

Dog Welfare Assessment App: Using the data

The Dog Welfare Assessment app has been developed to allow you to self-assess the welfare of dogs in your CNR (catch neuter return) programme. This is important in order to identify potential problems and take corrective action, to ensure that dog welfare is as positive as it can be.

You can have an instant overview of your activity by accessing the data you have collected by using the **scorecard** and selecting the stage you want to review. Please see the guide on accessing the data and scorecard.

For reporting purposes and analysis, the **data download (csv)** will be emailed to you. These files will be beneficial to your organisation, as they will provide a detailed overview of your activity. This will enable you to report on your organisation, as well as take corrective action to improve dog welfare.

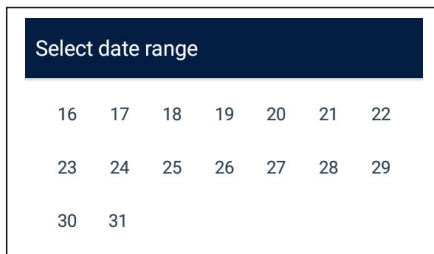

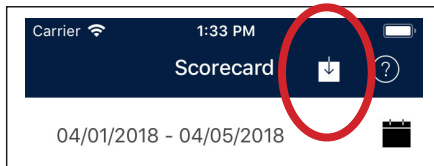

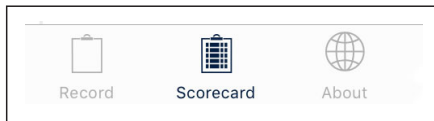

Download the full guidelines and resources from edin.ac/dog-welfare

Contact the Centre
dog.welfare@ed.ac.uk

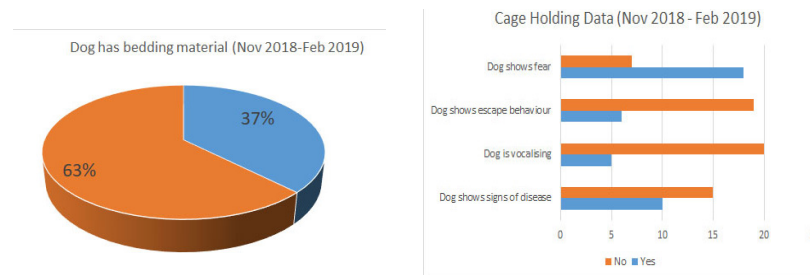

Viewing the scorecard data and selecting a date range

Email will include data in CSV/Excel format for each stage

Centre	AutoID	Created At	Dogid	Dog has at Aggression	Dog has di Dog has bi Dog show	Dog is voc Dog show	Dog show	Dog shows aggression to handler
Roxylk's ABC clinic	5c0b8914144ab000eed010	08/12/2018 09:04		no	no	yes	no	yes
Roxylk's ABC clinic	5c0e6194144ab000eed066e	10/12/2018 12:52	2	no	no	yes	yes	no

Data can be analysed and graphs/charts created (like below)

Benefits of using the data

- **Review the data every few months** to identify areas of positive activity as well as areas where corrective actions could be taken
- **Making improvements:** Where corrective action needs to be taken, discuss this with your team/organisation
- **Dog welfare:** the data will help you to monitor the welfare of the dogs
- **Reports:** The data can be used for reporting purposes to your managers/funders/charity
- **Resources:** Review additional resources on our website edin.ac/dog-welfare

By clicking on the download button (highlighted above), your data will be emailed to you
