

INTERNATIONAL DAY
OF WOMEN AND GIRLS
IN SCIENCE
FEBRUARY 11

History and Today: Inspiring Women

TECHNOLOGY: HAYAT SINDI

BORN: Mecca, Saudi Arabia, 1967

WHAT IS HAYAT INTERESTED IN?

Hayat is increasing access to proper healthcare resources and technology for developing regions across the world

WHY DOES HAYAT INSPIRE US?

- Hayat is the first female member of the Consultative Assembly of Saudi Arabia, which advises the King
- She travelled to the UK aged 16 to study and taught herself English
- Hayat believes that a person's religion, colour or gender has no bearing on their scientific contributions
- Hayat launched Transform Fund, which provides money to help developing communities provide good education, clean energy and good health.

WHAT DO YOU THINK?

- Why might medicine or education not be available to everyone around the world?
- Have you ever felt pressured to alter your beliefs or appearance to 'fit in'? How did this make you feel?

DO YOU WANT TO LEARN MORE ABOUT HAYAT?
