

Digital Interventions for Older People Experiencing Homelessness (OPEH): A systematic scoping review rationale

Emily Adams, Advanced Care Research Centre Academy

Supervisors: Stewart Mercer, Eddie Donaghy, Maria Wolters, Caroline Sanders

THE UNIVERSITY of EDINBURGH

usher institute

Rationale: Barriers to support for OPEH

AGING ^{[2][3][4]}

- PEH show accelerated aging
- PEH high frailty relative to age
- OPEH fragile support systems

DIGITAL INEQUALITIES

- Access to equipment and connectivity
- Educational barriers
- Issues of trust with personal data

HOMELESSNESS ^[1]

- Flexibility of systems
- Service coordination
- Staff education
- Patient preparedness
- Complex health needs
- Need for holistic care

Support for OPEH

Problem statement

The potential triple disadvantage caused by the interaction of being older, homeless, and digitally excluded creates a uniquely problematic situation that warrants further research.

Research Aims

1 Characteristics

Examine delivery, implementation characteristics, context of existing digital interventions for PEH

2 Usage

Examine the usage of these digital interventions by OPEH

3 Considerations

Identify considerations and barriers for OPEH in digital inclusion
