

Prion Diseases

A Global Problem for Animal and Human Health

3rd November 2015

09:00-17:00

The Roslin Institute, Edinburgh, UK

09:00 Dr Herbert Budka

University Hospital, Zurich, Switzerland

Human and Animal Prion Diseases – Where do we stand?

09:30 Dr Olivier Andreatti

INRA, Toulouse

Zoonotic Potential of Animal Prion Disease

10:00 Prof Richard Knight

CJDRSU, University of Edinburgh

Subclinical Human Prion Disease

10:30-10:45 Discussion

10:45-11:15 Coffee

11:15 Dr Linda Detwiler

College of Veterinary Medicine, Mississippi State University

Living with Endemic Prion Disease

11:45 Prof Colin Masters

Mental Health Research Institute, University of Melbourne

Common Mechanisms for Neurodegeneration

12:15-12:30 Discussion

12:30-13:30 Lunch

13:30 Prof Jean Manson

The Roslin Institute, University of Edinburgh

Early Events in Prion Disease

14:00 Prof Dr Mathias Jucker

Hertie Institute for Clinical Brain Research, Germany

Infectious Nature of Misfolded Proteins

14:30 Prof Corinne Lasmezas

Scripps Research Institute, Florida

Intervention Strategies for Misfolded Proteins

15:00-15:15 Discussion

15:15-15:45 Coffee

15:45 Prof Craig Ritchie

CCBS, University of Edinburgh

New Targets for Intervention for Chronic Neurodegeneration

16:15-17:00 Roundtable Discussion
