

CCBS Data Access and Governance Committee

Cyril Pernet, Rebecca Devon, and Rustam Al-Shahi Salman

<https://www.ed.ac.uk/clinical-brain-sciences/data-access-governance>

What is data access and governance?

- How to manage data: who can and cannot access your research data? How do you share data?
- What is sensitive information?

Why does it matter?

- Sharing data improves science
- Funders require that you share data
- Grant applications need data management plans
- Personal data must be safeguarded

How do you get training ?

<http://datalib.edina.ac.uk/mantra/>

<http://www.rcuk.ac.uk/international/funding/collaboration/rcuk-dfid-concordat/>

Make a Data Management Plan online

<https://dmponline.dcc.ac.uk/>

The CCBS DAG Committee

- Comprises Investigators, IT Specialists & Data Management Experts from across CCBS: Clinical Neuroscience, Psychiatry and Neuroimaging
- Works on how to share data (<http://datashare.is.ed.ac.uk/>), safe havens (i.e. working with NHS data), licensing, and as a reference point

Future plans

- We can direct researchers to training opportunities and researchers
- We would like to increase capacity to deliver funders' and the University's needs
- Watch our website for more information, or come along to a committee meeting!
