

THE UNIVERSITY *of* EDINBURGH

Transcript for "Your undergraduate degree" video

Choose to study at Edinburgh and you'll be investing in an education that will help you build a successful future.

Most of our programmes in the arts, humanities, engineering, sciences or social sciences allow you to study a range of subjects in your first two years, before specialising in the next two.

In first year, you usually study three subjects. With the help of your Personal Tutor, you may choose these from related areas or you can experiment with different subjects.

By second year, you'll know which subjects you want to continue with and which new ones you'd like to try.

So, by your third and fourth years, you'll be confident about choosing which area to specialise in. You may also have the exciting opportunity to study abroad. We offer more than 500 international exchange places at other world-class institutions. This valuable experience counts as part of your degree and the skills you'll develop will look great on your CV.

By the time you graduate, your breadth of knowledge will be highly prized by employers, giving you the very best chance of success in your chosen field.

The University of Edinburgh. Imagine what you could do.
