## 1. What is it?

PDF and Print is a plugin that allows you to create PDF files and print posts or pages.

## 2. What does it do?

Activating the plugin will automatically add 'PDF' and 'Print' icons to your website pages, posts and widgets.

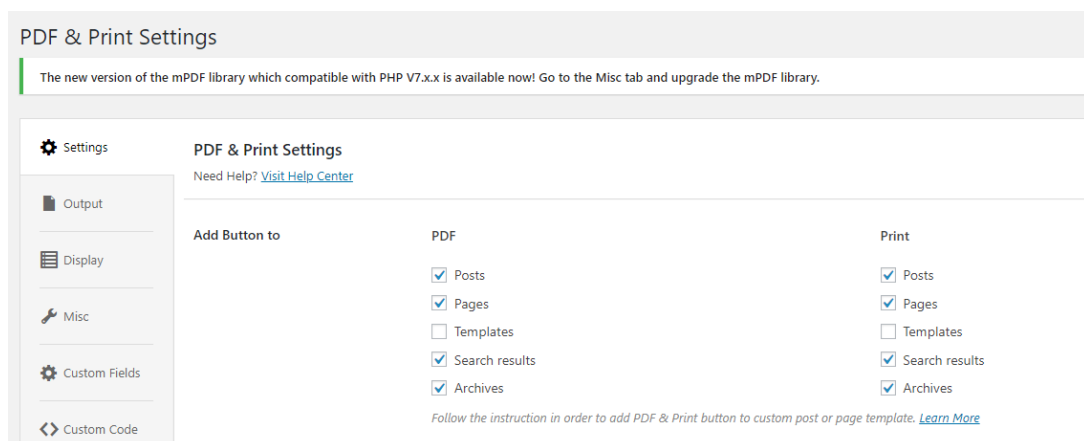

## 3. How does it work?

Adds an additional 'PDF and Print' item in the sidebar that has a menu with extra configuration options. Please do bear in mind that some of the plugin features are only available with the 'Pro Version' and this is currently not supported/available.

## 4. Settings

You can select where the PDF and Print buttons will appear on your website. By default, all options but Templates are ticked but the available selections are - Posts, Pages, Templates, Search results and Archives.

**Button Positions** - Choose where to position the buttons. The default position is 'Top Right' but you can use the following options - 'Top Left', 'Top Right', 'Bottom Left', 'Bottom Right', 'Top and Bottom Left' and 'Top and Bottom Right':

Buttons Position

- Top Left
- Top Right
- Bottom Left
- Bottom Right
- Top & Bottom Left
- Top & Bottom Right

*Select buttons position in the content (default is Top Right).*

**Button Image** – please leave on default settings ('None' disables the plugin):

Button Image	PDF	Print
	<input type="radio"/> None	<input type="radio"/> None
	<input checked="" type="radio"/> Default	<input checked="" type="radio"/> Default
		

**Button Title** - Select text to add to the button (default is none):

Button Title	PDF	Print
	<input type="text" value="Print to PDF"/>	<input type="text" value="Print"/>

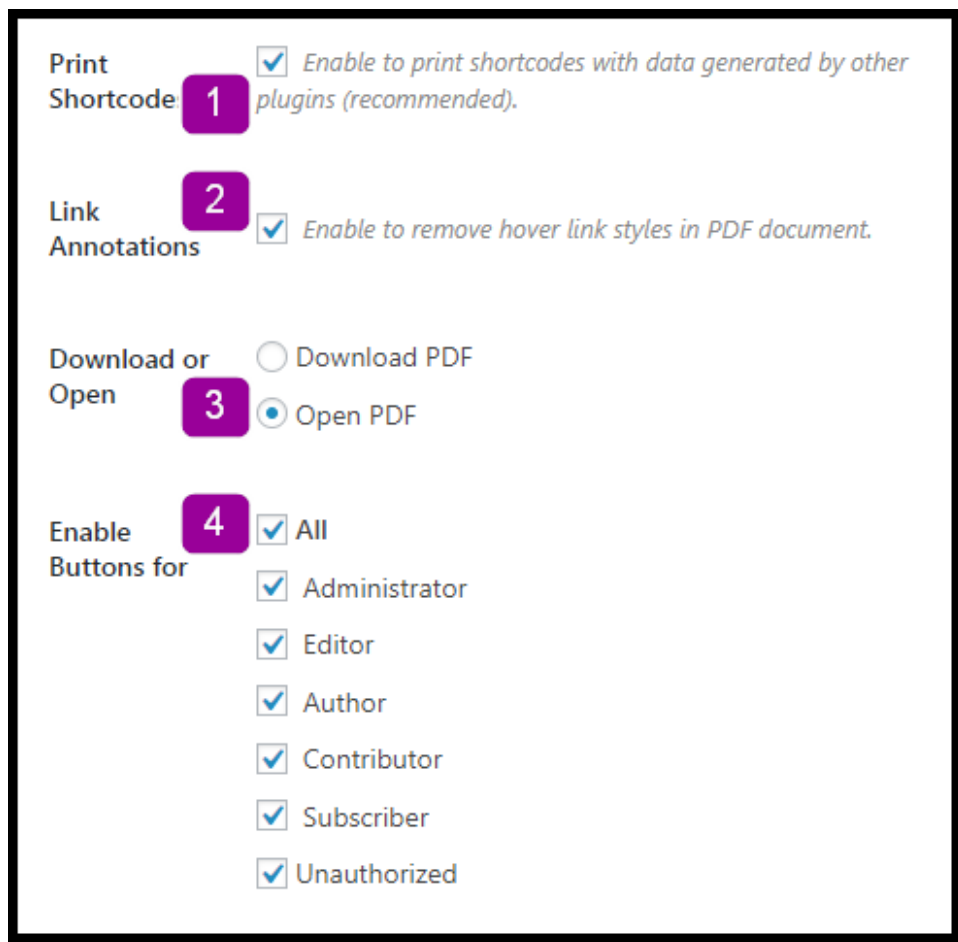

In the browser this text is added to the right of the icon:

**Print Preview Window** – Add the option to open the print preview dialogue box which allows the user to specify advanced printing properties:

**Additional Options:**

1) Print Shortcode – enabled to ensure shortcode used by other plugins in printed correctly.

2) Link Annotations – Enable to remove the hover link styles (i.e. remove the underline and colour).

3) Download or Open – how to handle PDF files by default (opening the file will also allow the user to save a copy if Adobe Acrobat Reader is installed).

4) Enable buttons for – Default is All - ensuring every user of the site can print or save as PDF.

## Output

Certain Output options are disabled and are only available as part of the Pro Features, however the following settings are available:

The screenshot shows the 'Document Output Settings' panel in a settings application. On the left is a sidebar with navigation options: Settings, Output (selected), Misc, Custom Code, and License Key. The main panel is titled 'Document Output Settings' and includes a link to the 'Visit Help Center'. The settings are as follows:

- Full Page PDF:** An unchecked checkbox with the label 'Enable to create PDF layout to mirror what is shown on screen, including fonts (work only with javascript)'. Below it is a 'PDF Page Size' dropdown menu set to 'A4'.
- Margins:** Four input fields for 'Top', 'Bottom', 'Left', and 'Right' margins, each followed by 'px'. The values are 16, 16, 15, and 15 respectively.
- Additional Elements:** Two checkboxes: 'Title' (checked) and 'Featured image' (unchecked).
- Additional Fonts:** A 'Load Fonts' button and a note: 'Load additional fonts required for PDF file(-s)'.
- Default CSS:** Two radio buttons: 'Default' (selected) and 'Current theme'.
- Custom CSS:** An unchecked checkbox with the label 'Enable to add custom CSS code to documents'.

A 'Save Changes' button is located at the bottom left of the settings panel.

**Full Page PDF-** You can enable to create a PDF layout that will mirror what is shown on screen (Note: this only works with javascript).

**PDF Page Size** – Define the physical size/aspect of the PDF (default setting is A4).

**Margins** – Set page margins (much like you would do in a document editor such as Word, defaults are from the top clockwise 16px, 16px, 15px, 15px).

**Additional Elements** – Include the Title and (if used) the featured image of the post.

**Additional Fonts** - Load additional fonts.

**Display** – Unavailable in free version

## Miscellaneous

**Miscellaneous Settings**  
Need Help? [Visit Help Center](#)
