

# The Hutton Club...

Friday 16<sup>th</sup> February

I believe that what I got up to at school should remain private. Besides – I was stoned for much of my time at Eton so I can't actually remember anything I did back then...

## **Dr. David Sanderson**

'Quaternary chronometer or tracer of sedimentary processes? Recent applications of optically stimulated luminescence at SUERC'

**4pm – Old Library, Geography**

Refreshments include 'herbal' teas and 'special' brownies.
