University helped create the field of cognitive science and is still at the forefront of it. You will not only be taught by researchers who laid those foundations but by researchers who are still making key advances.

Cognitive science comprises psychology, philosophy, linguistics and informatics. Our broad-ranging research supports a wide range of advanced courses in later years, including those on consciousness, metaphysics, language acquisition, computational neuroscience, the computational mind, language pathology, and human agency and free will.

You will have access to state-of-the-art research facilities including electroencephalogram (EEG), non-invasive brain stimulation, eye and motion tracking equipment. You will also have access to a dedicated psychology and philosophy library.

Introducing Cognitive Science

Philosophers and scientists have long speculated about the nature of the human mind and the role of language in making the human mind what it is. Recent developments – in fields as diverse as robotics, brain imaging, anthropology and speech technology – bring a host of new perspectives to our quest to understand our own inner workings. Cognitive science brings together scholars from linguistics, psychology, philosophy, neuroscience and computer science.

Cognitive science is the interdisciplinary attempt to understand the human mind. It focuses on abilities such as reasoning, perception, memory, awareness, emotion, attention, judgment, motor control, language use, and the connections between them. Cognitive science uses methods such as computer modelling, linguistic analysis, philosophical reasoning, robotics, neuroimaging and psychological experiments.

The University of Edinburgh played a key role in founding this discipline, by exploiting and enriching long-standing connections between the disciplines that contribute to the study of human cognition. You will be taught by the researchers who both laid the foundations and are still making key advances in the field and the course content is regularly reviewed to ensure our students learn about current developments.

Our Cognitive Science (Humanities) programme requires you to undertake a selection of basic courses covering material in linguistics, philosophy, psychology and computer science. At honours level, in Years 3 and 4, you will choose from a wide variety of more advanced courses in this range of disciplines, with the opportunity to specialise in one domain for your honours dissertation project.

Our goal is to help you come to a broad understanding of issues such as the relationship between language and thought, the relationship between mind and brain and the philosophical implications of our increasing ability to look inside the working brain and to model its activities in computers and robots.

Study abroad

If you are studying cognitive science you will be encouraged to consider universities abroad, with the help of your Personal Tutor and/or members of the cognitive science academic staff. This will help to identify a university at which you could spend Year 3. You will study a range of courses that are comparable in academic range to those we offer.

Career opportunities

Graduates with cognitive science qualifications have excellent employment prospects in fields that will shape our society – those which depend on computers, such as economics, entertainment, technology, mobile systems, manufacturing and health, to name but a few – and those thought of traditionally as more humanities orientated, such as the civil service, management, finance, journalism, social work and teaching.

I feel like the University really wants to develop students as people not just academically.

Kat Steggles
3rd year MA (Hons) Cognitive Science
Design

Why choose Design at the University of Edinburgh?
You’ll benefit from talks and workshops from visiting professional practitioners and will take part in exhibitions, industry competitions and live projects that will help you to prepare for professional practice.

Our studio and workshop spaces range from the historic, to contemporary, with specialist spaces for making work at all scales and across all media.

Our graduates qualify ready for industry, with the confidence to establish themselves as independent designers, creatives or makers.

Introducing Design
We aim to develop cross-disciplinary methods and approaches to people and culture that equip you to design excellence into people’s lives. This is about both designing artefacts and understanding the world around us. Our design vision and ideas lie in a global framework of design and how people wish to live their lives. We encourage you to articulate innovative and sustainable creative visions and identities. Our graduates will become the designers, thinkers and makers who will positively shape the world.

Did you know?
Our Film & TV BA has been awarded the Creative Skillset Tick, the industry kitemark of quality, following a rigorous assessment process by experts working in the creative industries.

Illustration
Illustration encompasses form, colour, line, composition and pictorial space. Illustrations illustrate a range of printed material, graphic and web design, advertising, packaging, periodicals, books and more. Contemporary practice includes the theatre, music, television, museum-related work and exhibitions. We teach drawing and image-making from a methodology of observation, perception and literary interpretation.

Interior design
Interior design is the study and design of interior space in a range of public and private environments. You will develop your skills through innovative projects that enable you to explore the design potential of existing buildings and bring new life to old structures.

Jewellery and silversmithing
We aim to produce designers who create fresh, exuberant works of originality and innovation. We encourage you to combine new technologies with traditional techniques in precious or semi-precious metal and gemstones, plastics, wood, paper, stone and textiles.

Performance costume
Our unique programme teaches costume making and design. Our curriculum includes life drawing, textiles, millinery, set design, model making and puppetry. You will be encouraged to be an innovative, individual and adaptable designer and maker. Our programme is highly respected by industry and has impressive graduate employment rates.

Product design
Product design is about understanding people, questioning existing ways of doing things and seeing opportunities for innovative products that will enrich quality of life. You will explore cutting-edge research, design and practical methods used at the discipline’s forefront. You will explore making, thinking and designing through a variety of materials and technologies, informed by thought provoking briefs.

Textiles
We offer a rich exploration of textiles in their broadest sense for a range of contexts. You will be encouraged to take an experimental approach to materials and processes to produce innovative and contemporary design work. This may include textiles for fashion, interiors or alternative contexts for design, exploring combinations of material, texture, colour and pattern.

Placements
Industry experience is embedded in our programmes through live project briefs, workshops and mentor schemes. Work placements are not compulsory but may be available, typically, these are secured by students and occur outside of semester time.

Study abroad
You may apply to spend part of Year 3 at one of our partners in Australasia, Europe or North and South America. Please check your specific programme details online.

Additional costs
Materials costs vary depending on your programme. In some cases, your choice of materials will have an impact on the costs you incur.

Some programmes offer study trips and individual field-based projects which may incur a cost to you. You will usually be required to cover accommodation, subsistence and travel costs. Your contribution will vary based on your chosen programme and courses, and on the nature of each trip.

Career opportunities
Our programmes have strong industrial pathways to ensure the most successful and meaningful careers for graduates. We boast a vibrant alumni network and strong links with the cultural and creative sector across Scotland and beyond. The University Careers Service offers exceptional support throughout your time with us.

The University of Edinburgh Undergraduate Guide 2020 entry

Year by year...

Year 1
You will be introduced to the theoretical and fundamental practical methods of design through a number of compulsory courses in your chosen subject and within Design & Screen Cultures. You will also be able to take option courses from ECA and across the wider University.

Year 2
Through compulsory courses in your subject, Design & Screen Cultures, and options chosen from anywhere within ECA or the wider University, you will focus on the development of your work through appropriate materials, media and technical processes.

Year 3
In your compulsory courses you will undertake a series of externally focused projects, including competitions, exhibitions and industry collaborations. We also offer opportunities for exchange programmes depending on your subject.

Year 4
You will undertake a major, self-initiated studio project, and theoretical work (in the form of a written dissertation) that may be informed by personal research interests. This may be preceded by set projects, depending on your programme. You will participate in the Degree Show or Fashion Show near the end of the academic year.

“For me, coming to ECA has been one of the best decisions I’ve ever made. The freedom you’re given with projects to interpret briefly and tailor them to your own style, concept and imagination is one of the things I’ve enjoyed most.”

Callum Miller
4th year BA (Hons) Performance Costume
Economics

Why choose Economics at the University of Edinburgh?

We’re ranked in the UK’s top 10 universities for economics in the QS World University Rankings by Subject 2018. Economics can be taken on its own or as part of a joint honours programme with subjects such as business, Chinese and social policy. Employers may see this as an advantage because of your double specialisation, interdisciplinary knowledge and adaptability.

You will join a vibrant learning community where active and engaged student societies like the Economics Society and the Edinburgh University Trading and Investment Club, which holds the UK’s biggest student-run investment portfolio, run events and activities throughout the year.

Introducing Economics

There has never been a more exciting time to study economics. The ongoing consequences of the last economic crisis mean that the world urgently needs new thinking and new processes to meet the challenges of a changing economic climate.

As an economics student you will explore issues of economic stability, growth and development, all vital for economic forecasting and for influencing economic performance and policy.

You will also examine the causes of economic growth and the policies that are designed to promote prosperity, increase efficiency and reduce unwanted fluctuation in fiscal activity. There is a distinguished history of economics in Scotland that includes the work of David Hume and Adam Smith. Throughout your studies, you will learn from world-leading economists before following in the footsteps of our graduates who are in demand by national and international organisations.

Joint honours

Economics can also be studied as part of a joint honours programme with a range of subjects, including business, Chinese and social policy.

Additional costs

There are required textbooks that you will use in your courses during Years 1–3.

Study abroad

There are opportunities to study in Australia, New Zealand, Hong Kong, USA, Canada, Argentina, Mexico and within Europe (Erasmus+).

Career opportunities

Our graduates are highly regarded by employers. The skills you develop will equip you for careers in accountancy, business, management and consultancy, or for work in aid agencies, not-for-profit organisations or government departments. Many graduates have entered the finance sector and some large financial firms actively recruit Edinburgh graduates.

Economics
Why choose Education at the University of Edinburgh?

We're ranked in the UK's top 10 universities for education in the QS World University Rankings by Subject 2018. Our initial teacher education programmes are accredited by the General Teaching Council for Scotland (GTCS). Our Childhood Practice programme is accredited by the Scottish Social Services Council (SSSC).

UK and EU students studying primary education with Gaelic or physical education will be guaranteed a one-year teaching induction post in a Scottish school on the successful completion of their studies.

Introducing Education

We offer two main areas of study: teacher education and childhood practice. All our students have an interest in human relationships and are encouraged to develop professional values of trust, respect, integrity and a clear commitment to social justice. On all our programmes, you'll explore innovative ways of working with different learners to ensure you gain the knowledge, professional skills, and experience to excel in your career.

Programmes

BA – 3 years
Childhood Practice
MA (Hons) – 4 years
Physical Education (PGCE)
Primary Education with Gaelic (Fluent speakers)
MA (Hons) – 5 years
Primary Education with Gaelic (Learnem)

Teacher education
Our teacher education programmes provide an excellent foundation for a career in teaching and are accredited by the General Teaching Council for Scotland (GTCS). Upon graduation, UK and EU students will be guaranteed a one-year teaching induction post in a Scottish school.

Please note: It is important that applicants for teacher education programmes show commitment, motivation and suitability for their programme and the profession. This can be demonstrated in your personal statement by reflecting on relevant work experience and explaining your understanding of the teacher's role. For more guidance, visit: www.ed.ac.uk/education/teacher-education

Advice for applicants
Standard entry requirement:
SQA Highers ABB by end of 5S. A Levels ABB.
IB 34 points (grades 655 at HL).
Minimum entry requirement:
SQA Highers ABB by end of 5S, with a minimum of BBB achieved in one year of 5A-5S. A Levels ABB.
IB 34 points (grades 655 at HL).
Additional requirements
An interview. Successful applicants will also be required to join Disclosure Scotland’s Protecting Vulnerable Groups (PVG) scheme.

Please note: This indicates the overall standards required to consider you for entry. The standard entry requirement and minimum entry requirement are explained on page 9. Full, detailed entry requirements, including the subjects you need, vary by programme. Please check the full details before you apply: www.ed.ac.uk/ug/14

Further information and programme-specific entry requirements at
www.ed.ac.uk/ug/14

Childhood practice
Our programme prepares you for a management role within the early childhood learning and care sector. It examines issues of childhood, including education studies, health education, child development, family studies and social policy. Leadership, management and professionalism also feature prominently. You will develop skills in communication and management and learn about organisational development and inter-agency working. Accredited by the Scottish Social Services Council (SSSC), graduates of the programme are eligible to register with the SSSC as a lead practitioner/manager.

Placements
Several of our programmes offer work-based placements.

Additional costs
All of our programmes offer field trips or work-based placements. You may incur residential costs on field trips and travel costs on placement. All successful applicants must join Disclosure Scotland’s Protecting Vulnerable Groups (PVG) scheme, which will currently cost you £18-£59. For MA (Hons) Physical Education, you will require approximately £366 of clothing which you are expected to wear for practical sessions and work-based placements.

Career opportunities
You may go on to teach your chosen age group or subject, pursue leadership roles within your specialism, or go on to postgraduate study. Opportunities also exist in community learning and development in public and voluntary sectors, adult education, youth work, and childcare management.

Physical education

Year 1
You will study physical education, educational studies and applied sport and exercise science. You will focus on the primary school curriculum, as the foundation for life-long engagement in physical education and undertake a placement in a primary school.

Year 2
You will combine ongoing study of physical education and educational studies with two other courses to broaden your knowledge and inform teaching and learning. Your placement will be in a secondary school.

Year 3
You will have an extended placement in a secondary school and take courses in educational studies and physical education. These courses will provide you with a detailed understanding of educational practice. The focus of these courses will enable you to engage in educational practice, learn about social justice and consider issues related to national qualifications. Drawing on courses taken in Years 1 and 2, you will also select a disciplinary perspective to inform your professional practice.

Year 4
You will conduct a major independent study on an area of professional interest. To support this work you will have an extended placement course, the opportunity to specialise in a disciplinary perspective, and a course focusing on the future of physical education.

Year by year continued overleaf.

English Language

Why choose English Language at the University of Edinburgh?

We are ranked in the world’s top 15 universities for English language and literature in the QS World University Rankings by Subject 2018. We conduct world-leading research in English language and linguistics.

English language offers an unusually large number of course options. As well as gaining a comprehensive grounding in linguistic concepts and ideas, you will look at the development of English from pre-history and the language of early Britain, to modern English and its status as the global language of the 21st century.

You will approach the study of English language through the lens of modern linguistics.

Introducing English Language

As well as being interested in the study of change in English, we have a strong tradition of investigating different varieties of the language, including Scots, distinct dialects of English, and international variations.

The English language has a well-recorded history of more than 1,000 years and its changes can be traced through written materials ranging from medieval manuscripts to text messages, and more recently, through recordings of spoken English.

Using techniques from modern linguistics, you will analyse the structure of written and spoken English and will explore how the language has changed in the course of its history.

You can also study modern-day varieties of English and Scots and identify the similarities and differences between the features of English and other languages.

Study abroad

There are opportunities to study abroad through Erasmus+ or the University’s international exchange programme.

Career opportunities

Popular career paths for English language graduates include journalism, publishing, PR, advertising, and, with additional training, speech and language therapy. You can also train to teach English in the UK or abroad.

“...equipping me with skills that I can use for my future career, but also with the tools and attributes to look at the bigger picture.”

Bryan Tan
MA (Hons) English Language & Literature graduate

Year by year...

Year 1
You will take two semester-long introductory courses, which introduce you to the principles of theoretical linguistics.

Year 2
You will study how we learn language, regional and social variations generally and of English in particular, and communication methods. If you are studying a joint honours you will also take courses from your other subject.

Year 3
You can start to specialise and choose the topics that interest you most. Advanced courses available at this level typically include Reading Old English, Dialects of Britain and Ireland, Global Englishes, English Word Formation, History of Scots, and many more, including linguistics courses.

Year 4
You will continue to choose advanced courses according to your interests. You will also take a specialised research training course before starting your honours dissertation, regarded by many as the most formative experience of their undergraduate studies.
English Literature & Scottish Literature

Why choose English Literature & Scottish Literature at the University of Edinburgh?

We are ranked in the world’s top 15 universities for English language and literature in the QS World University Rankings by Subject 2018.

Based in the first UNESCO World City of Literature, we are the oldest department of English Literature in the UK and one of the longest established in the world.

With multiple student societies for literature and drama enthusiasts, our large community has lots to offer, including reading and writers’ groups, poetry slams, creative writing magazines, guest seminars and a thriving Peer-Assisted Learning Scheme (LitPALS). Our students organise their own annual literature conference, and we also have a fantastic Writer-in-Residence.

Introducing English Literature & Scottish Literature

Studying literature at the University of Edinburgh allows you to develop a deeper understanding of how literary texts work, and of the varying and vital roles they play in our lives and societies, past and present.

Our courses cover writing from a vast range of English-speaking cultures and all major periods in history, medieval to postmodern. Tracing the evolution of literary thinking, you’ll engage with a broad range of subjects in Years 1 and 2, then specialise thereafter in the periods and genres that interest you most.

You’ll be based at the heart of the University in a world-leading festival city with an unrivalled range of libraries, collections and literary venues, from the National Library of Scotland to the Scottish Poetry Library, Writers’ Museum, and Scottish Storytelling Centre. We also have strong links with the Edinburgh International Book Festival, which annually welcomes around 1,000 authors to our literary city.

Joint honours

You can take a single honours programme in either English Literature or Scottish Literature, combine both in a joint programme, or take either with one of a wide range of other subjects, including a number of modern languages. In addition, English literature can be studied with English language. However, please note that while we offer a flexible programme, because of the exceptionally high demand for a very limited number of places, there is no guarantee that students who are admitted to a joint honours programme can later transfer to our single honours English Literature or Scottish Literature MA (Hons) programmes.

Study abroad

There are opportunities to spend Year 3 studying abroad, either at a range of universities in Europe through the Erasmus+ scheme (including Copenhagen, Amsterdam, Berlin, Vienna and Barcelona), or in a number of universities worldwide through the University’s international exchange programme (these include Pennsylvania, California, Toronto, Hong Kong and Melbourne).

Career opportunities

The skills you’ll develop on our programmes, including the ability to think critically and work independently and to deadline, are essential in many careers. We have great links with the Careers Service and, throughout your time with us, we’ll encourage you to identify and hone your skills, including through initiatives such as Life After Lit, which allow you to draw inspiration from our graduates.

Many of our graduates have gone on to work in publishing, advertising, arts and events management, the creative industries, teaching, and the media. Some have used their transferable skills to pursue careers in finance and business, while others have moved into creative writing, which we teach as an option, supported by our Writer-in-Residence.

The skills you’ll develop on our programmes can open the door to a wide range of careers. We have great links with the Careers Service and, throughout your time with us, we’ll encourage you to identify and hone your skills, including through initiatives such as Life After Lit, which allow you to draw inspiration from our graduates.

English Literature & History QV41
Scottish Literature QV31
Scottish Literature & Classics QV48
Scottish Literature & History QV47
Scottish Literature & Scottish History QV22

You will take

English Literature 1

Year 1

You will study English Literature 1, investigating the historical development of English literature from the medieval period to the 17th century, or Scottish Literature 1, examining the relationship between Scottish national identity and literature from the medieval period to the present day. You will also study modern literary and critical theory, and choose courses from other subject areas.

You will take

English Literature 2 or Scottish Literature 2. Both courses examine the changes in literature between 1750 and 1950 and the cultural and historical contexts in which the literature of this period was produced. You’ll also take courses from other subject areas to broaden the scope of your study.

Year 3

You can start to specialise and choose courses according to your area of interest and will take compulsory courses in critical practice.

Year 4

You can choose further specialist courses and will write an independent dissertation.
French & Francophone Studies

Why choose French & Francophone Studies at the University of Edinburgh?

We are ranked 4th in the UK and 19th in the world for modern languages in the QS World University Rankings by Subject 2018.

We are unique in Scotland in offering single and joint honours modern languages programmes which take four years to complete, including a year abroad. If you’re studying two languages, you’ll divide your time abroad between countries relevant to each language, further broadening your skills and experience.

Our festival city is bursting with cinemas, theatres, libraries and galleries, with plenty of French-focused activities, societies and clubs run by cultural institutions and the Students’ Association. Edinburgh’s French film scene is particularly strong, with an annual French Film Festival and plenty to see throughout the year.

Introducing French & Francophone Studies

French is one of the most widely spoken languages in the world. At Edinburgh, you’ll learn about French and Francophone literature, cinema, art, and political and philosophical ideas, all of which have played a key role in shaping our modern civilisation, as well as mastering the language itself.

Join us and you’ll be part of the largest subject area in a School passionate about languages, literatures and cultures. You’ll benefit from great resources and friendly staff who are experts in their fields. We are home to the Centre de Recherches Francophones Belge and have excellent links with the Institut Francais d’Ecosse.

Career opportunities

Studying a language to degree level, especially when you spend a year abroad as part of your studies, gives you a set of skills and life experiences highly prized by employers. The employment statistics for French graduates from the University of Edinburgh are impressive, and you will have a remarkable range of career options available to you.

Additional costs

You will spend Year 3 of your programme abroad. The normal residence requirement for a European language is 30 weeks in the relevant country or countries. Some students of French may apply for posts as English-language assistants in schools, for which a salary is paid. Costs vary according to destinations: capital cities are more expensive than provincial towns. For EU countries, Switzerland, a number of Erasmus+ Socrates placements are available, which include a small grant from European Union funds.

Students studying more than one language must complete a minimum period of eight weeks in each country. Some limited government funding may be available from the University to assist with the cost of study abroad during the summer vacation.

You will spend Year 3 abroad, either studying (normally through an Erasmus+ exchange in France, Belgium, or Switzerland), or in any French-speaking country as a teaching assistant or on a work placement.

The University has exchange places in 30 different institutions in France, Belgium, and Switzerland, ranging from prestigious universities including the Sorbonne in Paris, to specialised Grandes Ecoles.

You can take French as a single honours programme or jointly with one of a wide range of other subjects. You’ll engage with a broad range of subjects in Years 1 and 2, and specialise thereafter, with a vast range of option courses to choose from at honours level.

You’ll be based at the heart of the University, in the city’s historic centre, close to the Main University Library and the National Library of Scotland, both of which have excellent French collections.
Why choose German at the University of Edinburgh?

We are ranked 4th in the UK and 19th in the world for modern languages in the QS World University Rankings by Subject 2018. We are unique in Scotland in offering single and joint honours modern languages programmes which take four years to complete, including a year abroad. If you're studying two languages, you'll divide your time abroad between countries relevant to each language, further broadening your skills and experience.

We are consistently rated highly by our students and there's lots going on, from a regular seminar series featuring visiting speakers to our annual German Play and student-run German Society, which organises language cafes, movie nights, pub quizzes and more.

Introducing German

For centuries, German-speaking cultures have had a profound international influence. Study German with us and you'll learn the language while studying literature, film and theatre, all within the context of historical and political developments. Our expertise stretches from medieval to contemporary times.

German is one of the larger subject areas in a School passionate about languages, literatures and cultures, so you'll benefit from a wide range of courses, great resources and friendly staff, several of whom are native German speakers. You'll be based at the heart of the University in a world-leading festival city with fantastic cinemas, theatres, galleries, libraries and collections, including outstanding German-language holdings in the National Library of Scotland.

We welcome both beginners and students with previous knowledge of the language. You'll engage with a broad range of subjects in your first two years, and specialise thereafter, progressing in all aspects of the German language, from talking about culture, current affairs and literature in German, to essay writing, creative writing and translation.

We contribute actively to the local cultural scene, and you will be able to attend film screenings, performances and talks organised by members of staff for the wider public. We also have very close links with local schools, the German Consulate, and the Scottish branch of the Goethe-Institut.

Study abroad

Year 3 will be your year abroad. You will spend time studying, teaching or working in a German-speaking country. The University currently has Erasmus+ exchange programmes with universities in Berlin, Augsburg, Heidelberg, Tubingen, Freiburg, Leipzig, Mainz and Vienna.

If you are studying more than one language you will divide your time abroad between two countries.

Additional costs

You will Spend Year 3 of your programme abroad. The normal residence requirement for European languages is 30 weeks in the relevant country or countries. Some students of German may apply for posts as English-language assistants in schools, for which a salary is paid.

Costs vary according to destinations: capital cities are more expensive than provincial towns. For EU countries, a number of Erasmus+ places are available, which include a small grant from European Union funds.

Year by year...

**Year 1**

If you haven't studied German before you will take German 1A, an intensive language course. If your entry qualification for German is A level, you will take German 1B, which covers language as well as literature and culture from 1770 to the present day. You'll also take courses from other subject areas to broaden the scope of your study.

**Year 2**

In the German 2 language course, you will develop your oral language skills further, and practise creative writing, translation and grammar. You will also continue to study literature and culture. We are developing a suite of options, likely to include: Disability in German Romanticism; Identity, Politics and Society on the German Screen; Culture, Modernity and the City in the Weimar Republic; Reading Literary Antisemitism the Contemporary Short Story in German; and Migration and Integration in German-Langauge Discourses. You will take two of these options. You'll also take courses from other subject areas to broaden the scope of your study.

**Year 3**

You will spend Year 3 (or part of it, if you are also taking another language) working or studying in a German-speaking country.

**Year 4**

You will take German language classes in essay and précis writing, spoken German and German-to-English translation of literary and journalistic texts. You will also choose from a wide range of specialist courses on German literature, film, theatre and society, and complete your dissertation.
Health, Science & Society

**Why choose Health, Science & Society at the University of Edinburgh?**

This innovative programme looks at the complexity of human experience in the area of health, illness and the social arrangements for care, and brings together disciplines including sociology, psychology, geography, counselling, ethics and nursing studies.

You will have the opportunity to undertake innovative option courses in community engagement, opening up a pathway to new abilities, work experience and community-based learning.

Looking at healthcare on a broad international scale is possible in Year 3, when you will have the opportunity to study abroad through the University’s international exchange programme.

**Introducing Health, Science & Society**

We live in a global age of increasing life expectancy but chronic health conditions are rising and infectious disease is showing no signs of disappearing. This programme will help you to understand the social dimensions of health and illness, preparing you to contribute to improving the lives of people on this planet.

Drawing on a range of disciplinary perspectives, you will address three broad themes: societies and communities; individuals, personhood and experience; and healthcare, social care and professional development. You will explore this important field of human experience across diverse social contexts, applied to real-world settings.

You will examine how social, political and economic organisations contribute to health and illness and to the distribution of these across societies, communities and social groups. You will also look at culture and language and how these influence the ways in which people experience health and illness.

Integral to your learning will be the concept of care and its delivery and the development of critical understandings of the contributions that individuals, communities and policy-makers all make to health outcomes.

**Study abroad**

In Year 3 you may have the option to study abroad through our international exchange programme.

**Additional costs**

You may incur local public transport costs on the optional community engagement course.

**Career opportunities**

Graduates may pursue careers in community services, the voluntary sector, health services management, policy and research, health journalism, health education, patient advocacy, health promotion, liaison roles in health and social care, and project management/orientation. The programme provides a foundation for further professional career development or further study.

Study abroad? Yes

---

**Year by year...**

**Year 1**

You will explore the social causes of health and illness and their impact on different communities and social groups, drawing upon examples from around the world. This leads on to the study of individual and cultural understandings of health and illness and associated beliefs and behaviours, alongside the related concepts of deviance and stigma. You will also select four courses from a wide range of options.

**Year 2**

You will study current key health issues of local and global importance, using research materials so that you gain an understanding of how knowledge is produced and used in real-life situations. You’ll also be introduced to the complexity of language use in interaction, and the role of language in communicating about health in society and in healthcare settings, focusing on the production of meanings, identities and social relationships. Again, a wide range of option courses is available, from which you’ll choose four.

**Year 3**

You will learn research skills; explore compassion, empathy and ethics as critical to care; examine care alongside consideration of the concept of the person, spirituality, individuality and dignity; and study mental health problems and the therapeutic alliance. You’ll also choose three option courses from a wide range.

**Year 4**

In your final year you will examine critical challenges in interdisciplinary teamwork, effective health and social care partnerships, leadership and change management, and public health initiatives and community collaborations for enhancing health. You’ll also undertake an individual research project supported by a member of teaching staff. Again, the year will be completed with two option courses.

---

“**My programme is preparing me for my future career by addressing various issues from many different perspectives, which is necessary in our globalised world, as well as presenting me with opportunities to volunteer and go abroad.”**

Why choose History at the University of Edinburgh?

We are ranked 17th in the world for history in the QS World University Rankings by Subject 2018.

We cover every period of history from the early Middle Ages to the present day, and the major geographical regions of the world – Europe, Britain and Ireland, North America, Latin America, Asia and Africa.

Beyond the University and its own libraries, there are further resources available to you in Edinburgh for historical research, including the National Library of Scotland, National Museum of Scotland and National Records of Scotland.

Introducing History

History enables us to understand how the world has developed and become what it is today. Studying events and issues from the past also affects the way we see the present and future.

At Edinburgh our courses cover a wide range of different periods, from early medieval history to the contemporary world. You will have the opportunity to choose from a broad range of historical themes, including political history, cultural history, economic history, global history, social history, gender history, intellectual history and environmental history. Whichever path you choose, you’ll deepen your understanding of subject areas that you have studied previously and will have the opportunity to explore something completely new.

Joint honours

History can be studied as part of a joint honours programme with Arabic, archaeology, Chinese, classics, economics, English or Scottish literature, French, German, Italian, law, politics, Russian studies, Scandinavian studies or Spanish. Scottish history can be studied as part of a joint honours programme with Celtic, Scottish ethnology or Scottish literature.

Study abroad

There are opportunities to study abroad in Year 3, either by applying for the School’s Erasmus+ exchange agreements, or for one of the University’s many international exchanges beyond Europe. These cover practically every continent on the globe, from North and South America to Australasia and Asia. These are unique opportunities to immerse yourself in different university systems and cultures.

Additional costs

Your choice of dissertation topic may require fieldwork. Some additional costs may be associated with this fieldwork such as transport, accommodation and photocopying. The overall cost to you will depend on the topic you choose and where your fieldwork takes place. If you study abroad in Year 3, your costs will vary by country.

Career opportunities

You will gain key transferable skills that employers are looking for. In particular you will learn to develop intellectually rigorous arguments, based on sound independent research and analysis. You will also learn to compile and critically evaluate large amounts of complex and conflicting evidence, and to formulate and present your views coherently and cogently, both orally and in writing.

The research and analytical skills you will develop can be used in any research-based career. They can also be applied to careers including journalism, museum and heritage work, public relations, the diplomatic service or teaching.

Previous graduates have gone on to pursue a wide variety of careers, in the media, politics, civil service, heritage, law, business and finance, to name just a few.

Programme structure

Programme content

Year 1

History courses you take in Year 1 are broad survey courses that will emphasise processes and patterns within wide chronological and geographical frameworks, from the early Middle Ages to the present day, and are designed to prepare you for more specialised study in Years 3 and 4. With the exception of Economic History students, you will also take a skills course that engages with broader questions about the nature of history as an academic discipline and the methods and skills required for historical research. The chronology, geography and themes you cover will depend on the programme you study. You will also choose from a wide range of option courses.

Year 2

You will continue to study a range of histories, deepening your knowledge of particular geographical regions, chronological periods and themes. Courses currently cover various periods and themes in American, European, British, Scottish and global history, although what you will study will vary depending on your chosen programme. With the exception of Economic History students, you will also study a further skills course and choose from a wide range of option courses.

Year 3

You will study additional skills courses that reflect on history as a discipline and introduce you to the practice of historical research. You will also choose from a range of specialist courses, allowing you to focus on a specific aspect of history or to continue with a broad curriculum. The courses offered are diverse and vary each year but previously courses have covered subjects as diverse as the French Revolution, the Third Reich, gender in the Middle Ages, the American Civil War, and Chinese economic history.

Year 4

You will study further specialist courses. One or more of these, depending on your programme, will be a longer special subject studied across the year. Courses available can change each year but previously have included the Italian Renaissance, the Vietnam War, the Scottish Enlightenment, and Gandhi. You will also engage in independent research to produce a dissertation on a topic substantially of your own devising.

Why choose History of Art at the University of Edinburgh?
You will work alongside leading academics, many of whom are involved in curating at major international art exhibitions.

Our range of teaching specialisms is one of the broadest in the UK and covers everything from Celtic and early Islamic art, to contemporary art and the global art market. We also have specialisms in medieval and Renaissance, early modern, and both 19th and 20th century art and architecture. We teach Chinese, Japanese and Indian art and have broad and up-to-date coverage of contemporary art theories and politics.

In Year 3, you will have the opportunity to apply for work experience in one of the city’s collections, and gain behind-the-scenes access to Edinburgh’s renowned art galleries and museums.

Introducing History of Art
History of art will introduce you to art from different periods and world cultures. You will learn how, and for whom, works of art were made, as well as situating artworks within visual and material culture more broadly.

You will explore the meanings of works of art and visual culture and the ways they continue to be interpreted. In Year 3 you will have the opportunity to study abroad. Then, in your final year, you will have the opportunity to specialise in particular aspects of the field, and develop independent research projects and a dissertation.

Our aim is to produce graduates who have an informed and nuanced understanding of artistic practice and visual and material culture at different historical periods, who additionally possess an extensive and well-rounded knowledge and understanding of art history and its methods of study.

Many of our academic staff curate, or exhibit in, major international art exhibitions. You will also have access to Edinburgh’s renowned art galleries and museums.

Programmes
MA (Hons) History of Art V350
History of Art & Architectural History V360
History of Art & Chinese Studies V131
History of Art & English Literature V033
History of Art & History of Music V333
History of Art & Scottish Literature V035

You may also be interested in
Architectural History & Heritage Page 20
Art Page 22
Fine Art (5-year programme) Page 22

Additional costs
You will bear the costs of printing your work, for example, the final year dissertation, which must be submitted on paper. In addition, there may be small costs associated with travel to visit exhibitions, but these are usually limited to around £10-£20 per visit.

Career opportunities
Studying history of art at the University of Edinburgh prepares you for a range of careers in the art world such as curatorships in galleries and museums, art journalism, publishing, art dealing, tourism, graphics, advertising, heritage management and auctioneering.

Some graduates use their skills and experience for careers in management or teaching, after additional training, while some choose to go on to further study.

Study abroad
There are opportunities to study abroad in Europe and North America, via Erasmus+ and other international exchange schemes. Further information is available online.

Placements
In Year 3, if you do not go abroad, you will have the option of a work placement, which involves a supervised position in one of Edinburgh’s many museums, galleries, special collections or heritage management institutions. Entry to the work placement is competitive, based on your CV and an interview with the host institution.

Joint honours
History of art can also be studied as part of a joint honours programme with French, German, history, Italian, music, Russian studies or Spanish.

Year by year…

Year 1
You will study History of Art 1, covering the period from the fall of the Roman Empire until the end of the Counter Reformation. This will include non-western material. You will also choose two option courses from other subject areas, if you study history of art with another subject, you will study compulsory courses from that subject and may be able to choose one option course from another subject area.

Year 2
You will study History of Art 2, which begins with the 18th century and continues to the present day. As in Year 1, you will be able to choose two option courses from related fields such as architectural history and classical art or, alternatively, from unrelated subjects available across the University. If you are studying history of art with another subject you will take compulsory courses from that subject and may be able to choose one option.

Year 3
You will take a compulsory course on methods and approaches to art history, along with a choice of specialist options, including courses from architectural history. Teaching largely happens in groups of around 15, with the focus on discussion and debate. You will also have the opportunity to complete a work placement in a local cultural organisation, and there are a variety of project based tasks. In Year 3 you will really start to develop your independence as a scholar.

Year 4
In your final year, you will take more options courses, which not only further refine your area of specialisation, but also further develop your skills. As in Year 3, Year 4 courses are taught in small groups and offer opportunities to take your writing and debating skills to a very high level. The main focus of the year is your dissertation, an 8,000-word piece of original research on a topic of your choosing. With guidance from teaching staff, you can use your dissertation to refine interests from Years 1-3, or you can use it as a springboard for something completely new.

“Programme is equipping me with broad knowledge of my fields of study but also instilling the specific critical attitude necessary to follow a path into gallery curation, journalism or academia.”

Why choose Islamic Studies & Middle Eastern Studies at the University of Edinburgh?

We are ranked 4th in the UK for Middle Eastern & African Studies in the Complete University Guide 2019. We are passionate about enabling choice and broadening minds through flexible, four-year study of languages and cultures from around the globe.

The University has a long and well-established reputation for teaching Islam and the history, culture, languages and literatures of the Middle East. Arabic, for example, has been taught here since the 18th century.

You’ll join a small, friendly community with great links to the Alwaleed Centre, fantastic resources (including our own library), and regular programmes of workshops, film screenings and guest seminars.

Introducing Islamic Studies & Middle Eastern Studies

Located at the crossroads between Europe, Africa and Asia, the Middle East has played a pivotal role on the world stage from ancient times. An understanding of the Islamic world remains highly relevant in the 21st century.

Our programmes explore past and present, taking either an area studies (Middle Eastern Studies) or religious studies (Islamic Studies) approach, with the added option to learn elementary Arabic, Persian or Turkish.

Our emphasis is on developing your critical and analytical skills, so you’ll focus on discussing key issues, practice applying concepts – both in discussion and in writing, and learn to analyse and interpret source material. You’ll engage with a range of subjects in Years 1 and 2, and specialise thereafter, choosing from a range of honours option courses spanning history, politics, religion, literature and culture.

Study abroad

In Year 3 you will normally have the option of an Erasmus+ exchange at one of two English-language universities, Boğaziçi or Bilgi, in Istanbul (although please note that this will depend on advice taken from the Foreign and Commonwealth Office).

Additional costs

Students who study abroad will incur additional costs. An Erasmus+ grant is available for participating students, to assist with the extra costs of studying and living abroad.

Career opportunities

Graduating with an understanding of the Islamic world is an excellent primer for a range of careers in the media, non-government organisations, industry, and the diplomatic and civil services. With increasing migration in response to changing global dynamics, there is high demand for such graduates both at home and abroad. There are also opportunities to continue studying at postgraduate level, with Year 4 in particular developing the research skills you’ll need if you choose this path.

Further information and programme-specific entry requirements at www.ed.ac.uk/ug/52

“Edinburgh is home to many Middle Eastern communities and this diversity really helps create a more immersive study experience.”

Neil Robertson
3rd year MA (Hons) Middle Eastern Studies

Arabic & Persian Page 16

Career opportunities

Year 1
You will take classes and receive instruction in a Middle Eastern language – either Arabic, Persian or Turkish. Depending on your programme, you will also take courses in Islamic history, the religion of Islam, modern Middle Eastern history and/or Islamic and Middle Eastern cultures, as well as courses from other subject areas.

Year 2
On MA (Hons) Islamic Studies you will take introduction to Islam, Islamic and Middle Eastern Cultures and option courses of your choice. On MA (Hons) Middle Eastern Studies you will take Modern Middle Eastern History and option courses of your choice. You may continue with your language studies, taking either Arabic 2, Persian 2 or Turkish 2 as appropriate.

Year 3
You will continue to study a range of courses on subjects relating to Islam or the Middle East, including history, politics, religion or cultural studies. Opportunities to study abroad may also be available.

Year 4
You will continue with your honours courses from a wide range of relevant options from across the University. You will also complete a dissertation on a subject of your choice and under the supervision of an academic advisor.
Italian

Why choose Italian at the University of Edinburgh?

We are ranked 4th in the UK and 19th in the world for modern languages in the QS World University Rankings by Subject 2018. Offering 16 languages and a wide range of joint programmes, we’re passionate about enabling choice and broadening minds through flexible, four-year study of languages and cultures from around the globe.

We are unique in Scotland in offering single and joint honours modern languages programmes which take four years to complete, including a year abroad. If you’re studying two languages, you’ll divide your time abroad between countries relevant to each language, further broadening your skills and experience.

From our own Italian Society to the Italian Cultural Institute, you’ll find many places to indulge your interest in one of the world’s great cultures, while enjoying the endless opportunities to meet new people. The environment was very quickly made friends and involved in our cultural life, from a creative writing magazine for European languages and cultures, to an annual Italian play.

At honours level, we have a wide range of courses covering the Middle Ages to the present day, so you’ll be able to choose your Italian options according to your interests in different periods and topics, including politics and the arts.

Our small class sizes and friendly staff make it easy to get to know your tutors, creating a supportive learning environment, and there are lots of opportunities to get involved in our cultural life, from a creative writing magazine for European languages and cultures, to an annual Italian play.

You’ll be based at the heart of the University, in the city’s historic centre. The main University Library and National Library of Scotland are both nearby and host large collections of Italian manuscripts and books.

Study abroad

You will spend Year 3 in Italy. We currently have exchange places in a variety of different institutions including University of Venice (Ca’Foscari), University of Rome (Sapienza and Roma Tre), University of Bologna, University of Milan, University of Florence and University of Siena.

Students studying more than one language must complete a minimum of eight weeks in each country.

Additional costs

You will spend Year 3 of your programme abroad. The normal residence requirement for European languages at Edinburgh is 30 weeks in the relevant country or countries. Some students of Italian may apply for posts as English-language assistants in schools, for which a salary is paid. Costs vary according to destinations: capital cities are more expensive than provincial towns. For EU countries, a number of Erasmus+ places are available, which include a small grant from European Union funds. Some limited government funding may be available from the University to assist with the cost of studying abroad during the summer vacation.

Career opportunities

Studying a language to degree level, especially when you spend a year abroad as part of your studies, gives you a set of skills and life experiences highly prized by employers. As a graduate of Italian, you will have a remarkable range of career options available to you. With its long and rich history, including the most UNESCO World Heritage Sites of any nation, Italy continues to thrive as a cultural and scientific powerhouse of the Mediterranean. It is a founding member of the European Union, a member of numerous international institutions including the UN, NATO, and the Council of Europe, and is an advanced economy with the eighth largest nominal GDP in the world.

Our graduates have gone into careers as varied as publishing, banking, journalism, teaching, and IT. Some are working for international aid organisations or within the European Commission, the diplomatic service and the United Nations.

There are also opportunities to continue studying, with Year 4 in particular developing the research skills you’ll need if you choose this path. There are many graduate-level programmes available, particularly in the UK, US and of course Italy itself.

Advising applicants

Standard entry requirement:

SQA Highers: ABBB by end of S6, with a minimum of BBB achieved in one year of S4-S6.
A levels AAB. IB of points (grades 766 at HL) to 34 points (grades 655 at HL).
Minimum entry requirement:

SQA Highers: ABBB by end of S6, with a minimum of BBB achieved in one year of S4-S6.
A levels ABB.
IB 34 points (grades 655 at HL).

Please note This indicates the overall standards required to consider you for entry. The standard entry requirement range and minimum entry requirement are explained on page 9. Full, detailed entry requirements, including the subjects you need, vary by programme. Please check the full details before you apply: www.ed.ac.uk/ug/47

Further information and programme-specific entry requirements at www.ed.ac.uk/ug/47

Year by year...

Year 1
You will study the foundations of the Italian language, both written and spoken. You will also take courses from other subject areas to broaden the scope of your study.

Year 2
You will develop your mastery of the Italian language, in preparation for the year abroad. The Italian literature, history and culture that you will study spans from the Middle Ages to contemporary Italy. You’ll also take courses from other subject areas to broaden the scope of your study.

Year 3
You will spend your third year abroad, either studying at a university or working in an approved placement.

Year 4
Your final year will combine advanced language courses with a choice of option courses that will give you access to the full range of Italian culture, from Dante to modern cinema and avant-garde literature. You will also complete your dissertation.
**Why choose Japanese at the University of Edinburgh?**

We are ranked 4th in the UK and 19th in the world for modern languages in the QS World University Rankings by Subject 2018. Offering 16 languages and a wide range of joint programmes, we’re passionate about enabling choice and broadening minds through flexible, four-year study of languages and cultures from around the globe.

Edinburgh is the only university in Scotland to offer undergraduate honours programmes in Japanese and one of the few in the UK with integrated course offerings on China and Korea.

Japanese at the University achieved 100 per cent student satisfaction in the National Student Survey (NSS) 2018.

**Introducing Japanese**

Over the past 150 years, Japan has experienced change at breakneck pace, but has nevertheless retained its fascinating cultural heritage. Study with us and you’ll develop the linguistic and analytical skills to engage critically, and in a truly interdisciplinary way, with this dynamic society – as well as understanding its place in East Asia, now one of the world’s most important and influential regions.

We offer a comprehensive and rigorous Japanese language programme, coupled with diverse Japanese studies options taught by international experts. You will receive extensive methods training that will help bridge the gap between school and university learning, and spend a year at one of our many partner institutions in Japan.

We pride ourselves on learning that is innovative, inclusive, and led by cutting edge research. There’s lots going on in our tightly-knit community of scholars in all aspects of Asian studies, from film screenings and an Anime Society, to a regular seminar series featuring visiting speakers from around the world.

You’ll be introduced to kana writing (the Japanese phonetic writing), kanji and translation, and choose from courses on Japanese and East Asian society, history, philosophy, and culture (including literature, art and film), from the earliest times to the present day.

Please note that our Japanese programmes involve beginners’ language study and are not suitable for native or near-native speakers.

**Joint honours**

Japanese can be studied as a joint honours programme with linguistics or as part of our International Business with Japanese programme. Applicants for International Business with Japanese should note it does not normally involve formal study of Japanese in Years 3 or 4, although most students do spend their third year in Japan studying business courses delivered in English.

**Study abroad**

You will study abroad in Year 3. You have exchange agreements with many of Japan’s top-ranking universities.

**Additional costs**

You will spend Year 3 in Japan as a compulsory part of your programme. Costs will vary depending on the location. Some scholarship money may be available, from external sources, on a competitive basis.

**Career opportunities**

With more than 128 million native speakers, Japanese is one of the world’s most commonly-used languages. A cultural treasure-trove, the country is also a major global power. The skills you’ll develop on our programmes, from speaking to translating the language, analysing key sources and understanding cultural nuances living abroad, will give you the edge in a range of careers, both in Japan and closer to home, where links with East Asia are growing.

Our graduates are now working as translators, interpreters and teachers, in areas such as finance, investment and law, and in sectors as diverse as publishing and management consultancy. There are also opportunities to continue studying at postgraduate level, with Year 4 in particular developing the research skills you’ll need if you choose this path.

“... a large body of people here who are willing to widen their horizons – it allows for a very intellectually engaging experience.”

Josh Croll

3rd year MA (Hons) Japanese

---

**Year by year...**

**Year 1**

You will study Japanese language at beginner, post-beginner or advanced level, depending on your existing skills, as well as courses from other subject areas.

**Year 2**

You will continue your Japanese language study and deepen your understanding of Japanese society and culture through Researching Japan: Skills, Methods and Critiques. We also offer the following option courses: Politics and Economy of Japan, Pre-Modern East Asian History, and Thinking Through Japan, and courses from other subject areas.

**Year 3**

You will spend your third year in Japan, where you will develop your language skills and start work on your dissertation.

**Year 4**

You will continue to study Japanese language and choose from a range of option courses in Japanese History, politics, religion, culture, film and literature. You will also complete your dissertation.
Landscape Architecture

Why choose Landscape Architecture at the University of Edinburgh?

Our landscape architecture programme has full accreditation from the Landscape Institute (LI), the chartered body for the landscape profession in the UK. You will develop professional experience through an integrated practice working period which combines online learning with career experience, helping to prepare you for your landscape architecture career. You will explore landscape and environmental topics with contemporary relevance to both urban and rural contexts. You will learn skills that prepare you to face some of the most meaningful challenges currently happening in our cities and wider territories. These include resilience to climate change, regeneration of polluted and contaminated areas, or adaptation to the increase of human populations.

Introducing Landscape Architecture

Landscape architecture is a creative discipline that focuses on intervention in the landscape through imaginative design, strategic thinking and scientific precision. It analyses, represents, reclaims, reinvents and constructs landscapes as places with meaning. It is positioned at the interface between art and design, and the physical, natural and social sciences.

Our programme is committed to educating designers who are creative, inventive, intelligent, rigorous and ethical in their practice as both students and professionals. Our staff are also designers, makers and theorists who engage with both local and global landscapes in their ongoing research and practice.

Our programme is structured in three interconnected strands: design, theory and techniques. We have a unique relationship with the Royal Botanic Garden Edinburgh, where you will learn about plants and horticulture from world-leading researchers and scientists. You will also have the opportunity to take up practical placement opportunities worldwide. We currently offer exchange opportunities with renowned landscape architecture institutions in mainland Europe and Australia.

Accreditation

Our MA Landscape Architecture is a four-year honours programme that is accredited by the Landscape Institute. We also offer an alternative three-year BA programme which will enable accelerated progress or development, and may be selected by students towards the end of Year 2. Please check online for further information.

Career opportunities

Our graduates are highly in demand. A landscape architecture qualification from the University of Edinburgh can lead to employment worldwide. Almost all of our landscape architecture graduates quickly gain employment, predominately in private practice but also in local government and with public bodies such as Scottish Natural Heritage or the Countryside Agency.

Law

Why choose Law at the University of Edinburgh?

We are ranked 25th in the world for law in the QS World University Rankings by Subject 2018. Edinburgh Law School has been educating and training some of the world’s finest legal minds for more than 300 years. Studying in Scotland’s capital, you will be at the heart of Edinburgh’s legal centre, with the highest courts in Scotland a five-minute walk away. You will also benefit from access to some of the best academic law materials in Europe in our recently refurbished law library.

You will join a supportive law community and be assigned to a LawPALS group – our peer assisted learning scheme, which is designed to help you adapt to the study of law.

Introducing Law

Our Law School has a strong international reputation for research and our teaching staff offer expertise across a wide range of legal fields. There is a vibrant law student community which organises many social, careers and other law-related events.

Social Policy Page 88

Accurate problem solving and understanding the structures of our society, which result from the study of law, are highly valued skills. As a law student, you will learn about the formal structures of our society and the role of law in shaping society.

Accreditation

Our LLB programmes are accredited by the Law Society of Scotland. You will be required to study certain courses to graduate with a full qualifying degree.

Scots law

At Edinburgh you will study Scots law. Students interested in practising law in England or Wales may not benefit from studying law in Scotland as there are significant differences between Scots and English law.

International students

Please check the Law Society of Scotland’s visa advice online if you intend to progress to a Diploma in Professional Legal Practice to qualify as a solicitor in Scotland. The current salary threshold for a Scottish law firm to sponsor a tier 2 visa exceeds a first trainee’s recommended salary.

Study abroad

We have a wide range of international links which give you opportunities for study abroad in Year 3. We run exchange schemes with partner universities in Europe, the Far East and North and South America. Some of our programmes require a degree of language ability as you will be taught in the language of the host country. This includes France, Germany, Spain and Chile. However, we also operate several exchanges in Europe (including Austria, Finland, Norway, Sweden, Denmark, Belgium and the Netherlands), North America (the USA and Canada), Australasia and the Far East (Singapore and Hong Kong), where your study abroad will be taught in English.

Joint honours

Law is offered with a range of other subjects. If you intend to proceed to qualification as a lawyer in Scotland, please contact the School to check if your chosen joint honours programme allows you to cover all required fields for progression to practise.

Additional costs

On some courses, you will be encouraged to purchase additional learning materials for assessments.

Career opportunities

After graduating, you can progress to the legal profession in Scotland by completing the Diploma in Professional Legal Practice, followed by a traineeship with a legal firm, to qualify as a solicitor. You can then opt to go to the bar, to qualify as an advocate. There are also opportunities for Scottish-qualified lawyers to practise in other jurisdictions, including other member states of the European Union.

Graduates who do not choose a legal career often use their skills and experience for employment in finance, management or journalism or with international organisations such as the European Union and the United Nations.

Further information and programme specific entry requirements at www.ed.ac.uk/ug/23

Law

Law (Ordinary & Honours)

Year 1

You will be introduced to general legal principles and legal techniques and will study compulsory courses including Scottish Legal System, Critical Legal Thinking, Contract Law, Family Law, Public Law of the UK, Scotland and European Union Law.

Year 2

Your courses will include Property Law, Jurisprudence, Public Law and Individual Rights, Delict, and Criminal Law. Business Entities, Commercial Law, Evidence and Succession and Trust Law are required for professional purposes.

Year 3

You will have the opportunity to specialise in further law subjects, chosen from a wide range of courses, including Commercial Law, International Law, Property Law, Family Law and Criminology. You will receive legal skills training during your honours study. If you are studying law with a language you will spend your third year abroad. For other students, study abroad is an option. Year 3 is the final stage of the LLB (Ordinary) programme.

Law (Graduate Entry)

Year 1

You will be introduced to general legal principles and legal techniques and will study compulsory courses including Scottish Legal System, Critical Legal Thinking, Contract Law, and European Union Law.

Year 2

You will build on the skills and knowledge obtained in Year 1 with a selection of compulsory courses including Property Law, Jurisprudence and Evidence and Criminal Law. You will also take a selection of law option courses.

Year 3

You will be introduced to general legal principles and legal techniques and will study compulsory courses including Scots Law, the Scottish Legal System, Critical Legal Thinking, Contract Law, and European Union Law.

“...The programme is very challenging and prospective employers in my field are aware of that. If I can make it here, I’ll make it anywhere!”

Advice for applicants

Standard entry requirement: SQA Highers AAAA to ABBB. A Levels A*AA to ABB. IB 33 points (grades 776 at HL) to 34 points (grades 655 at HL).

Minimum entry requirement: SQA Highers ABBB by end of S6. IB must be achieved in one set of exams by end of S5.

For ML14: A Levels ABB. IB 34 points (grades 655 at HL).

For ML115: Minimum entry requirements are a 2:1 honours degree or equivalent.

Please note: This indicates the overall standards required to consider you for entry. The standard entry requirement range and minimum entry requirement are explained on page 9. Full, detailed entry requirements, including the subjects you need, vary by programme. Please check the full details before you apply: www.ed.ac.uk/ug/23
Linguistics

Why choose Linguistics at the University of Edinburgh?

We are ranked in the world’s top 5 universities for linguistics in the QS World University Rankings by Subject 2018. We conduct world-leading research in linguistics and English language.

We support a range of theoretical approaches and you will be exposed to different, sometimes competing, theories of language structure. Our researchers work on a wide range of languages and we have ongoing linguistic fieldwork projects on Brazilian Portuguese, Celtic, Faroese and Shilluk (a Sudanese language).

You will have access to our state-of-the-art cognitive neuroscience research laboratory, which includes world-class eye tracking facilities to help discover the mechanisms of language processing in the brain, our perception laboratory, for perceptual and psycholinguistic experiments, and a suite of recording studios. You will also be able to use and study in the psychology library.

Introducing Linguistics

Linguistics examines how language works, describing how sounds, words, sentences and conversations combine to express and create meaning. It studies the uses of language in everyday life, the ways in which it varies across society and evolves over time, and how it is mastered by children.

Linguistics can also be studied as part of a joint honours programme with a range of other subjects.

Career opportunities

Linguistics graduates work in a wide range of fields such as journalism, international relations, translation, marketing and social research. Recent graduates have taken up funded places on MSc programmes or have found employment in speech technology research. A linguistics qualification is also a good foundation for careers in professions such as speech and language therapy, adult literacy, or for teaching English as a foreign language.

Linguistics has a long history at the University of Edinburgh and our teaching staff have an excellent reputation for research in this area.

Linguistics is a new subject for nearly all undergraduates so you will require no prior knowledge at the beginning of the programme.

Study abroad

There are opportunities to study abroad either through Erasmus+ or through the University’s international exchange programme.
Music

Why choose Music at the University of Edinburgh?
We are ranked in the UK’s top 10 universities for music in the Complete University Guide 2019.

Our staff are world leaders in a wide range of musical areas including musicology, acoustics and music technology, composition, improvisation, music psychology, and community music.

The University hosts more than 25 musical societies and a packed schedule of concerts during the year ranging from classical and jazz to contemporary and electronic.

Introducing Music
Music is a rich and vibrant subject, which spans the arts, humanities and sciences. It includes specific areas such as performance, composition, acoustics, audio technology, music theory, and analysis. It also provides the opportunity to engage with much broader issues in history, anthropology, sociology, cultural studies, philosophy, cognitive sciences, and psychology. This disciplinary breadth is at the heart of our programmes.

Career opportunities
Our BMus programme provides the breadth and depth needed to pursue a variety of careers in music, the creative arts, education, or the media. Our graduates go on to successful careers in a diverse range of areas including performance, composition, teaching, academia, arts management, curation, community music, music therapy, print media, film, radio, television, animation, and the games industry. Studying music also equips you with transferrable skills that can serve as an excellent basis for careers in seemingly unrelated areas, such as finance, business, or law, as well as a full complement of broader graduate-level jobs.

Our BSc programme provides you with the skills and expertise to pursue careers in the acoustics, audio and music technology industries. The advanced skills in software engineering, physics, mathematics and general problem solving that you will also develop are recognised by a range of employers. Graduates with such experience are sought after in sectors, including software engineering, the wider music industry, manufacturing, energy, finance and the space industries. The BSc is also an excellent preparation for advanced postgraduate study in related areas, such as acoustics, audio engineering, audiology, high performance computing, psychology and neuroscience, and more.

Programmes

BMus (Hons) Music W302

Our flexible BMus programme provides you with the opportunity to develop critical and technical skills from a variety of perspectives. You will study a range of musical genres and styles and explore the sociopolitical, historical, and cultural contexts in which music is produced and received. You will have the opportunity to specialise in composition and/or performance, and take courses from outside of music in each year.

Our BSc programme explores the intersections between music technology, physics, engineering, and computer science. You will receive a rigorous grounding in fundamental scientific skills, and study music technology, sound recording, and computer programming in a range of musical contexts. In Years 3 and 4, you can choose a strongly scientific pathway in physical acoustics, a multidisciplinary pathway in computer music systems, or your own combination of the two.

The University’s Reid School of Music is an exciting place to study, with numerous opportunities to make music and perform in university ensembles, which include orchestras, choirs, a big band, wind band, composers’ orchestra, and opera group. Our lively concert calendar and central Edinburgh location let you immerse yourself in the city’s rich cultural scene.

Year by year…

BMus (Hons) Music

Year 1
You will take Popular Music History and Thinking about Music, as well as Creative Musicianship, which develops your creative, practical, and listening skills through an integrated approach to the different facets of musicianship including written and aural analysis, composition, and performance. If you wish to study music theory at a high level before (A Level or Advanced Higher), you will take Fundamentals of Music Theory, an intensive music literacy course. You can take options in Music Psychology and Musical Acoustics. If you may also take Performance, if you are Grade VIII standard or equivalent on your first instrument, at the point of entry. Any of these option courses can be replaced with courses from outside music.

Year 2
You will take two Music and Ideals from the 19th and 20th centuries, which covers chamber music, musical analysis and composition techniques. You will also take Music Analysis and Sound Recording, building your musicianship through a grounding in musical analysis and compositional techniques, or developing skills in microphone techniques, room acoustics, field recording and production. You can take options in Composition and Creative Music Technology, and if you studied Programming 1 in Year 1, you can progress to Performance 2. You can also select up to 60 credits from subjects outside of music.

Year 3
You will take popular music, musicology, and music criticism, as well as Research Methods in Music. You may choose to take 40 credits from subjects outside of music. You can also undertake one or more of a 40 minute recital, a portfolio of compositions, a creative practice music project, a dissertation, or an edition.

BSc (Hons) Acoustics & Music Technology

Year 1
You will study physics, acoustics, mathematics, and music technology. Physics 1A presents the basic principles of physics and will develop your problem-solving and study skills. Mathematics for Physics 1 and 2 will equip you with key algebra and calculus skills for acoustics and music technology. You will study Musical Acoustics, which explores musical instruments and architectural acoustics, and Sound Recording, which covers microphone techniques, room acoustics and field recording, and a music recording project. You may also take options from music, physics, engineering, informatics, or from across the University.

Year 2
You will take courses in Architectural Acoustics and Spatial Audio, and Creative Music Technology, which build on Year 1 themes. Mathematics courses cover advanced algebra, calculus, and dynamics. You will also be introduced to computer programming, data analysis, and experimental techniques for physics and acoustics. You will have the opportunity to take further option courses from music, a range of relevant courses is also available from physics, engineering, and elsewhere, helping you to make the most of the many options available across the University.

Year 3
Courses include audio signal processing and computer music systems, which form the basis for developing music technology software and hardware for audio processing and live performance. You will explore how physics can be used to understand musical sound and design cutting edge software that provides the highest sound quality in instrument and audio effects emulation. You are encouraged to complement these with courses in sound design, Fourier analysis, fluid mechanics, and physics. You may apply for a placement and complete a project in collaboration with a company in the acoustics, audio, or music technology sector.

You will focus on a year-long, major final project in acoustics and music technology. You will choose a strongly scientific pathway in physical acoustics and computational simulation of acoustical systems, a subject area in which Edinburgh is a world leader. You can also select further options from music, physics, or engineering.

Advice for applicants

Standard entry requirement: SQA Highers ABB. A Levels ABB. IB 36 points (grades 665 at HL) to 34 points (grades 655 at HL).

Minimum entry requirement: SQA Highers ABBB by end of 5th, with a minimum of BBB achieved in one year of S4-S6. A Levels ABB. IB 34 points (grades 655 at HL).

Additional requirements: An interview. Successful applicants will also be required to join Disclosure Scotland’s Protecting Vulnerable Groups (PVG) scheme.

Please note This indicates the overall standards required to consider you for entry. The standard entry requirement range and minimum entry requirement are explained on page 6. Detailed entry requirements, including the subjects you need, vary by programme. Please check the full details before you apply: www.ed.ac.uk/ug/13

Programmes

BN (Hons) Nursing Studies 8700

Why choose Nursing Studies at the University of Edinburgh?

We are ranked in the UK’s top 5 universities for nursing in the Q5 World University Rankings by Subject 2018. We offer you the opportunity to customise your learning by choosing from a university-wide range of options in Year 1, then choosing honours options in Years 3 and 4 to develop your specialist interests within nursing. You will be taught in a small cohort of around 50 students enabling you to receive close support. There are also opportunities to study abroad through our links with universities in mainland Europe, China and Australia.

Introducing Nursing Studies

We have been providing nursing education for more than 60 years. Our Bachelor of Nursing (BN) with honours programme prepares you for a rewarding and varied career in healthcare. On graduation you will be eligible for registration with the Nursing and Midwifery Council as an Adult Nurse.

We offer clinically-based knowledge and practical skills, balanced with theoretical and research-based knowledge, ensuring our graduates are highly effective practitioners by the end of our four-year programme. Nursing students require a strong interest in human relationships, well-developed social and communication skills, and a high degree of empathy. Through academic study and clinical practice, our programme will help you to build on these skills and attributes as well as develop the leadership and analytical skills required to provide excellent nursing care.

Please note

Our programme is currently being reviewed and revised in order to meet the new Nursing and Midwifery Council Standards for Education and prepare nurses to work in the changing context of healthcare. The year by year description below is for guidance only; course names and content will be updated. However the four pillars of life sciences, social and psychological perspectives on health and social care, research, and professionalism which underpin the curriculum will remain.

Accreditation

This programme is validated by the Nursing and Midwifery Council (NMC). Achievement of the required clinical and academic outcomes leads to eligibility for registration with the NMC as an Adult Nurse.

Study abroad

There are opportunities to complete a practice placement abroad in Year 3. There is also an opportunity for two students to experience a semester-long exchange with an Australian university in Year 3. All costs of study abroad must be met by the student.

Placements

Clinical practice placements are provided by NHS Lothian and NHS Borders. You should expect to be placed across these two health boards during your programme. You will work with a trained mentor on placement.

Additional costs

Expenses for travel to and from clinical placements can be claimed if you are a Scottish student and eligible for Student Awards Agency for Scotland (SAAS) funding. Other students must meet these costs personally.

In Year 3 there is an opportunity to undertake a single semester exchange with La Trobe University, Australia, for which you will be liable for visa, immunisation, travel and living costs. You will also undertake an elective clinical placement, either abroad or elsewhere in the UK. All visa, immunisation, travel and living costs associated with this placement will be borne by you.

Students from the rest of the UK, the EU and overseas will also be liable for the cost of the following mandatory items: uniforms, occupational health, accommodation and travel associated with the Protection of Vulnerable Groups (PVG) scheme, which will currently cost you £48-£50.

Career opportunities

Careers in our field are excellent for nursing students graduating from the University of Edinburgh. Our graduates have gone into careers in a range of clinical settings in both community and hospital contexts, specialising, for example, in intensive care, oncology, theatres and accident and emergency, as well as in voluntary sector organisations. You may choose to undertake further study for masters or PhD and go on to develop your career in higher education, research, management or policy development.

Further information and programme-specific entry requirements at www.ed.ac.uk/ug/13

Year by year...

Year 1

Years 1 and 2 provide an introduction to nursing care and theory, and to the sociological and psychological aspects of healthcare. You will also choose two option courses from subjects across the University. You will gain clinical experience through community and medical ward placements.

Year 2

As well as progressing your study of life sciences in Nursing Care and Decision Making, Healthy Communities, Professionalism and Evidence and Research, you will also study Mental Health and Wellbeing. Your placements build on the Year 1 experience with a further community placement, mental health placement and surgical or outpatient experience.

Year 3

You will continue to deepen your study of Professionalism and Evidence and Research, as well as studying Management of Transitions, which focuses on care of the older person and Cultural Diversity and Care. Immersion Experience which includes the elective placement. You will also choose two options courses. Clinical experience includes care of the older person and a clinical experience linked to one of your honours options. You will also organise your elective placement either in the UK or abroad.

Year 4

You will choose a further two honours options, study Professionalism 4 and complete your dissertation. Your clinical practice will include an honours-linked placement and a 12-week placement consolidating your clinical competence.

Why choose Philosophy at the University of Edinburgh?

Following the Research Excellence Framework (REF) 2014 we were ranked seventh in the UK for philosophy by overall GPA (Times Higher Education, Overall Ranking).

You will have a choice of more than 40 option courses in Years 3 and 4 in all the main branches of philosophy. Our world-leading academics are especially strong in the philosophy of mind and cognition, ethics, epistemology, the philosophy of language, the philosophy of science and the history of philosophy.

Staff and students work with the University’s Philosophy Society, which regularly hosts lectures, seminars, study support sessions, quizzes, film showings and guest speakers – giving you fun, stimulating and valuable opportunities to engage in debate and discussion.

Introducing Philosophy

As the historical home of David Hume and Adam Smith, the city of Edinburgh has long been, and remains, a fitting place to study philosophy. The University too, has a strong historical connection to the subject, counting Adam Ferguson and Sir William Hamilton among its former students.

Studying philosophy allows you to think about some of the great philosophical questions in a clear, disciplined and systematic manner. It introduces you to the thinking of some of the great philosophers of the past and present, and illuminates the connections between diverse areas of human experience. It also makes you more aware of the assumptions that form the basis of your beliefs.

Joint honours
Philosophy can also be studied as part of a joint honours programme with French, German, Italian, Russian studies, Scandinavian studies, Spanish or theology.

Career opportunities
The philosophy courses you study throughout your programme provide you with the analytical and critical-thinking skills that are highly valued in the workplace. Previous graduates have gone on to work in education, commerce, journalism, finance, law and computing. Some graduates also choose to continue with their studies and pursue a research or academic career.

You will start to specialise. You will normally choose courses from a range linked to the major areas of the subject.

Study abroad
There are opportunities to study abroad through the Erasmus+ programme or the University’s international exchange programme.

Year by year...

Year 1
You will study Creativity: From Plato to the Enlightenment, Morality and Value and Logic. These courses introduce you to key topics in the history of philosophy, morality and ethics, and the nature of argument. You can also choose to take Philosophy of Science, which looks at philosophical problems and assumptions around science.

Year 2
You will take two courses: Mind, Matter and Language and Knowledge and Reality. You can also choose option courses in a wide range of subjects.

Year 3
You will choose further courses from a range linked to the major areas of the subject. You will also complete either an independent dissertation, consisting of a single extended essay on a topic of your choice, or a coursework dissertation via two extended essays on topics linked to your choice of courses.

Further information and programme-specific entry requirements at www.ed.ac.uk/ug/35

Politics with Quantitative Methods RM9D

Why choose Politics & International Relations at the University of Edinburgh?

We are ranked in the UK’s top 10 universities for politics and international studies in the QS World University Rankings by Subject 2018.

Home to the Scottish Parliament, the city of Edinburgh offers you the perfect location in which to study politics – and we offer you a dynamic environment, regularly hosting leading international academics, politicians and diplomats.

Our alumni include government ministers, Members of Parliament, policy analysts, broadcasters, business leaders, and teachers, as well as an increasing number of social entrepreneurs.

Introducing Politics & International Relations

Studying politics, you will explore the origins and present-day contexts of domestic and international conflicts about power and resources. You will also study the morality of political action, the limits of freedom and justice, and the processes of governance at various levels. International relations is a subfield within political science that looks at the origins and evolution of the state system and the changing nature of state power. It examines the driving forces behind international cooperation and conflict, and explores security and prosperity in the international system.

Our politics programmes focus on politics, political theory, public policy and international relations in Europe, Russia, Africa and the US.

Our international relations programmes cover specific topics and regions within world politics, such as human rights and foreign policy, the Middle East and Africa.

Politics, Philosophy & Economics

This new programme examines different interdisciplinary perspectives on many of the pressing issues of the modern world. It will equip you with the key skills to engage with the political, philosophical and economic debates of the day. You will acquire the necessary frameworks for thinking about political and philosophical issues, combined with the quantitative skills for answering political and economic questions.

Politics/International Relations with Quantitative Methods (QM)

If you choose to study politics or international relations with quantitative methods, these programmes can prepare you for a variety of exciting and well-remunerated careers. You will be offered a work placement with a top local employer so you can practise your skills. QM can include anything from designing surveys or experiments to using quantitative evidence from surveys, digital media, archives and open data. The current shortage of social scientists with these data analysis skills means graduates from these programmes will have a CV that stands out.

Joint honours

You can also choose to study politics as part of a joint honours programme with one of the following subjects: Arabic, economics, French, geography, German, history, Italian, law, philosophy, Russian studies, Scandinavian studies, social anthropology, social policy, sociology or Spanish.

Year by year…

Politics

Year 1
You will take an introduction to Politics, Political Theory and Political Thinking, an introductory political theory course. International Relations students also take an international law course taught by the School of Law. Depending on your programme, you will also take up to four option courses of your choice.

Year 2
Compulsory politics and international relations courses look at how and why states interact at international level, including cooperation through international organisations such as the European Union, the World Trade Organisation and the United Nations. You will also take courses that introduce you to key methods in political science. Comparative Politics in a Globalised World and Introduction to Data Analysis. Depending on your programme, you will also take up to three further option courses.

Year 3
You will take a course on research design and choose five honours courses from a wide range of politics and international relations options, and complete an honours dissertation on a topic of your choice.

Politics/International Relations

Why choose Psychology at the University of Edinburgh?

We consistently rank as one of the top 30 universities in the world for psychology (QS World University Rankings by Subject 2018 and Complete University Guide 2019).

We offer you a wide choice of courses in Years 1 and 2 from across the humanities and the sciences. This means you can decide on a humanities- or science-focused pathway as you progress through your first two years of study, rather than before you apply.

You will have access to state-of-the-art facilities including laboratories for cognitive neuroscience, developmental science, human movement, individual differences and general experimental psychology. You will also have the support of a large panel of volunteer research participants and partnerships with local nurseries. Our teaching facilities include a private psychology library, computer suites, and well-equipped teaching rooms.

Introducing Psychology

Psychology is the scientific study of the mind, brain and behaviour. It focuses on building and testing theories to help explain how people interact with each other and the world around them.

Psychologists are interested in the way biological, personal, and social factors influence how we think, feel, and behave. They also study how we perceive, think, and learn about the world around us. They examine how we communicate verbally and non-verbally, and how and why our mental abilities change across our lives.

Psychology is an experimental and observational science, in which evidence from research studies is used to develop and evaluate theories. Our programme has a strong emphasis on developing skills in research methods and statistical analysis, to support our research-led teaching.

Accreditation

The four-year BSc Psychology (C802) programme is accredited by the British Psychology Society, as are most of our psychology joint honours. Please contact us for further information regarding joint programmes.

Study abroad

In Year 3, there are opportunities to study at a university abroad. You can devise your study abroad with our Year Abroad advisers and with advice from your Personal Tutor and Edinburgh Global.

Joint honours

Psychology can also be studied as part of a joint honours programme with business, economics, linguistics, philosophy, or sociology. It can also be studied as part of our cognitive science (humanities) programme (see page 32).

Career opportunities

Our graduates develop high-level research, statistical, IT and report-writing skills, valued by employers in various sectors. Many psychology graduates have gone on to work in healthcare and social services, charitable organisations, human resources, management, business and finance, consulting, and media and advertising.

Some students continue their studies to enter a research or teaching career, or to train as a professional psychologist in a specific field (such as clinical, educational, forensic, health, or organisational psychology).

Advice for applicants

Standard entry requirement:

SQA Highers AAA to ABB.

A Levels AAA to ABB.

IB 40 points (grades 766 at HL) to 34 points (grades 655 at HL).

Russian Studies

Why choose Russian Studies at the University of Edinburgh?

We are ranked 4th in the UK and 19th in the world for modern languages in the QS World University Rankings by Subject 2018.

We are unique in Scotland in offering both single and joint honours language programmes which all take four years to complete, including a year abroad. If you’re studying two languages, you’ll divide your time abroad between countries relevant to each language, further building your skills and experience.

We’re the oldest Russian teaching organisation in Scotland. From our annual Russian play to a range of student societies for Russian speakers and cultural enthusiasts, our close-knit community has lots going on. The Princess Dashkova Russian Centre runs a fantastic series of public events, including lectures and film screenings, and we have good links with the Scotland-Russia Forum.

Introducing Russian Studies

Spoken by millions of people in Europe, Central Asia and beyond, Russian is the language of some of the most iconic literary and cultural works in history. Study with us and you’ll learn the language while exploring its social, cultural and political contexts, including through literature and film.

We welcome both beginners and students with previous knowledge of the language. You’ll engage with a broad range of subjects in Years 1 and 2 then specialise thereafter, choosing options ranging from The Great Russian Novel, to The Post-Soviet Word, and Image and Memory. You’ll take advanced language classes, including spoken Russian and translation.

You’ll be based at the heart of the University in a world-leading festival city bursting with cinemas, theatres, galleries, libraries and collections. These include outstanding Russian-language holdings in the University’s Main Library and the National Library of Scotland.

Study abroad

There are opportunities to work and study abroad between Years 1 and 2. Residence abroad is mandatory in Year 3.

If you are studying more than one language you will divide your time abroad between two countries. Previous placements in Russia have included Moscow, St Petersburg, Kazan, Petrozavodsk and Riga.

The normal residence requirement for European languages at Edinburgh is 30 weeks in the relevant country or countries. If you are studying more than one language you must complete a minimum of eight weeks in a country relevant to each part of your programme.

Additional costs

You will spend Year 3 of your programme abroad. Placements in Russia involve tuition fees charged by Russian universities but reimbursement of these fees for our students is provided by the University. Living costs vary according to your destination. Capital cities are more expensive than provincial towns.

Career opportunities

After a period of political, social and economic transformation, Russia is playing an increasingly important role in global politics and, as the world’s largest country, has its fifth most widely spoken language.

Opportunities for Russian-speaking graduates, both at home and abroad, are many, varied and steadily expanding. They include business, journalism, culture, defence, publishing, translation and law. Our graduates will have the intellectual strength and flexibility that so many employers prize in high-level humanities graduates. Your year abroad will be of particular benefit in developing the key skills you’ll need to thrive after graduation.

Having developed enhanced research skills during your time with us, especially in Year 4, you may also choose to continue studying at postgraduate level.

Study abroad?

Yes

Additional courses on European cinema, 19th- and 20th-century Russian literature. You will have the opportunity to take a summer language course in St Petersburg, Moscow or Riga. You’ll also take courses from other subject areas to broaden the scope of your study.

Year 2

You will continue to study Russian language, and will also take a course on 19th- and 20th-century Russian literature. You will have the opportunity to take additional courses on European cinema, literature, theatre, languages and medieval culture. You’ll also take courses from other subject areas to broaden the scope of your study.

Year 3

If you have no previous knowledge of Russian you will take Russian Studies 1A, an intensive beginners Russian course. If you have studied the language before, you will take Russian Studies 1B which provides an advanced Russian language component. Both of these courses include a unit on Russian culture. After completing Year 1 you have the opportunity to take a summer language course in St Petersburg, Moscow or Riga. You’ll also take courses from other subject areas to broaden the scope of your study.

Year 4

In your final year you will take Russian language classes – Prose and Writing in Style, developing your active Russian language skills, Translation and Text Analysis, developing your reception skills, and Oral. You will also take one or more option courses, specialising in Russian literature, Russian language and society, Russian politics, or Russian architecture. Depending upon your programme, you may also have the opportunity to write a long essay in Russian or to complete a dissertation in Russian, developing your independent research and Russian writing skills.

Thomas Noneley
3rd year MA (Hons) Russian Studies & English Literature
Scandinavian Studies

Why choose Scandinavian Studies at the University of Edinburgh?

We are ranked 4th in the UK and 19th in the world for modern languages in the QS World University Rankings by Subject 2018. Offering 16 languages and a wide range of joint programmes, we’re passionate about enabling choice and broadening minds through flexible, four-year study of languages and cultures from around the globe.

Edinburgh is the only university in Scotland, and one of only two in the UK, to offer undergraduate honours programmes in Scandinavian languages and culture.

We are also unique in Scotland in offering both single and joint honours language programmes which all take four years to complete, including a year abroad.

Introducing Scandinavian Studies

Scandinavian languages and cultures are rapidly expanding in popularity, with television, film and literature in particular, attracting global critical acclaim. Study with us and you’ll learn modern Danish, Swedish or Norwegian in the context of Scandinavian culture, past and present, engaging with a broad range of subjects in Years 1 and 2, then specialising thereafter.

You do not need a previous knowledge of any of the languages, as all classes are taught from beginners’ level. Our staff, most of whom are native speakers, are experienced in the accelerated teaching of language skills to ensure that you make good progress.

You’ll be based at the heart of the University in a world-leading festival city with excellent cultural and research links to the Nordic nations, a thriving Scandinavian scene, and fantastic libraries, language learning facilities, and collections. There’s lots going on in Scandinavian studies, and in the wider area of European languages and cultures, from a creative writing magazine to film screenings and student-led plays.

Year by year...

Year 1

You will choose one of the three intensive beginners’ language courses (Danish 1, Norwegian 1 or Swedish 1). These courses also provide an introduction to the culture and literature of the country in question.

Students in Years 1 and 2 are also encouraged to take one or both of the following free-standing but complementary courses: Scandinavian Civilisation A: Vikings, Sagas and the Road to Enlightenment; Scandinavian Civilisation B: From National Romanticism to the Nordic Model. Between them, these courses provide an overview of important trends in the history, society, culture and politics of the Scandinavian and wider Nordic world from the earliest times to the present day. You’ll also take courses from other subject areas to broaden the scope of your study.

Year 2

You will continue with Danish Language 2, Norwegian Language 2 or Swedish Language 2, which build on and develop your linguistic knowledge from Year 1. You will also take one or both of:

• Scandinavian Literature 2, which focuses on Danish, Norwegian and Swedish literature from 1835 to the present day, and covers a wide variety of literary forms, ranging from the fairytale to crime writing, from drawing-room drama to new urban narratives.

• Scandinavian Languages 2, which investigates the similarities and differences between the Scandinavian languages past and present and discusses the perspectives and problems of inter-Scandinavian communication and the challenges involved in translating from Scandinavian into English. You’ll also take courses from other subject areas to broaden the scope of your study.

Year 3

You will spend Year 3 abroad, studying or working in Denmark, Norway or Sweden. You will complete one of the following courses designed to hone high-level writing skills in Danish, Norwegian or Swedish, in translation from all three of the Scandinavian languages into English, and in spoken Danish, Norwegian or Swedish.

You will also choose from a range of specialist honours option courses, focusing on Scandinavian cultural topics from the medieval to the modern, including Old Norse Studies, Viking Studies, History of the Scandinavian Novels, History of the Scandinavian Languages, Nynorsk, and Icelandic and Faroese. You will also complete your dissertation.

Career opportunities

As there are relatively few graduates from UK universities specialising in the Scandinavian languages, there are excellent opportunities for those who do learn Danish, Norwegian or Swedish. This is particularly true since speakers of one language are widely understood in all Scandinavian countries.

Our graduates are to be found in every kind of career, especially those that place a premium on well-honed communication skills and thinking that is both disciplined and imaginative, or where the skills and experiences you will develop during your Year Abroad are highly valued. There are excellent opportunities in areas such as translation, journalism, tourism, the cultural sector, international relations, industry and marketing, including within the institutions of the European Union (both Swedish and Danish are official working languages of the EU).

There are also opportunities to continue studying at postgraduate level, with Year 4 in particular developing the research skills you’ll need if you choose this path.

Study abroad

You will spend Year 3 abroad, studying or working in Denmark, Norway or Sweden. We have Erasmus+ exchange programmes with the universities of Bergen, Copenhagen, Oslo and Uppsala.

At the University of Edinburgh, all students on programmes in modern European languages are required to spend at least 30 weeks of Year 3 in the country or countries where their chosen language(s) are spoken.

Students studying more than one language must complete a minimum of eight weeks in each country.

Additional costs

You will spend Year 3 of your programme abroad. The costs of studying abroad vary according to the destination: capital cities are more expensive than provincial towns. A number of Erasmus+/Socrates places are available, which include a small grant from European Union funds. Some limited government funding may also be available from the University to assist with the cost of study abroad during the summer vacation.

Scandinavian Studies Bts, Humanities & Social Sciences

Scandinavian Studies, Humanities & Social Sciences
Scottish Ethnology

Why choose Scottish Ethnology at the University of Edinburgh?

We are the only institution in the world to offer undergraduate Scottish Ethnology programmes. You’ll be taught by experts who are immersed in Scottish culture beyond the classroom, meeting active tradition-bearers, visiting museums, and taking part in events involving present day customs in various parts of Scotland.

You’ll have access to an unrivalled range of resources in the School of Scottish Studies Archives. These resources offer tremendous opportunities for studying Scotland’s cultural heritage. The collections include some 33,000 audio recordings, a photographic archive containing thousands of images from the 1930s onwards, films and videos, and a manuscript archive. We also have strong links with Bòrd na Gàidhlig, the National Library of Scotland and the National Museum of Scotland.

Introducing Scottish Ethnology

How do we use and make sense of the past from within our present, and how can this understanding help us to shape our future? The study of ethnology is common to universities across Europe but our undergraduate Scottish Ethnology programmes are unique. They provide a fascinating insight into the traditional and popular culture of Scotland, while giving you a set of skills that you can apply to any culture.

Our programmes draw on Scotland’s diversity (urban and rural, Lowland and Highland, Scots and Gaelic), but also introduce comparative materials from elsewhere. We put folklore and folklife in a Scottish and international context, examining the various ways in which a modern European nation expresses itself through its customs, beliefs, social organisation, language, music and song.

Working with a range of rich materials, from traditional archives to modern media and digital data, you will develop the practical and intellectual tools to help navigate, and indeed influence, contemporary culture and society in an increasingly globalised world.

Additional costs

Your dissertation may involve some fieldwork, depending on your topic of study, and this may incur travel costs. However, if you prefer, you can select an archive-based project that is unlikely to have any additional costs.

Study abroad

There are opportunities to study abroad through Erasmus+ or the University’s international exchange programme.

Career opportunities

Our graduates are highly valued in the workplace for the skills they have gained in research, analysis, communication and presentation, as well as a strong understanding of culture and society.

Your enhanced ability to think for yourself, to distil complex issues down to their central points, and to understand the reasons for societal change, will give you the edge in careers across different sectors.

Recent graduates have developed successful careers in areas such as teaching, museums and heritage, arts and cultural management, tourism, broadcasting, the media and policy development.

There are also opportunities to continue studying at postgraduate level, with Year 4 in particular developing the research skills you’ll need if you choose this path.

You will study Scottish cultural history, heritage, cultural expression and representation. Courses also look at literature, music and visual arts and how these are linked to Scottish identity. You’ll also take courses from other subject areas to broaden the scope of your study.

Year 2

You will study oral and visual representations of Scotland through music, song, art, photography and film and you will receive practical training in ethnographic fieldwork techniques and ethics. You’ll also take courses from other subject areas to broaden the scope of your study.

Year 3

You will choose from a range of specialist options such as Ethnological Fieldwork Methods, Traditional Narrative, Cultural Revivalism, Traditional Song, Scotland and Heritage, and Traditional Drama.

Year 4

You will undertake a dissertation and choose from options such as Custom, Belief and Community, Scottish Emigrant Traditions, The Supernatural World, Material Culture in Scotland, and Traditional Music.
Scottish Studies

Why choose Scottish Studies at the University of Edinburgh?

The capital city of Scotland, a UNESCO World Heritage Site and the seat of the Scottish Parliament, is the ideal place to study the nation from a variety of perspectives in a highly flexible programme.

You'll engage with a wide range of disciplines across the University, drawing on its links with Scotland’s key political, cultural and historical institutions.

You'll graduate with a wide range of key skills in research, analysis, communication and presentation, as well as a strong understanding of culture and society.

Introducing Scottish Studies

Scotland is a vibrant, modern European nation, with a rich, varied and fascinating heritage. How can we best study such a nation, and how can we make sense of its past and its present, and help to shape its future?

Our MA (Hons) Scottish Studies programme is interdisciplinary, drawing on arts, humanities and social science approaches to the study of the nation from a variety of perspectives. Based within Celtic and Scottish Studies in the School of Literatures, Languages & Cultures, you'll be encouraged to engage with a range of subject areas across the University that share a common interest in the study of Scotland, for example by drawing on courses from Celtic, history, politics, sociology and archaeology, and combining these with a focus on ethnology, heritage, the creative arts and cultural expression.

You will study Scottish cultural history and tradition and discover how literature, music and visual arts have helped to shape Scottish identity. You'll also consider the complex relationship between culture and politics, and draw parallels with other countries to place Scotland in its wider international context.

You'll have access to an unrivalled range of resources in the School of Scottish Studies Archives. These resources offer tremendous opportunities for studying Scotland’s cultural heritage. The collections include some 33,000 audio recordings, a photographic archive containing thousands of images from the 1930s onwards, films and videos, and a manuscript archive.

We have strong links with Bòrd na Gàidhlig, the National Library of Scotland, National Museum of Scotland, and National Archives of Scotland, and a great relationship with student societies interested in Scotland and Scottish culture.

Study abroad

There are opportunities to study abroad in Year 3 through Erasmus+ or the University’s international exchange programme.

Career opportunities

Upon graduation you will have the ability to engage with the workings of a modern nation, and will demonstrate a close understanding of the complex set of strands which have come together over time to create it. As such, our graduates are highly valued as they bring to the workplace a wide range of key skills in research, analysis, communication and presentation, as well as a strong understanding of culture and society. These are highly positive skills to possess in a rapidly changing world and your qualification will serve you very well wherever the future takes you.

You're enhanced ability to think for yourself, to distil complex issues down to their central points, and to understand the reasons for societal change, will arm you for a career in many different sectors and professions. This will also include areas such as teaching, museums and heritage, arts and cultural management, the tourism industry, broadcasting, the media, and policy development.

"I like the interdisciplinary nature of the programme and it caters for a lot of my interests. I find it interesting, challenging and rewarding."

IB 34 points (grades 655 at HL).

Minimum entry requirement:
SQA Highers ABBB by end of S6, with a minimum of BBB achieved in one year of S4-S6.
A Levels ABB.
IB 34 points (grades 655 at HL).

Please note: This indicates the overall standards required to consider you for entry. The standard entry requirement and minimum entry requirement are explained on page 9. Full, detailed entry requirements, including the subjects you need, vary by programme. Please check the full details before you apply: www.ed.ac.uk/ug/55
Social Anthropology

Why choose Social Anthropology at the University of Edinburgh?

We are ranked in the top 10 universities in Europe for anthropology in the QS World University Rankings by Subject 2018.

You will bring theory to life by carrying out your own research and fieldwork, in the UK or overseas, spending up to four months on an individual research project that will form the basis of your dissertation in Year 4.

You will be able to choose from a wide range of courses covering regional specialisations from Africa to Latin America, and thematic specialisations such as happiness, medical anthropology, the invention of history, or anthropology of food.

Introducing Social Anthropology

Social anthropology is the study of human conduct and thought. Societies around the world vary enormously socially, culturally and politically. The study of these variations, and the common humanity that underlies them, is at the heart of social anthropology.

There are close links between social anthropology and sociology, human geography, development studies, history, archaeology and philosophy.

You will take a broad range of courses in Years 1 and 2, and will then have the opportunity to specialise in Years 3 and 4. You will spend up to four months on an individual research project that will form the basis of your dissertation. Fieldwork for your project can be done both within and outside the UK.

Joint honours

Social anthropology can be studied as part of a joint honours programme with Arabic, archaeology, development, geography, law, linguistics, Persian, politics, social policy or sociology.

Additional costs

Fieldwork may be required, depending on your choice of dissertation topic. There may be some additional costs associated with this fieldwork. You can apply for funding to assist with this.

Career opportunities

Previous graduates have chosen careers in social development, healthcare, journalism and film. Others have gained employment as museum curators, or with international organisations such as Oxfam. A growing number choose to continue with postgraduate study in anthropology, leading to careers as anthropological researchers with universities, public bodies such as the NHS, or private sector companies.
Social Policy

Why choose Social Policy at the University of Edinburgh?

We are ranked in the top 10 universities in Europe for social policy in the QS World University Rankings by Subject 2018.

You will be able to combine social policy in a joint honours programme. Options include quantitative methods, for which the innovative Q-Step programme includes a paid internship between Years 3 and 4.

We have close relationships with the Scottish and UK governments, as well as European and global institutions - all of which provide opportunities to be immersed in a diverse range of contemporary policy developments.

Introducing Social Policy

Social policy is the study of societies and the way they change through policy making. Generally studied as a joint honours programme, for example with sociology, politics, economics or another subject, social policy looks at the ways in which public policies, social institutions and market forces affect how contemporary societies operate and are affected by debates about inequality and social justice.

Social policy is relevant to many areas of everyday life, including housing, employment, income, health and education. Our programmes will appeal to students who are interested in current political and social issues that appear in the news as well as long-term changes in how societies work - whether at local, national, European or global levels.

Government, Policy & Society with Quantitative Methods L231
Social Policy & Economics L41
Social Policy & Law L441
Social Policy & Politics L442
Social Policy & Sociology L453
Social Policy with Quantitative Methods 41H

If you are interested in studying quantitative methods, you may also be interested in:

International Relations/Politics with Quantitative Methods Page 74
Sociology with Quantitative Methods Page 92

Social policy programmes

You'll develop an in-depth understanding of current societal issues by looking at how social policies are constructed and contested. You'll consider the history, aims and effectiveness of different government policies and you'll compare different models of welfare provision around the world, looking at the impact of trends such as population ageing, globalisation and immigration.

Social policy is ideally suited to students who are interested in contemporary social and political issues and who enjoy thinking critically about the structures, institutions and problems that shape our lives. It offers ideal training for a career in government, charities, think tanks and pressure groups, among others.

Government, Policy & Society

This programme teaches you about the economic, political and societal dimensions of important policy areas such as labour markets, health and welfare. You will also learn how politicians make decisions and what influences their decision making. This programme allows you to engage with the most pressing issues currently facing our societies and prepare you for key roles in government, the third sector and beyond.

Year by year...

Year 1
You will take Social Policy & Society, which revolves around three main themes: social needs, social problems and social rights, and how different debates about welfare have been influenced by these themes.

You will study Politics of the Welfare State, which examines social policy as a political issue in the UK. It introduces you to the politics of the area that constitutes one of the largest sets of government expenditure. You will be confronted with debates about the different ways of delivering welfare and the interplay between the state and the private sector.

You can choose option courses from other academic areas and will also take the course Fundamentals of Social Policy, which provides the key subject-specific learning skills you’ll use in your further years of study.

Year 2
You will take European Social Policy, which compares different approaches to social policy in various European countries. You will also take Evidence, Policy & Policy as well as further Fundamentals courses, which will equip you with analytical skills needed to engage with controversial policy issues in public debate. You will also study other compulsory courses appropriate to your programme and will select one option course.

Year 3
You can study option courses that cover areas such as family policy, labour market policies, social inequalities, criminal justice, health policy and education policy. You will also take at least one course on research methods.

Year 4
You will continue to take social policy courses and will complete an individual research project. This may involve collecting and analysing data and information from sources such as the European Commission, UK Government, Scottish Government, local authorities and voluntary organisations.

Joint honours

Social policy can also be studied as part of a joint honours programme with sociology, politics, law, economics, French, German, geography, Russian studies, Scandinavian studies, or social anthropology.

Career opportunities

Most of our graduates move into careers in policy or research within government, voluntary organisations, pressure groups or commercial organisations. These programmes also equip you with skills and knowledge that could be applied to careers in teaching or to the management and delivery of services, whether public or commercial. Some graduates have gone on to study for professional qualifications in housing management, social work or human resource management.

Advice for applicants

Standard entry requirement:
SQA Highers AAAA to AABB.
SQA Highers by end of S6, with a minimum of BBB achieved in one year of SQA Highers.

Minimum entry requirement:
ABB by end of S6, with a minimum of BBB achieved in one year of A Levels.

Please note: This indicates the overall standards required to consider you for entry. The standard entry requirement range and minimum entry requirement are explained on page 9. Full, detailed entry requirements, including the subjects you need, vary by programme. Please check the full details before you apply: www.ed.ac.uk/ug/22
Why choose Social Work at the University of Edinburgh?

We were ranked first in the UK for social work in The Times and The Sunday Times Good University Guide 2018. You will undertake full-time practice placements with local agencies and organisations during Years 3 and 4. Our programme is fully accredited by the Scottish Social Services Council (SSSC).

Introducing Social Work

The study of social work allows you to develop the knowledge, skills and experience needed to work with vulnerable people who are encountering difficulties in their personal or family lives or whose actions have led to the involvement of statutory services. Social workers undertake sophisticated assessments in relation to issues of care and control in order to protect the individual and safeguard society. Social workers often work with other services including health, education, housing and the police. They have a strong interest in human relationships and a commitment to social justice, alongside well-developed social, empathetic and communication skills. The work of a social worker is challenging, demanding and rewarding. A high level of personal resilience is required in order to manage the various challenges of this career.

You will also require well-developed social and communication skills and a high degree of empathy.

The University started providing training for social workers in 1918 and we are well recognised as a leading institution in social work training. We have previously played a major role advising on the future shape of social work services in Scotland, and contributed to reports that led to the Social Work (Scotland) Act 1968, which remains a core legislative basis for Scottish social work today.

We seek to meet the demands of a changing profession and contribute to understanding of, and improvements in, public policy and professional practice.

Entry to our social work programme is conditional on continued registration with the Scottish Social Services Council, and up-to-date membership of the Protection of Vulnerable Groups scheme.

In Years 1 and 2 you will study the history and development of social work, key milestones in its development and the policy and legal frameworks of practice. You will also begin to develop your people skills. In Years 3 and 4 you will then focus on the context and complexity of social work practice and will undertake two assessed practice placements, each based in different settings.

Social workers represent society’s response to challenges such as families under stress, offending, long-term illness, mental illness and other serious problems. Good social work combines an interest in people with a rigorous intellectual attitude and the constant search for better methods of helping, supported by research and development.

It is a profession suited to creative, practical and resourceful individuals who enjoy working with people. You will combine ingenuity and optimism with honesty and realism, in the face of the demanding situations experienced by some service users. You should have a stable, well-rounded personality and you must be able to see beyond consensus journalism and the immediate issues as they are presented by service users and policy makers.

Further information and programme-specific entry requirements at www.ed.ac.uk/ug/20

Accreditation

Our BSc [Hons] Social Work is accredited by the Scottish Social Services Council: www.sssc.uk.com

Career opportunities

Social work graduates are eligible to work in statutory or voluntary settings within adult services, children and families, or criminal justice sectors. While many of our graduates stay working in Scotland, your professional qualification will allow you to work elsewhere in the UK and in many countries internationally.

Graduates work in a range of locations such as community-based agencies, prisons or hospitals. Career pathways exist from early practitioner stage through to senior management, including in major organisations in the third sector, and international aid and humanitarian organisations.

The strong communication and interpersonal skills that you will develop during your programme prepare you for a range of other careers involving working with people.

Some graduates also choose to continue with their studies or go on into research.

BSc [Hons] Social Work L500

Social Work with...
Sociology at the University of Edinburgh

We’re ranked in the world’s top 25 universities for sociology, and 8th in Europe, in the QS World University Rankings by Subject 2018.

Our commitment to teaching and student support is demonstrated in the winners and nominations we have achieved over the years at the Edinburgh University Students’ Association Teaching Awards.

One of the great strengths of studying sociology with us is the breadth and diversity of topics covered and the range of joint programmes we offer.

Introducing Sociology

Sociology examines how individual choices are affected by wider social forces and how they can be understood by placing them in their social context. At Edinburgh, we study the relationship between individuals and groups, issues of belonging and identity, the social causes of cooperation and conflict, and the way societies and social institutions are formed and change over time.

Our programme also equips you to compare different national contexts and understand contemporary social issues from a global perspective.

Joint honours

Sociology can be studied as a joint honours programme with politics, psychology, social anthropology, economics, social policy, law or geography.

Study abroad

In Year 3 you may choose to study abroad through the University’s international exchange programme or through the School’s Erasmus+ exchange programme. This programme is run with universities in Bremen and Copenhagen.

Career opportunities

Graduates go on to a wide variety of careers in the private sector, voluntary sector, local or central government, the media or journalism, or use their practical and research skills to work in social or market research. Many graduates go on to postgraduate study and an academic career or teaching.

Why choose Sociology at the University of Edinburgh?

“The programme equips us with practical skills such as learning research techniques and statistical programs while also developing an open-minded and creative outlook.”

Spanish, Portuguese & Latin American Studies

Why choose Spanish, Portuguese & Latin American Studies at the University of Edinburgh?

We are ranked 4th in the UK and 19th in the world for modern languages in the QS World University Rankings by Subject 2018.

We are unique in Scotland in offering both single and joint honours language programmes which all take four years to complete, including a year abroad. If you’re studying two languages, you’ll divide your time abroad between countries relevant to each language, further building your skills and experience.

International culture flourishes here, with a thriving Centre for Contemporary Latin American Studies, numerous Hispanic student societies, a creative writing magazine for European languages, and an annual, student-led Spanish play. Our in-house Centro de Língua Portuguesa is sponsored by the Instituto Camões, and we have very close links with local schools, the Spanish Consulate in Edinburgh and the Extebarque Basque Institute.

Introducing Spanish, Portuguese & Latin American Studies

The twenty countries where Spanish is an official language, and the nine where Portuguese is spoken, have fascinatingly rich and varied cultures. Studying one or both languages with us is your gateway to an extraordinary range of literature, film and theatre from around the world, explored in its historical context, from medieval to contemporary times.

Spanish

Studying Spanish at Edinburgh encompasses the study not only of the language but also of Hispanic culture and history. Our resources and our expertise will give you privileged access to all major areas of Spanish-language and Hispanic culture, from Catalonia to Argentina and from Latin American indigenous film-making to linguistics.

Portuguese

Portuguese is one of the world’s most important languages, spoken in Europe, South America, and Africa. Your studies will encompass learning about the culture of the Portuguese-speaking world, in particular, Brazil, Lusophone Africa and Portugal.

Study abroad

In Year 3 you will spend time in Spain, Portugal or Latin America. The normal residence requirement for this is 30 weeks in the relevant country or countries. Students studying more than one language must complete a minimum period of eight weeks in each country. The University currently has exchanges with universities in Almería, Barcelona (Autónoma), Córdoba, Extremadura, Madrid (Complutense and Autónoma), Salamanca, Seville, Granada, Alcalá de Henares, Málaga, Valladolid, Buenos Aires (San Andrés), Chile (Pontificia Universidad Católica), México (Universidad Nacional Autónoma de México), Puebla (Universidad de las Americas), São Paulo (USP), Rio de Janeiro (Pontificia Universidad Católica), Coimbra, and Lisbon.

Additional costs

You will be required to purchase the primary texts for your studies. During your year abroad in Year 3, associated travel and maintenance costs must be budgeted for. These vary according to destination. You may apply for salaried teaching posts as British Council English Language Assistants. University places without extra cost to you are available on Erasmus+ exchange programmes in Spain and Portugal and with our partner institutions in Argentina, Brazil, Chile and Mexico. You may also organise a work placement in your destination country, on an individual basis.

Career opportunities

The Spanish and Portuguese languages are both among the ten most widely spoken in the world and are your gateway to a great many countries and cultures, extending beyond Europe to Latin America and parts of Africa.

Some of our graduates choose career paths in translation, interpreting, teaching or business, both at home and abroad. Others go on to work within the public or third sector, including for international charities or institutions of the European Union (both Spanish and Portuguese are official working languages of the EU), or move into the creative industries, tourism and travel. Employers increasingly value the excellent communication skills that come with language learning, the intercultural and critical awareness provided by international experiences, and imaginative thinking. Careers where these skills are particularly useful include marketing, politics and policy work, and law. There are also opportunities to continue studying at postgraduate level.

Programmes

MA (Hons) Portuguese R500
Portuguese & English Language RQ33
Portuguese & English Literature RQ43
Portuguese & Linguistics RQ51
Portuguese & Philosophy RV55
Portuguese & Scottish Literature RQ59
Spanish R410

Spanish & History of Art RQ41
Spanish & Linguistics RQ41
Spanish & Philosophy RV45
Spanish & Politics RV42
Spanish & Portuguese R845

You can take a single honours programme in either Spanish or Portuguese, combine both languages in a joint programme, or study either with one of a wide range of other subjects.

It doesn’t matter if you’re a complete beginner, you can study either language to degree level with us.

Our staff, many of whom are native speakers, are experienced in the accelerated teaching of language skills. We also offer courses in Catalan and Basque.

Year by year...

Year 1

If you are studying Spanish, you will take either Spanish 1A or 1B depending on your language skills. You will also study a selection of literary texts and film.

You will study Portuguese, you will have the option to take Portuguese 1 which caters for both beginners and more advanced students.

You will be introduced to Portuguese-speaking culture through a selection of short stories and films from Mozambique, Angola, Brazil and Portugal.

It is possible to take both Spanish and Portuguese (in all four years).

You’ll also take courses from other subject areas to broaden the scope of your study.

Year 2

In Spanish, you will continue to develop your spoken and written language skills and continue to study Spanish and Latin American cultures. If you wish to study Catalan, you can start to learn about the language, history and culture of Catalonia. Basque language for beginners is also available. If you are studying Portuguese, you will continue to develop your language skills, and you will study the cultures and the societies of the Portuguese-speaking world, through literature, film, music and the arts.

All students also take courses from other subject areas. This will broaden the scope of your study.

Year 3

You will study or work in Spain, Portugal or Latin America.

Some of your work will be on your chosen language and some on a range of other subjects. This will broaden the scope of your study.

Year 4

You will study advanced language courses and choose from a range of specialist courses on Spanish, Latin American and Portuguese-speaking history, literature and culture. You will also complete your dissertation or long essay.

The University of Edinburgh Undergraduate Guide 2020 entry
Why choose Sport at the University of Edinburgh?

We are ranked in the world’s top 20 universities for sports-related subjects in the QS World University Rankings by Subject 2018. Our BSc (Hons) Applied Sport Science is endorsed by the British Association of Sport and Exercise Sciences (BASES). This recognises our teaching of core and interdisciplinary areas of sport science, and that students gain research experience in and outside the sport science laboratory. Our BSc (Hons) Sport & Recreation Management provides excellent placement opportunities with major sports organisations and is highly regarded by the industry.

Introducing Sport

We offer two separate sport-related programmes – Applied Sport Science and Sport & Recreation Management. You will benefit from our excellent facilities and state-of-the-art research equipment, joining a dedicated, close-knit community of researchers and academics.

Applied sport science involves the application of scientific principles to the promotion, maintenance and enhancement of sport- and exercise-related behaviours. Our programme is centred on four key disciplines: physiology, biomechanics, psychology, and skill acquisition.

You will develop an understanding of the factors that influence participation and performance in sport and exercise. In addition, you will learn the values and purposes of sport, exercise and physical activity in our changing world.

You will be part of a community of researchers and academics involved in sport- and health-related research and activities, such as advising government departments, supporting governance of sport at local, national and international levels, providing analyses to media outlets, organising international conferences and engaging in international development initiatives.

Sport and recreation management will help you develop an understanding of the principles of management, appreciate sport’s cultural and economic importance, and focus on the business of sport and the importance of community sport, elite sport, and international development through sport.

You will develop an understanding of the influence of social, political, economic and historical factors shaping the provision of sport and the business of sport.

You will have opportunities to conduct research with public, private and voluntary sports providers. Our students have analysed both state and non-state actors’ involvement in delivering sport at local, national and international level. Sociological and historical perspectives of researching and understanding the sports and recreation landscape have been adopted in past student research projects.

Programmes

BSc (Hons) Applied Sport Science C510

Sport & Recreation Management N230

Placements

Students of applied sport science do not have a compulsory placement but will have the opportunity to undertake a workplace or research attachment in collaboration with a body external to the University, such as sportsindia. Students of sport and recreation management have a compulsory placement course in Year 2 that provides an invaluable opportunity for work-based learning, enabling you to further your understanding of sport management in practice and enhance your employability. Placements have previously been with a wide range of organisations in the UK, such as community sports clubs, health and fitness clubs, football clubs (for example Celtic and Manchester United), golf courses (for example Gleneagles), sports marketing and media companies (for example Sky Sports, IMC, the Scotsman), governing bodies of sport (for example sportsindia, Scottish Hockey, JogaScotland, basketball Scotland, RFU, SRU, SFA), and local authority sports trusts, such as Edinburgh Leisure.

Additional costs

You may incur additional costs depending on the programme, the course, type of dissertation or placement you choose.

Study abroad

There are opportunities to study abroad during Year 3 through our international exchange programme. Depending on your programme, it is possible to study abroad in the US, Australia, New Zealand, Singapore, Malaysia or at a number of European universities.

Career opportunities

Graduates enter sport-related careers, such as working for elite sports clubs, performance sports centres, national or international sporting bodies, or the fitness industry. Graduates also enter health-related careers, for example local authority or NHS-funded exercise and health initiatives. Others work in sports marketing, tourism or events; gain graduate management and business posts or begin postgraduate study to focus their career towards teaching, phytotherapy, sports nutrition or public health, for example.

Year by year…

Applied Sport Science

Year 1

You will study the key disciplines of sport and exercise science and select from a broad range of options available in Year 2.

Year 2

As Year 1 but with the addition of research methods and information skills training.

Year 3

The key sport and exercise science disciplines continue plus research methods training and research project work. You will start to specialise with performance sport or physical activity for health options, such as Applying Sport Science; Sports Nutrition; Physical Activity, Exerciser, Fitness & Health; Psychology of Physical Activity; and Workplace Attachment.

Year 4

You will study two of the four key sport science disciplines and two options. Options include Sport & Exercise Medicine; Exercise Prescription for Rehabilitation; and Research Attachment. You will also complete an honours dissertation in sport or physical activity for health.

Sport & Recreation Management

Year 1

You will study Sport Management, which covers principles of management, governance of sport, human resources, organisational behaviour and team management. Trends in sport participation and provision, policies and practices of sport in the public, commercial and voluntary sectors are evaluated through case studies. In Sport and Society you will study contemporary social and cultural issues in sport, including key ideas in the sociology of sport and the history and development of sport. Courses offered elsewhere in the University are available as options.

Year 2

You will undertake a six-week, work-based attachment within a sports organisation. You will develop skills in presentations, report writing, and use of case study approaches, and develop an understanding of how management works in the real world of sport. Options are available from external providers.

Year 3

Compulsory courses include: Sport Development; Sociology of Sport; Sport and Communication; and Sport Strategic Management. You will also undertake an advanced research methods course.

Year 4

Compulsory courses include: Sport in a Global Context; Sport, Media and Society: Performance Indicators, Measurement and Management in Sport; and Social History of Sport in Scotland. You will also undertake an individual research project resulting in the submission of a dissertation on a topic of your choice.
Sustainable Development

Why choose Sustainable Development at the University of Edinburgh?

This programme offers specialist courses in sustainable development that benefit from innovative teaching and a strong sense of community. Our staff and our courses have won Edinburgh University Students’ Association Teaching Awards on many occasions.

The University has an outstanding record of world-leading research and teaching in a wide range of approaches to sustainability and human development, from across the social and natural sciences.

You will be able to engage with sustainability issues from a variety of disciplinary perspectives – focusing on the social science analyses that are crucial for sustainable development.

There are also opportunities (but no obligation) to study science courses if you wish.

Introducing Sustainable Development

Sustainable development refers to the challenges of reducing global inequity and improving wellbeing, while reducing threats to Earth’s systems from industrialised production and consumption.

Effective environmental care, in relation to climate stability, biodiversity and renewal of natural resources, requires the examination of how societies organise social, economic and political activity, how they relate to their surroundings and how they ensure the renewal of natural resources for future generations.

Additional costs

There are small costs associated with fieldwork in Year 3.

Career opportunities

Graduates of this programme will be in demand in the growth areas of environmental research, management, education, development, campaigning and non-governmental organisation work, national, international, and local government, environmental auditing, corporate social responsibility and risk management.

This programme will also provide you with the skills needed for careers in any fields which take social science graduates.

Theology & Religious Studies

Why choose Theology & Religious Studies at the University of Edinburgh?

We are ranked in the world’s top 20 universities for theology, divinity and religious studies in the QS World University Rankings by Subject 2018.

You will become part of a vibrant, tight-knit community of around 500 students and staff based in New College, one of Edinburgh’s most iconic buildings.

You will have study abroad opportunities during the summer and in Year 3 (see study abroad section below).

Introducing Theology & Religious Studies

Theology is one of the oldest areas of academic study known to humanity, while religious studies has developed in the modern period. Both disciplines are intellectually stimulating and relevant in helping us understand the role of religions, both ancient and modern, in the world around us.

Theology generally refers to the study of the Christian traditions from textual, historical and doctrinal perspectives. Religious studies refers to the comparative study of beliefs and practices in a variety of religious traditions and contexts and explores different theories of religion cross-culturally.

Taken together, our courses cover a wide range of religious traditions, including Christianity, Judaism, Islam, Buddhism, Hinduism, African indigenous religions and new religions, and the rejection of religion by atheists and humanists.

Religion influences, and is influenced by, most human endeavours and we encourage you to explore the dynamics between theology and religious studies and other disciplines in the humanities and social sciences. On our programmes you can choose to pursue your interests in a wide variety of subjects and you can combine breadth of knowledge with in-depth expertise. You will acquire critical and analytical skills and a broad education in argument and interpretation that will develop you intellectually and make you attractive to employers.

Study abroad

There is a range of opportunities to spend time abroad. For shorter periods, these include summer programmes and work abroad. During Year 3, you will also have the opportunity to study abroad on exchange for up to a year at a wide selection of leading global universities. These include Radboud University Nijmegen, Netherlands, and Dartmouth College, United States, with which we have an ongoing relationship. Going abroad expands your horizons and is great fun, as well as bringing academic and career benefits.

Career opportunities

Our graduates pursue a wide range of careers within a variety of settings, including the creative arts, non-governmental organisations, finance, teaching, management, administration, the ministry, the armed forces, government, counselling and the voluntary sector. Many of our students go on to study for postgraduate qualifications, including masters and doctorates.

Programmes

MA (Hons) Divinity & Classics VQ68
Philosophy & Theology VV56
Religious Studies VQ62
Religious Studies & English Literature VQ63
Religious Studies & Scottish Literature VQ63
Theology VQ64
MDiv (Hons) – 3 years
Divinity – Graduate Entry V630
BD (Hons) Divinity V600

Study abroad?”

Advice for applicants

Standard entry requirement:
SQA Highers ABBB by end of S5.
A Levels ABB.
IB 34 points (grades 655 at HL).
Minimum entry requirement:
SQA Highers ABBB by end of S6, with a minimum of B88 achieved in one year of 5-4-5.
A Levels ABB.
IB 34 points (grades 655 at HL).
For entry 2020:
Minimum entry requirements are an undergraduate degree.

Please note This indicates the overall standards required to consider you for entry. The standard entry requirement and minimum entry requirement are explained on page 9. Full, detailed entry requirements, including the subjects you need, vary by programme. Please check the full details before you apply: www.ed.ac.uk/ug/36

Year by year...

Divinity Year 1 & 2 You will choose from courses in biblical studies, the history of Christianity, and theology and ethics. In Year 2 you may also choose a course in religious studies.
Year 3 In Years 3 and 4 you will choose from a range of advanced level courses in biblical studies, the history of Christianity, and theology and ethics. You may choose to focus on one subject area in depth, or to continue to study several subject areas. On the BD (V600), you may choose to graduate after Year 3 with an ordinary degree. On the MDiv (V630) you will write your supervised dissertation and graduate at the end of Year 3 with an honours degree.
Year 4 You may choose courses from previous years. You can continue to take advanced level courses, and also write a supervised dissertation on a subject of your choice.

Philosophy & Theology Year 1 & 2 You will study courses in philosophy and choose further courses from theology and ethics, biblical studies, history of Christianity, and religious studies. You can also choose courses from other University subject areas.
Year 3 You will choose advanced level courses in philosophy, and will also write a dissertation chosen from either of the two fields, with academic supervision.

Religious Studies Year 1 You will study two compulsory religion courses, covering a range of religious traditions and approaches, and will also choose courses from a range of additional courses on particular religious traditions including Asian religions, Christianity and Islam. You can also choose courses from ancient history, history of art, classics, music, Scottish history, politics, social anthropology, social policy and sociology as combined options, or courses from other University subject areas.
Year 2 You will continue to study religion courses, covering a range of religious traditions and approaches, and other courses following on from your first year.
Year 3 You will choose advanced courses on one or more religious traditions and will take other courses in the study of religion. Students who took combined options in Years 1 and 2 may continue with these. You have the option of graduating after Year 3 with an ordinary degree.
Year 4 You will choose further advanced courses on one or more religious traditions and complete a supervised dissertation. Students who took combined options in Years 1 & 2 may continue with these.

Religious Studies & English/Scottish Literature Year 1 You will study two compulsory religion courses, covering a range of religious traditions and approaches, and English Literature 1 or Scottish literature 1. You can also choose courses from other University subject areas.
Year 2 You will study two compulsory religion courses, covering a range of religious traditions and approaches, and will also choose from a range of additional courses on particular religious traditions including Asian religions, Christianity and Islam. You can also choose courses from ancient history, history of art, classics, music, Scottish history, politics, social anthropology, social policy and sociology as combined options, or courses from other University subject areas.
Year 3 You will choose advanced courses on one or more religious traditions and will continue to study one or more religious traditions in international and cross-cultural contexts and will take literature courses at an advanced level.
Year 4 You will choose further advanced courses and will complete a dissertation on a subject in either religious traditions or literature, with academic supervision.

Thology

Year 1 & 2 You will choose courses from biblical studies, the history of Christianity, religious studies, and sociology. You will also choose courses from other University subject areas.
Year 3 You will choose advanced courses from your area(s) of interest within biblical studies, the history of Christianity, religious studies and sociology. You will have the option of graduating after Year 3 with an ordinary degree.
Year 4 You will continue to choose advanced courses from biblical studies, the history of Christianity, religious studies and sociology. You will have the option of graduating after Year 3 with an ordinary degree.

Religious Studies & English/Scottish Literature Year 1 You will study two compulsory religion courses, covering a range of religious traditions and approaches, and English Literature 1 or Scottish literature 1. You can also choose courses from other University subject areas.
Year 2 You will study two compulsory religion courses, covering a range of religious traditions and approaches, and will also choose from a range of additional courses on particular religious traditions including Asian religions, Christianity and Islam. You can also choose courses from ancient history, history of art, classics, music, Scottish history, politics, social anthropology, social policy and sociology as combined options, or courses from other University subject areas.
Year 3 You will choose advanced courses on one or more religious traditions and will continue to study one or more religious traditions in international and cross-cultural contexts and will take literature courses at an advanced level.
Year 4 You will choose further advanced courses and will complete a dissertation on a subject in either religious traditions or literature, with academic supervision.

“...I fell in love with the programme, which is progressive, inclusive and wide ranging. I think four-year programmes are brilliant, truly allowing for breadth and depth within a subject.”

Ellie Ashton
1st year MA (Hons) Religious Studies

Further information and programme-specific entry requirements at www.ed.ac.uk/ug/36
About the College of Medicine & Veterinary Medicine

Our reputation as one of the world’s leading centres of medical and veterinary medical research was reaffirmed by the Research Excellence Framework (REF) 2014 results. Our three submissions to REF were the University’s largest and were also some of the largest REF submissions in the UK. This emphasises the enormous power of the University’s research in human and animal medicine and health.

Overall, 84 per cent of our research activity was rated 4*, world-leading, or 3*, internationally excellent.

Veterinary medicine is ranked first in the UK, retaining its position as the country’s top vet school, in both the Guardian University Guide 2019 and The Times 2018 veterinary subject league tables.

Medicine is ranked in the UK top 10 by both the Complete University Guide 2019 and the Guardian University Guide 2019 league tables.

Welcome to the College of Medicine & Veterinary Medicine

Edinburgh is one of the UK’s most prestigious centres for medical and veterinary medical teaching and research. It is also one of the most progressive, hosting state-of-the-art facilities for dynamic teaching and learning.

Established in 1726, Edinburgh Medical School was the pre-eminent medical centre of the 18th and 19th centuries and today retains its status as a top-choice destination for students entering the medical profession. Our programmes in medicine, medical sciences, biomedical sciences and oral health sciences offer life-changing opportunities.

The Royal (Dick) School of Veterinary Studies has been at the forefront of veterinary education since William Dick founded it in 1823. It is regarded as one of the world’s most innovative and influential centres for veterinary education and clinical care.

The reputations of both these historic institutions as internationally renowned, research-led centres of excellence make Edinburgh an inspirational place to study medicine or veterinary medicine.

If you have any queries about the programmes listed in this section, please contact the relevant Admissions Office or go online for further details.

About the College of Medicine & Veterinary Medicine

Our reputation as one of the world’s leading centres of medical and veterinary medical research was reaffirmed by the Research Excellence Framework (REF) 2014 results. Our three submissions to REF were the University’s largest and were also some of the largest REF submissions in the UK. This emphasises the enormous power of the University’s research in human and animal medicine and health. Overall, 84 per cent of our research activity was rated 4*, world-leading, or 3*, internationally excellent.

Veterinary medicine is ranked first in the UK, retaining its position as the country’s top vet school, in both the Guardian University Guide 2019 and The Times 2018 veterinary subject league tables.

Medicine is ranked in the UK top 10 by both the Complete University Guide 2019 and the Guardian University Guide 2019 league tables.
Agricultural Science

Why choose Agricultural Science at the University of Edinburgh?

These programmes will help develop agricultural scientists who will find new ways to feed the world’s growing population without destroying the planet.

We believe in teaching in a real-world context through our strong links with industry and farming locally, nationally and internationally. You will have the opportunity to boost your employability with a work placement.

You will be part of a community of innovators and idea generators. Our Easter Bush Campus is home to three of the UK’s four agri-tech innovation centres, with a network of more than 100 industry partners.

Introducing Agricultural Science

There is a shortage of highly skilled leaders in sustainable farming practices. These programmes aim to equip you with the attributes that will prepare you to become a future leader in agricultural science and its application to agri-food related global challenges – whether in research, policy, non-governmental organisations or the agri-food industry.

There are fewer bigger global challenges than feeding the growing human population well, while protecting the natural systems on which we depend.

With the world population expected to reach 11 billion by the end of this century and demands on systems already at an all-time high, it is essential that we find new ways to feed the growing population without destroying the planet.

Sustainable agriculture

Improving the effectiveness and sustainability of agri-food systems is vital to tackling the challenges of global population growth, rapid urbanisation, food and environmental security and diet and health. These challenges affect affluent, middle and low income countries. Addressing them is key to moving hundreds of millions of people out of poverty, and central to many of the United Nations Sustainable Development Goals.

Research power

At the University of Edinburgh, we already make a significant contribution to tackling these issues at national and global levels. Following the UK government’s Research Excellence Framework (REF) 2014 Edinburgh was ranked first by research power (Research Fortnight REF 2014) in Agriculture, Veterinary and Food Science.

Teaching

We offer four programmes: Agricultural Economics, Animal Science, Crop & Soil Science, and Global Agriculture & Food Security. These programmes introduce key components of agricultural science to all students in Years 1 and 2 providing a solid foundation for progression onto your specialism pathway for Years 3 and 4. You must select a pathway on application, however transfers between specialisms can be made up until the end of Year 2. Major contributions to courses from research active staff ensure you will be aware of, and involved in, topical research throughout your programme.

Placements

In Year 3 you will undertake a core work placement in an area relevant to agri-food systems. There is scope to undertake additional work placements outside your studies and our staff will help you explore opportunities that match your interests and career aspirations. Work placements can incur additional costs.

Study abroad

You may take your work placement and your dissertation project either internationally or in the UK. You are expected to meet any associated costs, which will vary according to your preferred location.

Additional costs

You will require compulsory protective clothing (£50), locker deposits (£15) and will incur travel costs getting to Easter Bush campus. Using public transport from the city centre will cost around £500 a year, which we will proportionally subsidise in line with your year of study. Some Year 3 work placements and your final project may incur further accommodation and travel costs. For international students, please note your immigration application may include a healthcare surcharge of around £300 a year.

Scholarships

A range of scholarship opportunities is available to both UK and international students. Please check online for further information.

Career opportunities

Graduates will be in high demand from groups aiming to drive change and organisations leading the sustainable food debate. Our programmes aim to equip you for careers in:

- agri-food research, such as PhD and ultimately postdoctoral positions;
- national or international policy roles, including researchers, research project commissioners or managers, or science advisers for either government or inter-governmental departments or agencies;
- non-governmental organisations, as science advisers or research managers for agri-food/planetary health/ international development aid-related charities;
- or the agri-food industry for example as farming or agri-food industry consultants, technical experts, researchers, research project commissioners/managers for multinational agri-food companies, or as food product supply chain managers for retailers.

Advice for applicants

Standard entry requirement:

- SQA Highers BBB.
- A Levels BBB.
- IB 30 points (grade 5 at HL).

Minimum entry requirement:

- SQA Highers BBB.
- A Levels BBB.
- IB 30 points (grade 5 at HL).

Please note This indicates the overall standard required to consider you for entry. The standard entry requirements and minimum entry requirement are explained on page 9.

Full, detailed entry requirements, including the subjects you need, vary by programme. Please check the full details before you apply: www.ed.ac.uk/ug/64

Programmes

BSc (Hons) Agricultural Economics D401
- Agricultural Science (Animal Science) D402
- Agricultural Science (Crop & Soil Science) D403
- Agricultural Science (Global Agriculture & Food Security) D404

Did you know?

We’ve invested £35 million in our Global Academy of Agriculture & Food Security to enhance our education, training, research, innovation and consultancy.
Biomedical Sciences

Why choose Biomedical Sciences at the University of Edinburgh?

You will join an interdisciplinary programme that provides the knowledge, skills, and personal and professional development appropriate for globally competitive graduates of our key disciplines.

You will be supported by academic staff who provide an outstanding research-led, learning experience that fosters individual intellectual development.

You will have the opportunity to undertake projects with our leading biomedical researchers addressing major global biomedical challenges.

Introducing Biomedical Sciences

Studying biomedical sciences involves learning about the processes underpinning human health and disease. Developments in this field of research guide improvements in medical practice.

Our biomedical programmes have a common structure in Years 1 and 2 that provides a firm grounding in the knowledge, understanding and skills required for our specialist disciplines of anatomy and development, infectious diseases, neuroscience, pharmacology, physiology or reproductive biology. In Years 3 and 4, you will focus on exploring your discipline in depth. There are opportunities to transfer between honours disciplines at the end of Years 2 and 3.

You will be taught within an internationally respected research environment and will have the opportunity to work with our research groups. There are opportunities to study abroad in Europe, North America and Asia.

Anatomy and development

The anatomy and developmental biology fields are closely interlinked. Knowledge of anatomy is important in many areas of biology and medicine, including developmental biology. Similarly, developmental biology tells us much about how normal anatomy is formed and maintained. Understanding the anatomy and development of tissues and organs is essential to the emerging area of tissue repair.

Biomedical sciences

Understanding the functioning of the human body at molecular, cellular, organ and system levels, in health and disease, is the ultimate aim of biomedical sciences. Biomedical scientists integrate knowledge gained by research across a range of related disciplines and apply it in the analysis of disease mechanisms.

The basic research biomedical scientists carry out is fundamental for new developments and innovation in disease diagnosis, treatment and prevention. Biomedical scientists develop individual scientific, experimental and critical skills that can facilitate major contributions to improvements in human health and the treatment of illness.

Infectious diseases

Infectious disease is a major challenge to society in the developed and developing worlds. Our infectious diseases programme investigates the microorganisms that can cause disease in humans and animals and how a host responds to infection. It brings together the study of bacteriology, virology, immunology and molecular biology. You will study the interaction between microorganisms and hosts, infection processes and how microbes cause disease. This knowledge can be applied to the development of prevention and therapeutic strategies such as antibiotics, antiviral agents and vaccines.

Neuroscience

Neuroscience is the study of the nervous system, how the brain works and how cells interact to control behaviour. Research in neuroscience is aimed at better understanding the structure of the nervous system, how it works, develops and malfunction, and how it can be manipulated. Research is aimed at developing more effective treatment of diseases such as stroke, neurodegenerative disease, mental illness, cancer, toxicity and trauma.

Pharmacology

Pharmacology is the study of how drugs produce effects on the body to treat disorders or change bodily functions. It brings together physiology, biochemistry and molecular biology. You will study the effects of drugs on molecules, cells and tissues within the body and examine the side effects of drugs and the factors that affect absorption, distribution and excretion. Research in pharmacology aims to develop a better understanding of drug action and produce new drugs to improve patient care.

Physiology

Physiology examines living animals and how they function, grow and reproduce. It studies how cells respond to changes in their environment and examines how cell functions are integrated in tissues, organs and animals. You will study how information is sent from one cell to another through chemical or electrical signals and body systems such as nutrition, movement, respiration and reproduction. The understanding of fundamental physiological principles is central to our ability to identify potential therapeutic targets for the treatment of diseases.

Reproductive biology

Reproductive biology aims to understand the scientific principles that govern reproduction in humans and other mammals. You will study the requirements for reproduction, including producing sufficient numbers of viable gametes, fertilisation, implantation in a receptive uterus, formation of a placenta that can sustain and nurture a baby, and delivery at full term. Advances in this field provided the knowledge for assisted conception and revolutionised reproductive medicine and veterinary practice.

Career opportunities

Our programmes will appeal to those planning a career in biomedical research or related areas as well as graduate-entry careers in industry, management and the public sector. The broad analytical, scientific and personal skills you gain will equip you for a variety of careers. Previous graduates have been employed in science and in non-science sectors including teaching, marketing, accountancy and policy research. A large proportion of our graduates choose further study before entering successful academic or industry-based research careers.

Medical Sciences

Why choose Medical Sciences at the University of Edinburgh?
You will join a multidisciplinary programme that provides the knowledge, skills and personal and professional development appropriate for graduate entry to medicine, medical research or a career in one of the many healthcare or healthcare-related professions.
You will be supported by academic staff who provide an outstanding research-led, learning experience that fosters individual intellectual development.
You will have the opportunity to undertake projects with our leading medical and biomedical researchers addressing major global challenges in healthcare.

Introducing Medical Sciences
Our BSc (Hons) Medical Sciences programme provides a platform of compulsory courses which deliver core material in biomedical sciences, medical sociology and anthropology that underpins and directs advances in 21st-century medical practice. In addition, your option course choices offer you the flexibility to explore the broader biological, physicochemical, clinical and social sciences that underlie contemporary healthcare.

Programmes

BSc (Hons) Medical Sciences B100

Our programme develops healthcare-related themes with a particular emphasis on current medical research and its significance for advances in medical and clinical practice.

Opportunities exist for students to undertake research within the groups recognised as delivering internationally excellent and, in some areas, world-leading research.

Medical sciences is founded in developing skills in academic research and scientific inquiry to encourage an awareness and understanding of the research that is needed to continue to advance clinical practice. Alongside a depth of knowledge in medical sciences, you will also develop a level of understanding and a breadth of skills that will enable you to contribute to research and, in the future, to your profession and society.

Transfering to Medicine MBChB
Up to five offers for entry into Year 2 of the Edinburgh MBChB programme will normally be made to final-year BSc (Hons) Medical Sciences undergraduates. Application for these places should be made through UCAS.

Medical sciences undergraduates applying to the MBChB are required to have the appropriate academic qualifications, need to have sat the University Clinical Aptitude Test (UCAT) and, if shortlisted, be interviewed along with other shortlisted graduate applicants. Offers will be made before the end of the first semester of Year 4 of the medical sciences programme.

Medical sciences students will not normally be able to transfer to the MBChB programme during their studies.

Year by year...

Year 1
You will take three compulsory courses: Medical Sciences 1; and two courses covering medical biology and molecular and cellular biology. You will also be expected to take at least one course in biological chemistry. You will choose other courses from a range of biomedical and non-biomedical option courses. Medical Sciences 1 defines the unique identity of the programme, introducing a breadth of disciplines that integrate to contribute to our understanding of health and disease.

Year 2
You will expand your knowledge in basic biomedical sciences and further develop an integrated approach to understanding the science that underpins medical practice. You will take three compulsory courses: Anatomy & Pathology 2; Biomedical Sciences 2; and Microorganisms, Infection & Immunity 2 alongside additional courses chosen from biomedical, biological or other disciplines across the University. Anatomy and Pathology 2 is a programme-specific course that introduces an integrated approach to the structure and function of the human body at different levels of organisation and develops key programme-specific healthcare themes.

Year 3
You will develop expert specialised knowledge in medical sciences that enables you to understand current research and to discuss critically its significance and implications. You will develop key skills in critical analysis, research and communication alongside increasing biomedical knowledge. You will study three compulsory courses: Health, Illness & Society 3: Clinical Biochemistry & Endocrinology 3; and Clinical Immunology & Haematology 3A plus three option courses. The compulsory courses explore further the links between basic research and the clinical situation. Health, Illness & Society 3 is unique to this programme. It provides an important focus on developing awareness of healthcare-specific professional and ethical relationships, covering aspects of social medicine from the understanding of disease at a population level to the global allocation and use of healthcare resources.

Year 4
You will have opportunities to actively engage in research, discuss and analyse high-profile issues and reflect on and re-evaluate themes addressed in earlier years. You will study the compulsory course Medical Sciences 4 alongside two option courses that allow analysis of high-profile contemporary issues in medical sciences.

Career opportunities
You will be prepared for careers in a range of areas, including laboratory sciences, the pharmaceutical industry, healthcare or medical teaching, medical writing, healthcare management and clinical trials management.

Transferring to Medicine MBChB
Up to five offers for entry into Year 2 of the Edinburgh MBChB programme will normally be made to final-year BSc (Hons) Medical Sciences undergraduates. Application for these places should be made through UCAS.

Medical sciences undergraduates applying to the MBChB are required to have the appropriate academic qualifications, need to have sat the University Clinical Aptitude Test (UCAT) and, if shortlisted, be interviewed along with other shortlisted graduate applicants. Offers will be made before the end of the first semester of Year 4 of the medical sciences programme.

Medical sciences students will not normally be able to transfer to the MBChB programme during their studies.

The strong research element of the programme is an ideal preparation for anyone considering a career in postgraduate research.

Although this programme is not a qualification in medical practice, the skills and knowledge gained provide an excellent platform for applications to graduate medical programmes.

Graduates can also enter careers in veterinary medicine, dentistry, nursing, pharmacy and physiotherapy. However, to enter these professions you will need to pursue further study and training.

Study abroad
There is currently an opportunity for up to two students to study at the Karolinska Institute, Stockholm, Sweden, in Year 3.

Career opportunities
You will be prepared for careers in a range of areas, including laboratory sciences, the pharmaceutical industry, healthcare or medical teaching, medical writing, healthcare management and clinical trials management.

Transferring to Medicine MBChB
Up to five offers for entry into Year 2 of the Edinburgh MBChB programme will normally be made to final-year BSc (Hons) Medical Sciences undergraduates. Application for these places should be made through UCAS.

**Medicine A100**

---

**Why choose Medicine at the University of Edinburgh?**

- We’re ranked in the UK top 10 for medicine by both the Complete University Guide 2019 and the Guardian University Guide 2019.
- You will complete an academic year of full-time, research-based study in Year 3, meaning you will graduate with two qualifications: a research-based BMedSci (Hons) and an MBChB.
- We have a high graduate employment rate, with 99 per cent of our students progressing to employment or further training six months after graduation.

**Introducing Medicine**

Medicine at Edinburgh offers a modern, innovative curriculum designed to prepare you for contemporary medical practice. Our aim is for you to graduate as a competent, ethical and reflective doctor, with the care of patients your first concern. You will graduate as an excellent communicator and team player, prepared for complex and uncertain situations, equipped for ongoing personal development, and trained for high professional achievement and leadership.

**The breadth and depth of medical knowledge is expanding exponentially, with advances in medical science and research rapidly translated into clinical practice. Edinburgh’s future doctors will be equipped with an understanding of the underpinning science and the clinical skills to treat patients effectively, as well as the personal attributes and attitudes required by medical practice and to meet the standards of good medical practice as laid out by the General Medical Council (GMC).**

We are the only Scottish institution to offer a six-year MBChB programme, which includes a year of full-time, research-based study in Year 3. We have a long history of medical students taking a year of intercalated research as part of their medical training and our programme embeds this research year into the training of all of our medical cohort. Many students will either present or publish their research findings, which is beneficial to their future career and our graduates typically perform well in entrance exams for the Royal Colleges of Physicians and Surgeons. You will choose from a range of more than 20 third year honours programmes that cover biomedical and clinical science as well as the medical humanities. These include diverse disciplines such as neuroscience, immunology, global health, anthropology and sociology of medicine and health sciences, which has surgical, medical and primary care streams.

At the end of the programme you will graduate with both a research-based Bachelor of Medical Sciences honours degree and an MBChB primary medical qualification. You will have a deep understanding of medical research and evidence-based medicine, and will have developed your analytical skills. All these will be useful in your chosen career, allowing you to understand and lead innovation in all fields of medicine from general practice to hospital-based specialties or public health. Progression directly from Years 2 to 4 is possible but will only be considered in special circumstances, such as graduates employed in primary care.

The MBChB curriculum content is designed to meet the GMC’s outcomes for graduates. These will be achieved as you progress through your courses and attachments, based on the human experience, activity and behaviour, from biomedical sciences to clinical practice within GP practices and hospitals, as well as attachments in Edinburgh and across south east Scotland. By the end of the programme, you will be well-equipped for a career in academic medicine, general practice or hospital medicine.

You will be given a Personal Tutor who will meet you regularly during your programme to offer help and advice. In Years 4 to 6 you will be assigned a Clinical Tutor Associate each month, a doctor in training who will offer you individual tuition tailored to your educational needs.

**Placement**

Exposure to the clinical environment and patient care is a feature throughout the programme and our graduates typically perform well in entrance exams for the Royal Colleges of Physicians and Surgeons. You will choose from a range of more than 20 third year honours programmes that cover biomedical and clinical science as well as the medical humanities. These include diverse disciplines such as neuroscience, immunology, global health, anthropology and sociology of medicine and health sciences, which has surgical, medical and primary care streams.

**Accreditation**

The programme is accredited by the UK General Medical Council and recognised by overseas accrediting bodies in the US, Canada, Australia and elsewhere.

**Medical Licensing Assessment**

The GMC will introduce a Medical Licensing Assessment (MLA) in 2022. To obtain registration with a licence to practise medicine in the UK you will need to pass both parts of the MLA, as well as your university finals, and demonstrate your fitness to practise.

**Study abroad**

You will have the opportunity to study abroad for a maximum of 6 weeks in Year 6.

**Additional costs**

- You will incur travel costs, both to our main teaching location a 20-minute bus ride from central Edinburgh and to your clinical placements. An annual student ticket from Lothian Buses costs £525. We provide a travel subsidy of more than £900 per student over the course of the programme. Other financial support is available. You are also expected to purchase a stethoscope in Year 4 of the programme. Scrubs will be provided.

**Career opportunities**

- We participate in the UK Foundation Programme Scheme, which places graduates in Foundation Doctor posts across the UK. Many graduates move on to work with distinguished national and international research groups. Further information is available online.

**Further information and programme-specific entry requirements at www.ed.ac.uk/ug/40**

---

**“The programme creates well-trained doctors through rigorous clinical teaching. It also teaches us about the global importance of health and places things in context. With Edinburgh’s reputation, I am comforted that I will be guaranteed a job in the future.”

Amika Wilder-Smith 3rd year MBChB Medicine**

---

**Year by year…**

**Year 1**
- You take courses that introduce the scientific, sociological and behavioural principles of medicine and place them in the context of patient care. Areas covered will include anatomy, surgery, infection, safe prescribing, knowledge of clinical practice and research and evidence-based medicine.

**Year 2**
- You will develop your practical, research and clinical skills, including history-taking and examination. You will develop your skills in homeostasis in the body, health promotion, global health and nutrition, statistical reasoning and medical informatics. You will work in small groups, taking part in clinical projects and spending time in general practice.

**Year 3**
- All students will enter an honours programme to obtain a Bachelor of Medical Sciences degree. Many students study a scientific discipline in depth, gaining research experience, and submit a dissertation. Recently established disciplines include health sciences and programmes in the medical humanities.

**Year 4**
- You will study all aspects of clinical medicine and healthcare delivery as part of a team. Courses continue to cover biological and clinical sciences and you will develop your practical experience through placements in hospitals and general practice.

**Year 5**
- You will move around a number of specialties, working on hospital wards as part of a team. In addition to further clinical placements in a range of disciplines, you will complete an individual research project in partnership with a clinical tutor.

**Year 6**
- You will consolidate your learning from previous years, working on an apprenticeship model to prepare for employment in the postgraduate Foundation Programme. There is an emphasis on developing practical skills and knowledge of general and acute medicine, emergency medicine, surgery, anaesthetics and intensive care. You will have the opportunity to assist a training doctor and, under supervision, undertake some of the duties of a Foundation Year 1 doctor. You also have an elective period, which is usually undertaken overseas.
Oral Health Sciences

Why choose Oral Health Sciences at the University of Edinburgh?

You will have the opportunity to explore aspects of oral health sciences through increased clinical time and the completion of a dissertation in Year 4.

You will receive closely-supported learning, particularly in the clinical setting. Our class sizes are around 10 students a year.

In Year 4 you will attend clinical placements for two days a week, working in outreach centres where you will gain valuable experience treating patients in a primary care setting.

Introducing Oral Health Sciences

The oral health sciences programme leads to a dual qualification in dental hygiene and dental therapy. It combines dental science with research, exploring the prevention and treatment of oral disease in both adults and children. Dental hygiene therapists are an integral part of the dental team and belong to the group of Dental Care Professionals.

Over the four-year honours programme you will study courses from four key areas: health and disease; clinical practice; personal and professional development; and preparation for practice. Our small class sizes provide a supportive learning environment and we offer a significant focus on practical skills, with clinical treatment of patients commencing in Year 1.

Your academic progress will be assessed through written examinations, simulated clinical cases and assignments, either at the end of each semester or at the end of the year. Your clinical progress is continually assessed throughout the programme, with objective structured clinical examinations (OSCEs) and direct observation of procedural skills (DOPS) being an integral part of the process.

Placements/Observations

You will be given the opportunity of working and observing in a number of different areas of dentistry. These include oral surgery, dental laboratory, general anaesthesia sessions and areas within the oral health improvement teams. In Year 4 you will attend dental outreach centres in the public dental service.

Career opportunities

Career opportunities for oral health sciences graduates in the UK exist within the NHS, private practice, in research and in academia. On graduation, you must register with the General Dental Council prior to commencing employment.

**Advice for applicants**

**Standard entry requirement:**

For D100:

- SQA Advanced Highers BB.
- SQA Highers AAAAB.
- A Levels AAA.
- IB 38 points (grades 666 at HL).

**Minimum entry requirement:**

Please see detailed information at:

[www.ed.ac.uk/vet/admissions](http://www.ed.ac.uk/vet/admissions)

**For D102:**

- A 2:1 BSc (Hons) degree or equivalent in a biological or animal science related subject.

**Additional requirements:**

- A Work Experience Summary (WES) and Additional requirements:

  - A 2:1 BSc (Hons) degree or equivalent in a biological or animal science related subject.

**Introducing Veterinary Medicine**

Veterinary medicine at Edinburgh mixes the best traditions and professional development portfolio world class.”

**Why choose Veterinary Medicine at the University of Edinburgh?**

We are consistently ranked one of the world's top veterinary schools. We are 1st in the UK in both the Guardian University Guide 2019 and The Times 2018 veterinary subject league tables. We are 5th in the world in the Shanghai Global Ranking of Academic Subjects 2018 and 8th in the world in the QS World University Ranking by Subject 2018.

We are accredited by The Royal College of Veterinary Surgeons (RCVS), The American Veterinary Medical Association (AVMA), The Australasian Veterinary Boards Council (AVBC), The South African Veterinary Council (SAVC), and The European Association of Establishments for Veterinary Education (EAEVE) meaning our graduates can expect career opportunities worldwide.

On our integrated programmes you will study a wide range of animals from large and small companion animals and exotics to a variety of wildlife species.

**Additional costs**

Additional costs include compulsory specialised equipment and protective clothing [estimated at £150], and locker deposits (£15), and you will incur travel costs getting to Easter Bush campus. Using public transport from the city centre will cost around £560 a year, which we will proportionally subsidise in line with your year of study. In addition, extramural study (externships) of 38 weeks will incur additional accommodation and travel costs. Limited grant funding may be available from the University, but is unlikely to cover the full costs of extramural study. For international students, your immigration application may include a healthcare surcharge of around £300 a year.

**Intercalated degrees**

If you have a special interest in animal disease, you can undertake BSc (Hons) Veterinary Science after Year 2 of the five-year programme (or Year 1 of the four-year programme). You can take a year of advanced study in a subject such as biochemistry, infectious diseases, neuroscience or zoology.

With permission, you may attend intercalated degree courses at other UK universities or veterinary colleges, or in other parts of the University of Edinburgh, then return to complete your BVMS. For exceptional candidates, there are also opportunities to study a one-year research MSc or intercalated three-year PhD. You can also enrol on one of our prestigious intercalated degree courses at other UK universities or veterinary colleges, or in other parts of the University of Edinburgh, then return to complete your BVMS.

**Career opportunities**

Our programmes are designed to train and prepare you for a career as a veterinary practitioner in general practice or in a specialised field such as small animal, farm animal, equine or exotic animal practice. They also prepare you for further training in a specialised clinical field. Opportunities exist for you to get involved in wildlife disease prevention, endangered species conservation, government service or livestock husbandry education in the developing world.

You can also pursue a research career. The School incorporates the Roslin Institute, which, with the Moredun Research Institute and Scotland’s Rural College, is a member of the Easter Bush Research Consortium – representing one of the world’s highest concentrations of animal scientists.

**Accreditation**

The extensive accreditation of our programmes means graduates can practise veterinary medicine throughout the UK, Europe, North America and Australasia. The BVMS is the equivalent of the North American Doctor of Veterinary Medicine (DVM), with the same standing worldwide.

**Programmes**

**BVMS**

- 5 years: Veterinary Medicine D100
- Graduate Entry Programme – 4 years: Veterinary Medicine D102

**More information:**

[www.ed.ac.uk/vet/studying](http://www.ed.ac.uk/vet/studying)
Welcome to the College of Science & Engineering

From the telephone to the television, motion pictures to radar, the bicycle to the steam engine and vaccine development to animal cloning, Scotland has always been at the forefront of science and engineering innovation.

Our College of Science & Engineering is proud to stand on the shoulders of the great thinkers behind these technological achievements and to inspire and produce the next generation of innovators. We are one of the UK’s largest science and engineering institutions with more than 3,400 staff and more than 10,000 students and we represent some of the world’s finest talents.

Current projects include nanotechnology, intelligent robotics, synthetic biology and exploring ways to harness renewable energy in response to international concern about climate change and the need to secure affordable energy supplies in the future.

Most of our programmes allow you to broaden your intellectual horizons by taking courses in Years 1 and 2 from a range of subjects across the University, such as our extensive suite of languages.

Illustration shows the Sanderson Building at the University’s King’s Buildings campus.
Why choose Biological Sciences at the University of Edinburgh?

We are ranked 5th in the UK and in the world's top 25 universities for biological sciences in the QS World University Rankings by Subject 2018. Our programmes will give you a solid grounding in fundamental topics allowing you to specialise in Year 3 and complete an independent research project in Year 4. You will be taught in state-of-the-art laboratories and in interactive computing studio facilities.

Introducing Biological Sciences

Biology is the study of life and embraces many different areas of both biological and biomedical interest. Studies range from exploring molecular structures, to understanding how genes work, the development and behaviour of microorganisms, plants and animals, their evolution, and their environmental interactions and impacts. It reveals core scientific knowledge of how cells and organisms function, and results in applications that underpin areas of both biological and biomedical interest.

The School of Biological Sciences offers several programmes spanning the breadth of biology. On our BSc (Hons) Biological Sciences or Biological Sciences with Management, you enter a general programme where you will be able to experience a range of courses before choosing your final subject specialisation. A number of these courses are in areas that you will not have had the opportunity to study before. We therefore offer a flexible learning experience, where you can tailor your programme to whichever career path you choose.

You will be taught in an internationally reputed research environment, with access to modern facilities. You will also be directly involved in research projects as part of your training. Most courses combine lectures, tutorials and practical or workshop sessions. You will be involved in individual study, active learning in groups and in team projects. Years 1 and 2 usually involve approximately nine hours of lectures and workshops, eight hours of practicals and two hours of tutorials each week. In later years, you will undertake more personal study and research. You will be linked with a research group and an in-depth project will form an important part of your final-year assessment.

Please apply for only one of the programmes in this group. You should also choose a subject specialisation on your application so we can appoint you to a Personal Tutor within the field where your interests currently lie. If you have no subject specialisation preference at this stage, choose Biological Sciences (C100). If you are interested in Biological Sciences with Management (C1TV), please put this choice on your application to ensure you are enrolled on the relevant compulsory business courses. Regardless of application choice, you will have the flexibility to change programmes within Biological Sciences provided the required courses have been passed.

Additional costs

You may incur additional costs of up to £150 for each year of your programme for purchasing books or other compulsory study material. Additional costs will be incurred for field or residential courses. You may choose to take more than one of these courses. All Year 4 students will attend a compulsory field or residential course. Currently, field or residential course costs vary on average from £150 to £300 per course for transport and accommodation. The costs for field courses will be due to be paid in the year the course is taken.

Career opportunities

The analytical and scientific skills you will gain will equip you for a variety of careers. The core skills which you will develop will enhance your employability. Our graduates go on to a range of careers. These include industry-based occupations. Some choose further study before entering successful academic or other career paths.

Chemistry

Why choose Chemistry at the University of Edinburgh?

All our chemistry programmes are accredited by the Royal Society of Chemistry, and our chemical physics programmes are accredited by both the Royal Society of Chemistry and the Institute of Physics.

You will have the opportunity to take an academic year-long research placement at a university in Asia, Europe or the US or a year-long industrial research placement, if you are studying an MChem or MChemPhys.

You will have the opportunity to combine chemistry with a wide range of other disciplines in Years 1 and 2.

Introducing Chemistry

Chemistry is the study of atoms, molecules and ions – their physical and chemical properties, their composition and structure, and their role and uses in every aspect of our lives.

Our programmes retain a broad perspective, preparing you for a range of potential careers in chemistry, or science more generally. All our programmes include practical aspects to develop your analytical, problem-solving and numeracy skills. Small-group workshops, tutorials and presentations will improve your communication and presentation skills, making you attractive to employers in many areas of industry and commerce.

The School of Chemistry has an enthusiastic and committed staff team that provides a supportive learning environment and a flexible approach to study.

A Levels A’AAA to AAA.
IB 38 points (grades 666 at HL).

Please note: This indicates the overall standards required to consider you for entry. The standard entry requirement range and minimum entry requirement are explained on page 9. Full, detailed entry requirements, including the subjects you need, vary by programme. Please check the full details before you apply: www.ed.ac.uk/ug/3

Placements

A year-long placement in industry, either in the UK or overseas, or with one of our partner chemistry departments at a range of universities overseas, can be included as part of our MChem or MChemPhys programmes. These placements will form the final year of your programme and will be comprised entirely of research project work. Those students who do not undertake one of these options will complete a final-year research project in Edinburgh occupying the full year.

Study abroad

 Overseas study in Europe, North America or Asia can be included as part of our MChem or MChemPhys programmes. This would form the final year of your programme and includes significant research project work.

Opportunities for study abroad currently include most European countries, the US and several countries in Asia. Students hoping to study in Europe may need to select an appropriate language course as an option in Year 1 or 2, for which a secondary/senior school-level language qualification is desirable.

Additional costs

You will require a white lab coat which cost £15 in 2018. In addition, you must also purchase three core textbooks in Year 1, which cost £125 in 2018. While you are on placement you may incur travel costs. However, most students who are on industrial placement will receive a salary or stipend from their host company.

Career opportunities

Our graduates are highly regarded by national and international employers. Many graduates move into careers in the oil, chemical or pharmaceutical industries, in sales and marketing or research and development roles. Many graduates choose further study, leading to an MSc, PhD or teaching qualification. Your programme also prepares you for a variety of other careers, including areas such as management, finance or IT.

Further information and programme-specific entry requirements at www.ed.ac.uk/ug/3

Year by year...

Year 1
You will spend approximately a third of your first year in chemistry lectures, laboratory classes and small-group tutorials. For all students a mathematics course is also required. The remainder of your curriculum can be chosen from a broad range of courses from across the University.

Year 2
You continue with your chemistry course, which again takes up about a third of your time. Additional courses such as Environmental Chemistry, Materials Chemistry, Chemical Pharmacology or courses in physics or mathematics may be required or recommended for your specific programme but most programmes still allow considerable choice of option subjects at this stage. The range of option courses available over the first two years allows real flexibility to maintain options to transfer between different programmes within the College of Science & Engineering.

Year 3
You will study compulsory chemistry courses that provide a foundation for the remaining honours years. If you are studying the chemical physics programme you will take a combination of chemistry and physics courses.

Year 4
You will take compulsory courses from your programme and will choose from a range of other advanced chemistry courses. Students on the BSc programmes will have a choice between a final-year research project or a science education placement with a local school, or a teaching qualification. Students on the MChem/MChemPhys programmes will take a research training course in preparation for their final-year project.

Year 5 (MChem/MChemPhys)
You will undertake a full-year research project. You will have the choice between remaining in Edinburgh to work on projects supervised by a staff member in chemistry (or physics for chemical physics students), or seeking to secure a place to undertake your project while on placement in industry, a government research institute, or in the chemistry department of one of our exchange partner universities around the world. Typically more than 50 per cent of students will follow one of these placement options.
Why choose Computer Science (Informatics) at the University of Edinburgh?

We're ranked 14th in the world, and 4th in the UK, for computer science in The Times Higher Education World University Rankings 2018 by Subject. We offer a wide range of courses that allow you to learn about topics such as robotics, language processing, computer security, interface design, operating systems, or computer models of the brain.

Our strong links with industry can help you find exciting internships, and our ties to University and national research centres offer opportunities to get involved in research that is transforming our world.

Introducing Computer Science (Informatics)

Informatics is the study of information, computation and communication in artificial systems such as computers, and in natural systems such as brains, genes and living cells. We offer programmes in computer science, artificial intelligence, software engineering, and cognitive science, and in informatics, which includes all of these disciplines.

Studying at the University of Edinburgh's School of Informatics will provide you with a good foundation in computer science and will offer a new perspective on ways that computational thinking can be applied to different settings.

You will develop a solid scientific understanding, and the practical skills required to analyse, design, implement and maintain computer-based systems in any setting. Our MInf programme allows you to study up to masters level as an undergraduate. You will take advanced courses, study subjects in depth and choose from a broad range of topics.

Artificial Intelligence

Artificial Intelligence is the attempt to build artificial systems that have intelligent behaviour. There are two main directions of research. One is to understand natural intelligence by the use of computer models. The other provides techniques and technology for building systems capable of intelligent decisions and actions. This AI is both a science and an engineering discipline. Applications of AI range from ‘smart’ controllers for household devices to computers that can converse in English, play games, conduct intelligent web searches or act as the brain of a robot.

Cognitive science

Cognitive science is the study of the mind and how it works to solve everyday tasks such as visual processing, reasoning, memory, problem-solving, language and communication. This programme focuses on both behavioural and computational aspects of cognitive science, giving you the opportunity to learn a range of skills and to explore different ways of studying the mind, from experiments with human participants to building computer simulations.

Software engineering

The study of software engineering will teach you how to write good software and give you the engineering skills needed to meet requirements such as reliability, maintainability, usability and cost-effectiveness. Our programme is directed towards the practical application of computing sciences, as computer systems grow in size and complexity.

Career opportunities

Our graduates have excellent career prospects. The vast majority make direct vocational use of their qualification in the IT industry. Increasingly however, our graduates also find work in the trades, industries and professions that rely heavily on computing systems, including media, communications, finance, energy and medicine.

Further information and programme-specific entry requirements at www.ed.ac.uk/ug/9
Earth Sciences

Why choose Earth Sciences at the University of Edinburgh?

We’re ranked in the UK’s top 25 universities for Earth and marine sciences in the QS World University Rankings by Subject 2018. You will join a community of the largest group of Earth scientists in Europe. This not only feeds into what we teach but will also provide you with a broad programme of study in your final year and a greater choice of topics for your independent research dissertation.

We have a large range of specialist facilities that will be relevant to your programme, including geophysics field equipment, airborne drone imaging, geochemistry laboratories, and high-performance computing.

Introducing Earth Sciences

Studying Earth sciences at Edinburgh offers you an opportunity to study all aspects of the Earth, from formation, planetary accretion and the evolution of life to present-day surface and environmental processes and the impact of global climate change.

The Earth sciences embrace many of the natural and physical science subjects, including mathematics, physics, chemistry, biology and geography, to understand the Earth and its development through time.

Our programmes all have a strong practical element where your observational, analytical and quantitative skills are developed, including computer modelling and programming. Fieldwork is central to all our programmes and is an important part of building a sense of community during your studies. Destinations may include local iconic landmarks, such as geologist James Hutton’s unconformity at Siccar Point in East Berwickshire, and locations abroad, such as Jamaica, Spain, Iceland and Cyprus.

Additional costs

Due to the support of our generous alumni community, all travel and accommodation costs associated with compulsory field trips will be waived from 2019. All our programmes involve a significant element of field study and we are pleased to be able to support our students as they learn practical and highly prized skills.

Environmental Geoscience

Can man coexist with nature? This question is at the heart of our BSc (Hons) Environmental Geoscience programme. You will explore the Earth’s environments and the processes that maintain and modify its surface, including man’s impact on atmospheric, terrestrial and marine geochemical cycles.

Geology

Understanding the formation and evolution of Planet Earth, how it has changed over billions of years and predicting what it will be like in the future is at the core of our geology programmes. You will develop and apply key scientific and transferrable skills to answer fundamental questions in earth science.

The five-year MEarthSci programme follows BSc Geology until the end of Year 4. In Year 5 you will develop your analytical skills and a higher level of understanding of the Earth system.

Geophysics & Physical Geography

Our geophysics programmes study the Earth’s systems, including its atmosphere, through the use of physics and mathematics. You will learn the fundamental physical principles and mathematical techniques underpinning the subject, and their application to fields as diverse as oil and gas exploration, weather forecasting, environmental monitoring and protection, and mitigation of natural hazards. You will also gain an understanding of the inner workings of our planet. You will use a wide range of facilities in the lab and in the field, such as gravity meters, magnetometers, seismic/electromagnetic prospecting equipment and various meteorological sensors. The five-year MEarthPhys programme follows BSc Geophysics until the end of Year 4. In Year 5 you will focus on an independent research project.

Placements

Students on our Geosciences with Professional Placement programmes may spend up to 12 months working in industry or with another professional organisation. Placements for other programmes take the form of short or vacation internships, which you can arrange yourself or with the help of the University’s Careers Service.

Career opportunities

The vast majority of our graduates move straight into degree-related employment or further study.

Our graduates are highly sought after by industry (including renewables) and resource companies, environmental consultancies and the financial sector, and many also find employment in the areas of environmental planning and regulation, geosimulation, science communication and education, and engineering.

We also have a professional advisory board that provides support on employability skills.

Further information and programme-specific entry requirements at www.ed.ac.uk/ug/7
Ecological & Environmental Sciences

Why choose Ecological & Environmental Sciences at the University of Edinburgh?

Edinburgh is the only place in the UK where you can study ecological and environmental sciences together in an integrated programme.

We’re ranked in the world’s top 25 universities for Earth and marine sciences in the QS World University Rankings by Subject 2018.

You will take part in residential fieldwork trips around Scotland from Year 2 to Year 4.

Introducing Ecological & Environmental Sciences

The growing world population means we now face problems of over-exploitation of natural resources, rapid climate change and habitat degradation. Ecology is the scientific study of the interaction of organisms with each other and their physical, chemical and biological environment. Environmental sciences integrates ecological, chemical and physical sciences to understand our changing environment. A combination of the two is vital to understanding and tackling these global issues. The study of ecological and environmental sciences will appeal to students with an interest in the diversity of the natural world and those concerned with environmental issues.

Curriculum choice

We offer a choice of two programmes. You can either take Ecological & Environmental Sciences or Ecological & Environmental Sciences with Management. For each, there is a broad range of topics available, with the opportunity to specialise in the area(s) of ecology and environmental sciences that interests you most in later years.

Ecological & Environmental Sciences

You will study a wide variety of courses, starting with those focused on the origins of life, the basics of ecological theory, and global environmental processes. You will examine topics such as biodiversity, conservation management and land-use change, while also gaining a broad understanding of physical, chemical and biological sciences.

Through field studies and taught courses you will discover and test methods used in ecological and environmental analysis. Later in the programme you will explore topics such as water resource management, land use, environmental pollution and environmental modelling. You will be taught by staff involved in high-level research in these subject areas.

You will have the opportunity to undertake research projects, including an independent research project in Year 4 and will complete field and laboratory assignments, including at least three week-long field trips in Scotland.

Ecological & Environmental Sciences with Management

You can combine your study of ecological and environmental sciences with the study of management. In addition to the above, you will study management courses from the Business School and the School of Economics, as well as from Schools across the College of Science & Engineering. This programme is particularly relevant to those seeking careers in policymaking, consultancy or in the management of natural resources.

Additional costs

Due to the support of our generous alumni community, all travel and accommodation costs associated with compulsory field trips will be waived from 2019. All our programmes involve a significant element of field study and we are pleased to be able to support our students as they learn practical and highly prized skills.

Career opportunities

Our programmes are particularly relevant if you are interested in working for an environmental consultancy or conservation organisation but also prepare you for careers in the forestry and water industries. Graduates have also gone on to work for government agencies, providing policy advice, or have entered teaching, finance or management. Many use the University’s research contacts to gain experience in their area of interest before starting work or continuing with their studies.

Programmes

BSc (Hons) Ecological & Environmental Sciences CF17 Ecological & Environmental Sciences with Management CN12

You may also be interested in Biological Sciences Page 118

Further information and programme-specific entry requirements at www.ed.ac.uk/ug/2

“The programme involves fieldwork, with projects in nearby Braidburn Valley Park. We independently designed and completed our own projects. This provided valuable experience designing projects and collecting data.”

Rhianna Shearer, year 3 BSc Honours Ecological & Environmental Sciences

You can combine your study of ecological and environmental sciences with Management so you can gain an understanding of the economic and social context of environmental problems at both local and global scales.
Introducing Engineering

Engineers create innovative solutions to real-world problems. We invent products, systems and processes that are faster, smaller, cleaner, safer, stronger, more efficient, more environmentally friendly, more economical, more sustainable and more marketable.

Why choose Engineering at the University of Edinburgh?

All our programmes are accredited by their relevant professional institution. Our engineering disciplines have an Industrial Advisory Board, which ensures that our programmes meet the current needs of industry.

Engineering is a vibrant and diverse subject. Whether tackling the global challenge of climate change or developing new medical devices, we will equip you with the skills to help solve society’s most pressing problems.

MEng students take part in multidisciplinary group design projects developed in collaboration with industry. Recent student successes include our team winning top prize at the 2017 Timber Research and Development Association (TRAIDA) student design competition; and HypED was the only UK team to participate at the Hyperloop 2017 finals.

Programmes

BEng (Hons) / MEng (Hons) – 5 years

- Chemical Engineering H800/H804
- Civil Engineering H800/H803
- Electrical & Mechanical Engineering H836/H836
- Electronics & Computer Science H900/H900
- Engineering H901/H901
- Environmental & Fire Safety Engineering H902/H901
- Structural Engineering with Architecture H921/H921
- Mechanical Engineering H921/H921

Our programmes cross the traditional engineering boundaries through cross-disciplinary design projects and teaching, in recognition of the multidisciplinary nature of modern engineering projects. On graduation from any of our programmes you will leave with a thorough core knowledge, together with analytical, practical, design and communication skills, enabling you to join a design, production or research team – or move rapidly into management and leadership roles.

You can keep your options open between these disciplines by applying for H100 Engineering. In Year 1 you will study a general engineering course that covers all four teaching areas. You must follow at least two of these, but can elect to study three or four if you wish. The route provides an insight into engineering as a whole, and helps you focus on areas of particular interest. On completion of the first semester, you will discuss your options with your Personal Tutor and transfer to one of the discipline programmes offered by the School of Engineering. All programmes, except Structural Engineering with Architecture, are available through this route.

Suitably qualified students may opt to apply for direct entry to Year 2, in which case flexibility is reduced, but the length of study is the same as a comparable degree in the rest of the UK. Note that H100 and Structural Engineering with Architecture are not available to students applying for direct entry to Year 2.

Accreditation

All our MEng programmes are accredited as fully satisfying the educational base for a Chartered Engineer (CEng). All our BEng programmes are accredited as partially satisfying the educational base for a Chartered Engineer (CEng). An accredited programme is needed to complete the CEng educational base.

Placements

MEng students have the opportunity to undertake a six-month placement in Year 4 in industry or at a research institution or university overseas. We will support you to secure a placement and all placements advertised by the School will be remunerated.

Additional costs

You are expected to purchase your own protective clothing, with a typical cost of between £3 and £5 depending on your programme. On Civil Engineering, Structural & Fire Safety Engineering, and Structural Engineering with Architecture, a compulsory surveying field trip in Year 2 costs around £250.

Scholarships

UK students on our electronics and electrical engineering programmes are eligible for a number of industrially funded scholarships from various sources. Please check online for details.

Career opportunities

Studying engineering at the University of Edinburgh prepares you for a career as a professional engineer in the UK or abroad and all programmes meet the requirements of the UK professional engineering bodies. Typically many of our graduates move on to work in internationally leading engineering companies, in technical, consultancy and managerial roles, including company directorships. Alternatively, many of our graduates have gone on to work in other areas, including the civil service, education, the armed forces and the financial sector.

Year by year...

Year 1

Your time will usually be divided between engineering, mathematics and option courses. You study several branches of engineering, followed by the first in-depth study of your preferred subject. For most of our programmes you can choose an option course from the sciences, arts or humanities. Chemical engineering students must take chemistry in Year 1.

Year 2

You will study your chosen branch of engineering, supported by courses in mathematics. You extend the application of your scientific and mathematical skills to solving engineering problems, building on your experiences from Year 1.

Year 3

You will now focus on your chosen field of engineering. At the end of Year 3, you will have the option of completing one more year for a BEng (Hons) or for a further two years for an MEng (Hons).

Year 4

You will concentrate on specialist study and develop your skills in applying this knowledge to a range of specialism areas. You will gain substantial work experience through several option courses and you will develop your projects in the final year.

Year 5 (MEng)

You will have further opportunities to broaden and deepen your understanding of fundamental engineering concepts with several option courses and you will develop your skills in applying this knowledge in a range of specialism areas. You will produce a substantial project that may involve working overseas or in industry in Year 4 or 5, depending on your discipline. You may also participate in our unique interdisciplinary design projects, initiated with support from the Royal Academy of Engineering.

“My impression from the open day chimed with the reasons I chose to study engineering, emphasising social and environmental consequences of sustainable engineering. Strong industry links in the renewables sector were also presented.”

Malise Edwards Mowforth

3rd year MEng (Hons) Mechanical Engineering
Why choose Geography at the University of Edinburgh?

We're ranked in the world's top 15 universities for geography in the QS World University Rankings by Subject 2018.

Edinburgh is a perfect location to study geography, combining the physical environment of the ancient volcano Arthur's Seat, with the human geographer's interests of a capital city and economic hub.

Each year, you will have fieldwork opportunities not only in Scotland but further afield. Recently, our students have undertaken fieldwork in Iceland, Greece, Germany, South Africa and Wales.

Introducing Geography

Geography is the study of the way the world works. As such, it is a uniquely diverse and integrative discipline that spans the natural and social sciences.

Geography can be studied as a natural science resulting in a BSc (Hons) award, or as a social science or humanities subject for the MA (Hons) award.

As a natural science, geography focuses on the environment, examining such issues as landscape formation, natural hazards and climate change, and the evolution of these processes through space and time. If you study it as a social science or humanities subject you will learn about the relationships between people and their social, cultural, political and economic worlds.

In both cases, the relationship between the human and physical environments is recognised to be important, and both BSc and MA students may choose human geography or physical geography options or a combination of both.

Study abroad

You will have the opportunity to study the European exchange programme Erasmus+ in Year 3 or to study in Canada, the US, Australia or New Zealand.

Additional costs

Due to the support of our generous alumni community, all travel and accommodation costs associated with compulsory field trips will be waived from 2018. All other programmes involve a significant element of field study and we are pleased to be able to support our students as they learn practical and highly prized skills.

Career opportunities

Studying geography at Edinburgh prepares you for a range of careers, including scientific and humanities research, planning, surveying, environmental consultancy, conservation, energy, teaching, non-governmental organisation work and geospatial data analysis. A significant number of graduates also move on to careers such as finance, marketing and law, or go on to further postgraduate study and research.

Advice for applicants

Standard entry requirement:
SQA Highers AAAA to AAAAA.
A Levels AAA to ABB.
IB 37 points (grades 666 at HL) to 32 points (grades 655 at HL).

Minimum entry requirement:
SQA Highers AABB by end of S6, with a minimum of BBB achieved in one year of S4-S6.
A Levels AAB.
IB 32 points (grades 655 at HL).

Please note This indicates the overall standards required to consider you for entry. The standard entry requirement range and minimum entry requirement are explained on page 9. Full, detailed entry requirements, including the subjects you need, vary by programme. Please check the full details before you apply: www.ed.ac.uk/ug/6

Why choose Mathematics at the University of Edinburgh?

We're ranked in the UK's top 10 universities for maths in the Complete University Guide 2019 by Subject, and the QS World University Rankings by Subject 2018.

Our broad-ranging research supports advanced courses including analysis, algebra and geometry, and applied topics such as statistics, operational research, finance, data science and mathematical biology.

We invest greatly in our learning community. You will be supported by MathPALS, higher-year students who will provide help and advice. Our MathsBase and MathsHub provide common areas for socialising and study.

Introducing Mathematics

Mathematics is central to everyday life and to the way we see the world. It is an intellectual adventure in its own right but it is also used to understand the physical world – from gravitational waves to climate change – and to find solutions in business and industry.

All of our students take the same compulsory courses in their early years and it is normally possible to switch between our different programmes in Years 1 and 2. In later years you can choose from our wide range of courses in pure mathematics, applied mathematics, statistics, operational research and financial mathematics. The majority of our content is taught through lectures and small group teaching sessions, called workshops. We actively encourage collaborative working on our programmes.

Mathematics programmes

• BSc (Hons) Mathematics allows you to tailor your studies to fit your interests. You can also specialise in applied mathematics or statistics.
  • For the MA, you will also study arts subjects in Years 1 and 2.
  • You offer joint honours options that allow you to study mathematics with biology, physics, computer science, music, business, management, economics, or philosophy.
  • The MMath adds an extra year of masters-level study to the end of the programme. This is designed for those who want to study in more depth, or who intend to use advanced mathematics in their careers or research.

Broad and accelerated programmes

All of our programmes can be taken in broad form, where you will also study other subjects in Years 1 and 2. These may be in related areas such as physics or economics, or from the wide range offered across the University. On a broad programme, the BSc and MA take four years and the MMath takes five.

For some programmes, well-prepared applicants can choose second-year entry and follow an accelerated programme which concentrates on mathematics from the outset. We support this with extra mathematics courses covering the key ideas from Year 1 of the programme.

Year by year...

Year 1
You will take three compulsory courses: introduction to Linear Algebra. Calculus and its Applications; and Proof and Problem Solving. These are common to all our programmes and will take up half of your timetable. They will allow you to build on your knowledge of pure mathematics and introduce you to the more rigorous ways of mathematical thinking required at university level.

Some students will also take our online course, Fundamentals of Algebra and Calculus. This introductory course provides extra preparation in key topics from advanced mathematics. You will also take courses in subjects other than mathematics.

You will receive support from MathBase, our popular walk-in help centre, and from our Student Learning Advisor.

Year 2
You will spend between half and two thirds of your time on Mathematics. You will take three compulsory courses in pure mathematics, extending your knowledge of calculus, probability and analysis, and will be introduced to the abstract ideas of group theory. Other topics include statistics and applied mathematics. Most of the mathematics courses are compulsory to allow you to develop as a well-rounded mathematician. This also keeps a wide range of options available in the following years. From this year onwards you can use the MathHub, our student-run facility, which is both a social centre and a work space.

Year 3
You will focus on the main subjects of your programme. You will receive an excellent grounding in advanced mathematics, preparing you for the options available later in your programme. You will study up to four compulsory mathematics courses and will have the option to start to specialise. Current option courses include Financial Mathematics, Introduction to Number Theory and Statistical Computing.

Year 4
You will have a wide range of mathematics courses to choose from and you can follow a programme that suits your particular interests and career aspirations. You offer a large selection of courses in pure and applied mathematics, statistics and operational research. You can take options in areas such as mathematical education, financial mathematics and mathematical biology. Current courses include Fundamentals of Optimization, Algebraic Geometry and Knot Theory.

Career opportunities

Our graduates have a range of careers open to them. The logical and analytical abilities, together with the presentation and practical problem-solving skills you will develop, are sought by employers. Many recent graduates have been employed by large firms in the financial sector. Others have gone into fields including software engineering, logistics, education and the civil service. Graduates also go on to further study, pursuing MSc and PhD programmes in mathematics or related subjects.

Our alumni engage with students by participating in our annual Careers Showcase, which highlights the opportunities taken up by Edinburgh mathematics graduates.

www.ed.ac.uk/ug/6

Jordana Black 4th year BSc (Hons) Mathematics

“Studying here has been an absolute privilege. The flexibility between programmes allowed me to explore a huge variety of topics and specialise in those I am most interested in.”

Accreditation

Our BSc (Hons) Mathematics & Statistics programme is accredited by the Royal Statistical Society.

Additional costs

You should expect to purchase necessary textbooks for some compulsory and option components of your programme.

Study abroad

There are opportunities to study abroad through Erasmus+ or University-wide exchange programmes. Our students have recently completed placements in California, Sydney and Vancouver.

Scholarships

Scholarships are available to full-time undergraduates studying at the School of Mathematics. Scholarships are offered to students of outstanding ability for the duration of their studies, subject to satisfactory academic progress each year. Please check the School of Mathematics’ website for further information.

“Most of all, I’ve gained the ability to rigorously explore my own curiosity.”

Physics & Astronomy

Why choose Physics & Astronomy at the University of Edinburgh?

We’re ranked 4th in the UK in the Times Higher Education World University Rankings 2019 for Subject physical sciences (which includes physics and astronomy).

Final-year projects are frequently hosted at our world-class research facilities. These currently include the ARCHER supercomputing service: a state-of-the-art scanning confocal microscope in soft matter; and a high magnetic field laboratory that includes dilution capable of 15 mK temperatures, as well as flow and high-pressure chamber for planetary environmental simulation.

You will join a community of researchers and academics who work across major research facilities including the Centre for Science at Extreme Conditions, the UK Centre for Astrophotography, the Higgs Centre for Theoretical Physics and the new Higgs Centre for Innovation. Both Higgs centres have been named after our Emeritus Professor and Nobel Prize winner Peter Higgs.

All our single honours programmes are accredited by the Institute of Physics.

Introducing Physics & Astronomy

Physics is the study of matter and motion, what the world is made of and how it works. Physicists study everything from the smallest particles to the structure of the universe. Our programmes are flexible, so you can tailor your studies to your interests and chosen career. You will also be able to choose a range of subjects from other academic areas.

You will learn the fundamental principles of physics and start to specialise as you progress through your programme. You will also have the opportunity to study abroad on the MPhys Physics with a Year Abroad programme or our Erasmus+ or international exchange schemes.

Core skills you learn, such as how to assemble data by experiment, study or calculation, and how to draw conclusions from your observations, will prepare you for a range of careers, or for further study and research.

Astrophysics

Astrophysics introduces you to the basics of physics and demonstrates how this knowledge can be applied to the physics of astronomy. Recent astronomical discoveries have made it an increasingly popular area of study. We have close links with the Royal Observatory, Edinburgh, one of the UK’s major centres of astronomical research.

Computational physics

This physics-based programme is for students interested in computing, modelling and simulation. You will study programming, algorithms and problem-solving methodologies.

Accreditation

All our programmes are accredited by the Institute of Physics.

Career opportunities

A wide range of employers recognise that physics graduates have advanced problem-solving skills and the ability to think logically and critically about complex situations. Add this to a high level of mathematical ability, computing and IT proficiency and communication skills in written, oral and online media, and graduates have opportunities in a diverse range of careers. Our recent graduates have gone on to employment with a wide variety of organisations, including Google, the European Space Agency, the BBC and IBM. Physicists are sought after by many sectors, including engineering, manufacturing, energy, finance, medicine, and the space industries. A number of our graduates undertake further study or research.

The Edinburgh experience

“Edinburgh is one of Europe’s most beautiful cities, draped across a series of rocky hills overlooking the sea.”
Lonely Planet

Scotland’s inspiring capital will be the backdrop to your studies – an irresistible blend of history, natural beauty and modern city life.

Also known as ‘the Athens of the North’, Edinburgh is home to two UNESCO World Heritage Sites and was the world’s first UNESCO City of Literature.

Large enough to offer something for everyone, but small enough to feel like home, Edinburgh is a modern, sophisticated and beautiful European city with a diverse, multicultural community.

A single day could see you hillwalking in the morning, lazing on the beach in the afternoon, and enjoying the treasures of medieval lanes or Michelin-starred restaurants by night.

The friends you meet, places you discover and the lasting memories you create contribute as much to your university experience as your formal learning. Around 100,000 students call Edinburgh home, giving the city a unique buzz and ensuring you’ll be in good company.
“Edinburgh is a vibrant and thriving city; a place of fascinating historical significance and a bustling political and cultural hub. Not only do I love the city, but the University’s reputation, nationally and globally, precedes it.”

Jack Liddall
MA (Hons) History & Politics
“I am often surprised by the beauty of this city – I love its architecture, landmarks and beautiful skies! It feels like a real privilege to live here.”

Eleanor Williams
MA (Hons) Psychology
Named the UK’s second best student city, and seventh in Europe, in the QS Best Student Cities 2018.

See what student life is like in Edinburgh
www.ed.ac.uk/undergraduate/student-life
Learn from the best

Our world-class academics are leaders in their fields, conducting groundbreaking research that directly informs the teaching you receive.

We have influenced thinking for more than 400 years, from our central role in the European Enlightenment to the development of the technology in your smartphone.

Our approach to sharing knowledge and encouraging learning is recognised nationally and internationally. This ranges from the Royal Academy of Engineering adopting our Exemplars of Teaching Excellence to our pioneering development of Massive Open Online Courses (MOOCs).

Our world-leading researchers contribute to teaching, sharing their discoveries with students. Nobel Prize winner Professor Peter Higgs proposed the Higgs boson while he was a lecturer here. Our scientists created Dolly the sheep, the first mammal cloned from an adult somatic cell. We pioneered the first automated, industrial assembly robot and created the first genetically engineered Hepatitis B vaccine. We’re still working towards historic firsts today – new treatments for multiple sclerosis, motor neuron disease and breast cancer; and innovative work to tackle climate change.

Our versatile four-year programmes let you try a range of subjects before specialising, for a broader and more flexible education.

Benefits

• Flexibility: experience new subjects without committing long term;
• Good results: discover which subjects are best suited to you and tailor your programme accordingly;
• Personal development: an opportunity to grow intellectually;
• Breadth: wider learning is enriching, and attractive to employers.

How it works

Most of our programmes in the arts, humanities, engineering, sciences or social sciences let you study a range of subjects in Years 1 and 2, before specialising in Years 3 and 4. With your Personal Tutor (see page 149), you’ll choose three subjects to study in Year 1 – either from related areas or to experiment with different subjects. In Year 2, you’ll know which subjects you want to continue and which new ones you’d like to try. By Years 3 and 4, you’ll feel confident choosing which area(s) to specialise in. By the time you graduate, your breadth of knowledge will be highly prized by employers, giving you the best chance of success in your chosen career.

Duration

Scottish programmes traditionally take four years. This differs from the rest of the UK, but is a long-established European model, emulated in the US.

In many of our science and engineering subjects, well-qualified applicants may apply for direct entry to Year 2, making it possible to graduate with a BSc after three years of study.

Our Medicine MBChB is a six-year programme. Our Veterinary Medicine BVMS, and MA Fine Art take five years. In science and engineering we offer five-year, undergraduate, MChem, MChemPhys, Mlarrtsci, MIng, MMath and MPhys programmes, which include an additional year of in-depth study, often with a research focus. Again, well-qualified applicants may apply for direct entry to Year 2.

Specific entry requirements for all our programmes can be found online: www.ed.ac.uk/undergraduate/degrees

www.ed.ac.uk/undergraduate/teaching

www.ed.ac.uk/undergraduate/degree-structure

The University of Edinburgh Undergraduate Guide 2020 entry

The four-year experience

My story: Tabitha James

MA (Hons) Ancient & Medieval History

Tabitha’s choice of courses kindled her interest in history and our flexible four-year structure allowed her the freedom to change programme and pursue new career goals.

Coming to the University has been one of the defining moments of my life. The four-year programmes allow a great deal of flexibility and I have been able to fully explore my interests in different subjects.

I applied to study MA (Hons) French & Classics and took a linguistics option in Year 1, alongside other history courses, then economics in Year 2. The two pre-honours years offered me the opportunity to study courses that weren’t available at school, and in particular, to explore periods of history to a greater extent. That led to my change in programme to MA (Hons) Ancient & Medieval History. Since then I have been lucky enough to receive a scholarship to travel in Israel and Jordan to visit historical sites in the Middle East – trips that I would not have been able to afford otherwise.

Edinburgh has opened up many doors to me and although it is undoubtedly a huge learning curve, it is well worth the journey. Through the flexibility of the four-year system I have gained knowledge in areas that a shorter structure would not have allowed. This has given me a grounding in a variety of fields which, in turn, gives me transferrable skills I can take in to my career.

There is also a breadth of activities available at the University. I have taken advantage of the active theatre societies and became Marketing Manager at the Edinburgh University Theatre Company. The societies Edinburgh offers put students in positions of responsibility and allow us to gain skills in areas where we might not usually get the opportunity. Experiences such as this, as well as internship opportunities in the cultural city of Edinburgh, are all helping me consolidate skills that I might not learn through my programme alone.

“We opened up many doors to me and although it is undoubtedly a huge learning curve, it is well worth the journey.”

Resources and facilities

You will learn in an unrivalled environment of world-class facilities and remarkable, historic buildings, all set against the backdrop of Scotland’s inspiring capital.

Learning resources
You’ll get generous, flexible access to our state-of-the-art library and IT resources and study spaces, helping you fit study in to your busy life.

• Our Main Library, in George Square, is one of the largest academic libraries in the world with more than 2,300 study spaces. Power and wi-fi is available at every desk. The Main Library is open 24 hours a day, seven days a week. Other site libraries also have extensive opening hours and award-winning staff available to help.

• In total, our Main Library, site libraries and library storage facilities hold more than 2 million printed volumes, and provide access to almost 700,000 electronic journal titles, 100,000 e-journals, 700 licensed databases and more than 66,000 streaming videos.

• The DiscoverEd system helps you search and find all our library resources. Our electronic resources can be accessed on- or off-campus, 24 hours a day.

• Free laptop loans are available from our libraries. There is almost 100 per cent wi-fi coverage in our buildings.

• The Learn virtual learning environment (VLE) makes lecture notes, course materials, assignments, grades and feedback available online. An increasing number of lectures are recorded and available to review.

• MyEd provides quick and easy online access to resources and services, such as email, timetables, the Learn VLE, your course results, library resources, links to news and more.

• We have one of the UK’s largest and most diverse teaching environments. Using the latest IT and audio visual technology, we pioneer interactive learning, flipped classroom and group study provision.

• Our Main Library offers night owls and early risers 24-hour computing.

• You can develop study, employability and digital skills with our range of library and classroom-based courses and workshops and access to a comprehensive collection of professional online video tutorials. We have a wide range of academic videos and self-help materials online and our 24/7 helpline is staffed by a team that has won national recognition.

• Our Centre for Research Collections is unique in the UK, bringing together more than 400,000 rare books, six kilometres of archives and manuscripts, and museum collections of art, historical musical instruments and other objects. Many of our collections are digitised and online.

• Our Centre for Research Collections is unique in the UK, bringing together more than 400,000 rare books, six kilometres of archives and manuscripts, and museum collections of art, historical musical instruments and other objects. Many of our collections are digitised and online.

• Our Institute for Academic Development provides study development resources and workshops and can advise you on how to become a more effective, independent learner.

• Our Centre for Open Learning and Languages for All programmes offer part-time day, evening and weekend classes in an eclectic range of subjects from archaeology to Turkish.

The University is home to a diverse range of facilities, including:

• The £43 million ARCHER supercomputer (Advanced Research Computing High End Resource) – the UK’s primary academic research supercomputer.

• One of the UK’s 10 Wellcome Trust clinical research facilities.

• The unique FloWave Ocean Energy Research Facility, the world’s most sophisticated ocean simulator.

• Edinburgh College of Art’s concert hall, painting studios and sculpture court.

• The Institute for Astronomy at the historic Royal Observatory, Edinburgh.

• The Hospital for Small Animals at the Royal (Dick) School of Veterinary Studies, which was established in 1823.

• A £32 million development at our Easter Bush campus to create a European centre of excellence in animal services and food security.
The benefits of studying at the University of Edinburgh

• international experience through study or work;
• new perspectives on your subject;
• international experience through the Erasmus+ Programme, more than 300 international student exchanges since Edinburgh has been a leader in worldwide.
We offer more than 1,400

Student exchange
An exchange is possible on most of our programmes. Destination options depend on what you’re studying and where your programme.

Please note: We keep updated information for Erasmus+ applicants, about the impact of the UK’s decision to leave the EU on our participation in the programme, available online: www.ed.ac.uk/erasmus+

Student exchange
Edinburgh has been a leader in international student exchanges since its foundation. We offer outstanding opportunities, with more than 300 destinations available to you worldwide. A ‘Go abroad’ experience offers you:

New skills that could offer an exciting travel opportunities; and an international network of friends;

New perspectives on your subject; international experience through Erasmus+ opportunities, with more than 300 international student exchanges since Edinburgh has been a leader in worldwide. Our partners include world-class institutions such as the California Institute of Technology, the Universities of Pennsylvania, Melbourne and Toronto, ETH Zurich, Heidelberg University and the Universities of Copenhagen and Amsterdam.

Please note: There are non-credit bearing options; credit achieved will not count towards your programme. There are a variety of funding options available. There is a huge range of flexibility and choice to fit around your programme.

Short-term options
We also offer a wide range of short-term opportunities aimed at providing as many students as possible with an international experience.

Short-term options

Personal support

We’ve invested £4 million to enhance your student experience and provide support and guidance.

We’ll work closely with you to help you:

• review your academic progress and performance regularly;
• think about your learning, how it contributes to your future development and prepares you for university study and your career;
• become a confident, active member of a community of learners;
• deal with any concerns or problems that affect your studies and refer you to other staff for help as appropriate.

Personal Tutors
You’ll be appointed a Personal Tutor, who will provide personal, one-to-one, academic guidance and support, help you review your progress, and address any concerns that might affect your studies. In addition, you’ll be able to call on a Student Support Team that offers a further layer of pastoral care. The team has a wealth of knowledge about the University’s services and offers a valuable source of information and guidance.

We also run a system of peer support in the form of student-run helpdesks, information points, academic families, buddying and mentoring. This allows newer students to call on the help and advice of more experienced students as they progress through university life.

Edinburgh University Students’ Association

www.eusa.ed.ac.uk

Edinburgh University Students’ Association works on your behalf to ensure students have the best possible experience at University. Their Advice Place offers free, impartial and confidential academic and welfare advice and their Peer Learning & Support programmes connect you with more experienced student mentors in your subject area.

See what our students say about the personal support they receive. Watch our video: www.ed.ac.uk/undergraduate/tutor

“Having a great relationship with your Personal Tutor makes you feel a lot less overwhelmed.”

My story: Emily Lynch
MA (Hons) History of Art

Email’s support network at the University includes her friends, the Student Disability Service and her Personal Tutor.

I chose Edinburgh because I wanted to study in an environment completely different to what I was used to. Having grown up in London, I wanted to experience somewhere less overwhelming and less anonymous. Edinburgh has this incredible lively, friendly vibe. I am yet to find elsewhere, while being a smaller city where everything is within walking distance. There are moments when you are homesick or it’s pouring with rain and you’re a bit grumpy, but I still get moments of disbelief that I am lucky enough to study here!

I turn to my friends when I have a challenging time purely because they are often going through the same thing. It is comforting knowing that you’re not alone in how you’re feeling. The friends I have made have been more diverse than at school. You make friends with people from many different countries and get an insight into their culture and beliefs. I go straight to my Personal Tutor or the disability service if it’s a problem academically, that way I get the best possible advice and quick solutions! My personal tutor is like my university mum. She is always on hand if I have any problems, whether academic or social. Having someone that knows me and what I required but also got to know myself personally was so important when it came to settling in and understanding how university works.

Having a great relationship with your Personal Tutor also makes you feel a lot less overwhelmed, particularly in first year when everything is so new. I also use the disability service and definitely recommend them. You build a relationship with your mentor which means I have someone else I visit regularly who knows when I’m feeling overwhelmed and anxious and gives me advice on how to balance university work. I don’t think I would be doing nearly as well academically without them!
**Finance made simple**

**We awarded more than £10 million in 2017/18 in undergraduate financial support. Edinburgh ranks in the UK’s top 35 most cost-effective student cities.**

**Financial support**
We offer one of the most generous financial support packages in the UK for students from the lowest household incomes. We’re committed to helping students of all ages and social backgrounds enter higher education and recruiting the best students regardless of their financial situation.

Support available includes:
- **Access awards**
  - University of Edinburgh Scholarships
    These are awarded to students who live in England, Wales or Northern Ireland. You will automatically be considered for this award. The Royal (Dick) School of Veterinary Studies provides two scholarships of £5,000 a year for overseas applicants on an eligible BVMS & full-time programme.
  - DHL UK Foundation provides 15 awards of £2,000 a year to students on Science, Technology, Engineering or Mathematics (STEM) programmes.
  - Discretionary and Childcare Funds are provided by the Scottish Government for UK students in financial difficulty or to provide childcare support to UK parents.
  - US and Canadian loans
    We are an approved institution for US and Canadian loans. Students may be eligible to borrow funds while they study at Edinburgh.
  - **Merit-based scholarships**
    University Scholarships award up to £1,000 a year for students of physics, engineering, informatics and mathematics. Many are sponsored by companies that also offer work placements.
  - **Tuition fees**
    What you pay and the assistance you may receive, depend on where you live.

  - **Students living in Scotland** – If you’re studying full time for your first degree, you’ll apply each year to the Student Awards Agency Scotland (SAAS) to have your fees paid by the Scottish Government.
  - **Students living in England, Wales or Northern Ireland** – The annual tuition fee for undergraduates from the rest of the UK is reviewed on an annual basis. The fee will depend on the timing and terms of the UK’s exit from the European Union. For up-to-date information on fees for EU students: www.ed.ac.uk/news/eu

  - **Students from the rest of the EU** – Tuition fee charges for 2020/21 entry: £9,250. Increases in the tuition fee for undergraduates from the Rest of the UK is reviewed on an annual basis. The fee for new entrants in 2019/20 was set at £9,250. Increases are subject to government guidance and regulation and will normally reflect the impact of inflation. You will receive a non-means-tested, government-funded loan to pay your fees. Loan repayments don’t start until you’re earning £18,330 (Northern Ireland) or £25,000 (England and Wales).

  - **Students from Northern Ireland**: Students living in Scotland have your fees paid by the Scottish Awards Agency Scotland (SAAS) to provide childcare support to UK parents. Students living in England, Wales or Northern Ireland – If you’re studying full time for your first degree, you’ll apply each year to the Student Awards Agency Scotland (SAAS) to have your fees paid by the Scottish Government. Students living in England, Wales or Northern Ireland – The annual tuition fee for undergraduates from the Rest of the UK is reviewed on an annual basis. The fee for new entrants in 2019/20 was set at £9,250. Increases are subject to government guidance and regulation and will normally reflect the impact of inflation. You will receive a non-means-tested, government-funded loan to pay your fees. Loan repayments don’t start until you’re earning £18,330 (Northern Ireland) or £25,000 (England and Wales).

- **Living costs** will be your main expenditure. We estimate these at approximately £8,500–£11,000 a year depending on your choice of accommodation and lifestyle. A breakdown of estimated weekly living costs is available online. You can apply to your regional funding body (see below) for loans, bursaries or grants to assist with living costs. Part of your loan entitlement, and all non-repayable bursaries and grants, will be means-tested:
  - **Students from Scotland**: www.sas.gov.uk
  - **Students from England**: www.gov.uk/student-finance
  - **Students from Wales**: www.studentfinancewales.co.uk
  - **Students from Northern Ireland**: www.studentfinanceeni.co.uk

For full details on tuition fees or to check your fee status: www.ed.ac.uk/student-funding/fees

**My story: Anais Banag**

**LLB (Hons) Law**

Before joining the University, Anais used widening participation events to learn what life would be like here.

“I was given the opportunity to visit the University and talk to students because I attended a LEAPS [Lothians Equal Access Programme for Schools] high school. This piqued my interest in the University and helped me set a goal in mind. I began to attend events organised by Pathways and the University’s widening participation team. I was able to interact with students, learn about the University and facilities, and visit the law library. These events allowed me to form a better picture of what life would be like at university. The staff and students were friendly. They made me feel welcome but were also realistic and honest. By the time it came to choosing universities, my heart was already set on Edinburgh. I had developed relationships with students and staff members by attending the regular events. The University was familiar to me and I felt welcomed by the student body. I had initial concerns about the workload, but had the opportunity to speak to older students who were very supportive and gave me advice. The law library was also very daunting but one of the Pathways sessions involved a tour of the law library and exercises. This meant that I was able to familiarise myself with the surroundings before I commenced university.”

“Anais’ tips for getting on at university:
- Socialise as much as you can. You will meet all kinds of wonderful people. Many will be different and this will broaden your viewpoints and cultural knowledge.
- At the same time, do not crumble to peer pressure. Remember who you are.
- University work should not come secondary to socialising. Find the right balance.
- Find the right work schedule for you. For example, I work best at night. Find what works best for you.

At the start of your degree:
- Find the right work schedule for you. For example, I work best at night. Find what works best for you.

**Anais’ tips for getting on at university:**

At the beginning of your studies:
- Socialise as much as you can. You will meet all kinds of wonderful people. Many will be different and this will broaden your viewpoints and cultural knowledge.
- At the same time, do not crumble to peer pressure. Remember who you are.
- University work should not come secondary to socialising. Find the right balance.
- Find the right work schedule for you. For example, I work best at night. Find what works best for you.

By the time it came to choosing universities, my heart was already set on Edinburgh. I had developed relationships with students and staff members by attending the regular events. The University was familiar to me and I felt welcomed by the student body. I had initial concerns about the workload, but had the opportunity to speak to older students who were very supportive and gave me advice. The law library was also very daunting but one of the Pathways sessions involved a tour of the law library and exercises. This meant that I was able to familiarise myself with the surroundings before I commenced university.”

“I attended lots of Open Days and chose the University of Edinburgh due to the friendliness of the staff and students I met and because of the flexibility offered by the programme structure. Receiving a scholarship has been of great benefit as it covers my travel costs so I can live at home and really focus on my studies.”

Blair Fleming
MA (Hons) International Business

*Student living index 2018*
We guarantee an offer of accommodation for all eligible new undergraduates from outside Edinburgh.

Although exciting, moving away from home for the first time can be daunting so we’re committed to making that transition as easy as possible for you. We realise you need more than just a place to live. You need an environment in which you can thrive. That’s why we guarantee accommodation for as many new undergraduates as possible. If you’re from outside Edinburgh, intending to study for the full academic year, and apply by the deadline, we guarantee accommodation for as many students as possible who are studying for just part of the year with us.

Your place in Edinburgh

The University is an integral part of the city. You’ll be learning – and living – in one of Europe’s most vibrant capitals. Our undergraduate accommodation is all within a short walk or bus ride from the city-centre.

University-owned and managed accommodation typically includes:

- all heating, hot water and electricity costs;
- internet facilities in every study-bedroom, with wi-fi in the vast majority of study-bedrooms and common areas;
- contents insurance;
- secure bike storage; and
- laundry facilities.

You will also have access to our Residence Life team, Residents’ Assistants and Wardens who live with you in your accommodation. They offer a full range of events and activities to help you settle in to life in Edinburgh and to create a supportive and inclusive community in which to live.

Catered accommodation

Pollock Halls provides catered accommodation for around 2,000 students. You will typically live in a single study-bedroom, more than half of which have en suite facilities, with shared common rooms. The meal plan included in your rent provides breakfast and dinner every weekday, with brunch and dinner at weekends. We were the first university in Scotland to earn a Food for Life Catering Mark, for serving healthy and sustainable meals.

Self-catered accommodation

Our range of flats and houses is a convenient alternative that costs less than catered options and still delivers a sociable and supportive environment. Most residents have a single study-bedroom in a flat they typically share with four to six other students. Most flats have shared bathroom and kitchen facilities, although there are increasingly popular options available for those who would prefer en suite study-bedrooms. These include Beaverbank, Blackfriars Street, Brae House, Haddington Place, Murano, Shrubhill, and Salisbury Court.

Our accommodation*

* Please check online for up-to-date information on available accommodation. The listed accommodation is usually available to undergraduates but the precise use of our estate is subject to change each year.

We have buildings at several sites around the city:

23 Central Area/George Square: Most of our schools are located in the city centre.
24 Edinburgh College of Art (ECA): The ECA main building is close to George Square.
25 New College (School of Divinity): This striking city landmark overlooks Princes Street.
26 Holyrood (Moray House School of Education & Sport): Close to the Royal Mile and the Scottish Parliament.
27 The King’s Buildings: Most science and engineering subjects are taught here, a ten-minute bus ride from the city centre.
28 Edinburgh Bioquarter/Royal Infirmary of Edinburgh (Medical School): Four miles from the city centre.
29 Easter Bush/Roslin Institute (Royal (Dick) School of Veterinary Studies): Six miles south of the Central Area.

Our story:

Elizabeth Lund

MA (Hons) Scandinavian Studies & History

American student Elizabeth chose to live somewhere she could escape to switch off from university life.

I live in Shrubhill accommodation on Leith Walk. It has a double bed and an en-suite, which I totally recommend if it’s within your means. A lot of people question why I got accommodation further away but for me it’s better to compartmentalise where I live and where I study. It’s easier for my brain to shut off at night!

I was worried about being homesick but finding friends and ways to occupy your time really helps you focus on the life you’re living now instead of the one you had.

It can be hard to fit in at first but people here are so friendly. They are literally from all over the world – I’ve met someone from all six inhabited continents at Edinburgh – and from all walks of life. You learn a lot outside the classroom about where people are from and their home cultures.

I can’t even begin to describe how it feels to wake up in such a beautiful city and surrounded by people from so many different cultures.

See what life is like in University accommodation.

**Sport**

**Whether a recreational gym-user or a performance athlete going for gold, our world-class sports facilities and coaches cater for you.**

In 2017/18 we were ranked third in the UK for sport by British Universities and Colleges Sport (BUCS). We offer a wide range of world-class sport, club activity, fitness and performance facilities.

**Play**

**Club and recreational sports**

Our Sports Union is made up of more than 60 sports clubs, catering for all types of activity and ability level, from complete beginner to elite athlete. Our clubs offer weekly coaching, practice and trips, with opportunities to compete and/or participate in sport on most days of the week. If, more recreational sporting involvement is your preference, we run Scotland’s largest intramural sports programme, offering informal leagues, tournaments and fun events, alongside a pioneering ‘3De’ come and try programme in an array of sports. We also deliver a raft of sports-related volunteering and skill development opportunities through our Coaching and Volunteering Academy.

**Indoor sports**

Our multi-activity sports halls accommodate a variety of sports, with dedicated spaces for squash, dance, boxing, grappling, archery and shooting. We also have a 25-metre, six-lane pool and saunas.

**Outdoor sports**

Our sports ground at Peffermill Playing Fields is one of Scotland’s leading outdoor sports facilities and plays host to a multitude of sports clubs and local, national and international events. We have international-standard, floodlit, water-based artificial hockey pitches, 3G football/rugby facilities, 3G five-a-side pitches, artificial cricket nets, a 100-metre training track and a range of premium quality grass pitches, including a Scottish Football Association-approved football arena, complete with spectator stand, floodlights and training area.

**Adventure sports**

In addition to adrenaline sports clubs, we have Firbush Outdoor Centre located on the stunning banks of Loch Tay in the Highlands. It offers tailored activities and services, from windsurfing to mountain leadership training. Our experienced instructors are fully accredited and all specialist equipment is available. We also have an indoor climbing and bouldering facility at the Pleasance Sports Complex, so there’s plenty of choice to get the pulse racing.

**Promoting physical activity**

Our Active Lives programme helps you get, and keep, active by offering one-to-one support, beginners’ groups and advice for a healthy active life that suits your interests.

**Train**

We offer one of the country’s best gym and fitness programmes, with flexible and affordable membership packages, a year-round programme of more than 100 weekly exercise classes; and world-class gyms, fitness challenges and sports participation events. Our 10 gyms include our spin studio, Velocity, the recently upgraded Katherine Grainger Rowing Gym and a 102-station cardiovascular gym, complete with network fitness. There is an extensive, high-quality provision for free and fixed weights, including an underground vault with top-of-the range equipment and our unique MyGym area for body conditioning. Our expert instructors and personal trainers will guide, support and encourage you.

**Perform**

We have one of the UK’s most highly regarded performance programmes for talented individuals and teams. Our top-class coaches, facilities and services currently support more than 300 students. We offer exceptional sport-specific programmes in rowing, swimming, hockey, women’s fencing, archery, orienteering, rugby and women’s basketball. These are led by dedicated performance coaches, with specialist conditioning, medical and advisory backup. This allows our teams to compete at the highest level in national leagues and in British and Scottish universities championships. A further 20 team performance sports and participants on our Individual Performance Programme also benefit from designated sports-specific support, including access to our world-class training and competition facilities. These facilities are regularly used by visiting international teams such as All Blacks Rugby, and we routinely host major events such as the Euro Hockey tournament in 2018.

Students and members of the public can access the nationally renowned Fitness Assessment and Sports Injury Centre (FASC). There you will benefit from dedicated specialist strength and conditioning expertise in an exclusive-use performance gym, and sports nutrition and lifestyle advice. We also offer dedicated elite sports accommodation for first-year students, promotional opportunities and branded sports clothing, as well as sports science support and flexible studying and mentoring. There is also access to funding opportunities through the Winning Students network. We now boast an elite athlete access policy to support applications to study at the University from talented sports performers.

“**The best gym we’ve ever used.**”

Dr Nick Gill

Head of Strength and Conditioning, New Zealand All Blacks Rugby

“**I chose Edinburgh because of the great balance I was afforded here with regard to my sporting and academic life.**”

Che Richards

LLB (Hons) Law & French

2017 BUCS indoor long jump champion

“**I’d never have taken up rowing. I’d never have had the life I’m currently living.**”

Katherine Grainger

Olympic champion rower and Edinburgh law graduate

Edinburgh University

Students’ Association

All University of Edinburgh students are automatically made members of our Students’ Association, which works on your behalf to ensure you have the best possible experience during your time here.

The Students’ Association supports more than 290 student-led societies and volunteering groups, from the A Cappella and Business societies, to the Yoga and Zoology societies. Their facilities include a world-class centre for student activities at the iconic Pleasance complex, which includes dance studios, a multipurpose performance space, TV and radio production studios and a café and bar.

The Students’ Association is led by five elected students (sabbatical officers) and maintains a Student Council, which you will be welcome to attend and put forward your ideas at. Students are represented across the University, through college, school and programme representatives, and by black and minority ethnic, disabled students’, LGBT+, and women’s officers.

Students’ Association venues deliver award-winning food and drink and hundreds of events throughout the year; from language cafés to silent discos and from ceilidhs to food fairs.

Teviot Row House, opened in 1889, is the oldest purpose-built students’ union in the world. It sits in the Central Area, next to the unique, domed, Potterrow venue. On the King’s Buildings campus, King’s Buildings House offers shops, study and meeting space, a café, bar and a gym.

For information on the advice and support services offered by our Students’ Association, please see page 149.

Helping shape your career

Six months after graduating, 95 per cent of our students are in employment or postgraduate study.

Employers are looking for more than just a qualification. They want a graduate with the skills, qualities and mindset to thrive in the working world. Studying here is an opportunity to enhance your career, develop new skills and abilities, grow in confidence, and learn about yourself. Employers from all sectors regard Edinburgh as an excellent training ground for high-flyers and value our graduates intellectual ability and high-level attributes, developed while studying here. We are well regarded by recruiters seeking talented graduates. High Fliers research ranked us the 13th most targeted university in the UK for 2017/18. The QS World University Rankings 2019 gave us 94/100 for employer reputation.

Careers Service

Our award-winning Careers Service can help you develop your potential and realise your career ambitions. We offer:

- an online careers portal advertising part-time jobs, internships and graduate roles;
- networking opportunities with employers, from top multinationals to local SMEs;
- a comprehensive website with information and advice;
- personalised guidance and help with job searches, applications and interviews;
- access to our worldwide alumni network, both on campus and via Platform One; and
- tailored internships through our Employ.ed programme.

My story:

Olivia Sweeney

MEng (Hons) Chemical Engineering

Our support helped Olivia to find both an internship and a career.

The Careers Service helped me in lots of ways. They supported each stage of my development, provided me with confidence when I needed it, and facilitated a change in career. By helping me understand what employers are looking for and decode job descriptions, I was able to tailor my CVs and cover letters to particular roles. A key skill they helped me develop was self-reflection – to draw from my past experiences and apply it to future roles. Through this I was able to gain two internships – the first with IAESTE [the International Association for the Exchange of Students for Technical Experience], in Pakistan and the second with the Saltire Scholarship programme [in Scotland].

This self-belief also gave me the confidence to pursue my masters with institutions that I was interested in, meaning I could spend my time in Gothenburg working on biofuel development. When it came to applying for graduate jobs, the Careers Service and the resources provided were invaluable. I had a Skype practice interview while in Sweden and this gave me an insight into how I perform in a pressured interview situation. The Careers Service continued to help me refine my CV and I was able to secure a job straight after graduating!

I recommended the Careers Service to friends who also received invaluable help. I would advise students to go and try it out.

Did you know?

More than 9,900 vacancies were advertised with our Careers Service in 2017/18.

“When it came to applying for graduate jobs, the Careers Service were invaluable.”
Building your employability

We’re ranked in the top 10 in the UK and in the top 100 in the world for the employability of our graduates – we invest in your future beyond the end of your programme.

The development and long-term success of our students is fundamental to our approach, including encouraging your efforts beyond graduation. Our graduate attributes describe the skills and mindsets that will set you apart: www.ed.ac.uk/graduate-attributes

MyDevelopmentHub
Our online database helps you access and benefit from the wide range of development opportunities here at Edinburgh and build your unique set of Graduate Attributes: www.ed.ac.uk/my-development-hub

Employ.ed – internship and work experience opportunities
Work-experience can substantially increase your chance of finding employment and we proactively source quality internship opportunities, exclusively for University of Edinburgh students and recent graduates, such as:

• on-campus summer internships;
• part-time internships for PhD students;
• opportunities with local employers in a range of sectors for students and recent graduates; and
• work shadowing with alumni based locally and globally.

Our paid internships are supported by a comprehensive development plan to ensure you benefit from the experience: www.ed.ac.uk/careers/internships

The Edinburgh Award
The activities you pursue alongside your studies, such as running a sports club, part-time work on campus, providing peer support or volunteering in the community, can prove rewarding in many ways, including broadening and enhancing your skills and employability. The Edinburgh Award recognises your involvement in a wide range of co- and extra-curricular activities, and the skills and attributes you demonstrate.

We will support you to get the most out of your experiences, to:

• increase your self-awareness;
• make the most of existing strengths and develop new skills/abilities;
• make an impact whatever situation you are in; and
• confidently sell and demonstrate what you have to offer to employers.

Many employers expect something extra from today’s graduates and the Edinburgh Award helps demonstrate what it is that sets you apart: www.ed.ac.uk/edinburgh-award

Edinburgh Innovations – backing your bright ideas
At Edinburgh you will join one of the most entrepreneurial student bodies in the UK. We have a strong enterprise culture to support your ambitions.

Edinburgh Innovations, the University’s commercialisation service, provides comprehensive support for student entrepreneurs.

Over the past two years Edinburgh Innovations has helped students create more than 70 startups, with nearly one in five being social enterprises.

Through our full range of support we have built an enviable record of success for our student entrepreneurs. Services include:

• one-to-one business advice meetings;
• start-up workshops and bootcamps;
• competitions and awards; and
• events and networking opportunities.

This unique offering is free, confidential and available to any Edinburgh student for the duration of their studies and for up to two years after graduation. We aim to help you distinguish yourself in a competitive job market and create real entrepreneurial opportunities: www.edinburgh-innovations.ed.ac.uk

“I’d recommend students get involved with Edinburgh Innovations. They offer practical support to make your business a reality. My sound design software, Dehumaniser, is now used by industry professionals, including Hollywood film studios.”

Orfeas Boteas
MSc Sound Design graduate

Orfeas used Edinburgh Innovations to support the development of his company Krotos Ltd: www.krotosaudio.com

The Edinburgh University Students’ Association also offers many opportunities to volunteer: www.eusa.ed.ac.uk/volunteering

Employ.ed – internship and work experience opportunities

Charlotte Square, New Town, Edinburgh
Find out for yourself what it’s like to live and study in Edinburgh…

We offer a range of opportunities to visit the University, before and after you apply, to help you find out more about studying and living in Edinburgh.

Open Days
Everyone is welcome at our Open Days – prospective students, their families, teachers and careers advisers. Open Days provide the opportunity to:

• attend subject-specific talks;
• speak to current students and staff;
• explore the University; and
• view our facilities.

Guided and self-guided tours
We offer guided tours for students and their families who are unable to attend an Open Day. These are student-led tours. Our Student Ambassadors will guide you around the Central Area of the University and answer general queries.

You can also visit the University at a time that suits you – we have self-guided tour materials available on our website. If you have any specific requirements, please contact Student Recruitment & Admissions: sra.enquiries@ed.ac.uk

Offer Holder Days
In most subjects, if we make you an offer you will usually be invited to an Offer Holder Day. There you will be able to spend time at your prospective school and speak at length with our students and staff.

referendum to leave the European Union. At the time of going
to print, we anticipate that undergraduate applicants from the
Republic of Ireland for 2020 will be treated on the same basis as
our existing EU students, as a result of the Common Travel Area
agreement, but this is subject to formal confirmation by the UK
and Scottish Governments. We await confirmation of the fee
status of other EU applicants for 2020 from the UK and Scottish
Governments. Please check online for the latest information
before you apply: www.ed.ac.uk/news/eu

The University’s standard terms and conditions will form
an essential part of any contract between the University
of Edinburgh and any student offered a place here.
Our full terms and conditions are available online:
www.ed.ac.uk/student-recruitment/terms-conditions

This publication is available online at
www.ed.ac.uk/undergraduate and can be
made available in alternative formats on request.
