## Who was least likely to be treated?

Of the 50.5% who received treatment, uptake is **proportionately lowest among** people:

Living in deprived areas **30.1%**

Living with Stage 3+ Chronic Kidney Disease **27.3%**

Aged 90+ **23.0%**

Sub-optimally vaccinated **23.0%**

Living with Rheumatoid Arthritis or lupus (SLE) **22.5%**

Living with HIV / AIDS **21.9%**

Under 18 **20.3%**

**98.5%**

treated outpatients treated within 5 days of diagnosis

Only around half of eligible people received treatment, but the vast majority of those that did, were treated within the recommended timeframe.
