1.0 PURPOSE

The Medicine for Human Use (Clinical Trials) Regulations 2004 (SI2004/1031) require clinical trials of investigational medicinal products (CTIMPS) to be conducted according to the principles of Good Clinical Practice (GCP). One of these principles, as laid down in the medicine for Human Use (Clinical Trials) Amended Regulations 2006 (SI2006/1928), is that:

‘Each individual involved in conducting a trial shall be qualified by education, training and experience to perform his tasks.’

Delivery of clinical trials requires a team of experienced and skilled staff to follow complex and regulated procedures. This SOP outlines the use of the competency and knowledge framework and delegation of activities within the ECTU Trial Management Team (TMT) to ensure that the appropriate skills and experience are achieved.

2.0 SCOPE

This SOP applies to all TMT staff comprising Senior Trial Managers (STM), Trial Managers (TM), Assistant Trial Managers (ATM) and Trial Management Support Officers (TMSO).

3.0 RESPONSIBILITIES

All TMT staff are responsible for ensuring the procedures outlined with this SOP are followed.

4.0 PROCEDURE

4.1 Competency and knowledge

- 4.1.1 ECTU will use the UK Trial Managers Network (UKTMN) Competencies framework which is a self-assessment tool nationally recognised by the UKTMN.
- 4.1.2 All TMT staff will complete this tool on an annual basis in preparation for their Annual Review. Following completion of the tool a summary report will be generated automatically, this should be used as a basis for discussion with their line manager either before or during the Annual Review. Any gaps in knowledge/training which may impact competency to complete a task should be identified and opportunities for training identified where appropriate. This should be documented on the Annual Review form.
- 4.1.3 For new staff the self-assessment tool should be first completed by the end of the probationary period. The report should be reviewed and discussed with their line manager prior to the end of the probationary period, to identify gaps in training/knowledge to allow for further training to be identified and provided prior to performing required tasks as required. This should be documented on the probationary review form.
- 4.1.4 The self-assessment tool report should be placed in their training folder (Section 4)
- 4.1.5 In addition to yearly Annual Reviews, regular 1:1 meeting will be held with each staff member and their Line Manager/ STMs to review work and identify any additional training needs.

The user of this document is responsible for ensuring it is the current version.

4.2 Delegation of Tasks

- 4.2.2 There may be circumstances where it is appropriate to delegate tasks to a more junior member of staff.
- 4.2.3 In the first instance, delegation of such tasks should be discussed with a Senior TM or Team Lead to assess if appropriate to delegate the task.
- 4.2.4 Following agreement appropriate training should be provided and evidenced on the Delegation of Task document. This should be completed and signed by the trainer and the Senior Trial Manager. The completed form should be held in the TMF (Section 6) and within the individuals training folder (Section 4)
