

# Are you sanitising sustainably?

Glasswashers' drying cycles are not efficient. Models with this feature also require more maintenance and cost more to purchase.

Dry pipette tips at 40°C or below

Pipette tips warp at temperatures higher than 40°C or below.

Do not use the bottom of the drying oven

Using the bottom of the drying oven interferes with the thermostat and causes excessive cycling.

Do not use drying cycles on glasswashers

**X** Drying cycle
