

PARTICIPANT CONSENT STATEMENT

Study Title: 'MethylDetectR' – Methylation-Based Health Profiling

Prior to using the application, I can confirm the following statements and thereby agree that I am satisfied that I have been sufficiently informed in relation to the upload of my data to 'MethylDetectR':

1. I confirm that I have read and understood the Participant Information Sheet for the above study.
2. I confirm that I understand the associated risks to uploading methylation data and methylation-based scores for human traits to 'MethylDetectR' as well as the measures undertaken to mitigate these risks.
3. I confirm that I understand that my participation is voluntary and I am aware of the appropriate contact details should I have any queries or complaints regarding the application.
