# MSc in Data and Decision Analytics

**Douglas Alem**

Programme Director of the MSc in Data and Decision Analytics (online)

Senior Lecturer in Business Analytics

[Douglas.Alem@ed.ac.uk](mailto:Douglas.Alem@ed.ac.uk)

# MSc Data and Decision Analytics

Our part-time MSc Data and Decision Analytics, studied over 24 months, prepares students not only to be able to analyse and digest data, but also to translate this into effective decision-making in the age of Big Data.

Delivered through a mixture of live online sessions with course organisers and asynchronous activities, this course combines theoretical foundations with practical hands-on experience.

<https://www.business-school.ed.ac.uk/msc/data-decision-analytics/overview/learning-outcomes>

# Online learning format

- **Learning Format**

You will learn through a combination of live online sessions and asynchronous activities

- **Interactive Sessions**

Live online sessions will introduce the theoretical foundation of the given subjects, and will allow you to practice the concepts through hands-on activities such as tutorials and computer labs

- **Resource Platform**

The programme's materials and overall resources will be available in the online platform called Learn

# Scheduling your studies

- **Live online sessions**

These take place on Mondays and Tuesdays between 09:00 and 18:00 GMT

There will be a maximum of **4 hours** required during these **two days of the week** for participating in the live online sessions

- **Personal study**

You will need to set aside approximately **15 hours per week** for reading, re-watching recorded online sessions, tutorials, and assignments.

# Technical requirements

- **You will need access to:**

- a computer
- the internet
- a fully up-to-date web browser

- **IT support**

Help is available to any student in the event of technical difficulties

# Programme Structure

## Year 1

---

### Semester 1 (Sep – Dec)

- Data Analysis and Statistics for Business
- Programming and Data-Driven Storytelling

### Semester 2 (Jan – May)

- Applied Decision Optimisation
- Applied Machine Learning

## Year 2

---

### Semester 1 (Sep – Dec)

- Data Management
- Heuristic Optimisation
- Data Analytics for Web and Social Media

### Semester 2 (Jan – May)

- Understanding Planetary Health & Data
- Making science relevant to policy and decision-making
- Time Series Forecasting

Key:  
Compulsory course  
Option course

# Dissertation

**Through the completion of a piece of individual research, you will develop a deep understanding and level of analysis of theories (machine learning and optimization) and applications to practical business problems.**

Students will have the opportunity to closely work with leading world-class faculty in cutting-edge research projects.

## Benefits

- Real project defined by a leading world-class faculty and/or company's business needs
- Enhances your technical skills, also developing further transferable skills
- Gain an insight into the sponsoring company
- You get to network and raise your profile
- Enhances employability and adds to your CV

## Career outcomes

**It is anticipated that demand for data analytics employees will continue to grow as analytics is viewed as a key competitive resource by many companies.**

We expect the programme to open a range of career pathways in analytics for our graduates or to allow them to progress further within their existing career.

**Roles we anticipate to be among these pathways include:**

- Business consultants
- Business analysts
- Data analysts
- Business intelligence and analytics consultants
- Metrics and analytics specialists
- Analytics associates
- Solution architects
- Business process analysts
- Management consulting associates
- Operational research consultants

## Ask AI

**"The University of Edinburgh's online MSc in Data and Decision Analytics appears to be a robust and well-designed program from a highly reputable institution. Its strong curriculum, focus on both predictive and prescriptive analytics, practical approach, and dedicated career support suggest that it can indeed significantly increase your chances of securing a great job in data or decision analytics. If the online format suits your learning style and current commitments, it's definitely worth serious consideration."**

- academic study skills development

- **Wellbeing service**

You can access additional wellbeing and mental health support via this central University service

- **Academic guidance**

Support is available through your Programme Director, Course Organisers, as well as the Institute for Academic Development

# Admissions requirements

**You will need a UK first-class or 2:1 honours degree in one of the subjects below, or an equivalent overseas qualification.**

- An undergraduate degree in any disciplinary area related to management science, operational research, statistics, econometrics, mathematics, physics, computer science, engineering, or business and management which incorporates a distinct quantitative element is required
- Candidates with a first class or 2:1 honours degree in an unrelated subject area but who have relevant work experience will be considered on an individual basis
- Candidates' background should ideally include courses and/or experience gained in topics such as linear algebra, calculus, probability, and statistics

# Document requirements

- **Degree certificate**

If graduated

- **Official transcript**

On headed paper or with a University stamp and signature, as well as grading scale

- **Reference**

Academic if still studying or graduated within last two years otherwise professional

- **Personal statement**

- **English language certificate**

(e.g. TOEFL, IELTS) even if out of date

**Note:** Documents must be provided in the original language as well as with an official English translation.

# Application review

## MSc Admission Decision

- 60% academic performance
- 40% non-academic qualities

## Personal statement

### Length

- 3,500 characters (approximately 500 words) in formal English

### Content

- What skills, qualities, and experiences have prepared you to undertake this programme?
- What value do you think you can add to the learning community as part of an internationally diverse group?
- What impact do you hope to make in your future career, and how will this programme contribute to your aspirations?

### Tips

- ✓ Tailor your personal statement to each programme and university
- ✓ Include relevant experience, e.g. paid or voluntary work experience
- ✓ Let us know about professional qualifications
- ✓ Tell us why you're suitable for the programme
- ✓ Don't write much more than the expected 500 words
