

SRS Sustainability Survey Results

Four things we learnt from the opinions of students and staff

2,670 Staff

College of Arts, Humanities & Social Sciences

College of Medicine & Veterinary Medicine

College of Science & Engineering

1,200 Students

College of Arts, Humanities & Social Sciences

College of Medicine & Veterinary Medicine

College of Science & Engineering

There is a large interest in sustainability

Over 90% are interested in sustainability and climate change

Around 50% were not aware of the university's reputation for sustainability.

There is a demand for more opportunities to learn about sustainability

Less than 50% of students and staff have sustainability embedded into their studies or work

Students

vs

Staff

Students

vs

Staff

There is a difference in opinion between students and staff as to whether they feel they have enough opportunity to learn about sustainability

There is an appreciation for increasing the University's use of renewable energy

Increasing use of renewable energy

Students and staff both ranked increasing the use of renewable energy as a top priority for the University

There is still opportunity to see the benefits of the University embedding sustainability into the curriculum

Embedding sustainability into the curriculum

Students and staff both ranked embedding SDG into the curriculum as a lower priority for the University

But did you know that the University has 41,312 students. That's thousands of people who could graduate with specialised sustainability related knowledge and skills to become change makers in their chosen career

What now ?
